Parcel Map Review Committee
Staff Report

Meeting Date: February 8, 2018
Agenda Item: 7A

STAFF REPORT CASE NUMBERS: WTPM17-0015, WTPM17-0017, WTPM17-0018, WTPM17-0019 and WTPM17-0020

BRIEF SUMMARY OF REQUEST: A series of five subsequent parcel maps to result in the division of one parcel of approximately 67 acres into 15 parcels

STAFF RECOMMENDATION: APPROVAL WITH CONDITIONS

STAFF PLANNER: Planner’s Name: Roger Pelham, MPA
Phone Number: 775.328.3622
E-mail: rpelham@washoecounty.us

APPLICANT/PROPERTY OWNER: LW Land Company, LLC

CASE DESCRIPTIONS
Sequential approval of the following Parcel Maps:

Tentative Parcel Map Case Number WTMP17-0015 (Palomino Ranch Estates #1) – For possible action, hearing, and discussion to approve the division of a 67.60 acre parcel into three 2.5 acre parcels and one remainder parcel of 60.10 acres.

Tentative Parcel Map Case Number WTMP17-0017 (Palomino Ranch Estates #2) – For possible action, hearing, and discussion to approve a second division of the newly created 60.10 acre parcel into three parcels of 5.0, 5.03 and 5.01 acres, and a remainder parcel of 45.06 acres.

Tentative Parcel Map Case Number WTMP17-0018 (Palomino Ranch Estates #3) – For possible action, hearing, and discussion to approve a third subsequent division of the newly created 45.06 acre parcel into three 5.0 acre parcels and one remainder parcel of 30.06 acres.

Tentative Parcel Map Case Number WTMP17-0019 (Palomino Ranch Estates #4) – For possible action, hearing, and discussion to approve a forth subsequent division of the newly created 30.06 acre parcel into three parcels of 5.0, 5.03 and 5.01 acres, and a remainder parcel of 15.02 acres.

Tentative Parcel Map Case Number WTMP17-0020 (Palomino Ranch Estates #5) – For possible action, hearing, and discussion to approve a fifth subsequent division of a newly created 15.02 acre parcel into one 5.0 acre and two 5.01 acre parcels.
• Applicant/Property Owner: LW Land Company, LLC
  Attn: Brian Murphy
  695 Mile Circle
  Reno, NV 89511

• Location: South end of Grass Valley Road, approximately ½ mile south of Whiskey Springs Road

• Assessor’s Parcel Number: 077-130-23

• Parcel Size: 67.60 acres

• Master Plan Category: Rural Residential (RR)

• Regulatory Zone: High Density Rural (HDR)

• Area Plan: Warm Springs (Specific Plan Area)

• Citizen Advisory Board: Warm Springs/Rural

• Development Code: Authorized in Article 606, Parcel Maps

• Commission District: 5 – Commissioner Herman

• Section/Township/Range: Section 16, T22N, R21E, MDM, Washoe County, NV

POSSIBLE MOTION

I move that, after giving reasoned consideration to the information contained in the staff report and information received during the public hearing, the Washoe County Parcel Map Review Committee approve with the conditions included as Exhibit A for this matter, Tentative Parcel Map Case Numbers WTPM17-0015, WTPM17-0017, WTPM17-0018, WTPM17-0019 and WTPM17-0020 for LW Land Company, LLC, and make the determination that the following criteria is or will be adequately provided for pursuant to Washoe County Code, Section 110.606.30.

Site Plan: Palomino Ranch Estates #1 through #5
Tentative Parcel Map Evaluation

Regulatory Zone: High Density Rural (HDR) within the Warm Springs Specific Plan

Maximum Lot Potential: 20

Number of Lots on Parcel Maps: 15, through a series of 5 tentative parcel maps

Minimum Lot Size Required: 2.0 acres

Minimum Lot Size on Parcel Maps: 2.5 acres

Minimum Lot Width Required: 150 feet

Minimum Lot Width on Parcel Maps: 323 feet

The tentative parcel map meets all minimum requirements for the High Density Rural (HDR) regulatory zone.

Development Suitability Constraints: The Warm Springs Area Plan Development Suitability Map, a part of the Warm Springs Area Plan, identifies the subject parcel as being within the “1% FEMA Flood Hazard” (100-year flood zone) area.

The subject parcel is within the Truckee Meadows Service Area (TMSA).

The series of requests seeks to divide one parcel of 67.60 acres, identified as Assessor’s Parcel Number 077-130-23, into a total of 15 lots, ranging in size from ±2.5 acres to ±5 acres in size. Two acres is the minimum area requirement for parcels under the High Density Rural (HDR) regulatory zone.

The Warm Springs Specific Plan limits the number of parcels to 75 percent of that available under the Medium Density Rural (MDR) regulatory zone because of the water restrictions in the area plan and in the basin. Without the reduction to 75 percent, a total of 27 lots might be allowed. With the reduction a total of 20 lots are allowed. The applicant seeks to create 15 lots. The number of lots proposed by this map series is less than the allowance for the 67.60-acre parent parcel.

In accordance with the Warm Springs Specific Plan requirements, the applicant must record a Development Agreement before the recordation of any final map. That requirement has been included as a recommended condition of approval.

Improvements to serve this development will be required to meet all generally applicable requirements for a subdivision, in accordance with WCC Section 110.606.30(j).

Project Evaluation

The parcel map series has been conditioned to comply with the applicable provisions of the Warm Springs Specific Plan. Approval of the Development Agreement will be contingent upon compliance with all specific requirements of that plan.

Reviewing Agencies

The following agencies received a copy of the project application for review and evaluation.

- State of Nevada
  - Department of Environmental Protection
  - Department of Transportation
  - Department of Water Resources
- Washoe County Community Services Department
Six out of the sixteen above-listed agencies/departments provided comments and/or recommended conditions of approval in response to their evaluation of the project application. A summary of each agency's comments and/or recommended conditions of approval and their contact information is provided. The Conditions of Approval document is attached to this staff report and will be included with the Action Order, if the series of parcel maps are approved.

- **Washoe County Planning and Building Division** addressed compliance with the requirements of the Warm Springs Specific Plan.
  
  **Contact:** Roger Pelham, 775.328.3622, rpelham@washoecounty.us

- **State of Nevada, Department of Water Resources** requires a will-serve letter from the Palomino Valley GID and to be a signature on the final map.
  
  **Contact:** Steve Shell, 775.684.2800

- **Regional Transportation Commission** addressed desire to include accommodations for Park-n-Ride within the project and encouraged the applicant to construct bike and pedestrian trails, but did not request conditions of approval.
  
  **Contact:** Rebecca Kapuler, 775.332.0174, rkapuler@rtcwashoe.com

- **Washoe County Planning and Building Division - Water Rights Manager** addressed the requirements for water rights to serve wells for new parcels.
  
  **Contact:** Vahid Behmaram, 775.328.3600, vbehmaram@washoecounty.us

- **Palomino Valley General Improvement District** provided conditions of approval to mitigate damage to adjacent roadways that may be caused by construction traffic as well as provide standards for roadways accessing the site.
  
  **Contact:** Caty Glatthar, 775.842.6382, palvalgid@gmail.com

- **Washoe County Engineering and Capital Projects Division** addressed technical standards for drainage, roadways and mapping.
  
  **Contact:** Walter West, P.E., 775.328.2310, wwest@washoecounty.us
Staff Comment on Required Findings

WCC Section 110.606.30 (i) requires that all of the following findings be made to the satisfaction of the Washoe County Parcel Map Review Committee before granting approval of the request. Staff has completed an analysis of the application and has determined that the proposal is in compliance with the required findings as follows.

1) General improvement considerations for all parcel maps including, but not limited to:

   a) Environmental and health laws and regulations concerning water and air pollution, the disposal of solid waste, facilities to supply water, community or public sewage disposal and, where applicable, individual systems for sewage disposal.

       **Staff Comment:** Compliance with all environmental and health laws and regulations concerning water and air pollution, the disposal of solid waste, facilities to supply water, community or public sewage disposal and, where applicable, individual systems for sewage disposal will be addressed with the approval of the required development agreement.

   b) The availability of water which meets applicable health standards and is sufficient for the reasonably foreseeable needs of the subdivision.

       **Staff Comment:** Conditions of approval have been proposed to ensure that water which meets applicable health standards and is sufficient for the reasonably foreseeable needs of the subdivision is provided.

   c) The availability and accessibility of utilities.

       **Staff Comment:** Availability and accessibility of utilities has been provided for on the proposed maps and will be ensured prior to recordation of any final map.

   d) The availability and accessibility of public services such as schools, police and fire protection, transportation, recreation and parks.

       **Staff Comment:** All appropriate agencies were provided with the applications and no recommendations of denial were received.

   e) Conformity with the zoning ordinances and master plan.

       **Staff Comment:** The proposed subdivision is in conformance with the zoning and the Warm Springs Specific Plan.

   f) General conformity with the governing body’s master plan of streets and highways.

       **Staff Comment:** The Warm Springs Specific Plan provides specific standards for streets and highways, conformance will be ensured by approval of the required development agreement.

   g) The effect of the proposed subdivision on existing public streets and the need for new streets or highways to serve the subdivision.

       **Staff Comment:** Conditions of approval have been provided by the Palomino Valley General Improvement District to ensure mitigation of negative impacts upon surrounding roadways.

   h) Physical characteristics of the land such as floodplain, slope and soil.

       **Staff Comment:** The site is in a floodplain and elevation of building pads will be required.

   i) The recommendations and comments of those entities reviewing the tentative parcel map pursuant to NRS 278.330 and 278.348, inclusive.

       **Staff Comment:** These provision of statute refer to the preparation and distribution of tentative maps. All recommended conditions of approval from reviewing agencies have been included in the recommended conditions of approval.
j) The availability and accessibility of fire protection including, but not limited to, the availability and accessibility of water and services for the prevention and containment of fires including fires in wild lands.

*Staff Comment:* The applications were provided to all interested agencies and no recommendations for denial were received.

k) Community antenna television (CATV) conduit and pull wire.

*Staff Comment:* Appropriate easements are required to be included on the final map.

l) Recreation and trail easements.

*Staff Comment:* No reviewing agencies recommended conditions requiring trail easements.

2) Subdivision improvement considerations for second or subsequent parcel maps pursuant to Section 110.606.30(d) and which are in addition to the criteria listed above.

*Staff Comment:* Notice of the public hearing on this item will be sent in accordance with WCC Section 110.606.30(d).

**Recommendation**

Those agencies which reviewed the application, recommended conditions in support of approval of the tentative parcel map, or provided no comments. Therefore, after a thorough analysis and review, Tentative Parcel Map Case Numbers WTPM17-0015, WTPM17-0017, WTPM17-0018, WTPM17-0019 and WTPM17-0020 are being recommended for approval with conditions. Staff offers the following motion for the Parcel Map Review Committee’s consideration.

**Review Criteria**

I move that, after giving reasoned consideration to the information contained within the staff report and the information received during the public meeting, that the Washoe County Parcel Map Review Committee approve Tentative Parcel Map Case Numbers WTPM17-0015, WTPM17-0017, WTPM17-0018, WTPM17-0019 and WTPM17-0020 for LW Land Company, LLC, subject to the conditions of approval included as Exhibit A with the staff report, and make the determination that the following criteria is or will be adequately provided for pursuant to Washoe County Code, Section 110.606.30:

1) General improvement considerations for all parcel maps including, but not limited to:

   a) Environmental and health laws and regulations concerning water and air pollution, the disposal of solid waste, facilities to supply water, community or public sewage disposal and, where applicable, individual systems for sewage disposal;

   b) The availability of water which meets applicable health standards and is sufficient for the reasonably foreseeable needs of the subdivision;

   c) The availability and accessibility of utilities;

   d) The availability and accessibility of public services such as schools, police and fire protection, transportation, recreation and parks;

   e) Conformity with the zoning ordinances and master plan;

   f) General conformity with the governing body’s master plan of streets and highways;

   g) The effect of the proposed subdivision on existing public streets and the need for new streets or highways to serve the subdivision;

   h) Physical characteristics of the land such as floodplain, slope and soil;

   i) The recommendations and comments of those entities reviewing the tentative parcel map pursuant to NRS 278.330 and 278.348, inclusive;
j) The availability and accessibility of fire protection including, but not limited to, the availability and accessibility of water and services for the prevention and containment of fires including fires in wild lands;
k) Community antenna television (CATV) conduit and pull wire; and
l) Recreation and trail easements.

2) Subdivision improvement considerations for second or subsequent parcel maps pursuant to Washoe County Code, Section 110.606.30(d) and which are in addition to the criteria listed above.

**Appeal Process**

Parcel Map Review Committee action will be effective 10 calendar days after the written decision is filed with the Secretary to the Parcel Map Review Committee, unless the action is appealed to the Washoe County Board of County Commissioners, in which case the outcome of the appeal shall be determined by the Board of County Commissioners. Any appeal must be filed in writing within 10 calendar days from the date the written decision is filed with and signed by the Secretary of the Parcel Map Review Committee and mailed to the applicant.

Applicant: LW Land Company, LLC
Attn: Brian Murphy
695 Mile Circle
Reno, NV 89511

Representatives: TEC Engineering
Attn: Jason Gilles
9437 Double Diamond Parkway
Reno, NV 89521
The tentative parcel map approved under Parcel Map Case Numbers WTPM17-0015, WTPM17-0017, WTPM17-0018, WTPM17-0019 and WTPM17-0020 shall be carried out in accordance with the Conditions of Approval granted by the Washoe County Parcel Map Review Committee on February 8, 2018. Conditions of Approval are requirements placed on a permit or development by each reviewing agency. These Conditions of Approval may require submittal of documents, applications, fees, inspections, amendments to plans, and more. These conditions do not relieve the applicant of the obligation to obtain any other approvals and licenses from relevant authorities required under any other act or to abide by all other generally applicable Codes, and neither these conditions nor the approval by the County of this project/use override or negate any other applicable restrictions on uses or development on the property.

Unless otherwise specified, all conditions related to the approval of this tentative parcel map shall be met or financial assurance must be provided to satisfy the conditions of approval prior to the recordation of a final parcel map. The agency responsible for determining compliance with a specific condition shall determine whether the condition must be fully completed or whether the applicant shall be offered the option of providing financial assurance. All agreements, easements, or other documentation required by these conditions shall have a copy filed with the County Engineer and the Planning and Building Division.

When conditions required by different agencies address the same topic, the more stringent standards shall be required.

Compliance with the conditions of approval related to this tentative parcel map is the responsibility of the applicant, his/her successor in interest, and all owners, assignees, and occupants of the property and their successors in interest. Failure to comply with any of the conditions imposed in the approval of the tentative parcel map may result in the institution of revocation procedures.

Washoe County reserves the right to review and revise the Conditions of Approval related to this tentative parcel map should it be determined that a subsequent license or permit issued by Washoe County violates the intent of this approval.

For the purpose of conditions imposed by Washoe County, “may” is permissive and “shall” or “must” is mandatory.

Conditions of Approval are usually complied with at different stages of the proposed project. Those stages are typically:

- Prior to recordation of a final map.
- Prior to obtaining a final inspection and/or a certificate of occupancy.
- Prior to the issuance of a business license or other permits/licenses.
- Some “Conditions of Approval” are referred to as “Operational Conditions.” These conditions must be continually complied with for the life of the project.

The Washoe County Commission oversees many of the reviewing agencies/departments with the exception of the following agencies.
• The DISTRICT BOARD OF HEALTH, through the Washoe County Health District, has jurisdiction over all public health matters in the Health District. Any conditions set by the Health District must be appealed to the District Board of Health.

• The REGIONAL TRANSPORTATION COMMISSION (RTC) is directed and governed by its own Board. Conditions recommended by the RTC may be required, at the discretion of Washoe County.

STANDARD CONSIDERATIONS FOR SUBDIVISIONS
Nevada Revised Statutes 278.349

Pursuant to NRS 278.349, when contemplating action on a tentative subdivision map, the governing body, or the planning commission if it is authorized to take final action on a tentative map, shall consider:

(a) Environmental and health laws and regulations concerning water and air pollution, the disposal of solid waste, facilities to supply water, community or public sewage disposal and, where applicable, individual systems for sewage disposal;

(b) The availability of water which meets applicable health standards and is sufficient for the reasonably foreseeable needs of the subdivision;

(c) The availability and accessibility of utilities;

(d) The availability and accessibility of public services such as schools, police and fire protection, transportation, recreation and parks;

(e) Conformity with the zoning ordinances and master plan, except that if any existing zoning ordinance is inconsistent with the master plan, the zoning ordinance takes precedence;

(f) General conformity with the governing body's master plan of streets and highways;

(g) The effect of the proposed subdivision on existing public streets and the need for new streets and highways to serve the subdivision;

(h) Physical characteristics of the land such as floodplain, slope and soil;

(i) The recommendations and comments of those entities reviewing the tentative map pursuant to NRS 278.330 and 278.335; and

(j) The availability and accessibility of fire protection, including, but not limited to, the availability and accessibility of water and services for the prevention and containment of fires, including fires in wild lands.

FOLLOWING ARE CONDITIONS OF APPROVAL REQUIRED BY THE REVIEWING AGENCIES. EACH CONDITION MUST BE MET TO THE SATISFACTION OF THE ISSUING AGENCY.

Washoe County Planning and Building Division

1. The following conditions are requirements of the Planning and Building Division, which shall be responsible for determining compliance with these conditions.

   Contact: Roger Pelham, Senior Planner, 775.328.3622, rpelham@washoecounty.us
a. The final maps shall be in substantial compliance with all plans and documents submitted as part of this tentative parcel map application, and with any amendments imposed by the Parcel Map Review Committee. All documentation necessary to satisfy the conditions noted below shall accompany the final maps when submitted to the County Engineer and the Planning and Building Division.

b. The applicant shall comply with all the conditions of approval and shall submit all final maps for signature by the Director of the Planning and Building Division within 22 months from the date of approval by the Parcel Map Review Committee. Each agency responsible for imposing conditions may determine whether its conditions must be fully completed or whether the applicant shall be offered the option of providing financial assurances as a means of assuring compliance.

c. The final maps shall contain the following jurat:

DIRECTOR OF PLANNING AND BUILDING CERTIFICATE

THE FINAL PARCEL MAP CASE NO. WTPM {insert correct case number} MEETS ALL APPLICABLE STATUTES, ORDINANCES AND CODE PROVISIONS; IS IN SUBSTANTIAL CONFORMANCE WITH THE TENTATIVE MAP AND ITS CONDITIONS, WHICH ARE INCORPORATED HEREIN BY THIS REFERENCE, AND THOSE CONDITIONS HAVE BEEN SATISFIED FOR RECORDATION OF THIS MAP. THE OFFER(S) OF DEDICATION IS (ARE) REJECTED AT THIS TIME, BUT WILL REMAIN OPEN IN ACCORDANCE WITH NEVADA REVISED STATUTES CHAPTER 278.

THIS FINAL MAP IS APPROVED AND ACCEPTED THIS _____ DAY OF __________, 20______, BY THE DIRECTOR OF THE PLANNING AND BUILDING DIVISION OF WASHOE COUNTY, NEVADA, IN ACCORDANCE WITH NEVADA REVISED STATUTES 278.471 THROUGH 278.4725.

____________________________________________________________
MOJRA HAUENSTEIN, DIRECTOR, PLANNING AND BUILDING DIVISION

d. Any regulations, procedures, and conditions adopted by the Washoe County Health District must be met prior to recordation of a final map. Prior to the recordation of any final map the applicant shall provide documentation from the Health District to the Planning and Building Division that all requirements have been met.

e. Any regulations, procedures, and conditions adopted by the Truckee Meadows Fire Protection District must be met prior to recordation of a final map. Prior to the recordation of any final map the applicant shall provide documentation from the Fire District to the Planning and Building Division that all requirements have been met.

f. The application indicates that the proposed improvements will not exceed the major grading thresholds that require a special use permit. If the final construction drawings for the map include grading that exceeds the Major Grading Permit Thresholds listed in Article 438 Grading Standards, the applicant shall apply for a special use permit for grading; and if approved, may be delayed up to three months processing time. In addition, all related standards within the Washoe County Development Code shall be met on the construction drawings. Compliance shall be determined by the Planning and Building Division.
g. The approval for this tentative parcel map does not include improvements for driveways to building pads. Grading for access to building pads, if they exceed the criteria stated in the previous condition, shall require a special use permit. Compliance shall be determined by the Planning and Building Division.

h. The developer shall be required to participate in any applicable General Improvement District or Special Assessment District formed by Washoe County.

j. A note shall be placed on all grading plans and construction drawings stating:

NOTE

Should any prehistoric or historic remains/artifacts be discovered during site development, work shall temporarily be halted at the specific site and the State Historic Preservation Office of the Department of Museums, Library and Arts shall be notified to record and photograph the site. The period of temporary delay shall be limited to a maximum of two (2) working days from the date of notification.

k. The developer and all successors shall direct any potential purchaser of the site to meet with the Planning and Building Division to review conditions of approval prior to the final sale of the site. Any subsequent purchasers of the site shall notify the Planning and Building Division of the name, address, telephone number and contact person of the new purchaser within thirty (30) days of the final sale.

l. Failure to comply with all conditions of approval shall render this approval null and void.

m. Where the project is adjacent to undeveloped land, the developer shall maintain a fire fuel break of a minimum 30 feet in width until such time as the adjacent land is developed.

n. Locating habitable structures on potentially active (Holocene) fault lines, whether noted on the recorded map or disclosed during site preparation, is prohibited.

o. Prior to recordation of any final map the applicant shall provide a plan for mandatory solid waste collection from each lot created.

p. The applicant shall include, in the Conditions, Covenants and Restrictions (CC&Rs) specifications for Fence material (if any), height, and location limitations, and re-fencing standards. Replacement fence must be compatible in materials, finish and location of existing fence.

q. In accordance with the Warm Springs Specific Plan (WSSP) [part of Volume 3 of the Washoe County Master Plan], prior to recordation of any final map, the applicant shall comply with, and shall submit appropriate documentation to the Planning and Building Division demonstrating compliance with, the following:

i. Demonstrate that elevated building pads will be constructed on all parcels within the floodplain (WSSP, page7).

ii. Consult with the State Archaeological and Historical Society (WSSP.1.4, page 10)

iii. Ensure that landscaping and revegetation are an integral part of the project design and conform to the water budget. (WSSP.2.1, page 12)

iv. Utilize existing certificated and permitted agricultural and stockwater groundwater rights issues as of July 31, 1990 in a proportional amount to serve proposed
residential development (WSSP.3.5 A, page 12) and provide water use calculations that conform to the water budget (WSSP, page 41).

v. Dedicate water rights to Washoe County consistent with the Warm Springs Area Plan Water Budget. (WSSP.3.5 D & E, page 12 &13)

vi. Ensure that new development designs, building material, colors, finishes and total site development blend with the surrounding rural character of the Warm Springs SP (WSSP.5.2, page 26)

vii. Prohibit off premise signs (WSSP.5.10, page 28)

viii. Shall obtain approval of a Development Agreement in accordance with WSSP.8.1. and WSSP Appendix G.

ix. Include the requirement that each residential lot install an irrigation system with automatic controller and backflow prevention device to meet County and State health Codes. (WSSP, Page A-xv)

x. Include the requirement that each homeowner or builder be required to submit landscape and irrigation plans for approval as part of the building permit application process. (WSSP, Page A-xv)

State of Nevada Division of Water Resources

2. The following conditions are requirements of the State of Nevada Division of Water Resources, which shall be responsible for determining compliance with these conditions.

Contact: Steve Shell, 775.684.2800

a. A Will-Serve Letter from Palomino Valley General Improvement District and a mylar map of the proposed project must be presented to the State Engineer for approval and signed through his office prior to development should Palomino Valley General Improvement District choose to serve the project.

Washoe County Community Services Department (CSD) Water Management Planner Coordinator

3. The following conditions are requirements of the Washoe County Community Services Department (CSD) Water Management Planner Coordinator, who shall be responsible for determining compliance with these conditions.

Contact: Vahid Behmaram, 775.328.3699, vbehemaram@washoecounty.us

a. The subject parcel is not near any municipal, quasi-municipal or private water delivery infrastructure; therefore, resulting parcels will rely on Individual Domestic wells as their source of domestic water supply.

b. Washoe County code requires that the applicant for a parcel map with parcels served by an individual domestic well, to bring forth an approved and recorded “Affidavit of Relinquishment for Domestic Wells” by the Nevada State Engineer’s office. The applicant shall complete the relinquishment process with the State Engineer’s office and record the approved form with the County Recorder’s office and submit a recorded copy to Washoe County as a pre-requisite to approval of their parcel map.

c. Washoe County retains the authority to impose its own review and reject water rights which do not comply with Washoe County code and area plans. Therefore, a preview of water rights intended to support the project (prior to relinquishment process) will be helpful for both the applicant and Washoe County staff.
d. The ground water rights subject to relinquishment MAY NOT be supplemental ground water which supplement primary surface water rights.

e. The amount of water rights necessary in Warm Springs is 2.50 acre-feet of ground water rights per newly created parcel. The original parcel is deemed exempt from the relinquishment process. In the way of an example, if one parcel is subdivided into a total of 4, there are 3 newly created parcels and one existing or remains thereof.

f. These proposed maps will require the relinquishment of 35.00 acre-feet in total, since the process begins with 1 existing parcels and ends with a total of 15 parcels of which 14 are newly created parcels @ 2.50 acre-feet per parcel will = 35.00 acre-feet in total.

g. The water rights must be in good standing with the State of Nevada, with current title. The water rights must be from the same hydrographic basin as the lands subject to the parcel map and comply with the appropriate area plan

**Palomino Valley General Improvement District**

4. The following conditions are requirements of the Palomino Valley General Improvement District (PVGID) which shall be responsible for determining compliance with these conditions.

**Contact:** Cathy Glatthar, 775.842.6382, palvalgid@gmail.com

a. Development of the new parcels created by these parcel maps will result in construction traffic on existing surfaced roads maintained by the PVGID. Existing surfacing consists of thin Cape Seals that are not designed to withstand heavy truck traffic. Prior to any construction on these lots, the developer shall meet with the PVGID to designate haul routes that truck traffic will be restricted to. Prior to construction, the PVGID will conduct a condition survey of the haul routes. Following house construction, the haul routes will be re-surveyed, possibly on an annual basis for the duration of development. The developer will be responsible for related damage to the roads, and will reimburse the PVGID accordingly prior to the issuance of any Certificates of Occupancy by Washoe County.

b. Any improvements to existing roads maintained by the PVGID shall be performed by the developer to the standards of the PVGID.

c. Grass Valley Road will require extension northward from its present terminus to serve Parcels A-1, A-2 and A-3 and the private access road for the rest of the parcels. The road extension shall consist of two travel lanes, at a total width of 20 feet, flanked by one foot wide shoulders and roadside v-ditches a minimum of 12 inches deep on each side of the road. The roadway shall be constructed with either a four percent crown or a four percent cross slope.

d. The new Grass Valley Road extension has not been accepted for maintenance by the PVGID and will therefore require private maintenance.

e. Future driveway entrances shall not allow drainage onto Grass Valley Road. Driveway culverts or drainage swales matching and perpetuating the flows of the roadside v-ditches along Grass Valley Road shall be installed and maintained by the property owner.

**Washoe County Engineering and Capital Projects Division**

5. The following conditions are requirements of the Engineering and Capital Projects Division, which shall be responsible for determining compliance with these conditions.
Contact: Walter West, P.E. 775.328.2310, wwest@washoe county.us

GENERAL CONDITIONS

a. Final parcel maps and final construction drawings shall comply with all applicable statutes, ordinances, rules, regulations, and policies in effect at the time of submittal of the tentative map or, if requested by the developer and approved by the applicable agency, those in effect at the time of approval of the final map.

b. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Engineering and Capital Projects Division a complete set of reproducible as-built construction drawings prepared by a civil engineer registered in the State of Nevada.

c. The developer shall be required to participate in any applicable General Improvement District or Special Assessment District formed by Washoe County. The applicable County Department shall be responsible for determining compliance with this condition.

d. The developer shall provide written approval from the U.S. Postal Service concerning the installation and type of mail delivery facilities. The system, other than individual mailboxes, must be shown on the project construction plans and installed as part of the onsite improvements.

e. A complete set of construction improvement drawings, including an onsite grading plan, shall be submitted to the County Engineer for approval prior to finalization of any portion of the tentative parcel maps. Grading shall comply with best management practices (BMP’s) and shall include detailed plans for grading and drainage on each lot, erosion control (including BMP locations and installation details), slope stabilization and mosquito abatement. Placement or disposal of any excavated material shall be indicated on the grading plan.

f. Any existing easements or utilities that conflict with the development shall be relocated, quitclaimed, and/or abandoned, as appropriate. The County Engineer shall determine compliance with this condition.

g. Any easement documents recorded for the project shall include an exhibit map that shows the location and limits of the easement in relationship to the project.

h. Add a note on the map stating: No Habitable structures shall be located on a fault that was active during the Holocene Epoch of geological time.

i. A Homeowners Association shall be formed to perpetually fund and maintain the private streets and drainage system constructed with this project.

j. The conditions, covenants and restrictions (CC&Rs) shall prominently note to the satisfaction of the District Attorney’s Office and the County Engineer that Washoe County will not assume responsibility for maintenance of the development’s private street system or accept the streets for dedication to Washoe County unless the streets meet those Washoe County standards in effect at the time of the offer of dedication.

k. Comply with the conditions of the Washoe County technical check for this map.

DRAINAGE CONDITIONS (WCC Articles 110.416 & 110.420)

l. Prior to finalization of any portion of the tentative parcel maps, a final, detailed hydrology/hydraulic report shall be submitted to the County Engineer. All storm drainage improvements necessary to serve the project shall be designed and constructed to
County standards and specifications and/or financial assurances in an appropriate form and amount shall be provided.

m. The 100-year floodplain boundaries and flood elevations shall appear on the final parcel map. If the floodplain boundary has been conditionally changed by a Federal Emergency Management Agency (FEMA) Conditional Letter of Map Amendment or Conditional Letter of Map Revision, the date of that letter and a note to that effect shall appear on the final map.

n. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures, and grouted rock riprap shall be used to prevent erosion at the inlets and outlets of all culverts to the satisfaction of the Engineering Division.

o. The developer shall provide pretreatment for petrochemicals and silt for all storm drainage leaving the site to the satisfaction of the Engineering Division.

p. The Truckee Meadows Regional Stormwater Quality Management Program Construction Permit Submittal Checklist and Inspection Fee shall be submitted with each final map or series of final parcel maps if maps are recorded simultaneously.

q. A note on the final map shall indicate that all drainage facilities not maintained by Washoe County shall be privately maintained and perpetually funded by a homeowners association. The maintenance and funding of these drainage facilities shall also be addressed in the CC&Rs to the satisfaction of the District Attorney's Office.

r. The maximum permissible flow velocity (that which does not cause scour) shall be determined for all proposed channels and open ditches. The determination shall be based on a geotechnical analysis of the channel soil, proposed channel lining and channel cross section, and it shall be in accordance with acceptable engineering publications/calculations. Appropriate linings shall be provided for all proposed channels and open ditches such that the 100-year flows do not exceed the maximum permissible flow velocity.

s. All slopes steeper than 3:1 shall be mechanically stabilized to control erosion. As an alternative to riprap, an engineered solution (geofabric, etc.) may be acceptable.

t. Maintenance access and drainage easements shall be provided for all existing and proposed drainage facilities.

u. The hydrology report shall include sizing the driveway culverts such that they will pass the onsite 100-year flow. The driveway culvert sizes shall be identified on the improvement plans for each phase.

v. Drainage easements shall be provided for all storm runoff that crosses more than one lot.

w. Prior to final map approval, offsite drainage easements shall be acquired allowing for the change in point and manner of discharge.

x. Place a note on the map stating that the natural drainage shall not be impeded.

y. Any structures within a FEMA flood zone must comply with Washoe County Code Article 416.

TRAFFIC AND ROADWAY (WCC Article 110.436)

z. Street names shall be reviewed and approved by the Regional Street Naming Coordinator.
aa. Proposed landscaping and/or fencing along street rights-of-way and within median islands shall be designed to meet American Association of State Highway and Transportation Officials (AASHTO) sight distances and safety guidelines. No tree shall overhang the curb line of any public street.

bb. All roadway improvements necessary to serve the project shall be designed and constructed to County standards and specifications and/or financial assurances in an appropriate form and amount shall be provided. All project roadways shall be constructed with asphaltic paving.

cc. The roadway design shall comply with AASHTO Guidelines for traversable slopes and minimum clear zones. Roadway easement widths shall accommodate all roadway and v-ditch improvements.

dd. Adequate snow storage easements shall be identified on the final plat.

e. If the Engineering and Capital Projects Division does not inspect the subdivision improvements, prior to release of any financial assurances for the private improvements, the development shall provide the Engineering and Capital Projects Division with a letter prepared by a civil engineer licensed in the State of Nevada, certifying that the private improvements have been constructed in accordance with the approved plans.

ff. A paved access road meeting the requirements of Washoe County Development Code from the proposed parcels to either Whiskey Springs Road or Ironwood Drive or other existing paved roadway maintained by Palomino Valley GID shall be constructed to Washoe County Standards to the satisfaction of the Washoe County Engineer.

gg. A secondary, emergency access easement and roadway shall be provided to provide two points of ingress and egress within 1,500’ of any parcel.

**Washoe County Health District**

6. The following conditions are requirements of Washoe County Health District (WCHD) Environment Health Services, which shall be responsible for determining compliance with these conditions.

**Contact:** James English, 775.328.2610, jenglish@washoecounty.us

a. The parcel maps shall meet all requirements for a second or subsequent parcel maps after the initial map with all parcels a minimum of 5 acres.

b. Parcel Map Case Number WTPM17-0015 is required to be recorded prior to the recordation of the other proposed parcel maps in order to comply with section 040.030 of the District Board Of Health Regulations Governing Sewage, Wastewater and Sanitation.

c. All proposed parcels are required to have a test trench evaluation by WCHD and will require permitting. Please contact David Kelly, Senior REHS with the Land Development program for required test trench fees and map submittal requirements.

*** End of Conditions ***
Parcel Map Review

Date: January 16, 2018
To: Roger Pelham, Planning and Building Division
From: Walter West, P.E., Engineering and Capital Projects Division

Subject: Parcel Map Case No.'s WTPM17-0015, WTPM17-0017, WTPM17-0018, WTPM17-0019, WTPM17-0020

Engineering is in receipt of a letter from the applicant’s engineer, Jason Gilles, for consideration of revised conditions of approval for items 5.gg and 5.cc. (see attached letter for reference). This memorandum is in response to Mr. Gilles’ letter.

Request to Revise Item 5.gg

Subdivision improvements shall be required for second parcel maps per Washoe County Code Section 110.605.30.lj

Subdivision improvements shall be provided in accordance with Washoe County Development Code which includes, among other things, the construction of full width access roads to and within the development (Washoe County Code Section 110.436.20.e(2)). Table 110.436.25.4 would apply for projects serving lot sizes greater than 1.5 acres which requires paved roadways. The required pavement width is 26 feet for local standard roadways and 28 feet for collector standard roadways which includes 2 foot paved shoulders each side. It should also be noted that shoulder widths providing required clear zone distances in compliance with AASHTO design standards shall be provided.

Proposed roadways shall extend to existing public or private paved roadways that are maintained by State of Nevada, Washoe County, or General Improvement District (GID). All proposed roadways shall be maintained by either the Palomino Valley GID or a Homeowners Association.

Mr. Gilles indicates that alternative routes are being contemplated. It is acceptable to Engineering to allow the project to gain access to the site through alternative means provided however that the paved access road be extended to an existing paved roadway that is maintained by either NDOT or Palomino Valley GID. Accordingly, please revise Item 5.gg to read as follows:
5.gg A paved access road meeting the requirements of Washoe County Development Code from the proposed parcels to either Whiskey Springs Road or Ironwood Drive or other existing paved roadway maintained by Palomino Valley GID shall be constructed to Washoe standards to the satisfaction of the Washoe County Engineer.

Request to Revise Item 5.cc

Mr. Gilles would like to add language to the condition to waive the requirement of constructing asphalt paved roadways with collection of fees to cover future roadway paving. It is my understanding that Washoe County has determined to no longer waive the construction of paved roadways since recent court actions have directed Washoe County to refund previously collected roadway and other improvement fees.

Item 5.cc should remain unchanged. Please delete Item 5.z as it is redundant to Item 5.cc.

cc: Dwayne Smith, Director
    Jason Gilles, TEC Engineering
Case Number: WTPM 17-0015 & 17-017 thru 0020
Owner: LW Land Company, LLC
Attn: Roger Pelham, MPA

To all parties concerned:

This letter is being sent to clarify access to the project site and request revision / relief from Conditions of Approval for the proposed development project(s) referenced above.

Condition of Approval 5. gg. (Exhibit A – page 9 of 9) states: “Grass Valley Road from Whiskey Springs Road to the adjacent proposed parcels shall be improved to Washoe County standards with asphalt paving.”

The Applicant is requesting that this condition be modified, as there are alternate routes available for access to the subject site. As per the attached Exhibit, there are three routes available presently to service the subject site. Grass Valley to the north and south of the subject site, as well as a roadway easement to the west of the subject site from Ironwood Drive to the applicants adjacent land holdings. Currently these three routes are being analyzed to determine which route will be the most effective and advantageous to serve the proposed project. As such:

The Applicant is requesting that the Condition be modified to state that “An Access Road to the proposed parcels, from either Whiskey Springs Road or Ironwood Drive be improved to Washoe County Standards to the satisfaction of Washoe County Engineering staff”

Condition of Approval 5. cc. (Exhibit A – page 9 of 9) states: “All roadway improvements necessary to serve the project shall be designated and constructed to County standards and specifications and/or financial assurances in an appropriate form and amount shall be provided. All project roadways shall be constructed with asphaltic pavement.”

The Applicant is requesting that the Condition be modified to state that “All roadway improvements necessary to serve the project shall be designated and constructed to County standards and specifications and/or financial assurances in an appropriate form and amount shall be provided. As per the Warm Springs Specific Plan, 6.13 and 6.13.1, paved road access is hereby waived as a Condition of Approval, with appropriate fees to be collected prior to final map recordation.”
The applicant appreciates your consideration of the proposed modifications and is available to meet and discuss at your convenience.

Any questions or concerns, please feel free to reach me @ 775 352-7800 x226 or jgilles@tecreno.com

Sincerely,

Jason Gilles

RE: Comments on WTPM17-0015, WTPM17-0017, WTPM17-0018, WTPM17-0019, and WTPM17-0020

To: Roger Pelham
Washoe County Community Services Department
1001 East Ninth Street, Building A
Reno, NV 89512

Name: Palomino Ranch Estates #1, #2, #3, #4, and #5

County: Washoe County – Warm Springs

Location: A portion of Sections 15 & 16, Township 22 North, Range 21, East, MDB&M.

Plat: Tentative: Fifteen (15) lots and one remainder lot totaling approximately 67.60 acres and being Washoe County Assessor’s Parcel Number 077-130-23.

Water Service Commitment
Allocation: No water is committed at this time. Proposed source is domestic wells.

Owner-Developer: LW Land Company, LLC
695 Mile Circle
Reno, NV 89511

Engineer: TEC Civil Engineering Consultants
9437 Double Diamond Parkway, #17
Reno, NV 89521

Water Supply: Individual Domestic Wells
General: There are several active water rights appurtenant to the described lands in this proposed project. LW Land Company, Capuro Investments, LLC, Mark and Wilma Carr Trust, and Fred Carr Trust A-3 all own irrigation rights that have a place of use which include all or portions of the base parcel. The lands of the proposed project lie within the Palomino Valley General Improvement District service area. Any water used on the described lands should be provided by an established utility or under permit issued by the State Engineer’s Office.

All waters of the State belong to the public and may be appropriated for beneficial use pursuant to the provisions of Chapters 533 and 534 of the Nevada Revised Statutes (NRS), and not otherwise.

Any water or monitor wells, or boreholes that may be located on either acquired or transferred lands are the ultimate responsibility of the owner of the property at the time of the transfer and must be plugged and abandoned as required in Chapter 534 of the Nevada Administrative Code. If artesian water is encountered in any well or borehole it shall be controlled as required in NRS § 534.060(3).

Municipal water service is subject to Palomino Valley General Improvement District rules and regulations and approval by the Office of the State Engineer regarding water quantity and availability.

A Will Serve from Palomino Valley General Improvement District and mylar map of the proposed project must be presented to the State Engineer for approval and signed through his office prior to development should Palomino Valley General Improvement District choose to serve the project. Domestic wells are subject to provisions of Chapter 533 of the Nevada Administrative Code.

Action: No action is required at this time.

Best regards,

Steve Shell

    WTMP17-0019 (Palomino Ranch Estates #4)
    WTMP17-0020 (Palomino Ranch Estates #5)

Dear Mr. Pelham,

We have reviewed the subject applications and have the following comments and recommendations.

Comments and Recommendations:

- Future accommodations for Park-n-Ride and Vanpool activities should be implemented into the parcel maps for these projects.

- The land use data in RTC’s travel demand model does not include enough household growth in the traffic analysis zone (TAZ) that this property is located in. If this project is approved, we will adjust our travel demand model increasing the land use growth in the TAZ.

- The RTP, the RTC Bicycle/Pedestrian Master Plan and the Nevada Department of Transportation Pedestrian Safety Action Plan, all indicate that new development and re-development will be encouraged to construct pedestrian and bicycle facilities, internal and/or adjacent to the development, within the regional road system. Also, these plans recommend that the applicant be required to design and construct any sidewalks along the frontage of the property in conformance with the stated ADA specifications.
Thank you for the opportunity to comment on this application. Please feel free to contact me at 775-332-0174 or email me at rkapuler@rtcwashoe.com if, you have any questions or comments.

Sincerely,

Rebecca Kapuler
Planner

/697 Palomino Ranch Estates
September 28, 2017

TO: Roger Pelham, Senior Planner, CSD, Planning & Development Division

FROM: Vahid Behmaram, Water Management Planner Coordinator, CSD

SUBJECT: Tentative Parcel Map Case Numbers WTMP17-0015, 0017, 0018, 0019 & 0020 (Palomino Ranch Estates #1 through #5)

**Project description:**

The applicant is proposing a series of 5 parcel maps subdividing a large parcel 67.60 acres in size into 15 smaller parcels of various sizes. All parcels are located within the Warm Springs hydrographic Basin. Water will be provided by individual domestic wells, and sewage disposal will be by individual septic systems.

*The Community Services Department (CSD) recommends approval of this project with the following Water Rights conditions:*

1. The subject parcel is not near any municipal, quasi-municipal or private water delivery infrastructure; therefore, resulting parcels will rely on individual Domestic wells as their source of domestic water supply.
2. Washoe County code requires that the applicant for a parcel map with parcels served by an individual domestic well, to bring forth an approved and recorded “Affidavit of Relinquishment for Domestic Wells” by the Nevada State Engineer’s office. The applicant shall complete the relinquishment process with the State Engineer’s office and record the approved form with the County Recorder’s office and submit a recorded copy to Washoe County as a prerequisite to approval of their parcel map.
3. Washoe County retains the authority to impose its own review and reject water rights which do not comply with Washoe County code and area plans. Therefore, a preview of water rights intended to support the project (prior to relinquishment process) will be helpful for both the applicant and Washoe County staff.
4. The ground water rights subject to relinquishment MAY NOT be supplemental ground water which supplement primary surface water rights.
5. The amount of water rights necessary in Warm Springs is 2.50 acre-feet of groundwater rights per newly created parcel. The original parcel is deemed exempt from the relinquishment process. In the way of an example, if one parcel is subdivided into a total of 4, there are 3 newly created parcels and one existing or remains thereof.
6. These proposed maps will require the relinquishment of 35.00 acre-feet in total, since the
process begins with 1 existing parcels and ends with a total of 15 parcels of which 14 are newly created parcels @ 2.50 acre-feet per parcel will = 35.00 acre-feet in total.

7) The water rights must be in good standing with the State of Nevada, with current title. The water rights must be from the same hydrographic basin as the lands subject to the parcel map and comply with the appropriate area plan.

Re: LW Land Company, LLC Tentative Parcel Map Case Numbers: WTPM17-0015, and WTPM17-0017 through WTPM17-0020

Palomino Ranch Estates #1 through #3

Dear Mr. Pelham,

The Palomino Valley General Improvement District (PVGID) requests the following conditions of approval be placed on the above referenced proposed parcel map cases:

1. Development of the new parcels created by these parcel maps will result in construction traffic on existing surfaced roads maintained the PVGID. Existing surfacing consists of thin Cape Seals that are not designed to withstand heavy truck traffic. Prior to any construction on these lots, the developer shall meet with the PVGID to designate haul routes that truck traffic will be restricted to. Prior to construction, the PVGID will conduct a condition survey of the haul routes. Following house construction, the haul routes will be re-surveyed, possibly on an annual basis for the duration of development. The developer will be responsible for related damage to the roads, and will reimburse the PVGID accordingly prior to the issuance of any Certificates of Occupancy by Washoe County.

2. Any improvements to existing roads maintained by the PVGID shall be performed by the developer to the standards of the PVGID.

3. The new Grass Valley Road extension from its present terminus to serve Parcels A-1, A-2 and A-3 and the private access road for the rest of the parcels. The road extension shall consist of two travel lanes, at a total width of 20 feet, flanked by one foot wide shoulders and roadside v-ditches a minimum of 12 inches deep on each side of the road. The roadway shall be constructed with either a four percent crown or a four percent cross slope.

4. The new Grass Valley Road extension has not been accepted for maintenance by the PVGID and will therefore require private maintenance.

5. Future driveway entrances shall not allow drainage onto Grass Valley Road. Driveway culverts or drainage swales matching and perpetuating the flows of the roadside v-ditches along Grass Valley Road shall be installed and maintained by the property owner.

If you should have any questions, please contact me at 775-848-6788 or by email to palvalgig@gmail.com.

Sincerely,

Larry J. Johnson
President
FROM: Palomino Valley GID <palvaigid@gmail.com>
SENT: Wednesday, October 04, 2017 12:08 PM
TO: Pelham, Roger
Subject: A few observations re: Development in the Warm Springs SPA

Hello again,

1. Unless something has changed, it appears LW Land Co. will need to pave the interior roads within their subdivision since they are creating more than 9 new parcels.

Warm Springs Specific Plan
APPENDIX G - FINANCING PLAN
March 7, 1995
Page G-vi

PRIVATE ROADS

The Washoe County Development Code allows for the creation of new parcels to be served by private roads. These private roads can be gravel surface if serving no more than 9 new parcels, 2.5 acres or larger in size. If the 22 foot wide asphalt County standards is used, these private roads could serve a larger number of parcels. These roads would be signed and marked adjacent to any existing public road (i.e.: PGVZD road). Any future purchaser of a parcel that would be served by a private road would be so notified through the disclosure statement under the development agreement to ensure the purchasers knowledge of the private road system. These private roads are to be maintained by a private homeowners’ association with a separate fee structure for maintenance, including dust control, and dedicated capital fund for long term replacement. It is expressly provided in this Financing Plan that the PGVZD would not be responsible for maintaining any of these designated private roads.

2. I'm still waiting to hear back from Wes Rubio at the Health Dept (we've been playing phone tag), but I did find the following online this morning:

REGULATIONS OF THE WASHOE COUNTY
DISTRICT BOARD OF HEALTH GOVERNING
SEWAGE, WASTEWATER, AND SANITATION
May 23, 2013

040.030 The minimum lot size for new subdivisions and a second or subsequent parcel map from the original parcel as it existed on October 23, 2001, proposing to use on-site sewage disposal, shall be 3 acres. The Health Authority may reduce the minimum lot size requirement to as small as one acre per lot if the applicant for division can show to the satisfaction of the Health Authority that adequate measures have been taken to ensure that the smaller lot area will not have a greater impact to the groundwater quality than the 3-acre lot size. In any case, no division shall be approved if the parcel density exceeds the standard established by the Nevada Division of Environmental Protection. Staff decisions regarding the adequacy of the proposed measures shall be approved by the sewage wastewater and sanitation Hearing Board and the District Board of Health through the variance procedure outlined in these regulations. Existing lots and the first four parcels created from an existing parcel shall be a minimum area of 1 acre.

Regards,
~ Cathy

2001 E 9th St, Bldg C, Reno, NV 89512
Conditions of Approval for:

WTMP17-0015
WTMP17-0017
WTMP17-0018
WTMP17-0019
WTMP17-0020

The proposed project being a series of 5 parcel maps creating 15 lots shall be subject to the following conditions of approval:

GENERAL CONDITIONS

1. Final parcel maps and final construction drawings shall comply with all applicable statutes, ordinances, rules, regulations, and policies in effect at the time of submittal of the tentative map or, if requested by the developer and approved by the applicable agency, those in effect at the time of approval of the final map.

2. Prior to acceptance of public improvements and release of any financial assurances, the developer shall furnish to the Engineering and Capital Projects Division a complete set of reproducible as-built construction drawings prepared by a civil engineer registered in the State of Nevada.

3. The developer shall be required to participate in any applicable General Improvement District or Special Assessment District formed by Washoe County. The applicable County Department shall be responsible for determining compliance with this condition.

4. The developer shall provide written approval from the U.S. Postal Service concerning the installation and type of mail delivery facilities. The system, other than individual mailboxes, must be shown on the project construction plans and installed as part of the onsite improvements.

5. A complete set of construction improvement drawings, including an onsite grading plan, shall be submitted to the County Engineer for approval prior to finalization of any portion of the tentative parcel maps. Grading shall comply with best management practices (BMP’s) and shall
include detailed plans for grading and drainage on each lot, erosion control (including BMP locations and installation details), slope stabilization and mosquito abatement. Placement or disposal of any excavated material shall be indicated on the grading plan.

6. Any existing easements or utilities that conflict with the development shall be relocated, quitclaimed, and/or abandoned, as appropriate. The County Engineer shall determine compliance with this condition.

7. Any easement documents recorded for the project shall include an exhibit map that shows the location and limits of the easement in relationship to the project.

8. Add a note on the map stating: No Habitable structures shall be located on a fault that was active during the Holocene Epoch of geological time.

9. A Homeowners Association shall be formed to perpetually fund and maintain the private streets and drainage system constructed with this project.

10. The conditions, covenants and restrictions (CC&Rs) shall prominently note to the satisfaction of the District Attorney’s Office and the County Engineer that Washoe County will not assume responsibility for maintenance of the development’s private street system or accept the streets for dedication to Washoe County unless the streets meet those Washoe County standards in effect at the time of the offer of dedication.

11. Comply with the conditions of the Washoe County technical check for this map.

**DRAINAGE CONDITIONS** (County Code 110.416 & 110.420)

1. Prior to finalization of any portion of the tentative parcel maps, a final, detailed hydrology/hydraulic report shall be submitted to the County Engineer. All storm drainage improvements necessary to serve the project shall be designed and constructed to County standards and specifications and/or financial assurances in an appropriate form and amount shall be provided.

2. The 100-year floodplain boundaries and flood elevations shall appear on the final parcel map. If the floodplain boundary has been conditionally changed by a Federal Emergency Management Agency (FEMA) Conditional Letter of Map Amendment or Conditional Letter of Map Revision, the date of that letter and a note to that effect shall appear on the final map.

3. Standard reinforced concrete headwalls or other approved alternatives shall be placed on the inlet and outlet of all drainage structures, and grouted rock riprap shall be used to prevent erosion at the inlets and outlets of all culverts to the satisfaction of the Engineering Division.

4. The developer shall provide pretreatment for petrochemicals and silt for all storm drainage leaving the site to the satisfaction of the Engineering Division.

5. The Truckee Meadows Regional Stormwater Quality Management Program Construction Permit Submittal Checklist and Inspection Fee shall be submitted with each final map or series of final parcel maps if maps are recorded simultaneously.

6. A note on the final map shall indicate that all drainage facilities not maintained by Washoe County shall be privately maintained and perpetually funded by a homeowners association. The maintenance and funding of these drainage facilities shall also be addressed in the CC&Rs to the satisfaction of the District Attorney’s Office.

7. The maximum permissible flow velocity (that which does not cause scour) shall be determined for all proposed channels and open ditches. The determination shall be based on a geotechnical analysis of the channel soil, proposed channel lining and channel cross section,
and it shall be in accordance with acceptable engineering publications/calculations. Appropriate linings shall be provided for all proposed channels and open ditches such that the 100-year flows do not exceed the maximum permissible flow velocity.

8. All slopes steeper than 3:1 shall be mechanically stabilized to control erosion. As an alternative to riprap, an engineered solution (geofabric, etc.) may be acceptable.

9. Maintenance access and drainage easements shall be provided for all existing and proposed drainage facilities.

10. The hydrology report shall include sizing the driveway culverts such that they will pass the onsite 100-year flow. The driveway culvert sizes shall be identified on the improvement plans for each phase.

11. Drainage easements shall be provided for all storm runoff that crosses more than one lot.

12. Prior to final map approval, offsite drainage easements shall be acquired allowing for the change in point and manner of discharge.

13. Place a note on the map stating that the natural drainage shall not be impeded.

14. Any structures within a FEMA flood zone must comply with Washoe County Code Article 416.

**TRAFFIC AND ROADWAY (COUNTY CODE 110.436)**

1. All roadway improvements necessary to serve the project shall be designed and constructed to County standards and specifications and/or financial assurances in an appropriate form and amount shall be provided.

2. Street names shall be reviewed and approved by the Regional Street Naming Coordinator.

3. Proposed landscaping and/or fencing along street rights-of-way and within median islands shall be designed to meet American Association of State Highway and Transportation Officials (AASHTO) sight distances and safety guidelines. No tree shall overhang the curb line of any public street.

4. All roadway improvements necessary to serve the project shall be designed and constructed to County standards and specifications and/or financial assurances in an appropriate form and amount shall be provided. All project roadways shall be constructed with asphaltic paving.

5. The roadway design shall comply with AASHTO Guidelines for traversable slopes and minimum clear zones. Roadway easement widths shall accommodate all roadway and v-ditch improvements.

6. Adequate snow storage easements shall be identified on the final plat.

7. If the Engineering and Capital Projects Division does not inspect the subdivision improvements, prior to release of any financial assurances for the private improvements, the development shall provide the Engineering and Capital Projects Division with a letter prepared by a civil engineer licensed in the State of Nevada, certifying that the private improvements have been constructed in accordance with the approved plans.

8. Grass Valley Road from Whiskey Springs Road to the adjacent proposed parcels shall be improved to Washoe County standards with asphalt paving.

9. A secondary, emergency access easement and roadway shall be provided to provide two points of ingress and egress within 1,500' of any parcel.

RE: Palomino Ranch Estates; APN 077-130-23
Tentative Parcel Map; WTPM17-0015, WTPM17-0017, WTPM17-0018, WTPM17-0019,
WTPM17-0020

Dear Mr. Pelham:

The Washoe County Health District, Environmental Health Services Division (WCHD) has reviewed the above referenced project. Approval by the WCHD is subject to the following conditions:

1. The WCHD has reviewed the proposed parcel maps referenced above and has the following comments:
   a. The parcel maps meet all requirements for second or subsequent parcel maps after the initial map with all parcels a minimum of 5 acres.
   b. Parcel map WTPM17-0015 is required to be recorded prior to the recordation of the other proposed parcel maps in order to comply with section 040.030 of the DEOH Regulations Governing Sewage, Wastewater, and Sanitation.
   c. All proposed parcels are required to have a test trench evaluation by WCHD and will require permitting. Please contact David Kelly, Senior REHS with the Land Development program for required test trench fees and map submittal requirements.

If you have any questions or would like clarification regarding the foregoing, please contact Wes Rubio, Senior Environmental Health Specialist at wrubio@washoeCounty.us regarding all Health District comments.

Sincerely,

[Signature]

It was a pleasure meeting you at the Warm Springs CAB meeting last month. The reason for this correspondence is to reiterate the issue of proposed additional home development in the Warm Springs/Palomino Valley basin. As I stated at the CAB meeting, I’m getting inundated with calls, and being pulled over by my neighbors regarding their fears of water shortage the result of the proposed additional 5 acre ranch development. There are multiple ranches, that sit at higher elevations who have lost their wells, the result of increased water usage by the grass farm, Pratt family increasing their hay production and the biggest issue is the 5 acre subdivisions, which have wells being drilled in plain sight, while existing residents are having to import water for their daily needs. I understand that the 5 acre development was proposed and approved many years ago. There was a reason why this valley was zoned in 40 acre parcels, that’s what the aquifer can support. The community is fearful and getting angrier by the day. Every time a well truck pulls into that subdivision the anger intensifies. Please do not approve any further subdividing or new well permits on any parcels in the Warm Springs/Palomino Valley that do not have an existing well on the property until a current and detailed water survey can be performed to assure that the existing ranches, and agricultural businesses can continue to pull from the existing aquifer. Please pass this on to the planning commission.

Seriousy,

Dennis M Buck  
Chair, Warm Springs CAB.

**From:** Sharon Korn  
**To:** Washoe County Planning and Development  
**Subject:** Palomino Valley Development on Grass Valley

Hello,

I live on grass valley rd. in Palomino valley. A neighbor indicated they got a notice about 15 houses proposed to be developed just south on Grass Valley:

Case Numbers: WTMP17-0015, WTMP17-0017, WTMP17-0018, WTMP17-0019 and WTMP17-00120  
(Palomino Valley Ranch Estates #1, #2, #5, #4, #5)

I understand the notice did not have to be sent out to anyone, but as a courtesy to those who may be impacted. I feel I will be impacted because I have a mail slot in the gang boxes at the corner of Grass Valley and Whiskey Springs. Everyone who has a box there will be impacted and should receive that notice.

First, when I get my mail on my way back from town, there will be heavier traffic on Whiskey Springs, which we don’t need. It’s already too busy, a lot of folks speed like crazy and the road is rapidly deteriorating.

Second, houses packed together will be an eyesore and take away from the character of the valley. No one out here wants the valley to become Spanish Springs–North. It’s already bad enough that some of this type of housing has already been allowed to be developed in places out here.

Third, water is problematic out here. How can we support 15 families bunched together? Will they be taking away some of my water? Living on a mountain means the more water sucked out of the valley floor will possibly impact me. I hear several folks had to drill new and/or deeper wells in the past due to over development.

Fourth, one of the reasons I moved here was that I was told (in writing) that this area had a 40 acre minimum. How/when did this change?

It’s sad that this valley is well on the way to be ruined for those who moved here for the isolation. Please do not approve these projects.

Regards,

Sharon Korn
Dear Sirs,

I have spoken to you on the phone and sent previous emails. I have also sent emails and made phone calls to The State Division of Water Resources, State Water Engineer, and Chris Peterson Engineer with the Washoe County Health Department. I have been referencing from the Washoe County Area Plan dated January 12, 2012, list of references for water rights/resources the 1987 study by Guyton and Associates entitled Study of Ground Water Availability in Warm Springs Valley, Washoe County, Nevada. In the Warm Springs Area plan just below the water rights section entitled Alternatives numbers 1-3. Please read #3 which highlights concerns noted by Guyton and Associates in their study results. They in 1987 had raised concerns relating to not only ground water availability but water quality problems found in wells within the basin, containing dissolved solids, fluoride, nitrate, sulfate, iron, other trace metals and arsenic. I was just made aware that a new resident at 900 Ironwood road, had after water testing of his new well arsenic levels so high he had to put in a very expensive water filtration system in order to have safe drinking water. This parcel sits just outside the SPA in Reno area of proposed new LW Land Company development. The community is concerned about the continued impact on domestic wells, general health standards, and water availability specifically because Washoe County has been approving development in the SPA without any new data as to groundwater availability and quality. The Palomino Valley Equestrian Estates approved in 2010 in the SPA with construction of over 10 homes completed and another 40 yet to be completed. with homes on individual wells and septic tanks, is an example. There is also the Newall development already completed with homes on 2 1/2 acres. Under review is another proposed subdivision with homes on 2 and 1 1/2 acres, requested by the LW Land Company splitting 67 acres into 15 parcels.

Tentative Parcel Map Application
Supplemental Information

(All required information may be separately attached)

Chapter 110 of the Washoe County Code is commonly known as the Development Code. Specific references to tentative parcel maps may be found in Article 606, Parcel Maps.

1. What is the location (address or distance and direction from nearest intersection)?

South end of Grass Valley Road; approximately half a mile south of Whiskey Springs Road.

a. Please list the following:

<table>
<thead>
<tr>
<th>APN of Parcel</th>
<th>Land Use Designation</th>
<th>Existing Acres</th>
</tr>
</thead>
<tbody>
<tr>
<td>077-130-23</td>
<td>120 - Vacant, Single Family</td>
<td>67.00</td>
</tr>
</tbody>
</table>

2. Please describe the existing conditions, structures, and uses located at the site:

Vacant land.

3. What are the proposed lot standards?

<table>
<thead>
<tr>
<th>Minimum Lot Area</th>
<th>Parcel 1</th>
<th>Parcel 2</th>
<th>Parcel 3</th>
<th>Parcel 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.5 ac.</td>
<td>2.5 ac.</td>
<td>2.5 ac.</td>
<td>60.10</td>
<td></td>
</tr>
<tr>
<td>Minimum Lot Width</td>
<td>327.10</td>
<td>327.10</td>
<td>327.10</td>
<td>323.15</td>
</tr>
</tbody>
</table>
4. Was the parcel or lot that is proposed for division created (recorded) within the last 5 years? (If yes, public review of the parcel map will be required. See Planning and Building staff for additional materials that are required to be submitted.)

☐ Yes ☐ No

5. Utilities:

   a. Sewer Service  Septic
   b. Electrical Service/Generator  N/A Energy
   c. Water Service  Well

6. Please describe the source of the water facilities necessary to serve the proposed tentative parcel map:

   a. Water System Type:

   ☐ Individual wells
   ☐ Private water Provider:
   ☐ Public water Provider:

   b. Available:

   ☐ Now ☐ 1-3 years ☐ 3-5 years ☐ 5+ years

   c. Washoe County Capital Improvements Program project?

   ☐ Yes ☐ No

7. What sewer services are necessary to accommodate the proposed tentative parcel map?

   a. Sewage System Type:

   ☐ Individual septic
   ☐ Public system Provider:

   b. Available:

   ☐ Now ☐ 1-3 years ☐ 3-5 years ☐ 5+ years

   c. Washoe County Capital Improvements Program project?

   ☐ Yes ☐ No

8. For most uses, the Washoe County Code, Chapter 110, Article 422, Water and Sewer Resource Requirements, requires the dedication of water rights to Washoe County when creating new parcels. Please indicate the type and quantity of water rights you have available should dedication be required:

   a. Permit #  3B acre-feet per year
   b. Certificate #  acre-feet per year
   c. Surface Claim #  acre-feet per year
   d. Other, #  acre-feet per year
e. Title of those rights (as filed with the State Engineer in the Division of Water Resources of the Department of Conservation and Natural Resources):

9. Does the property contain wetlands? (If yes, please attach a preliminary delineation map and describe the impact the proposal will have on the wetlands. Impacts to the wetlands may require a permit issued from the U.S. Army Corps of Engineers.)

☐ Yes ☐ No If yes, include a separate set of attachments and maps.

10. Does property contain slopes or hillsides in excess of 15 percent and/or significant ridgelines? (If yes, and this is the second parcel map dividing this property, Article 424, Hillside Development of the Washoe County Development Code will apply.)

☐ Yes ☐ No If yes, include a separate set of attachments and maps.

11. Does property contain geologic hazards such as active faults; hillside or mountainous areas; is it subject to avalanches, landslides, or flash floods; is it near a water body, stream, Significant Hydrologic Resource as defined in Article 418, or riparian area such as the Truckee River, and/or an area of groundwater recharge

☐ Yes ☐ No If yes, include a separate set of attachments and maps.

12. Does the tentative parcel map involve common open space as defined in Article 408 of the Washoe County Development Code? (If so, please identify all proposed non-residential uses and all the open space parcels.)?

☐ Yes ☐ No If yes, include a separate set of attachments and maps.

13. If private roads are proposed, will the community be gated? If so, is a public trail system easement provided through the subdivision?

[Signature]

Washoe County Planning and Building
TENTATIVE PARCEL MAP SUPPLEMENTAL INFORMATION

WTPM17-0015, 0017, 0018, 0019, 0020
EXHIBIT D
14. Are there any applicable policies of the adopted area plan in which the project is located that require compliance? If so, which policies and how does the project comply?

☐ Yes  ☐ No  If yes, include a separate set of attachments and maps.

15. Are there any applicable area plan modifiers in the Development Code in which the project is located that require compliance? If so, which modifiers and how does the project comply?

16. Is the project subject to Article 418, Significant Hydrologic Resources? If yes, please address Special Review Considerations within Section 110.418.30 in a separate attachment.

☐ Yes  ☐ No  If yes, include a separate set of attachments and maps.

Grading

Please complete the following additional questions if the project anticipates grading that involves: (1) Disturbed area exceeding twenty-five thousand (25,000) square feet not covered by streets, buildings and landscaping; (2) More than one thousand (1,000) cubic yards of earth to be imported and placed as fill in a special flood hazard area; (3) More than five thousand (5,000) cubic yards of earth to be imported and placed as fill; (4) More than one thousand (1,000) cubic yards to be excavated, whether or not the earth will be exported from the property; or (5) If a permanent earthen structure will be established over four and one-half (4.5) feet high. If your project exceeds any of the above criteria, you shall either provide a preliminary grading and roadway design plan for review OR if these criteria are exceeded with the final construction drawings and not disclosed at the Tentative Parcel Map Application, you shall be required to apply for a special use permit for grading and you will be delayed up to three months, if approved.

17. How many cubic yards of material are you proposing to excavate on site?

N/A
18. How many cubic yards of material are you exporting or importing? If exporting of material is anticipated, where will the material be sent? If the disposal site is within unincorporated Washoe County, what measures will be taken for erosion control and revegetation at the site? If none, how are you balancing the work on-site?

N/A

19. Can the disturbed area be seen from off-site? If yes, from which directions, and which properties or roadways? What measures will be taken to mitigate their impacts?

N/A

20. What is the slope (Horizontal/Vertical) of the cut and fill areas proposed to be? What methods will be used to prevent erosion until the revegetation is established?

N/A
21. Are you planning any berms and, if so, how tall is the berm at its highest? How will it be stabilized and/or revegetated?

N/A

22. Are retaining walls going to be required? If so, how high will the walls be, will there be multiple walls with intervening terracing, and what is the wall construction (i.e. rockery, concrete, timber, manufactured block)? How will the visual impacts be mitigated?

N/A

23. Will the grading proposed require removal of any trees? If so, what species, how many, and of what size?

N/A

24. What type of revegetation seed mix are you planning to use and how many pounds per acre do you intend to broadcast? Will you use mulch and, if so, what type?

N/A
25. How are you providing temporary irrigation to the disturbed area?

N/A

26. Have you reviewed the revegetation plan with the Washoe Storey Conservation District? If yes, have you incorporated their suggestions?

N/A

27. Surveyor:

Development Standards Handbook for

PALOMINO RANCH ESTATES

DEVELOPMENT STANDARDS

Introduction
LW Land Company LLC, the owner of the property Palomino Ranch Estates, is one of the parcels within the Warm Springs Specific Plan (WSSP). (Refer to the Land Use Plan showing the project within the Warm Springs area in Appendix C) The property is 67.60 acres in size. There will be a total of 15 lots, 3 lots will each be 2.50 acres, with remaining 12 lots will be 5+ acres.(Refer to Vicinity Map and Parcel Map)

Objective
To develop a community that capitalizes on the rural and equine character of the Warm Springs area while utilizing resources efficiently and effectively, and giving consideration to design, marketability, and aesthetics.

Agriculture
The Specific Plan protects existing adjacent agricultural uses from potential development conflicts. The CC&Rs and all final maps shall contain a note of restriction that states, "No formal written or verbal complaints can be filed with Washoe County and no lawsuits or other legal proceedings can be brought against any legal agricultural use." Each purchaser will sign a disclosure statement that reiterates the same information.

Residential Design Guidelines
The purpose of this handbook is to describe the principles, policies, standards, and deed restrictions that will control development of Tumbleweed Estates to ensure that it is built and maintained as envisioned in the master planning process for the Warm Springs Specific Plan area.

Lot Concepts Standards
The individual lot concepts are designed to promote the rural character of the Warm Springs Valley. The lots have designated building envelopes, transition zones, and required open space. Where there is a difference between what is illustrated in the Individual Lot Concept Plans and what the text states, the plans shall take precedence over the text. (Refer to the Individual Lot Concept Plans, pages 4-5.)
Building Envelopes
The building setbacks from the street vary to provide a more rural atmosphere to the streetscape. All lots have an established building envelope as defined by the Individual Lot Concept Plans. Building side and rear yard setbacks shall conform to current Washoe County Code requirements.

Buildings may be located anywhere within the designated building envelope. All buildings, structures, or storage of any type will be confined to this area on each lot.

A landscaped/irrigated zone with a minimum depth of 30 feet is required around all dwellings. This landscaped/irrigated zone must utilize fire retardant/resistant landscaping. For additional fire protection, the landscaping within the building envelope should be thinned and maintained so as not to present a hazard to the homeowner or adjacent property owners.

The landscaped/irrigated zone may encroach into the transition zone. All disturbed areas within the building envelope that are not landscaped, will be revegetated with a combination of native shrubs, grass, and wildflower seed mixtures specified in this document. The relationship between building envelopes is designed to provide an open space corridor and to provide necessary space for additional possible division of the property. (Refer to the Individual Lot Concept, Figures 1-A through 3-A pages 4-14.)

Transition Zone
The designated transition zone portion of the lot provides an extension of usable yard area but does not permit structures. The zone provides a transition from the open space to the developed portion of each lot. The only fencing that shall be permitted within the transition zone is Open Ranch Style Fencing, White Rail PVC Fencing, or temporary painted-metal panelized fencing. The landscaping for the transition zone has been considered under and is incorporated into the Water Allocation. Horses and 4-H animals are limited to the transition zone and building envelope unless pasture has been provided by securing the requisite water rights.

Open Space
Please see Plate 9 map, Appendix D, which shows the proposed open space, trails and the golf course in the Warm Springs master plan.

The designated open space portion of each lot will be left undisturbed. All open space areas shall be maintained by the individual property owner. These open space corridors are designated to protect the existing, rural character of the valley. Open space areas may continue existing, established agricultural or ranching uses and are exempt from the limitations imposed by the section on "Animals" later in this Development Standards Handbook.
No use of motorized vehicles, other than vehicles actively engaged in ranching or farming activities, is allowed within the designated open space areas. Open space corridors may be utilized as a non-motorized trail system for equestrian use. The only fencing that shall be permitted within the open space area is Open Ranch Style Fencing, White Rail Synthetic Fencing, or temporary painted-metal Panelized Fencing. Water rights, in accordance with the Optional Water Usage Landscape (see page 26 under Water Allocation), must be purchased for maintenance of pasture for animals enclosed within the open space. The open space in the Warm Springs Specific Plan shall be left in natural vegetation or agricultural use. If disturbed, it shall be reseeded as specified in the section on Revegetation of Open Space/Drainage ways. Plant selection should include only drought tolerant and low water demand material (refer to plant list in Appendix A). These attributes contribute to the decreased average annual residential water demand that is mandated for implementation of the Warm Springs Specific Plan.

View sheds

The proposed building envelopes, as illustrated by Figure 1-A, page 4, Figures 2-A, page 5, and by 3-A, page 14, are staggered and setbacks are increased to afford views and vistas from each building envelope to the surrounding valleys and mountains.

Architecture

All buildings must incorporate an architectural theme or identity that is complementary and compatible with the Warm Springs Specific Plan area and its surroundings. All building plans shall be submitted to the WSSP Architectural Review Committee to ensure this policy is enforced in a way that encourages creative design. No mobile homes are allowed except for construction purposes. To enhance the development and maintain the rural character, buildings and structures shall adhere to the following guidelines. (Refer to Conceptual "Western Ranch" Theme Home, Figures 8a and 8b page 20.)

Exterior Walls and Trims

Building materials must support the "western ranch" theme and be approved by the WSSP Architectural Review Committee. Exterior siding and wall colors must be earth tone and harmonize with the surrounding landscape. No gloss finishes are allowed.

Large unbroken expanses of the same wall material shall be avoided. Trim shall be used on all exterior walls to create highlight and shadow. All reflective material (e.g., chimney stacks, flashings, exhaust vents and pipes, etc.) must be painted to match or blend with surrounding materials.
Figure 1-A
Lot Concept for 2.5 Acre Parcels
Figure 2-A

Individual Lot Concept for 5(+) Acre Parcels
Roofing
Roofing materials shall be earth tone and of a color that harmonizes with the surrounding area and color scheme of the structure. To support an architectural theme consistent with the Warm Springs Specific Plan, building materials for roofs shall be limited to slate, concrete tile, or architectural composition, extra-dimensional 30-year roofing. Flat roofs shall not be allowed. Metal non-reflective and colored roofs may be permitted with Architectural Review Committee approval. All reflective material (e.g., chimney stacks, flashings, exhaust vents and pipes, etc.) must be painted to match or blend with surrounding materials.

Building Heights
To promote an architectural theme consistent with the Warm Springs Specific Plan, single story homes are encouraged, but all homes shall be limited to two stories and, in accordance with Washoe County Development Code requirements, 35 feet in height. (Refer to Conceptual "Western Ranch" Theme Home, Figures 8a and 8b, page 20.)

Completion of Construction
Construction of any improvement, once commenced, shall be pursued diligently to completion within 18 months of commencement. Improvements not so completed or upon which construction has ceased for ninety (90) consecutive days or which have been partially or totally destroyed and not rebuilt within a reasonable period shall be deemed nuisances. The Homeowners Association may remove any such nuisance or repair or complete the same at the cost of the owner provided the owner has not commenced required work within thirty (30) days from the posting of a notice by the Homeowners Association to commence such work upon the property. Such notice shall state the steps that will be taken to eliminate the nuisance.

Miscellaneous Animals
No more than four (4) Horses or 4-H animals, limited to cattle or sheep, will be allowed. Such animals will only be permitted within the building envelope and transition zone unless additional water rights are acquired for pastureland within the open space. Adequate ground cover to eliminate dust and prevent erosion shall be maintained at all times. As many as four (4) customary household pets are allowed provided they are not kept for commercial purposes and are kept reasonably confined so as not to become a nuisance. Horses, animals, and household pets shall not unreasonably interfere with the comfort, privacy, or safety of other properties. Animals shall be kept in accordance with Washoe County rules and regulations. The homeowners association shall have the authority to determine whether the animals unreasonably interfere with the comfort, privacy or safety of other properties.
Homeowners may provide irrigated pasture as an exercise area or for supplemental feed in which the animals may be kept when not stabled or corralled. Livestock may be considered an optional use for water allocated for landscape use. Pasturelands for animals will require additional water rights to be dedicated to Washoe County. Irrigated pastures require additional water rights at 4 acre-feet/year per acre. 1-1/4 acres of irrigated pasture would require the dedication of a total of 5 acre-feet of water. (Refer to Optional Usage Water Consumption Table A & B, pages 30-31 in the Landscape/Irrigation Section.)

Travel Trailers, Motor Homes, and Boat Storage
Travel trailers, motor homes, other recreational vehicles, or boats and trailers may only be stored within the building envelope. This may occur either within enclosed structures or in the side or rear yards if such yards are completely screened from any street, lot parcel, or open space area and the minimum distance from the screening material maintains the zoning requirements for that yard. Screening shall be consistent with the designated neighborhood privacy fence. (Refer to Figure 5 page 19) The architectural review committee will approve all fencing material.

Utilities
All individual services to each unit for all lot sizes shall be underground from the neighborhood service line. All on site utility lines to outbuildings, detached accessory structures, pump houses, etc., shall be underground.

Mailboxes
Individual property owners will not have US Mail delivered to their property. The Post Office has community mail boxes located at Grass Valley Road and Whiskey Springs Road 1/2 mile from proposed project. Per the post office if needed more community mail boxes will be put in place at that location.

Garbage and Refuse Disposal
There shall be no burning of trash, garbage or other like household refuse, nor shall any property owner accumulate on their lot junked or unsightly vehicles or litter, refuse or garbage, except in receptacles provided for such purposes.

Concealment of Fuel Storage Tanks and Trash Receptacles
Fuel storage tanks, limited to propane or heating oil and every receptacle for ashes, trash, rubbish or garbage shall be so placed and kept as not to be visible from any street, lot, parcel, or open space except at the times when refuse collections are made.

Antennas
Satellite dishes and home radio antennas shall be screened from view from any adjacent parcels, streets, or open space by locating in side or rear yards behind screen fences at a minimum. Screen fences for this purpose shall maintain the minimum distance from the screening material to that yard property line that meets the zoning requirements.
Nuisances
No noxious or offensive activities, odors, or nuisances shall be permitted on any lot or parcel in the development. No refuse, animal manure, unsightly or abandoned vehicles, debris, noxious materials, discarded personal effects, and construction materials not for immediate use shall be permitted on any lot or portion thereof. It is incumbent upon all property owners to maintain their lots and yards in a neat, orderly, and well-mannered, whether said lots are vacant or improved. The Homeowners Association shall be responsible for timely enforcement for this provision.

Conservation
All building construction shall utilize methods of energy conservation and the use of low water demand features. Table 1 provides a list of recommended and mandatory energy and water conservation features, which will be incorporated into the building construction.

1 Upon approval of the Washoe County District Health Department.

Building design and orientation shall be considered in conservation of energy. All buildings will be designed and oriented to benefit from passive solar heating if practicable. Passive solar construction guidelines and energy conservation measures for Northern Nevada are available through the Sierra Pacific Power Company.ii

Homes will be designed to utilize the following minimum guidelines of energy conservation in site and architectural design. Simple alterations in building design can enable the use of the sun, wind, landform, and vegetation to provide for supplemental heating, cooling, and insulation for a structure.

Energy Conservation Guidelines
All buildings should be located and oriented to benefit from passive solar heating. The desirable exposure is towards the south, southeast, or southwest. The simple east-west orientation of a rectangular building in northern Nevada has been found to reduce energy consumption by 40%. Site development should use plant materials and landforms to enhance energy conservation. Coniferous trees planted along the windward side of the property can act as a windbreak to deflect winter winds. Shrubs and trees planted against the structure can help to insulate the building. Deciduous trees planted on the south side of the structure will shade the building during the summer and enable sun to penetrate during the winter. The creation of earth berms on the windward side can reduce heat loss due to wind and help to insulate the structure. (Refer to the Minimum Landscape Elements - Figure 3-A page 11) The structure should be designed to keep energy needs for heating and cooling to a minimum. Passive energy conservation measures include the following:

- Good insulation.
- Location of active living spaces on south side
- Location of closets, mud-room, garages, or storage space on north and east sides
- Air-lock entries
- Concentration of windows on south side
- Reduction in number and size of openings on north side.
- Maximum use of double-glazing
- Building overhangs to shield windows from summer sun and to admit winter sun
- Use of paved surfaces, rock or masonry on south side to absorb radiation

Active solar energy systems shall be permitted if the solar panels are integrated into the architectural design. If not integrated into the roof or body of the structure, they may not be placed on the roof and they must be screened from public view.
Domestic Water Allocation

The Warm Springs Specific Plan mandates compliance with a per lot water allocation. The designated water allocation for this project is 1.12 acre-feet/year per lot, which is equivalent to 364,896 gallons per year. Domestic water use for the average household is 70,260 gallons per year and landscape water use is at a minimum of 75,208 gallons per year. This leaves 217,428 gallons of water for selection of optional landscape elements. Livestock pasture irrigation may require dedication of additional water rights beyond the 1.12 acre-feet/year. Each lot owner is required to incorporate the following list of minimum required landscape elements into their landscaping. No less than 50% of the required landscaping shall be oriented to the front yard of the lot.

The plant selection includes only drought tolerant and low water demand material. Those aspects of the permitted plants contribute to the decreased average annual residential demand for water that is mandated for implementation of this plan.

The landscaping and irrigation plans must be submitted to the Architectural Control Committee for review and approval. This should be done at time of building permits for structures but may also be done separately.

The minimum landscape elements for each lot shall be:

2,000 square feet of lawn area. Half of which can be in the rear yard.
5 evergreen or deciduous trees within the front yard setback (1 must be a specimen tree, (15 gallon minimum); 5 deciduous or evergreen trees within the building envelope (15 gallon minimum); 12 evergreen shrubs (1 gallon minimum); and 12 deciduous shrubs (1 gallon minimum.)

A minimum of five (5) trees are required within the front yard(s) as defined by Washoe County Code. Plant material per neighborhood, should be kept similar to strengthen neighborhood unity and identity. (Refer to Figure 3-A, page 11)

For a list of suggested shrub/groundcover and trees for home owner review, see Appendix A.
The required landscape elements, plus the estimated domestic water use, utilize approximately 147,468 gallons per year. 217,428 gallons per year remains for optional use.

<table>

<td>gal.</td>
<td>gal.</td>
</tr>
</tbody>
</table>

Table 2A provides a list of optional water use estimates for differing types of landscaping. These may be used in any combination on any lot provided the water allocation per lot is not exceeded. The intent is to mandate compliance with the designated water allocation while at the same time providing alternatives to permit variety in individual landscape designs. The plant selection includes only drought tolerant and low water demand material. Those aspects of the permitted plants contribute to the deceased average annual residential demand for water that is mandated for implementation of this plan.
Selection of materials should contain a mixture of plants with fast, medium and slow growth rates and a variety of sizes should be planted to provide a more natural appearance.

All surface water drainage ways within the subdivision shall be graded to resemble a natural drainage swale and incorporated in the overall design. There will be no linear, uniform width drainage ways. Drainage ways should be lined with native wildflowers, grasses, shrubs, and scattered rocks and boulders to slow water velocities.

The amount of water required for one acre of pasture irrigation is 4 acre-feet/year. For 1 ¼ acres of pasture, a total of 5 acre-feet/year is required. As many as 5 acre-feet/year per lot of water rights may be permitted through the State Engineers Office. These water rights will be used to irrigate the pasture and/or livestock on each lot.

Table 2A

<td>29,645 gallons</td>
</tr>
</tbody>
</table>

The Water Allocation for Pasture applies only when additional water rights have been purchased from a private party and transferred to the receiving parcel by the State Engineer.

As long as no more than 1,800 gallons per day are utilized, additional optional landscaping may be installed. The total utilization does not equal 364,896 gallons due to the fact that much less water is used during the winter months. (Refer to Optional Landscape use Table 2-A)

Additional information on the constraints placed upon the use of water and the standards employed are located within the Warm Springs Specific Plan (WSSP) are included with this document as Appendix B, Excerpted and Abridged Information from the Warm Springs Specific Plan.
Maintenance
All plant material and lawn areas shall be kept in healthy condition. Any dead plant material shall be removed and replaced within 30 days.

References
Appendix B includes an abridged excerpt from the Warm Springs Specific Plan that explains the water budget for the hydrographic basin and provides part of the rationale for stringent landscaping and irrigation requirements. The excerpt has been slightly amended from the text of the actual plan to reflect some updates and actions by the State Engineer.

Revegetation of Open Space/Drainage ways
All open space areas, other than those in agricultural use, shall be left in native material.

Areas designated as Open Space that are currently in agricultural use will allow grading. If noxious weeds are in abundance, the owner may employ a weed management plan developed by an appropriate land reclamation specialist. As development occurs and agricultural practices are abandoned, it will be the property owner’s responsibility to ensure that these areas will be over-seeded with a native grass mixture as described in Table 3, page 14. A gradual transition of plant material is desired.

The soils and precipitation in Warm Springs Valley greatly reduce plant species available for revegetation. The species selected will survive with no supplemental irrigation water being applied after establishment. After two years, there will not be any temporary water to the revegetation. The revegetation seed mix should be tied to the agricultural soils and modified as recommended by the seed company.

Indian Ricegrass must be drill seeded at 3-4 inches below the surface. Pubescent Wheatgrass and Globe Mallow should be drill seeded to a depth of one-half inch below the surface. Kochia and Winterfat should be hydro seeded.

Basin Wildrye (Alyssum cinereus) should be substituted for ricegrass in clay soil areas. Wildrye is not adapted to shallow soils and placement should be monitored. The seed should be drill seeded no deeper than 1/2 inch below the surface. Wildrye will require more supplemental irrigation water than ricegrass during the first year, but once established well survive with no additional water.

Seeding should be completed during late fall. This will assure seed is placed ready to germinate when soil moisture and temperature conditions are ideal the following spring. Temporary above ground irrigation is not recommended but may be necessary in order to establish plants if seed is installed during summer months.
To improve establishment chances, seeded area should be hydro mulched at a rate of 1,000 lbs./acre with 180 lbs./acre of tackifier added. Supplemental irrigation water can be applied the first growing season. Irrigation should be light and infrequent. This will promote root development that will be essential once irrigation water is eliminated. Water used for this purpose must be deducted from the given available water. After the system is abandoned, the water may be relocated to other uses.

Irrigation

Irrigation Requirements

Each residential lot will be required to install an irrigation system with automatic controller and backflow prevention device to meet Washoe County/State health codes. The irrigation system shall include an overhead spray system for any turf areas, with uniform head to head coverage and matched sprinkler head precipitation rates. Temporary irrigation systems may be in use for two (2) seasons only. The system shall also include a drain down method for winterization. All trees, shrubs, and ground covers shall be watered with standard controllers allowing each tree, shrub, or ground cover to be watered with individual drip emitters or collectively in groups with micro sprayers.

Landscape and Irrigation Plan Submittal Requirement

Each future homeowner or builder will be required to submit landscape, grading, and irrigation plans to Homeowners Association and the Architectural Review Committee for approval as a part of the building permit application process. The plans shall be prepared by a qualified landscape industry professional, landscape contractor, or a landscape architect.
The landscape plan shall include a site base map prepared to a 1"=20' minimum scale with the house and driveway footprint, property lines, utility locations, etc. This base map must clearly show proposed landscape areas with square footage area calculations to meet the water usage requirement specified in this document. In addition to the above, the landscape plan must include:

- A plant species list keyed to plant locations on the plan. The plant list must include plant sizes and quantities;
- The amount of water calculated for established landscape;
- An indication of surface material(s) in non-landscaped areas; and
- Agricultural soils test results and proposed soils improvement/amendment methods.

The irrigation plan shall be prepared to scale on the same base map as the landscape plan. The irrigation plan must include the following:

- Point of connection to water source;
- Location, type of installation detail of backflow prevention device;
- Remote control valve location, manufacturer’s name, product number, size and gallons per minute for each lateral zone;
- Irrigation main and lateral line type, size, and depth of bury;
- Sprinkler head locations, manufacturer’s name, product number, nozzle size and number, radius gallons per minute and pounds per square inch (psi) operation rate;
- Drip system valve locations and sizes, lateral line type and location, emitter type, product number, and amount per plan and;
- Controller’s manufacturer’s name, product number, and installation location.

The grading plan shall be prepared to scale on the same base map as the landscape and irrigation plan. The grading plan must include the following:

- Limits of grading and construction;
- Dust control plan/permit measures required by Washoe County Code;
- Existing and proposed contours, including berms for energy conservation and drainage away from structures;
- Paving or surface treatment for walkways and driveways;
- Location and type of temporary fencing to protect open space and native vegetation from construction traffic; and
- Revegetation of disturbed areas, seeding quantity, and need for temporary irrigation.

The revegetation seed mix should be tied to the agricultural soils test and modified as recommended by the seed company.
Maintenance
All irrigation systems shall be maintained in good operating condition. The irrigation system shall be extended to any new plant material at the time of installation.

Within twelve (12) months of completion of the main dwelling unit, each lot or parcel shall be completely landscaped with automatic irrigation systems in place and operating. All landscaping shall be maintained to harmonize with and sustain the attractiveness of the development.

Fencing
General Considerations:
All property from the building envelope to the street shall be kept free and open. Fencing will be consistent within the neighborhood for this development. Wood fencing will be treated with a light or medium brown stain that will increase wood durability. Stains should be consistent in tone on the individual properties but no one property will be required to match exactly with neighbors. Owners are required to keep fencing in good working order and have a well-maintained appearance. The type of fence will be controlled by the Architectural Review Committee.

Solid Wood or Synthetic Material (with the appearance of wood) Privacy Fence:
Privacy fence with a height of up to 6 feet may be constructed within the building envelope as long as it is limited to the rear of the house. Such a fence may be used in the side yard for screening such features as RV storage area, satellite dishes, trash receptacles, fuel storage tanks, dog runs, or a patio. Otherwise, side yards will not be enclosed with a privacy fence. Fences should tie into a structure or other terminus point. (Refer to Privacy Fencing, page 19 under Figure 5.)

Open Ranch Style Fencing:
May be used in the side and rear yards within the building envelope, transition zone, or open space, may be used to define space and circulation areas or accent gardens and will be limited to no more than four feet in height. (Refer to Split Rail Fencing, page 19 under Figure 7) The fencing should be of a consistent height and end at some transition point such as the house. The fencing may be stained but not painted.

White Rail Synthetic Material Fencing:
This material may be used to enclose pasturelands, stable runs, corrals, and the perimeter of the property other than in the front yard area between the residence and the street. (Refer to White Rail Fencing, page 19 under Figure 6.) White rail PVC fencing may also be constructed within the designated building envelope in substitute for the Open Ranch Style Fencing. Fencing for pasture beyond the limits of the building envelope will not be permitted unless pasture is established and grasses are irrigated in accordance with Table 2A, (page 12). Under this scenario, pasture fencing may be the white PVC rail and the irrigated pasture area should adjoin the building envelope on a least two sides.
Chainlink Fence, Woven Wire, or other wire fence:
This fence material may be used for backyard pet enclosures, vegetable gardens, or swimming pools. (Specialty fences, in accordance with Washoe County Code.) The wire fencing, posts, and rails will be vinyl or plastic coated in a color to harmonize with building colors, or be a dark brown or black. No barbed wire fencing will be allowed.

Exterior Lighting.
The functional objectives in providing exterior area lighting are to illuminate areas necessary for safe and comfortable use. In certain situations, area lighting can add to the aesthetic appeal of a site by highlighting architectural features of a building or illuminating pathways and landscape plantings. In these instances, only the special features of a building or landscape should be illuminated: it should be noted that the standards and guidelines contained in this section address area lighting on individual properties, and not overhead street lighting along public and private rights-of-way.

Standards.
Exterior lights shall not blink, flash, or change intensity. String lights, building or rooftop tube lighting, reflective or luminescent wall surfaces are prohibited. Exterior lighting shall not be attached to trees except for the Christmas season. Driveway, walkway, and building lights shall be directed downward. Fixture mounting height shall be as low as possible and appropriate to the purpose illumination for aesthetic or dramatic purposes of any building or surrounding landscape utilizing exterior light fixtures projected above the horizontal is prohibited. Seasonal lighting displays and lighting for special events which conflict with other provisions of this section may be permitted on a temporary basis.

Guidelines.
Lighting Design
Exterior lighting should be designed as an integral part of the architecture and landscape and should be located in a manner that minimizes the impact of lighting upon adjacent structures and properties.

Lighting Levels
Avoid consistent overall lighting and overly bright lighting. The location of lighting should respond to the anticipated use and should not exceed the amount of light actually required by users. Lighting for pedestrian movement should illuminate entrances, changes in grade, path intersections, and other areas along paths, which if left unlit, would cause the user to feel insecure. Lighting suppliers and manufacturers have lighting design handbooks that can be consulted to determine fixture types, illumination needs, and light standard heights.

Fixture Design
Exterior lighting fixtures should be simple in design and should be well integrated with other architectural site features.

Structural Lighting
Night lighting of building exteriors should be done in a selective fashion: highlight special recognizable features; keynote repeated features; or use the play of light and shadow to articulate the facade. The purpose of illuminating the building should be to add visual interest and support building identification. Harsh overall lighting of a facade tends to flatten features and diminish visual interest.

Lighting Height
As a rule, the light source should be kept as low to the ground as possible while ensuring safe and functional levels of illumination. Area lighting should be directed downward with no splay of lighting directed off-site. The height of light fixtures of standards must meet Washoe County standards. Lighting should be directed downward in order to avoid sky lighting. Any light source over 10 feet height must incorporate a cutoff shield to prevent the light source from being directly visible from areas off-site. The height of luminaries should be in scale with the setting.

Permitted Land Uses.
High Density Rural
Minimum Lot size 2.5 acres.

Construction of Extension of Grass Valley Road.
Grass Valley Road will be constructed to Palomino Valley General Improvement District standards, for their consideration for acceptance and maintenance.

ATTACHMENT A
Legal Description

All that real property situated in the County of Washoe, State of Nevada, described as follows;

Parcel 16-2-1-1, as shown on Record of Survey map filed in the office of Washoe County Recorder, Washoe County, Nevada on October 29, 1975, under file No. 383409, 383410 and 383412 and Division of land map filed October 29, 1975, under file No. 383418, Palomino Valley Unit 1.

A portion of the North West ¼ Sec 16 township 22 North, Range 21 East M.P.E. & M; in the county of Washoe, state of Nevada, being more particularly described as follows;

Commencing at the NW corner of Sec 16; then South 89 Degree 28' 24" East, 46.12' thence S 89 Degree 28' 26E 2,603.98 feet thence N 1 Degree 01' 36E 1,321.95 feet, thence S 89 Degree 29' 20" E 2,025.00 feet thence North 416.50 N 31 Degree 21' 36" West 1,066.96 feet to true point of beginning.

APPENDIX B

EXCERPTED AND ABRIDGED INFORMATION FROM THE WARM SPRINGS SPECIFIC PLAN

WATER BUDGET

INTRODUCTION
The Specific Plan Area (SPA) is within the Warm Springs Valley Hydrologic Basin No. 84. The average annual precipitation in the basin is estimated to be 9.76 inches. There are no perennial streams in the SPA, but intermittent external drainage to Pyramid Lake does exist. The Nevada State Engineer has designated the Warm Springs Valley Basin as an area requiring additional water resource supervision. Various reconnaissance level studies have been conducted to estimate the potential amount of groundwater resources in the basin.

In general, an estimate of the available water resource and the current consumption patterns will be used to identify the total number of residential dwelling units and commercial or quasi-public uses that can be served from the available supply. Land areas have been identified based on the maximum number of residential dwelling units and desired development densities achievable based on the water available to the SPA and the location of existing water rights. The total number of acres assigned to each land use category, with appropriate allowance factors, will provide an adequate base to develop the projected number of residential units at buildout.

It is important to recognize that new techniques are being developed to improve the prediction of safe groundwater yields. The estimates used in this plan will probably be superseded with new information resulting in the need for refined land use allocations. This water budget, therefore, is a useful tool for generating a plan for the Warm Springs SPA, but it should not be considered as the final water budget for the basin.

Specific Plan 3,000 ACRE FEET PERENNIAL YIELD
The position of the State Engineer is that only the Water Resources Reconnaissance Series Report No. 43 can be used to establish the perennial yield for the basin. This report specifies 3,000 acre-feet as the perennial yield. The perennial yield is the amount of water that is naturally replenished when a long-term average is considered.

The following table, Table A-4, establishes the water allocation for the SPA when 3,000 acre-feet is used as the planning perennial yield. The table summarizes the Warm Springs Area Plan Water Budget, and details the allocation remaining for the SPA.

Residential

According to the current Warm Springs Area Plan, the subdivision of parcels creating new residential lots on individual domestic wells will require the dedication of 2.5 acre-feet/year (AFY) of water rights to Washoe County. The residential section of the budget is based on allocating water available per residential lot on an individual well at 1.12 acre-feet/year. This number is based on a mandatory water conservation program with low water demand vegetation landscaping and low demand water fixtures in the "Warm Springs Area Plan" of the Washoe County Comprehensive Plan dated December 3, 1991, page 5B, paragraph 2 and Action Program WS.4.6.1.

The water use calculation is based on the following water consumption elements:

1. Domestic Use
   
   a. The average per capita domestic water use (not including irrigation), is 77 gallons/person/day. This is based on a non-conserving household. A conserving household using water conservation fixtures will reduce the domestic per capita water use to 60 gpd. Using current technology, ultra low flow fixtures could reduce domestic per capita water consumption to 52 gpd. (Source: "Residential Water Conservation Project, Summary Report" by Brown and Caldwell, June 1984.)
   
   b. The average household size is projected to be 2.5 persons.

   \[\text{77 gallons/day} \times 365 \text{ days} \times 2.5 \text{ people} = \]

   \[70,262.5 \text{ gallons/house/year} = \]

   0.216 AF/house/year

   c. A monitoring system will be required to determine actual use and mandate design and allocation changes based on actual use. The monitoring system should include tensiometers on trees/shrubs at sample facility.

2. Landscape Irrigation Use
   
   a. Lawn Watering

   The watering requirements for the Warm Springs area are determined as follows:
Water 0.5" twice per week for 16 weeks; water 0.75" twice per week for 12 weeks during the summer months. For a 100 square foot lawn area, we used the following calculation:

\[-5 \times 2 \times 16 \times .62^* = 9.92 \times 100 = 992 \text{ gallons}\]

\[.75 \times 2 \times 12 \times .62^* = 14.16 \times 100 = 1,116 \text{ gallons}\]

\[.41" \times \text{water applied to one square foot surface area} = .62 \text{ gallons}\]

b. Trees and Shrubs

The shrub and tree water consumption budget figures were determined using the following method:

The bermed saucer watering area of a mature tree was determined to be 4' diameter (3' for mature shrubs). The area of a 4' diameter saucer equals 12.5 square feet (7 sq. ft. for shrubs). The square footage area was multiplied by two feet to represent the preferred depth of watering to promote deep rooting and resistance to adverse conditions. This number represents cubic foot volume of soil to be watered which is multiplied by the water holding capacity of the soil (1.33 gallons per cubic foot of clay loam soil, Source: "Effectively Irrigating Landscape Trees" by Janet Harlin). The resulting number of gallons represents the amount of water to be applied per watering:

mature tree (12.5 s.f. x 2 x 1.33 gallons = 33.25 gallons) mature shrub (7.0 s.f. x 2 x 1.33 gallons = 18.60 gallons)

The watering frequency was determined as follows:

For an evergreen tree or shrubs, water twice per week for the 12-week summer season, once per week for the remaining 16 weeks of the growth season and twice per month for the additional five months of the year.

evergreen trees and shrubs (2 x .12) + (1 x .16) + (2 x 5) = 50 waterings

For a deciduous tree or shrubs water twice per week for the 12-week hot summer season and once per week for the remaining 16 weeks of the growth season. No additional water is required for the winter months.

deciduous trees and shrubs (2 x 12) + (1 x 16) = 40 waterings

The per tree water consumption budget figures are then derived by multiplying the amount of water per application times the watering frequency =

evergreen tree 33.25 gallons x 50 waterings = 1,662 gallons

evergreen shrub 18.60 gallons x 50 waterings = 930 gallons

deciduous tree 33.25 gallons x 40 waterings = 1,330 gallons

deciduous shrub 18.60 gallons x 40 waterings = 744 gallons

We have averaged the yearly water consumption of mature deciduous and evergreen trees to determine the budget amount per tree in our figures (1,496 gallons). The average yearly water consumption of mature deciduous and evergreen shrubs equals 837 gallons.
c. The intent of the plan is to mandate compliance the per lot water allocation while at the same time providing alternatives to permit variety in individual landscape designs. The following chart provides a list of optional water use estimates that can be used in any combination on any lot provided the water allocation per lot is not exceeded.

</tbody>
</table>

3. Animal Use

Livestock uses an average of 20 gallons of water per day:

\[20 \times 365 = 7,300\text{ gallons/animal/year}\]

Per Policy WS.3.1.A, uses such as pastures, require dedication of water rights in addition to domestic rights.

4. Residential Water Use

Residential water usage figures by average lot size are fisted utilizing the following water demand figures.

Lawn: The water requirement for lawn areas is as follows:

Water 0.5" twice per week for 16 weeks and water .75" twice per week for 12 weeks during summer months

\[\begin{align*}
\text{gallons per 16 weeks} & = \frac{.50 \times 2 \times 16 \times .62^*}{12} = 9.92 \times \text{sq. ft.} \\
\text{gallons per 12 weeks} & = \frac{.75 \times 2 \times 12 \times .62^*}{12} = 11.16 \times \text{sq. ft.}
\end{align*}\]

(*) 1" of water applied to one square foot surface area = .62 gallons)

Tree: Number trees \(1,496\) = gallons per season

\[1,496 = \text{an average of deciduous and evergreen trees from Table A-8}\]

Domestic Use: Average household gallons per day based on 2.5 persons per household.

- 2 acre and larger - 4.12 acre feet/year = 364,930 gallons
The recommended limit of lawn area for the 2 – 2 1/2 acre or larger lots is 4,000 square feet.

\[
\begin{align*}
9.92 \times 4,000 &= 39,680 \text{ gallons} \\
13.86 \times 4,000 &= 55,440 \text{ gallons} \\
84,320 \text{ gallons}
\end{align*}
\]

The plan requires five trees per lot:

\[
5 \times 1,496 = 7,480 \text{ gallons}
\]

Domestic use = 70,260 gallons

162,960 gallons

364,930 gallons

-162,960 gallons

202,870 gallons

Optional uses: This leaves 202,870 gallons for selection of optional landscape elements (see Table A for landscaping usage figures).

5. Irrigation Requirements

Each residential lot will be required to install an irrigation system with automatic controller and backflow prevention device to meet Washoe County/State health codes. The irrigation system shall include an overhead spray system for all turf areas, with uniform head to head coverage and matched sprinkler head precipitation rates. The system shall also include a drain down method for winterization.

All trees, shrubs, and groundcovers shall be watered a drip system with a separate control clock or a dual program controller. Each tree, shrub, or groundcover shall be watered with individual drip emitters or collectively in groups with micro sprayers.

End of Excerpt
APPENDIX C
APPENDIX D
DEVELOPMENT AGREEMENT
Washoe County and LW Land Company, LLC

This Development Agreement (the "Agreement") is effective on the date of recordation by Washoe County of this Agreement following its adoption by ordinance by the Washoe County Board of Commissioners ("Effective Date"); and is entered into by and between Washoe County, Nevada (hereinafter "County") and LW Land Company, LLC its agents and successors including developers and eventual subdivided-parcel-owners (hereinafter "Owner") (collectively hereinafter the "Parties").

WITNESSETH:

WHEREAS, the County is authorized, pursuant to Nevada Revised Statutes ("NRS") §278.0261, et seq., and Washoe County Development Code ("Code") 110.814.00, et seq., to enter into binding development agreements with persons having legal or equitable interests in real property for the purpose of establishing and strengthening long range plans for property development and providing for developer funding of certain public facilities to serve new development;

WHEREAS, Owner represents that he has complete and sole fee title ownership of the subject real property, the legal description of which is set forth on Exhibit "A" attached hereto and shown in the next identified exhibit (hereinafter the "Property");

WHEREAS, Owner has submitted and County has tentatively approved the initial preliminary parcel maps for development of the Property ("Project"), copies of which are attached hereto as Exhibit "B" ("Maps"), and the expiration dates of which were recently extended by the parties until October 10, 2017 pursuant to an "interim development agreement" and ordinance approved by the County;

WHEREAS, the Parties desire to enter into this Agreement in accordance with NRS and Code, as applicable, to promote the health, safety and general welfare of the County's inhabitants; to help provide some public services, uses and infrastructure, for which Owner voluntarily offers to pay, to secure to Owner certain land development safeguards and rights; and to achieve the goals and purposes for which development agreement law was enacted;

WHEREAS, it is further the Parties' desire that this Agreement satisfy certain of the infrastructure and development provisions of the County's specific plan for part of the general
WHEREAS, the County is underway with a review and update of the formal area plan for the general Warm Springs area ("Area Plan"), which may produce significant changes to the WSSP this year, including possible updated fees and schedule, different development vision, and altered infrastructure needs and financing structure.

NOW, THEREFORE, the Parties agree as follows:

1. **Incorporation of Recitals.** The foregoing recitals are incorporated herein by this reference and shall aid in the interpretation of this Agreement.

2. **Permitted Uses, Density, Height, and Size of Structures.** Pursuant to NRS 5278.0201 and Code 5110.814.20, this Agreement must set forth the maximum height and size of structures to be constructed on the Property as well as the density of uses and the permitted uses of the land. The Parties agree that the Property shall be divided and the Project constructed strictly for single residential purposes in accordance with the Maps, the WSSP, the Code, and the NRS all in effect on the date of the County's tentative parcel map approval of the Maps and as reflected in this Agreement, including its attached exhibits. Owner shall subdivide to a density only as shown on the Maps. However, Owner and his successors reserve the option to further subdivide the Property and its parcels in the future, pursuant to then existing law, if and when the WSSP, Area Plan, Code and the Washoe County Health Department permit it. This Paragraph 2 is, however, made subject to the provisions of Paragraph 6 below.

3. **Development And Infrastructure.**

   3.1 **Development Standards-Handbook.** The Parties have jointly drafted, in accordance with the Code and WSSP, the Project's Development Standards Handbook ("Handbook"), which is attached hereto as Exhibit "C" and incorporated herein by this reference. Construction and use of the Project shall be in accordance with the Handbook.

   3.2 **WSSP-HOA & CC&Rs.** As set forth in the WSSP, the Property shall be made subject to a master homeowners' association and master declaration of covenants, conditions and restrictions ("cc&rs") governing the entire WSSP area for the purposes identified in the WSSP, until the related WSSP requirements are modified or repealed, if at all, through the Area Plan update process. The association and the cc&rs shall be completed to the satisfaction of the County Community Development Department and the Washoe County District Attorney.

   3.3 **Disclosure Statement.** The Parties have jointly drafted, in accordance with the Code and WSSP, a Disclosure Statement ("Disclosure"), which is attached hereto as Exhibit "D" and incorporated herein by this reference. The purpose of the Disclosure is to provide all buyers specific information about certain aspects of the WSSP and this Agreement, and how those may affect their long-term ownership. The Disclosure is not intended to be comprehensive in all aspects of the acquisition of certain parcels. It is meant to only provide basic information about aspects of the WSSP and this Agreement that are required to be disclosed. A signed and notarized copy of the Disclosure must be provided to all future property owners and must accompany all building permit applications submitted to the County. The purpose of this
requirement is to ensure that all future owners of property within the Warm Springs community are aware of the requirements of the WSSP and this Agreement.

3.4 Water and Septic. Owner does not intend at this time to subdivide at any greater density than as shown on the Maps, which permits Owner to install septic and well facilities on each new parcel instead of connecting to community water and sewer facilities likely to be built by another area property owner known as the Warm Springs Ranch. Owner waives connection to community water and sewer systems at this time. Owner shall install the referenced septic and well facilities pursuant to applicable law and regulations existing at the time of issuance of each of the related well and septic permits. Owner and his successors may in the future connect to a community water or sewer system, pursuant to then-existing law, if and when the WSSP, Area Plan, Code and the Washoe County Health Department permit it.

4. Financing.

4.1 Infrastructure Related Fees.

4.1.1 Fee Commitments. Owner offers to and agrees hereby to pay all fees described in this Agreement and its exhibits. The duty to pay said fees and any increased or decreased fees negotiated as mentioned below, shall run with the Property and be binding upon and inure to the benefit of the successors and assigns of the Parties. These fees shall be paid to County on or before the time of the recording of each final parcel map.

4.1.2 Fee Area. The area encompassed within the WSSP is hereby designated as the "Fee Area" for the imposition of fees and the collection of funds under the provisions of this Agreement.

4.1.3 Special Fee Revenue Fund: Except as otherwise specifically provided in this Agreement, all fees collected pursuant to this Agreement shall be placed in a special, segregated, interest-bearing revenue fund (a "Special Fund") for each fee category and shall be used solely for the purpose of constructing the applicable Capital Improvements or providing refunds or reimbursements (as defined in Paragraph 4.6 herein) in accordance with this Agreement. The County, through its Director of Community Development and/or its Finance Director, shall maintain detailed records to identify the development(s) from which fees were collected, for which purpose and how said fees were spent.

4.1.4 Fee Changes. So long as the Project does not change from the use described in the Maps and conditions thereto, and except as otherwise provided in this Agreement, the fees set forth in this Agreement shall not increase without the written consent of the Parties except that the fees shall be adjusted to reflect changes in actual construction costs, but only as such costs are adjusted during the regular review of the Capital Improvements Program (CIP) for the WSSP. The CIP is attached as Exhibit "B," entitled Financing Concept Plan for the WSSP, and is incorporated herein by this reference. Notwithstanding this, Owner's fee obligations as defined in this Agreement may be altered or repealed, but not increased, subject however to Paragraph 3 below, by the update to the Area Plan and WSSP, possibly to include refunds of certain fees paid. Owner understands and agrees that no guarantee is expressed herein by the County, and that this Agreement does not affect the update process nor ultimate amended Area Plan and WSSP in any respect whatsoever.
4.2 Fees — Roads, Drainage, Planning, Water, Parks, Open Space, and Utilities. At the recording of each final map for any phase of the Project, the fees set forth in this Agreement shall be paid by Owner to County as follows:

4.2.1 Roadway Fees. Owner agrees to pay to the County all roadway fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Roadway Fees"). These fees shall be set aside in a Special Fund specifically for the construction of the first phase of the Spine Road or other collector roads as defined in the phasing plan for roadways set forth in Exhibit "E", County shall disburse these fees for the purpose of design and construction of the roadways or to reimburse Owner if Owner constructs collector roads to County specifications. These fees are separate and apart from the Regional Road Impact Fee (RRIF) (Paragraph 4.3.1), which is collected at building permit. The Roadway Fees are also separate and apart from the property owners' current fees collected by PVGD for the maintenance of public roadway easements.

4.2.2 Storm Drainage Fees. Owner agrees to pay to the County all storm drainage fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Drainage Fees"). These fees shall be set aside in a Special Fund specifically for the construction of Spine Road Drainage Improvements as defined in the plan for storm drainage set forth in Exhibit "F". These fees shall be reimbursed to Owner only if Owner constructs said drainage improvements to County specifications.

4.2.3 Planning Fees. Only those planning fees paid pursuant to this Agreement (hereafter "Planning Fees") shall be placed in a Special Fund specifically for the repayment of certain planning costs incurred by particular property owners as noted in the CIP. (Page G-xxii of Appendix G of the WSSP). Owner shall be credited Planning Fees as noted in the Fee Schedule attached as Exhibit "F". Pursuant to Paragraph 4.6.2 below, all Planning Fees accumulated in the Special Fund shall be used to reimburse said particular property owners who paid the cost of preparing the WSSP. Owner would otherwise pay Planning Fees as shown in the Fee Schedule (Exhibit "F").

4.2.4 Community Water System Fees. Owner agrees to pay to the County all community water system fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Water System Fees"). These fees shall be placed in a Special Fund specifically for the purchase of land for, as well as the design and construction of, the Community Water System as defined in the plan set forth in Exhibit "E". All Water System Fees accumulated in the account shall be applied by the County or other government entity to design and construct this water system or used to reimburse Owner if Owner constructs said system to County specifications.

4.2.5 Parks and Open Space Fees. Owner agrees to pay to the County all parks and open space fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Park Fees"). These fees shall be placed in a Special Fund specifically for the purchase of land for, as well as the design and construction of, certain parks and open space as defined in the plan set forth Exhibit "E". All Park Fees accumulated in the account shall be applied by the County or other government entity to design and construct the parks and open space or used to reimburse Owner if Owner constructs said parks and open space to County specifications. The Park Fees are separate and apart from the Residential Construction Tax (Paragraph 4.3.2 below), which is collected at building permit.
4.2.6 Public Facilities Fees—Police and Fire. Owner agrees to pay to the County all public facilities' fees shown in the Fee Schedule for the Project attached hereto as Exhibit "E" (hereafter "Facilities' Fees"). These fees shall be placed in a Special Fund specifically for the purchase of land for, as well as the design and construction of, the police and fire public facilities otherwise known in and defined in Exhibit "E" as "Community Facilities". All Facilities' Fees accumulated in the account shall be applied by the County or other government entity to design and construct these public facilities or used to reimburse Owner if Owner constructs these facilities to County specifications.

4.3 Existing RTC and County Fees.

4.3.1 Existing RTC Regional Road Impact Fee (RRIF). Owner understands and agrees that in addition to the Roadway Fees discussed in Paragraph 4.2.1 above, the Project is subject to the current RRIF, which shall be paid by Owner to County pursuant to applicable RRIF law at issuance of building permits.

4.3.2 Existing Park Residential Construction (RCT). Owner understands and agrees that in addition to the Park Fees discussed in Paragraph 4.2.5 above, the Project is subject to the current RCT fee schedule, to be paid by Owner to County pursuant to applicable RCT law at issuance of building permits, or as otherwise may be lawfully agreed to in by Washoe County Department of Regional Parks and Open Space. If Owner constructs the parks and open space to County specifications, then Owner shall be credited or refunded in accordance with such procedures for credit or refund.

4.4 Credits. The County's Director of Community Development shall make determinations of credit in accordance with this Agreement. Credits apply only to the respective Special Fund set forth in Paragraph 4.2 above and shall not be transferable to other Special Funds. Credits may only be used upon substantiation of the completion of improvements, or in the case of planning fees, evidence of payment of fees.

4.4.1 Credits for Roadway Fees, Drainage Fees, Water System Fees, Park Fees, and Facilities' Fees. Credit against fees paid to Special Funds shall be based on the actual cost of the provision of those facilities or the independently appraised value of the dedication, whichever is applicable. The actual cost or value shall be credited against the total amount due based upon the Per Fee Unit that is established by this Agreement and identified in Exhibit F hereeto.

4.4.2 Credits for Planning Fees. Only those particular property owners who paid the cost of preparing the initial WSSP or their successors, shall be eligible for Planning Fees credit. Owner is eligible for Planning Fees' credit as one of the original payees and the total amount of credits for the Maps, assuming all parcels are recorded, is estimated at the amount set forth in Exhibit F hereeto.

4.5 Credit Waiver. Owner must apply any Credits at the time of the filing of a final parcel map. Owner's failure to do so for a particular final map shall be deemed a waiver of those Credits to that particular final map. Said Credits may be used on future parcel maps.

4.6 Refund/Reimbursements of Fees.
4.6.1 Refunds. Except as otherwise provided in this Agreement, upon completion of that category's capital improvements as identified in the CIP for the entire WSSP area, the County shall refund to current WSSP property owners all remaining fees in that category's fund (the "Refund"). Less an administrative fee equal to the administrative costs incurred by the County. Refunds may be awarded only if the Director finds from all circumstances and evidence that: (i) the actual cost of all improvements made in that category of CIP improvement is less than all respective fees paid into that category; (ii) excess funds exist in the Special Fund; and (iii) no additional funds are required to complete the respective improvements required within the WSSP.

4.6.2 Planning Fees Reimbursement. In addition to the Credits provided for in this Agreement, the Owner may choose to be reimbursed for the actual Planning Fees paid through a reimbursement (the "Reimbursement"). However, in no event shall the combination of Credits and Reimbursements total more than the actual Planning Fees paid. Any Reimbursement made shall reduce the amount of Credit available. Conversely, any Credit obtained shall likewise reduce the amount of Reimbursement available. A request for Reimbursement shall be submitted by Owner to the County's Community Development Department within 30 days of the postmark date of notice mailed to Owner of the determination of actual costs made by the County's Director of Community Development. Should the Planning Fees Special Fund not have sufficient funds to allow for full Reimbursement, then the County shall repay, on a quarterly basis, from whatever funds have been collected during the preceding quarter into said fund until the full amount of Reimbursement is paid.

4.6.3 Pro Rata Refunds/Reimbursements. If more than one valid application for a Refund or Reimbursement is made and approved, the County shall allocate the funds available for reimbursement between the applicants based on the ratio of the actual costs incurred in each respective fee category or the ratio of the planning fees paid by the applicants.

4.6.4 Director's Decision and Appeals. Administrative decisions regarding Refunds or Reimbursements may be appealed by the affected Owner to the Washoe County Planning Commission by filing with the County's Department of Community Development a statement of the grounds of the appeal within ten (10) days of the postmark date of notice mailed to Owner of the administrative decision. The County's Director of Community Development will schedule such appeal on the Planning Commission agenda for the next regularly scheduled meeting occurring at least twenty-one (21) calendar days after receipt of the appeal statement. If the Planning Commission reverses the decision of the Director of Community Development, it shall direct the Director to recalculate the fee in accordance with its findings. In no case shall the Planning Commission have the authority to negotiate the amount of the fee. If the Planning Commission affirms the decision of the Director of Community Development, the affected Owner may appeal to the County Board of Commissioners within ten (10) calendar days of the Planning Commission hearing by filing a notice of appeal with the County's Department of Community Development. The County shall consider and render a decision on the appeal in a prompt manner.

4.7 Dedication and Maintenance of Facilities. Owner may be required to offer certain facilities, to include roadways, for dedication to the County at the time of the filing of a final map. Dedication of facilities or roadways to PVGID may also be required.
5. **SADs and GIDs.** Owner offers to and hereby agrees to waive protest to participation in any special assessment or general improvement district proceedings and agrees to cooperate fully therewith.

6. **Reliance, Uncertainties and Subsequent Actions.**

6.1 **Reliance by the Parties.** The Parties understand and acknowledge that the other relies upon the assurances, arrangements, and promises set forth in this Agreement and its exhibits, all of which permit the construction and completion of the Project in accordance with the terms of and the uses, densities, heights, sizes and other similar matters defined in this Agreement and its exhibits.

6.2 **Uncertainties.** The Parties understand and acknowledge that circumstances beyond the control of either party could defeat their mutual intent that the Project be constructed in the manner contemplated by this Agreement. Among such circumstances is water availability or other limited natural resources, waste disposal limitations, federal regulation of air and water quality, and the Area Plan update and possible amended WSSP. The parties recognize that unforeseeable circumstances could affect each other’s ability to perform obligations hereunder.

6.3 **Subsequent Actions.** Owner acknowledges and agrees this Agreement does not relieve the from compliance with existing, changed, modified or amended rules, regulations, laws, ordinances, resolutions, fees or codes of other governmental agencies. Such rules, regulations, laws, ordinances, resolutions, fees or codes of governmental entities must be complied with by the Owner and are not locked in nor a part of this Agreement. Owner further acknowledges and agrees this Agreement does not prevent the County in a subsequent action applicable to the Project from adopting different law, provisions or conditions that do not conflict with the terms in and the law governing this Agreement, except that any subsequent action by the County shall not prevent the development of the Project pursuant to this Agreement. It is not the intent of the Parties nor shall this Paragraph be construed as excusing the County of any obligation hereunder or depriving Owner of any right under this Agreement, which can be performed and without impairment of the County’s emergency powers and obligation to obey and enforce state and federal law (Code 110.814.05(c) and (d)).

6.3.1 **Exceptions.**

6.3.1.1 **Amended WSSP.** Notwithstanding this Paragraph 6 and any other contradictory term in this Agreement, Owner understands and agrees that certain possible changes to the WSSP as adopted through the current update process to the Warm Springs Area Plan shall be binding upon Owner, successors and the Property in any matter whether the final map or a building permit has been approved or issued, and Owner agrees to immediately cooperate and comply with such changes as may be contained within the updated Area Plan and amended WSSP. This Paragraph 6.3.1.1 is limited to those certain possible changes to the WSSP that concern homeowners' associations, co-ops, water and sewer, non-paved-road maintenance and related costs and fees. This Paragraph 6.3.1.1 shall also constitute a covenant running with the land of the Property.

6.3.1.2 **Public Health & Safety Law.** Notwithstanding this Paragraph 6 and any other contradictory term in this Agreement, Owner understands and agrees that at the time of submission to the County for any map or permit (including without limitation final maps and building permits) related to the Project the then existing laws (whether local, state or federal)
affecting public health and safety (as typically used for example in the building, health and fire codes' sectors) shall apply. This Paragraph 6.3.1.2 shall constitute a covenant running with the land of the Property.

7: **Conflicting Laws.**

7.1 **Conflicting State or Federal Rules.** In the event that any conflicting state or federal laws or regulations enacted after the date of this Agreement prevent or preclude compliance with one or more provisions of this Agreement or require changes in plans, maps or permits approved by the County, this Agreement shall remain in full force and effect as to those provisions not affected, and the conflicting laws or regulations shall not be applied retroactively.

7.1.1 **Notice and Copies.** Either party, upon learning of any such matter, will provide the other party with written notice thereof and provide a copy of any such law, regulation or policy or an account of any such action or inaction together with a statement of how any such matter conflicts with the provisions of this Agreement; and

7.1.2: **Modification Conference.** The parties shall, within thirty (30) calendar days of the notice referred to in the preceding subsection, meet and confer in good faith and attempt to modify this Agreement to bring it into compliance with any such federal or state law or regulation, or accommodate any such action or inaction.

7.2 **County Commission Hearings.** In the event County believes that an amendment to this Agreement is necessary pursuant to this Paragraph 7, the proposed amendment shall be scheduled for hearing before the County Commission and notice pursuant to law (including NRS 52.78:0203(2)). The County Commission shall determine the exact nature of the amendment or suspension necessitated by such federal or state law or regulation or action or inaction. Owner shall have the right to offer oral and written testimony at the hearing. The Commission's decision is subject to judicial review as set forth in Paragraph 9.3 below.

7.3 **Cooperation in Securing Permits.** County shall use its best efforts to cooperate with Owner in securing any County permits, licenses or other authorizations that may be required as a result of the Commission's decision. It is the responsibility of the owner to pay all applicable fees in connection with securing the permits.

8. **Review, Default and Termination.**

8.1 **Frequency of Reviews.** As required by NRS 278.0705 and Code 110.814.33, at least once every twenty-four (24) months during the term of this Agreement Owner shall provide to the County's Community Development Department and County shall review in good faith a report demonstrating Owner's good faith and material compliance with the provisions of this Agreement and outlining any issues regarding the County's performance during the preceding twenty-four (24) months. The County's Director of Community Development shall promptly report to the County Commission on the topics of the Owner's report and satisfaction of this Agreement. If at the time of review an issue not previously identified in writing is required to be addressed, the review, at the request of either party, shall be continued to afford sufficient time for response.
8.2 Opportunity to be Heard: Any party requesting an opportunity to be heard by the County Commission on this review matter shall be given such opportunity within a reasonable time following submission of the Director's report to the Commission.

8.3 Procedures in the Event of Default. In the event of any default with any provision of this Agreement, the nondefaulting party shall send by regular mail to the other a courtesy notice not less than thirty (30) calendar days prior to declaring a default under this Agreement. This thirty-day period shall be measured from the date of postmark of the notice. The courtesy notice shall detail the alleged default, any action necessary to cure the default and, where appropriate, the manner and period of time in which the alleged default may be satisfactorily cured. During the period of time the default letter is pending, the defaulting party shall not be considered in default for the purposes of termination or institution of legal proceedings. If the default is corrected, then no default shall exist and the noticing party shall take no further action. If the default is not corrected within thirty (30) calendar days, the following shall occur:

8.3.1 Set Hearing Notice and Possible Freeze. The party noticing a default shall set the matter for hearing before the County Commission. This hearing shall occur at the Commissioners' meeting that follows after the minimum seven (7) business days mentioned in this Paragraph 8.3.1 plus the time necessary for publication and notice pursuant to law. Said parties shall send a letter to the other party, by certified mail return receipt requested, and by regular mail, providing notice of intent to present the matter to the Commission, the date set for the Commission's public hearing of same, and notice of at least seven (7) business days before the hearing date of an additional opportunity to correct the default. The seven (7) or more business days will be measured from the date of postmark of the certified and regular mailing of the letter. If the default remains uncorrected at the expiration of these seven days the Commission shall conduct its hearing on the matter. Furthermore, if the owner is the alleged defaulting party then the Director of Community Development may also immediately direct County staff to condition all future zoning, land use, and mapping applications for the Property so that the building permits to be issued as a result of those approvals shall not be issued until the default is corrected, subject to review by the Commission.

8.3.2 Review by County Commission. Following consideration of the evidence presented before the County Commission and a finding based on substantial evidence that a default has occurred by the alleged defaulting party and the default remains uncorrected, the County Commission shall, in the event County is the defaulting party, direct County staff to immediately cure the default, and, if Owner is the defaulting party, the County may amend or terminate this Agreement and/or may require or authorize the suspension of building permits for the Development. Termination shall not in any manner rescind, modify, or terminate any vested right in favor of Owner, existing or received, as of the date of the termination. Should Owner elect to appeal, Owner shall have twenty-five (25) calendar days after the date of the Commission's hearing to institute legal action as set forth in Paragraph 9.3 below to determine whether the County Commission abused its discretion.

8.3.3 Waiver. Failure or delay in giving any notice provided for herein shall not constitute a waiver of any default. Except as otherwise expressly provided in this Agreement, any failure or delay by any party in asserting any of its rights or remedies in respect to any default shall not operate as a waiver of any default or of any such rights or remedies, or deprive such party of its right to institute and maintain any actions or proceedings which it may deem necessary to protect, assert, or enforce any of its right or remedies.
8.4 Unavoidable Delay or Default, Extension of Time for Performance. Neither party, hereunder shall be deemed to be in default, and performance shall be excused, where delays or defaults are caused by war, acts of terrorism, insurrection, strikes, walkouts, riots, floods, earthquakes, fires, casualties, acts of God, restrictions imposed or mandated by governmental entities, failure of governmental agencies (other than County) to perform acts or deeds necessary for the performance of this Agreement, enactment of conflicting state or federal laws or regulations or similar matters beyond the control of the parties. If written notice of any such delay is given to County within thirty (30) calendar days after the commencement thereof, an automatic extension of time, unless otherwise objected to by County within ten (10) business days of such written notice, shall be granted coextensive with the period of the enforced delay, or longer as may be required by circumstances or as may be subsequently agreed to between County and Owner.

9.1 Expiration of Agreement. The term of this Agreement shall be for three (3) years commencing on the date of this Agreement as defined at the beginning hereof. Owner may apply once to the County Board of Commissioners for a two-year extension of this Term, provided that the law and regulations existing at the time of action by the Board to grant the extension shall thereafter govern the Property, the Project, the Maps and this Agreement. The Board’s action shall be at its discretion.

9.2 Amendment or Cancellation of Agreement. Except as otherwise permitted by NRS 278.0205 and this Agreement, this Agreement may be amended from time to time or canceled only upon the mutual written agreement of the Parties.

9.3 Legal Action, Damages and Venue. The County and Owner agree that the County would not have entered into this agreement if it were liable for damages under or with respect to this Agreement. Accordingly, the County and the Owner may pursue any remedy at law or equity available for breach, except that neither the Owner nor the County shall be liable to the other or to any other person or entity for any monetary damages whatsoever. Prior to the institution of any legal action, the party seeking legal action must give the thirty (30) day notice of default as set forth in Paragraph 8.3 above. Following such notice, a public hearing must be held by the County Commission where the allegations will be considered and a decision regarding their merits will be reached. Any judicial review of the County Commission’s decision or any legal action taken pursuant to this Agreement will be heard by a court under the standard review appropriate to court review of zoning actions, and the decision of the County Commission shall be overturned or overruled if its decision is clearly arbitrary and capricious. Judicial review of the decision of the County Commission shall be limited to the evidence presented to the County Commission at the public hearing. Any judicial review or other action to enforce or interpret this Agreement shall occur in and rest exclusively with the Second Judicial District Court, State of Nevada.

9.4 Governing Law. This Agreement shall be construed and enforced in accordance with and shall be governed by the law of the State of Nevada.

9.5 Assignment.

9.5.1 Transfer to an Affiliate of Owner. The rights of Owner under this Agreement may be freely transferred or assigned to any entity, partnership, or corporation, which Owner
controls, or in which Owner has a controlling interest, or which controls. Owner; provided, such entity shall assume in writing all obligations of Owner hereunder.

9.5.2 Third-Party Assignment. The rights and obligations of Owner under this Agreement may be freely transferred or assigned to a third party not affiliated with Owner, provided such third party assumes in writing all obligations of Owner hereunder as to the assigned or transferred portion of the Project along with a copy of the sale, transfer, conveyance, or assignment agreement wherein the third party assumes the obligations of the Owner. Upon any such assignment hereunder, the Owner shall be relieved of all obligations and liabilities under or in connection with this Agreement, in connection with the conveyance of any portion of the Property, Owner shall provide County with written notice of any sale, transfer, conveyance, or assignment of any unimproved portion of the Project.

9.5.3 Financial Transactions. Owner has full discretion and authority to transfer, assign or encumber the Project or portions thereof in connection with financing transactions, without limitation on the size or nature of any such transaction, the amount of land involved or the use of the proceeds there from, and may enter into such transaction at any time and from time to time without permission of or notice to County.

9.6 Indemnity: Hold Harmless. Except as expressly provided in this Agreement, Owner shall hold County, its officers, agents, employees, and representatives harmless from liability for damage or claims for damage for personal injury, including death, and claims for property damage which may arise from the direct or indirect operations of Owner or those of its contractors, subcontractors, agents, employees, or other persons acting on Owner’s behalf, which relate to construction of the Project. Owner agrees to and shall defend County and its officers, agents, employees, and representatives from any claims and actions for damages caused or alleged to have been caused by reason of Owner’s activities in connection with the Project. Owner agrees to indemnify, hold harmless, and provide and pay all costs for a defense for County in any legal action filed in a court of competent jurisdiction by a third-party challenging the validity of this Agreement. The provisions of this Paragraph 9.6 shall not apply to the extent such damage, liability, or claim is solely caused by the intentional or negligent act of County, its officers, agents, employees, or representatives.

9.7 Binding Effect of Agreement. The burdens of this Agreement bind, and the benefits of this Agreement inure to, the parties’ respective successors in interest and shall run with the land until the completion of performance of this Agreement or its earlier revocation or termination as provided herein.

9.8 Relationship of Parties. It is understood that the contractual relationship between County and Owner is such that Owner is an independent contractor and not an agent of County for any purpose.

9.9 Notices. Unless otherwise provided in this Agreement, all notices, demands and correspondence required or provided for under this Agreement shall be in writing and delivered in person or sent by overnight courier or mailed by certified mail postage prepaid, return receipt requested. Notices shall be addressed as follows:
To County:

WASHOE COUNTY
Department of Community Development
Current Planning Division
PO Box 11130
Reno, NV 89520-0027

To Owner:

LW Land Company LLC
A Nevada Limited Liability Company
Brian Murphy
695 Mile Circle Drive
Reno, Nevada 89511

Either party may change its address by giving notice in writing to the other and thereafter notices, demands and other correspondence shall be addressed and transmitted to the new address. Notices given in the manner described shall be deemed delivered on the day of personal delivery or the delivery date by overnight courier or mail is first attempted.

9.10 Entire Agreement. This Agreement constitutes the entire understanding and agreement of the parties. This Agreement integrates all of the terms and conditions mentioned herein or incidental hereto and supersedes all negotiations or previous agreements between the parties with respect to all or any part of the subject matter hereof.

9.11 Waivers. All waivers of the provisions of this Agreement must be by written consent of all parties hereto.

9.12 Recording Amendments. Promptly after County's execution of this Agreement, an executed original of this Agreement shall be recorded in the Official Records of Washoe County, Nevada. All amendments hereto must be in writing signed by the appropriate officers of County and Owner in a form suitable for recordation in the Official Records of Washoe County, Nevada. Upon the completion of performance of this Agreement or its earlier revocation or termination, a statement evidencing said completion or revocation signed by appropriate officers of County and Owner shall be recorded in the Official Records of Washoe County, Nevada.

9.13 Headings, Exhibits, Cross-references. The headings and captions used in this Agreement are for convenience and ease of reference only and shall not be used to construe, interpret, expand or limit the terms of this Agreement. All exhibits attached to this Agreement and the recitals at the front of this Agreement are incorporated herein by the references thereto contained herein. Any term used in an exhibit hereto shall have the same meaning as in this Agreement unless otherwise defined in such exhibit. All references in this Agreement to Paragraphs, Sections and Exhibits shall be to Paragraphs, Sections and Exhibits of or to this Agreement, unless otherwise specified. Copies of the Exhibits shall be retained and maintained by the Department of Community Development at 1101 East Ninth Street, Reno and shall be available for inspection.

9.14 Severability of Terms. If any term or other provision of this Agreement is held to be invalid, illegal or incapable of being enforced by any rule of law or public policy, all other
conditions and provisions of this Agreement shall nevertheless remain in full force and effect, provided that the invalidity, illegality or unenforceability of such term does not materially impair the parties' ability to consummate the transactions contemplated hereby. If any term or other provision is invalid, illegal or incapable of being enforced, the parties hereto shall, if possible, amend this Agreement so as to affect the original intention of the parties.

9.15 Voluntary Agreement. Owner acknowledges that he had the option of conducting this own public facilities needs assessment but instead voluntarily chose to accept the WSSP. Owner further acknowledges and agrees that he voluntarily, willingly and without protest and duress freely enters into this Agreement and accepts the terms and conditions hereinafter.

IN WITNESS WHEREOF, this Agreement has been executed by the parties on the date stated.

Disclosure Statement
DISCLOSURE STATEMENT

Because you are considering the purchase of a parcel of property or a home in the Warm Springs area of Washoe County you need to know about the formal plans and rules that govern your purchase and your use of the property. This Disclosure Statement is required by the Warm Springs Specific Plan (WSSP), which is a formal document adopted by Washoe County for the purpose of planning land development and the public services needed to serve this development.

This Disclosure Statement will not tell you everything you need to know about buying and using property in Warm Springs pursuant to the WSSP. You need to study all documents related to your purchase and legal use of Warm Springs property, which are available from your seller and Washoe County. These documents may include a proposed purchase agreement and escrow instructions, title report, seller’s property advisories, the WSSP, the WSSP Development Standards Handbook, the project-specific Development Standards Handbook, a development agreement with Washoe County, and a possible declaration of covenants, conditions, and restrictions. This Disclosure Statement will attempt to summarize some of the major features of the WSSP and its exhibits.

THE WSSP

There are several attachments to this Disclosure Statement, which convey in summary manner some of the major features of the WSSP. They are referred to as exhibits. Exhibit A is a colored map that illustrates all of the land use types and densities currently approved under the WSSP. Exhibit B is a copy of a part of the Washoe County Development Code (Washoe County Code Chapter 110, Article 302), which displays the legal and illegal uses of both your property and neighboring properties. Exhibit C is a copy of another part of the Development Code (Article 304), which describes the use types set forth in Exhibit B. Exhibit D is a copy of a part of the County’s Area Plan Regulations for the Warm Springs Area (Article 226 of the Development Code).

It is important that you study these exhibits at a minimum and understand what you are allowed to do with your property. Your property is within the area that has been outlined on Exhibit A, and your signature on this Disclosure Statement ensures that you were informed of all land uses permitted on and adjacent to your property as well as within the entire Warm Springs Specific Plan community. Please note that you are agreeing NOT to file any written or verbal complaints or any lawsuits or other legal proceedings regarding any existing legal agricultural uses.

WARM SPRINGS AREA PLAN UPDATE

Washoe County is conducting this year of 2006 a review and update of the formal area plan for the general Warm Springs area (“Area Plan”), of which the WSSP is a part. This update may produce significant changes to the WSSP this year, including possible updated fees and schedule, different development vision, and altered infrastructure needs and financing structure. A few of these possible changes could apply to you now and require certain actions or payments. This is all discussed in the development agreement entered into by your developer/seller and Washoe County, a copy of which is attached as Exhibit E. Please read it now.

DEVELOPMENT AGREEMENT

Exhibit E is the referenced development agreement. It controls what may happen to and on the property you are buying or have bought. It requires, among other things, certain appearances to your home and landscape, the payment of certain fees (which your seller may or may not have satisfied), and your possible participation in a homeowner’s association as well as special assessment or general improvement districts. Please study this agreement.

HANDBOOK FOR DESIGN

All development within the WSSP community must satisfy the minimum criteria established in the WSSP Development Standards Handbook as well as the more specific criteria set forth in the project’s specific development standards handbook created by the developers of the project in which you may be purchasing property. These two handbooks are intended to provide future homeowners and businesses with design guidelines to be followed to conserve natural resources, primarily water supply, enhance the quality of the community, and ensure long-term design consistency and land use consistency, as
envisioned by the WSSP. A copy of this Project's Development Standards Handbook is included as Exhibit F. This handbook is attached to this Disclosure Statement for your reference at the time you prepare to design your future home or business.

INFRASTRUCTURE FEE PAYMENT

The WSSP contains a plan for funding, building and maintaining public services needed for the development of Warm Springs, such as roads, drainage, water, parks, police and fire. This plan is referred to as the financing plan, and it requires payment of fees to cover a proportionate share of these community services. The amount and payment of these fees was established by your property developer in the Development Agreement (Exhibit E). If the property you may purchase is located within a subdivided area in Warm Springs, you will be bound by the development agreement and must pay a fair share at purchase. Note that some of the fees apply only to property that will subsequently be subdivided. Other fees are applicable to parcels that will not be further subdivided.

Attached as an exhibit to the Development Agreement (Exhibit E) is a copy of the Schedule of Fees. The WSSP Development Standards Handbook notes that there will be a yearly escalation of these fees, based upon the Consumer Price Index.

ROADWAY MAINTENANCE

The Palomino Valley General Improvement District (PVGID) will review public roadways, major or minor, for acceptance for maintenance. PVGID probably affects your property. Any private roads must be the responsibility of your homeowners association, if any, and will not be maintained by PVGID or Washoe County.

FUTURE ASSESSMENT DISTRICTS

Please be advised that an assessment district or general improvement district could be created in the future to provide community water service, community sewer service, drainage systems, or roadways in the WSSP area. At the time you file for a building permit, such a district may or may not be in place. The attached waiver (that will require your signature at the closing of your property) will limit your ability to oppose any future assessment district that may be imposed to fund a community water system, community sewer service, drainage system, or roadway construction/maintenance.

ACCEPTANCE

I (we) have read and understand all the provisions of this Disclosure Statement and agree to all the stated provisions.

Financing Concept Plan
GENERAL

The major element of each development agreement to be entered into by a subdividing property owner and Washoe County would be the capital improvement program elements, which have significance within the entire WSSP area, or are required to serve more than one development. These elements form the "backbone" of the infrastructure system. The development agreement identifies specific elements of the infrastructure system that must be funded or constructed prior to issuance of certificates of occupancy by the County. The Capital Improvements Program (CIP) for the WSSP is found in Appendix G of the Warm Springs Specific Plan and is incorporated herein by this reference.

Palomino Ranch Estates
CC&R's
WHEN RECORDED RETURN TO:

LW Land Company LLC
695 Mile Circle Drive
Reno, NV 89511

DECLARATION OF
COVENANTS, CONDITIONS AND RESTRICTIONS
OF
PALOMINO RANCH ESTATES

This declaration made this __________ day of _______________
2017 by LW Land Company LLC ____________________________, a
Nevada Limited Liability Company ________________________, hereafter
referred to as 'DECLARANT'.

WHEREAS, DECLARANT is the owner of that certain real property
located in the County of Washoe evidenced by the certain official
subdivision map recorded in the office of the County Recorder of
the County of Washoe, State of Nevada, on, in Book _______ of
Subdivision Maps, at Page_______, and more particularly described
as Palomino Ranch Estates and

WHEREAS, DECLARANT desires to impose upon said lots mutual and beneficial
covenants, conditions and restrictions under a plan of improvement for
the benefit of all owners and future owners thereof.

NOW THEREFORE, DECLARANT hereby declares that said lots, numbered
_________ through _________ inclusive, are held and shall be held,
conveyed, hypothecated, used, improved and occupied subject to the
following covenants, conditions, restrictions, easements and
agreements which are imposed pursuant to a common plan and are intended
to create equitable servitudes designed to preserve the quality of said
land for the benefit of the various owners thereof, their heirs, successors
in interest and assigns. To wit:
RESTRICTIVE PROVISIONS

1. Use and Improvements

No buildings, other than one detached single-family private dwelling, private garage for the use of the occupants of such dwelling and a barn or other usual and appropriate outbuildings strictly incident and appurtenant to a private dwelling, shall be erected or maintained on any lots, except that a guest house may be permitted subject to County requirements. No use whatsoever, except in connection with its use and improvement as a site and grounds of a private dwelling as above set forth shall be made of any lot or plot therein and furthermore, no driveway, road, right of way, or any easements for public or private use shall be granted for any reason whatsoever, across or through any lot to any other piece of property without complying fully with County requirements.

2. Temporary Dwellings, Outbuildings and Accessory Outbuildings

No trailers, except temporary contractors' trailers used in connection with construction and not provided for dwelling accommodations, tents, garage or other outbuildings shall be used as a temporary or permanent residence, nor shall any residential structure be moved on to the tract from some other location; nor shall "used" lumber be utilized in the construction of any building, whether it be of temporary or permanent nature, unless approved prior to use by an architectural control committee. No accessory outbuildings shall be erected on any lot prior to the erection of a dwelling thereon. In no event shall any such accessory outbuilding, partially-completed or temporary structure ever be used for human occupancy or habitation.
3. Minimum Building Requirements

The construction of all dwellings on all lots, regardless of size of dwelling, must conform to F. H. A. or better specifications. On all lots, no dwelling shall be erected or permitted to remain thereon having a ground floor area, exclusive of open porches and garages, of less than 1,500 square feet for a one-story building, or 750 square feet for a two-story building, with the total size no less than 1,500 square feet.

4. Building Setback Requirements

On lots 10,000 square feet or smaller, building setbacks will vary, providing a more rural atmosphere in the streetscape. No building or projection thereof shall be located nearer than 20 feet to any street or driveway access easement. No building shall be located nearer than 25 feet to any rear lot line. All lots larger than 10,000 square feet will have an established building envelope with a minimum setback of 30 feet. Buildings may be located anywhere within the envelope; however, all buildings, structures or storage of any type, will be confined to this area on each lot. The size and shape of envelope may vary from lot to lot. The envelopes depth and setback will be related to overall lot size. These established setback lines notwithstanding, no structure shall be located nearer than 100 feet from any perennial stream. Areas within 100 feet of said perennial streams shall be maintained in their natural state. In accordance with fish and game codes, the Department of Fish and Game must be notified at least 30 days prior to any activity that alters a stream. Stream crossings and culvert installations are subject to this code section.

5. Heating and Fireplaces

The use of efficient, non-polluting heating systems shall be encouraged within the SPA Primary heating sources for residences
shall be standard conventional electric or propane gas systems distributing heat through ducts within the home. Applicants who prefer stoves as the major heat source in the home will be encouraged to use pellet stoves. Approved pellet stoves will be accepted as a major heat source within the residence. Wood-burning stoves and fireplace inserts are prohibited as a major heat source. Applicants with standard conventional electric or propane heating systems designed for use as the major heat source within the residence will be allowed the installation of one wood stove as a secondary backup heat system, provided the wood stove meets the new County clean-burning, low-pollution standards. Open fireplaces are prohibited except for gas burning fireplaces which have false logs and are used purely for aesthetic purposes and are not considered a heat source within the residence.

5. Architecture

All buildings must incorporate a "Western ranch" theme or identity architecturally, in a manner that is complementary and compatible with the plan area and its surroundings. No mobile homes are allowed except for construction purposes within the SPA. To enhance the development and maintain its rural character, buildings and structures shall adhere to the following guidelines:

a. Exterior Walls and Trim. Wood, brick, stucco, or stone material finishes are required for all exterior walls. Siding must run one consistent direction on all exterior walls. Exterior colors must be earth tone and harmonize with the surrounding landscape. No true primary or secondary colors are allowed, nor any gloss or semi-gloss finishes. All reflective metal such as chimney stacks, flashings, exhaust vents and pipes, must be painted to match or blend with surrounding materials. All draperies
and window coverings should also be of materials and colors which harmonize with the surroundings. Aluminum windows, door frames, solar panels, and skylights must be bronzed or anodized. Steel windows and door frames must be painted to match or blend with surrounding materials.

b. Animals. On lots greater than one acre, horses or 4-H animals, limited to cattle or sheep, will be allowed provided they are not adjacent to the center spine road, village center, community facilities center, or school sites. No lot shall have more than two such animals. All other lots may have the usual household pets provided they are not kept for commercial purposes and are kept reasonably confined so as not to become a nuisance. Horses, animals, and household pets shall not unreasonably interfere with the comfort, privacy, or safety of other properties. No lot shall have more than four household pets.

If horses/4-H animals are to be allowed in an area, that area shall be designated on tentative and final maps for those uses, and water rights dedicated to provide irrigated pasture in areas where the animals must be kept when not stabled.

c. Roofs. Roofs must be constructed of fire-retardant materials.

The use of standard wooden shakes or shingles will be prohibited. Roofing materials shall be restricted to tile, asphalt, fiberglass, fire-retardant treated shakes, or any new fire-retardant roofing materials in use which have pleasing aesthetic values. Roofing materials shall be of a color that harmonizes
with the surrounding area and color scheme of the structure. Flat roofs will be discouraged.

d. **Mailboxes.** Architectural structures of natural materials and natural colors shall be provided for grouped neighborhood mailboxes. The grouped neighborhood boxes of 15 or less per site shall be placed at neighborhood entry points, with adequate access from main roadways.

e. **Garbage and Refuse Disposal.** There shall be no burning of trash, garbage or other like household refuse, nor shall any property owner accumulate on their lot junked or unsightly vehicles or litter, refuse or garbage, except in receptacles provided for such purposes.

f. **Concealment of Fuel Storage Tanks and Trash Receptacles.** Fuel storage tanks and every receptacle for ashes, trash, rubbish or garbage shall be so placed and kept as not to be visible from any street, lot, parcel, or open space in the SPA, except at the times when refuse collections are made.

g. **Travel Trailers, Motor Homes and Boat Storage.** Travel trailers, motor homes (R.V.), or boats and trailers shall be stored within the building envelope and screened from any street, lot, parcel, or open space area by screen fences. If stored in side yards, the minimum side yard shall be 12 feet.

h. **Nuisances.** No noxious or offensive activities, odors, or nuisances shall be permitted on any lot or parcel in the development. No refuse, unsightly or abandoned vehicles, debris, noxious material, discarded personal effects, or construction materials not for immediate use shall be permitted on any lot or portion thereof. It is incumbent
upon all property owners to maintain their lots and yards in a neat, orderly and well-groomed manner, whether said lots are vacant or improved.

i. Completion of Construction. Construction of any improvement, once commenced, shall be pursued diligently to completion. Improvements not so completed or upon which construction has ceased for 90 consecutive days, or which have been partially or totally destroyed and not rebuilt within a reasonable period, shall be deemed nuisances. The County may remove any such nuisance or repair or complete the same at cost to the owner provided the owner has not commenced required work within 30 days from posting a notice to commence such work upon the property. Such notice shall state the steps to be taken to eliminate the nuisance.

j. Clothes Lines. No clothes lines shall be constructed or erected which would be visible from any street, other lot, or open space.

k. Garage. Every single-family dwelling unit constructed within the SPA shall have on the same lot or parcel enough covered and completely enclosed automobile storage space for at least two automobiles. On one-acre or large lots, garage doors shall be encouraged to face side yards away from streets.

7. Landscaping

Landscape design should fit the particular use and blend with the natural environment. The Lot concept limits the area in which a home owner may provide landscaping. The plant material must be selected from a predetermined list incorporated in this plan. The plant selection includes only drought tolerant and low water demand material. These factors contribute to a decreased average annual
residential demand that is mandatory for implementation of this plan.

A specified number of trees are required in the front yard setback and transition zone to provide a "sense of place". Plant material selected from the incorporated list, per neighborhood, should be kept similar to strengthen neighborhood unity and identity.

Selection of materials should contain a mixture of plants with fast, medium, and slow growth rates and a variety of sizes should be planted to provide a more natural appearance.

The use of plants around dwelling units to reduce heating and cooling needs is encouraged. Evergreens along the north and west act as a windbreak to deflect winter winds. Deciduous trees planted on the south around the perimeter of the unit are encouraged to provide summer shade while allowing winter sun. Creation of earth berms to the windward side can also reduce heat loss.

Drainageways should be lined with native wildflowers, grasses, shrubs, and rocks and boulders to slow velocities. They will be graded to resemble a natural drainage swale and incorporated in the overall design. Irrigation of plant material will utilize drip irrigation and other water conservation features as practical. The use of plumbed gray water storage systems will be investigated with the Health Department.

Within nine months of completion of the main dwelling unit, each lot or parcel shall be completely landscaped consistent with the landscape design guidelines and water budget incorporated in this plan. All landscaping shall be maintained to harmonize with and sustain the attractiveness of the development.

8. Fencing

All property lines from single-family dwelling units to the street shall be kept free and open.
A solid privacy fence may be constructed within the building envelope and limited to the rear of the house. Side yards will not be enclosed with a privacy fence in lots larger than 10,000 square feet. Fences shall be constructed of wood or masonry material and no fence will be over six feet in height. Developers will establish a typical privacy fence per neighborhood to promote neighborhood unity.

The transition zone and side yard may be fenced with open ranch style fencing. Fencing will be consistent within all neighborhoods. There shall be no chain link, woven wire or any type of wire fence within the development except for back yard pet enclosures and swimming pools.

9. Public Street and Monument Signs

On public streets the style of signage will be unique to the SPA. It will be uniform in style throughout the area. Subdivision entry signage shall be limited to monument signs of native materials and in conformance with design guidelines set forth in the commercial section of the plan.

10. Exterior Lighting

The functional objectives in providing exterior area lighting are to illuminate areas necessary for safe and comfortable use. In certain situations, area lighting can add to the aesthetic appeal of a site by highlighting architectural features of a building or illuminating pathways and landscape plantings. In these instances, only the special features of a building or landscape should be illuminated. It should be noted that the standards and guidelines contained in this section address area lighting on individual
properties, and not overhead street lighting along public and private rights-of-way.

On public streets, the style of lighting standard will be unique to the SPA. It will be decorative and uniform in style and intensity throughout the area. Lighting shall be directed downward with no splay of lighting directed outward.

a. Standards.
   i. Exterior lights shall not blink, flash or change intensity. String lights, building or roofline tube lighting, reflective or luminescent wall surfaces are prohibited.
   ii. Exterior lighting shall not be attached to trees except for the Christmas season.
   iii. Driveway, walkway, and building lights shall be directed downward.
   iv. Fixture mounting height shall be appropriate to the purpose.
   v. Illumination for aesthetic or dramatic purposes of any building or surrounding landscape utilizing exterior light fixtures projected above the horizontal is prohibited.
   vi. Seasonal lighting displays and lighting for special events which conflict with other provisions of this section may be permitted on a temporary basis.

b. Guidelines.
   i. Lighting Design. Exterior lighting should be designed as an integral part of the architecture and
landscape and located in a manner that minimizes the impact of lighting upon adjacent structures and properties.

ii. Lighting Levels. Avoid consistent overall lighting and overly bright lighting. The location of lighting should respond to the anticipated use and should not exceed the amount of light actually required by users. Lighting for pedestrian movement should illuminate entrances, changes in grade, path intersections, and other areas along paths which, if left unlit, would cause the user to feel insecure. Lighting suppliers and manufacturers have lighting design handbooks which can be consulted to determine fixture types, illumination needs, and light standard heights.

iii. Fixture Design. Exterior lighting fixtures should be simple in design and should be well-integrated with other architectural site features.

iv. Structural Lighting. Night lighting of building exteriors should be done in a selective fashion: highlight special recognizable features; keynote repeated features; or use the play of light and shadow to articulate the facade. The purpose of illuminating the building should be to add visual interest and support building identification. Harsh overall lighting of a facade tends to flatten features and diminish visual interest.
x. Lighting Height. As a rule, the light source should be kept as low to the ground as possible while ensuring safe and functional levels of illumination. Area lighting should be directed downward with no splay of lighting directed offsite. The height of light fixtures or standards must meet the County standards. Direct light downward in order to avoid sky lighting. Any light source over 10 feet high should incorporate a cut-off shield to prevent the light source from being directly visible from areas offsite. The height of luminaries should be in scale with the setting and generally should not exceed 10-12 feet.

11. Utilities
All utilities shall be underground on lots less than one acre. Undergrounding shall be encouraged for lots from one to two and a half acres and overhead on lots larger than two and a half acres. All individual services to each unit for all lot sizes shall be undergrounded from the neighborhood service line.

12. Prohibition Against Used Structures
No used buildings or structures, intended for use as a dwelling, shall be placed on any lot.

13. Ditches and Swales.
Each owner shall keep drainage ditches and swales located on his lot free and unobstructed and in good repair and shall provide for the installation of such culverts upon his lot as may reasonably be required for proper drainage.

14. Resubdivision or Joinder Lots
No lot shall be further subdivided, unless permitted by the SPA Plan and regulatory zoning category applicable.

15. Drilling and Mining
No drilling, testing, quarrying, or mining operation of any kind shall be permitted on any lot.

16. Television or Radio Antennae and Towers

No television or radio antennae or tower shall be erected or used outdoors, whether attached to a building or structure, or otherwise. The placement of satellite discs shall be screened from view from any adjacent parcels, streets, or open space by locating in rear yards behind screened fences at a minimum. At such time as a community antenna television (CATV) system may be installed to service the development, each lot owner shall pay his proportionate share of standby, installation of service charges made pursuant to the franchise governing such system. This is provided, however, that such charges shall be comparable to those of similar installations in the CATV industry.

17. Failure to Enforce

The various restrictive measures and provision of this declaration are declared to constitute mutual equitable covenants and servitudes for the protection and benefit of each lot in said subdivision and failure by DECLARANT or any other person or persons entitled so to do shall not serve to create any liability or responsibility to DECLARANT for its alleged failure to act. Failure to enforce any measure or provision upon violation thereof shall not stop nor prevent enforcement thereafter or be deemed a waiver of the right so to do.

18. Severability

The various measures and provisions of this declaration are declared to be severable, and the invalidity of one measure or provision shall not affect any other measure or provision.

19. Subordination to Mortgages and Deeds of Trust

Nothing contained in this declaration shall impair or defeat the lien of any mortgage or deed of trust made in good faith and for
value, but title to any property is subject to this declaration obtained through the sale or satisfaction of any such mortgage or deed of trust shall thereafter be held subject to all of the restrictions and provisions hereof.

20. Enforcement and Remedy

Each grantee of a conveyance or purchaser under a contract or agreement of sale by accepting a deed or contract of sale or agreement of purchase accepts the same subject to all of other covenants, restrictions, easements and agreements set forth in this declaration and agrees to be bound by the same.

Damages for any breach of the terms, restrictions and provisions of this declaration are hereby declared not to be adequate compensation, but such breach and/or the continuation thereof may be enjoined or abated by appropriate proceedings by the DECLARANT, or by an owner or owners of any other lot or lots in said subdivision. Court costs and attorney fees shall be awarded the prevailing parties of any legal action as deemed appropriate and awarded by the court.

21. Terms of Restrictions

These covenants, restrictions and agreements shall run with the land and shall continue in full force and effect until ______ at which time the same shall be automatically extended for successive periods of five years unless by a duly executed and recorded statement of the then owners of 75% or more of the lots in said subdivision elect to terminate or amend these restrictions in whole or in part. Said declarations of restrictions can be amended or modified at any time when 75% of the owners election to do so, provided however; that said amendment or modification is in compliance with the provisions of the Washoe County Code.

Note:
The following two items will be applicable in the event of an active architectural control committee.
22. Maintenance of Lots

All lots, whether occupied or unoccupied, and any improvements placed thereon, shall at all times be maintained in such a manner as to prevent their becoming unsightly, unsanitary or a hazard to health. If not so maintained, the architectural control committee shall have the right, through its agents and employees, to do so, the cost of which shall be borne by the owner. Neither the architectural control committee, nor its agents, employees or contractors, nor the DECLARANT, nor its agents, employees, or contractors shall be liable for any damage which may result from any maintenance work as performed.

23. Real Estate Signs

Professionally prepared signs of customary and reasonable dimension may be displayed on any lot advertising it, together with any improvements located thereon, for sale or lease. All other signs, bill boards, or advertising structures of any kind are prohibited except upon application to and written permission from the architectural control committee.

Note:

The following is an example of the architectural control committee section of the C. C. & Rs. Not all development projects within the plan area will be required to have an architectural control committee. In the event a project does not have an architectural control committee, then applicants will be required to submit an application to the citizen advisory board with definitive design, materials and color combinations for their review and recommendation prior to submittal to the County of Washoe.

24. Architectural Control Committee

   a. General Powers. All improvements constructed or placed on any lot must first have the approval of the committee as
evidenced by the signatures of at least two of the members affixed to the plans submitted. Two sets of plans and specifications shall be submitted to the committee, which plans shall show the location of all improvements, if any, easting upon said lot, the location of the improvement proposed to be constructed, the color and composition of all exterior materials to be used, proposed landscaping, and any other information which the committee may require, including soil, engineering and geologic reports and recommendations.

b. Committee Membership. The committee shall be composed of three members, to be appointed by DECLARANT, at least one of whom shall be a representative of DECLARANT. Committee members shall be subject to removal by DECLARANT and any vacancies from time to time existing shall be filled by appointment by DECLARANT, or in the event of DECLARANT’s failure to do so within two months after any such vacancy, the then majority of the lot owners. The power to appoint or remove Committee members shall be transferred permanently to the lot owners upon:

i. A lapse of 18 months between the filing of the final map of the development, provided that 90% of the aggregate number of lots of the development have been sold by the DECLARANT; or

ii. A lapse of three years from the date of Final Subdivision Public Report of the Nevada Department of Real Estate.

c. Grounds for Disapproval. The committee may disapprove any plan of development:

i. Because of the reasonable dissatisfaction of the committee with grading plans, location of the proposed improvement on a lot, finished ground elevation, color scheme, finish, design, proportions, architecture,
shape, height or style of the proposed improvement, the materials used therein, the kind, pitch or type of roof proposed to be placed thereon; or
ii. If, in the judgment of a majority of the committee reasonably exercised, the proposed improvement will be inharmonious with the development, or with the improvements erected on other lots.

4. Rules and Regulations. The committee may, from time to time, adopt written rules and regulations of general application governing its procedures which may include, among other things, required number of copies of plans and specifications: provisions for notice of approval or disapproval, including a reasonable time period for approval by reason of failure to disapprove.

5. Variances. The committee may grant reasonable variances or adjustments from the provisions of this declaration where literal application thereof results in unnecessary hardship and if the granting thereof will not be materially detrimental or injurious to owners of other lots.

6. Certification of Compliance. At any time prior to completion of construction of an improvement, the committee may require a certification, upon such form as it shall furnish, from the contractor, owner, or a licensed surveyor, that such improvement does not violate any setback rule, ordinance or statute, nor encroach upon any easement or right-of-way of record.

7. Administrative Fees. As a means of defraying its expense, the committee may institute and require a reasonable filing fee to accompany the submission of plans and specifications, to be not more than one-fourth of 1% of the estimated cost of
the proposed improvement, subject to a minimum fee of $75.00. No additional fee shall be required for resubmittal.

h. Liability. Notwithstanding the approval by the committee of plans and specification of its inspection of the work in progress, neither it, DECLARANT, nor any person acting in behalf of any of them shall be responsible in any way for any defects in any plans or specifications or other material submitted to the committee, nor for any defects in any work done pursuant thereto. Each person submitting such plans or specifications shall be responsible for the sufficiency thereof and the adequacy of improvements constructed pursuant thereto.

All covenants, conditions and restrictions herein contained which are required by the County of Washoe may also be enforced by the County of Washoe.

Tentative Parcel Map Application
Supplemental Information

(All required information may be separately attached)

Chapter 110 of the Washoe County Code is commonly known as the Development Code. Specific references to tentative parcel maps may be found in Article 606, Parcel Maps.

1. What is the location (address or distance and direction from nearest intersection)?

South end of Grass Valley Road; approximately half a mile south of Whiskey Springs Road.

a. Please list the following:

<table>
<thead>
<tr>
<th>APN of Parcel</th>
<th>Land Use Designation</th>
<th>Existing Acres</th>
</tr>
</thead>
<tbody>
<tr>
<td>077-130.23 Remainder</td>
<td>120 - Vacant, Single Family</td>
<td>60.10</td>
</tr>
</tbody>
</table>

2. Please describe the existing conditions, structures, and uses located at the site:

Vacant land.

3. What are the proposed lot standards?

<table>
<thead>
<tr>
<th></th>
<th>Parcel 1</th>
<th>Parcel 2</th>
<th>Parcel 3</th>
<th>Parcel 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum Lot Area</td>
<td>5.00 ac</td>
<td>5.03 ac</td>
<td>5.01 ac</td>
<td>45.06</td>
</tr>
<tr>
<td>Minimum Lot Width</td>
<td>674.00'</td>
<td>523.03'</td>
<td>314.07'</td>
<td></td>
</tr>
</tbody>
</table>
4. Was the parcel or lot that is proposed for division created (recorded) within the last 5 years? (If yes, public review of the parcel map will be required. See Planning and Building staff for additional materials that are required to be submitted.)

| ☐ Yes | ☐ No |

5. Utilities:

| a. Sewer Service | Septic |
| b. Electrical Service/Generator | NV. Energy |
| c. Water Service | Well |

6. Please describe the source of the water facilities necessary to serve the proposed tentative parcel map:

a. Water System Type:

| ☐ Individual wells |
| ☐ Private water | Provider: |
| ☐ Public water | Provider: |

b. Available:

| ☐ Now | ☐ 1-3 years | ☐ 3-5 years | ☐ 5+ years |

c. Washoe County Capital Improvements Program project?

| ☐ Yes | ☐ No |

7. What sewer services are necessary to accommodate the proposed tentative parcel map?

a. Sewage System Type:

| ☐ Individual septic |
| ☐ Public system | Provider: |

b. Available:

| ☐ Now | ☐ 1-3 years | ☐ 3-5 years | ☐ 5+ years |

c. Washoe County Capital Improvements Program project?

| ☐ Yes | ☐ No |

8. For most uses, the Washoe County Code, Chapter 110, Article 422, Water and Sewer Resource Requirements, requires the dedication of water rights to Washoe County when creating new parcels. Please indicate the type and quantity of water rights you have available should dedication be required:

| a. Permit # | acre-feet per year |
| b. Certificate # | acre-feet per year |
| c. Surface Claim # | acre-feet per year |
| d. Other, # | acre-feet per year |
e. Title of those rights (as filed with the State Engineer in the Division of Water Resources of the Department of Conservation and Natural Resources):

9. Does the property contain wetlands? (If yes, please attach a preliminary delineation map and describe the impact the proposal will have on the wetlands. Impacts to the wetlands may require a permit issued from the U.S. Army Corps of Engineers.)

☐ Yes ☐ No If yes, include a separate set of attachments and maps.

10. Does property contain slopes or hillsides in excess of 15 percent and/or significant ridgelines? (If yes, and this is the second parcel map dividing this property, Article 424, Hillside Development of the Washoe County Development Code will apply.)

☐ Yes ☐ No If yes, include a separate set of attachments and maps.

11. Does property contain geologic hazards such as active faults; hillside or mountainous areas; is it subject to avalanches, landslides, or flash floods; is it near a water body, stream, Significant Hydrologic Resource as defined in Article 418, or riparian area such as the Truckee River, and/or an area of groundwater recharge

☐ Yes ☐ No If yes, include a separate set of attachments and maps.

12. Does the tentative parcel map involve common open space as defined in Article 408 of the Washoe County Development Code? (If so, please identify all proposed non-residential uses and all the open space parcels.)

☐ Yes ☐ No If yes, include a separate set of attachments and maps.

13. If private roads are proposed, will the community be gated? If so, is a public trail system easement provided through the subdivision?

\[\text{Signature}\]
14. Are there any applicable policies of the adopted area plan in which the project is located that require compliance? If so, which policies and how does the project comply?

☐ Yes  ☐ No  If yes, include a separate set of attachments and maps.

15. Are there any applicable area plan modifiers in the Development Code in which the project is located that require compliance? If so, which modifiers and how does the project comply?

16. Is the project subject to Article 418, Significant Hydrologic Resources? If yes, please address Special Review Considerations within Section 110.418.30 in a separate attachment.

☐ Yes  ☐ No  If yes, include a separate set of attachments and maps.

Grading

Please complete the following additional questions if the project anticipates grading that involves:

(1) Disturbed area exceeding twenty-five thousand (25,000) square feet not covered by streets, buildings and landscaping;
(2) More than one thousand (1,000) cubic yards of earth to be imported and placed as fill in a special flood hazard area;
(3) More than five thousand (5,000) cubic yards of earth to be imported and placed as fill;
(4) More than one thousand (1,000) cubic yards to be excavated, whether or not the earth will be exported from the property;
(5) If a permanent earthen structure will be established over four and one-half (4.5) feet high. If your project exceeds any of the above criteria, you shall either provide a preliminary grading and roadway design plan for review OR if these criteria are exceeded with the final construction drawings and not disclosed at the Tentative Parcel Map Application, you shall be required to apply for a special use permit for grading and you will be delayed up to three months, if approved.

17. How many cubic yards of material are you proposing to excavate on site?

N/A
18. How many cubic yards of material are you exporting or importing? If exporting of material is anticipated, where will the material be sent? If the disposal site is within unincorporated Washoe County, what measures will be taken for erosion control and revegetation at the site? If none, how are you balancing the work on-site?

N/A

19. Can the disturbed area be seen from off-site? If yes, from which directions, and which properties or roadways? What measures will be taken to mitigate their impacts?

N/A

20. What is the slope (Horizontal/Vertical) of the cut and fill areas proposed to be? What methods will be used to prevent erosion until the revegetation is established?

N/A
21. Are you planning any berms and, if so, how tall is the berm at its highest? How will it be stabilized and/or revegetated?

| N/A |

22. Are retaining walls going to be required? If so, how high will the walls be, will there be multiple walls with intervening terracing, and what is the wall construction (i.e. rockery, concrete, timber, manufactured block)? How will the visual impacts be mitigated?

| N/A |

23. Will the grading proposed require removal of any trees? If so, what species, how many, and of what size?

| N/A |

24. What type of revegetation seed mix are you planning to use and how many pounds per acre do you intend to broadcast? Will you use mulch and, if so, what type?

| N/A |
25. How are you providing temporary irrigation to the disturbed area?

N/A

26. Have you reviewed the revegetation plan with the Washoe Storey Conservation District? If yes, have you incorporated their suggestions?

N/A

Development Standards Handbook for

PALOMINO RANCH ESTATES

DEVELOPMENT STANDARDS

Introduction
LW Land Company LLC, the owner of the property Palomino Ranch Estates, is one of the parcels within the Warm Springs Specific Plan (WSSP), (Refer to the Land Use Plan showing the project with in the Warm Springs area in Appendix C) The property is 67.60 acres in size. There will be a total of 15 lots, 3 lots will each be 2.50 acres, with remaining 12 lots will be 5+ acres.(Refer to Vicinity Map and Parcel Map)

Objective
To develop a community that capitalizes on the rural and equine character of the Warm Springs area while utilizing resources efficiently and effectively, and giving consideration to design, marketability, and aesthetics.

Agriculture
The Specific Plan protects existing adjacent agricultural uses from potential development conflicts. The CC&Rs and all final maps shall contain a note of restriction that states, "No formal written or verbal complaints can be filed with Washoe County and no lawsuits or other legal proceedings can be brought against any legal agricultural use" Each purchaser will sign a disclosure statement that reiterates the same information.

Residential Design Guidelines
The purpose of this handbook is to describe the principles, policies, standards, and deed restrictions that will control development of Tumbleweed Estates to ensure that it is built and maintained as envisioned in the master planning process for the Warm Springs Specific Plan area.

Lot Concepts Standards
The individual lot concepts are designed to promote the rural character of the Warm Springs Valley. The lots have designated building envelopes, transition zones, and required open space. Where there is a difference between what is illustrated in the Individual Lot Concept Plans and what the text states, the plans shall take precedence over the text. (Refer to the Individual Lot Concept Plans, pages 4-5.)
Building Envelopes
The building setbacks from the street vary to provide a more rural atmosphere to the streetscape. All lots have an established building envelope as defined by the Individual Lot Concept Plans. Building side and rear yard setbacks shall conform to current Washoe County Code requirements.

Buildings may be located anywhere within the designated building envelope. All buildings, structures, or storage of any type will be confined to this area on each lot.

A landscaped/irrigated zone with a minimum depth of 30 feet is required around all dwellings. This landscaped/irrigated zone must utilize fire retardant/resistant landscaping. For additional fire protection, the landscaping within the building envelope should be thinned and maintained so as not to present a hazard to the homeowner or adjacent property owners.

The landscaped/irrigated zone may encroach into the transition zone. All disturbed areas within the building envelope that are not landscaped, will be revegetated with a combination of native shrubs, grass, and wildflower seed mixtures specified in this document. The relationship between building envelopes is designed to provide an open space corridor and to provide necessary space for additional possible division of the property. (Refer to the Individual Lot Concept, Figures 1-A through 3-A pages 4-14.)

Transition Zone
The designated transition zone portion of the lot provides an extension of usable yard area but does not permit structures. The zone provides a transition from the open space to the developed portion of each lot. The only fencing that shall be permitted within the transition zone is Open Ranch Style Fencing, White Rail PVC Fencing, or temporary painted-metal panelized fencing. The landscaping for the transition zone has been considered under and is incorporated into the Water Allocation. Horses and 4-H animals are limited to the transition zone and building envelope unless pasture has been provided by securing the requisite water rights.

Open Space
Please see Plate 9 map, Appendix D, which shows the proposed open space, trails and the golf course in the Warm Springs master plan.

The designated open space portion of each lot will be left undisturbed. All open space areas shall be maintained by the individual property owner. These open space corridors are designated to protect the existing, rural character of the valley. Open space areas may continue existing, established agricultural or ranching uses and are exempt from the limitations imposed by the section on "Animals" later in this Development Standards Handbook.
No use of motorized vehicles, other than vehicles actively engaged in ranching or farming activities, is allowed within the designated open space areas. Open space corridors may be utilized as a non-motorized trail system for equestrian use. The only fencing that shall be permitted within the open space area is Open Ranch Style Fencing, White Rail Synthetic Fencing, or temporary painted-metal Panelized Fencing. Water rights, in accordance with the Optional Water Usage Landscape (see page 20 under Water Allocation), must be purchased for maintenance of pasture for animals enclosed within the open space. The open space in the Warm Springs Specific Plan shall be left in natural vegetation or agricultural use. If disturbed, it shall be reseeded as specified in the section on Revegetation of Open Space/Drainage ways. Plant selection should include only drought tolerant and low water demand material (refer to plant list in Appendix A). These attributes contribute to the decreased average annual residential water demand that is mandated for implementation of the Warm Springs Specific Plan.

View Sheds
The proposed building envelopes, as illustrated by Figure 1-A, page 4, Figures 2-A, page 5, and by 3-A, page 11, are staggered and setbacks are increased to afford views and vistas from each building envelope to the surrounding valleys and mountains.

Architecture
All buildings must incorporate an architectural theme or identity that is complementary and compatible with the Warm Springs Specific Plan area and its surroundings. All building plans shall be submitted to the WSSP Architectural Review Committee to ensure this policy is enforced in a way that encourages creative design. No mobile homes are allowed except for construction purposes. To enhance the development and maintain the rural character, buildings and structures shall adhere to the following guidelines. (Refer to Conceptual "Western Ranch" Theme Home, Figures 8a and 8b page 20.)

Exterior Walls and Trims
Building materials must support the "western ranch" theme and be approved by the WSSP Architectural Review Committee. Exterior siding and wall colors must be earth tone and harmonize with the surrounding landscape. No gloss finishes are allowed.

Large unbroken expanses of the same wall material shall be avoided. Trim shall be used on all exterior walls to create highlight and shadow. All reflective material (e.g., chimney stacks, flashings, exhaust vents and pipes, etc.) must be painted to match or blend with surrounding materials.

SECTION

OPEN SPACE

TRANSITION ZONE

BUILDING ENVELOPE

PERIMETER FENCE

SKETCH

2 1/2 Acre Concept
Figure 2-A
Individual Lot Concept for 5(+) Acre Parcels

5 Acre Concept
Roofing
Roofing materials shall be earth tone and of a color that harmonizes with the surrounding area and color scheme of the structure. To support an architectural theme consistent with the Warm Springs Specific Plan, building materials for roofs shall be limited to slate, concrete tile, or architectural composition, extra-dimensional 30-year roofing. Flat roofs shall not be allowed. Metal non-reflective and colored roofs may be permitted with Architectural Review Committee approval. All reflective material (e.g., chimney stacks, flashings, exhaust vents and pipes, etc.) must be painted to match or blend with surrounding materials.

Building Heights
To promote an architectural theme consistent with the Warm Springs Specific Plan, single story homes are encouraged, but all homes shall be limited to two stories and, in accordance with Washoe County Development Code requirements, 35 feet in height. (Refer to Conceptual "Western Ranch" Theme Home, Figures 8a and 8b, page 20.)

Completion of Construction
Construction of any improvement, once commenced, shall be pursued diligently to completion within 18 months of commencement. Improvements not so completed or upon which construction has ceased for ninety (90) consecutive days or which have been partially or totally destroyed and not rebuilt within a reasonable period shall be deemed nuisances. The Homeowners Association may remove any such nuisance or repair or complete the same at the cost of the owner provided the owner has not commenced required work within thirty (30) days from the posting of a notice by the Homeowners Association to commence such work upon the property. Such notice shall state the steps that will be taken to eliminate the nuisance.

Miscellaneous Animals
No more than four (4) Horses or 4-H animals, limited to cattle or sheep, will be allowed. Such animals will only be permitted within the building envelope and transition zone unless additional water rights are acquired for pastureland within the open space. Adequate ground cover to eliminate dust and prevent erosion shall be maintained at all times. As many as four (4) customary household pets are allowed provided they are not kept for commercial purposes and are kept reasonably confined so as not to become a nuisance. Horses, animals, and household pets shall not unreasonably interfere with the comfort, privacy, or safety of other properties. Animals shall be kept in accordance with Washoe County rules and regulations. The homeowners association shall have the authority to determine whether the animals unreasonably interfere with the comfort, privacy or safety of other properties.
Homeowners may provide irrigated pasture as an exercise area or for supplemental feed in which the animals may be kept when not stabled or corralled. Livestock may be considered an optional use for water allocated for landscape use. Pasturelands for animals will require additional water rights to be dedicated to Washoe County. Irrigated pastures require additional water rights at 4 acre-feet/year per acre. 1-1/4 acres of irrigated pasture would require the dedication of a total of 5 acre-feet of water. (Refer to Optional Usage Water Consumption Table A & B, pages 30-31 in the Landscape/Irrigation Section.)

Travel Trailers, Motor Homes, and Boat Storage
Travel trailers, motor homes, other recreational vehicles, or boats and trailers may only be stored within the building envelope. This may occur either within enclosed structures or in the side or rear yards if such yards are completely screened from any street, lot parcel, or open space area and the minimum distance from the screening material maintains the zoning requirements for that yard. Screening shall be consistent with the designated neighborhood privacy fence. (Refer to Figure 5 page 19) The architectural review committee will approve all fencing material.

Utilities
All individual services to each unit for all lot sizes shall be underground from the neighborhood service line. All on site utility lines to outbuildings, detached accessory structures, pump houses, etc., shall be underground.

Mailboxes
Individual property owners will not have US Mail delivered to their property. The Post Office has community mail boxes located at Grass Valley Road and Whiskey Springs Road 1/2 mile from proposed project. Per the post office if needed more community mail boxes will be put in place at that location.

Garbage and Refuse Disposal
There shall be no burning of trash, garbage or other like household refuse, nor shall any property owner accumulate on their lot junked or unsightly vehicles or litter, refuse or garbage, except in receptacles provided for such purposes.

Concealment of Fuel Storage Tanks and Trash Receptacles
Fuel storage tanks, limited to propane or heating oil and every receptacle for ashes, trash, rubbish or garbage shall be so placed and kept as not to be visible from any street, lot, parcel, or open space except at the times when refuse collections are made.

Antennas
Satellite dishes and home radio antennas shall be screened from view from any adjacent parcels, streets, or open space by locating in side or rear yards behind screen fences at a minimum. Screen fences for this purpose shall maintain the minimum distance from the screening material to that yard property line that meets the zoning requirements.
Nuisances
No noxious or offensive activities, odors, or nuisances shall be permitted on any lot or parcel in the development. No refuse, animal manure, unsightly or abandoned vehicles, debris, noxious materials, discarded personal effects, and construction materials not for immediate use shall be permitted on any lot or portion thereof. It is incumbent upon all property owners to maintain their lots and yards in a neat, orderly, and well-mannered, whether said lots are vacant or improved. The Homeowners Association shall be responsible for timely enforcement for this provision.

Conservation
All building construction shall utilize methods of energy conservation and the use of low water demand features. Table 1 provides a list of recommended and mandatory energy and water conservation features, which will be incorporated into the building construction.

<table>

| Recommended Conservation Features |
| State-of-the-art water saving appliances such as washing machines and dishwashers. |
| The use of trash compactors to limit the use of garbage disposals in sinks. |
| Passive solar design. |
| Solar water heater. |
| Zoned heating controls. |
| Plumbed gray water storage and distribution for irrigation of landscaping. |

1 Upon approval of the Washoe County District Health Department.

2 More information may be obtained from the Passive Solar Industries Council, 1090 Vermont Avenue, Suite 100, Washington D.C. 20005, (202) 371-0357.
Building design and orientation shall be considered in conservation of energy. All buildings will be designed and oriented to benefit from passive solar heating if practicable. Passive solar construction guidelines and energy conservation measures for Northern Nevada are available through the Sierra Pacific Power Company. ii

Homes will be designed to utilize the following minimum guidelines of energy conservation in site and architectural design. Simple alterations in building design can enable the use of the sun, wind, terrain, and vegetation to provide for supplemental heating, cooling, and insulation for a structure.

Energy Conservation Guidelines
All buildings should be located and oriented to benefit from passive solar heating. The desirable exposure is towards the south, southeast, or southwest. The simple east-west orientation of a rectangular building in northern Nevada has been found to reduce energy consumption by 40%. Site development should use plant materials and landforms to enhance energy conservation. Coniferous trees planted along the windward side of the property can act as a windbreak to deflect winter winds. Shrubs and trees planted against the structure can help to insulate the building. Deciduous trees planted on the south side of the structure will shade the building during the summer and enable sun to penetrate during the winter. The creation of earth berms on the windward side can reduce heat loss due to wind and help to insulate the structure. (Refer to the Minimum Landscape Elements - Figure 3-A page 11) The structure should be designed to keep energy needs for heating and cooling to a minimum. Passive energy conservation measures include the following:

Good insulation.
Location of active living spaces on south side
Location of closets, mud-room, garages, or storage space on north and east sides
Air-lock entries
Concentration of windows on south side
Reduction in number and size of openings on north side.
Maximum use of double-glazing
Building overhangs to shield windows from summer sun and to admit winter sun
Use of paved surfaces, rock or masonry on south side to absorb radiation

Active solar energy systems shall be permitted if the solar panels are integrated into the architectural design. If not integrated into the roof or body of the structure, they may not be placed on the roof and they must be screened from public view.
Domestic Water Allocation

The Warm Springs Specific Plan mandates compliance with a per lot water allocation. The designated water allocation for this project is 1.12 acre-feet/year per lot, which is equivalent to 364,896 gallons per year. Domestic water use for the average household is 70,260 gallons per year and landscape water use is at a minimum of 75,208 gallons per year. This leaves 217,428 gallons of water for selection of optional landscape elements. Livestock pasture irrigation may require dedication of additional water rights beyond the 1.12 acre-feet/year. Each lot owner is required to incorporate the following list of minimum required landscape elements into their landscaping. No less than 50% of the required landscaping shall be oriented to the front yard of the lot.

The plant selection includes only drought tolerant and low water demand material. Those aspects of the permitted plants contribute to the decreased average annual residential demand for water that is mandated for implementation of this plan.

The landscaping and irrigation plans must be submitted to the Architectural Control Committee for review and approval. This should be done at time of building permits for structures but may also be done separately.

The minimum landscape elements for each lot shall be:

2,000 square feet of lawn area. Half of which can be in the rear yard.
5 evergreen or deciduous trees within the front yard setback (1 must be a specimen tree, (15 gallon minimum); 5 deciduous or evergreen trees within the building envelope (15 gallon minimum); 12 evergreen shrubs (1 gallon minimum); and 12 deciduous shrubs (1 gallon minimum.)

A minimum of five (5) trees are required within the front yard(s) as defined by Washoe County Code. Plant material per neighborhood, should be kept similar to strengthen neighborhood unity and identity. (Refer to Figure 3-A, page 11)

For a list of suggested shrub/groundcover and trees for home owner review, see Appendix A.
The required landscape elements, plus the estimated domestic water use, utilize approximately 147,468 gallons per year. 217,428 gallons per year remains for optional use.

<td>147,468 gal.</td>
</tr>
</tbody>
</table>

217,728 gal.

Table 2A provides a list of optional water use estimates for differing types of landscaping. These may be used in any combination on any lot provided the water allocation per lot is not exceeded. The intent is to mandate compliance with the designated water allocation while at the same time providing alternatives to permit variety in individual landscape designs. The plant selection includes only drought tolerant and low water demand material. Those aspects of the permitted plants contribute to the deceased average annual residential demand for water that is mandated for implementation of this plan.
Selection of materials should contain a mixture of plants with fast, medium and slow growth rates and a variety of sizes should be planted to provide a more natural appearance.

All surface water drainage ways within the subdivision shall be graded to resemble a natural drainage swale and incorporated in the overall design. There will be no linear, uniform width drainage ways. Drainage ways should be lined with native wildflowers, grasses, shrubs, and scattered cocks and boulders to slow water velocities.

The amount of water required for one acre of pasture irrigation is 4 acre-feet/year. For 1 1/4 acres of pasture, a total of 5 acre-feet/year is required. As many as 5 acre-feet/year per lot of water rights may be permitted through the State Engineers Office. These water rights will be used to irrigate the pasture and/or livestock on each lot.

*The Water Allocation for Pasture applies only when additional water rights have been purchased from a private party and transferred to the receiving parcel by the State Engineer.*

As long as no more than 1,800 gallons per day are utilized, additional optional landscaping may be installed. The total utilization does not equal 364,896 gallons due to the fact that much less water is used during the winter months. (Refer to Optional Landscape use Table 2-A)

Additional information on the constraints placed upon the use of water and the standards employed are located within the Warm Springs Specific Plan (WSSP) are included with this document as Appendix B, Excerpted and Abridged Information from the Warm Springs Specific Plan.
Maintenance
All plant material and lawn areas shall be kept in healthy condition. Any dead plant material shall be removed and replaced within 30 days.

References
Appendix B includes an abridged excerpt from the Warm Springs Specific Plan that explains the water budget for the hydrographic basin and provides part of the rationale for stringent landscaping and irrigation requirements. The excerpt has been slightly amended from the text of the actual plan to reflect some updates and actions by the State Engineer.

Revegetation of Open Space/Drainage ways
All open space areas, other than those in agricultural use, shall be left in native material.

Areas designated as Open Space that are currently in agricultural use will allow grading. If noxious weeds are in abundance, the owner may employ a weed management plan developed by an appropriate land reclamation specialist. As development occurs and agricultural practices are abandoned, it will be the property owner's responsibility to ensure that these areas will be over-seeded with a native grass mixture as described in Table 3, page 14. A gradual transition of plant material is desirable.

The soils and precipitation in Warm Springs Valley greatly reduce plant species available for revegetation. The species selected will survive with no supplemental irrigation water being applied after establishment. After two years there will not be any temporary water to the revegetation. The revegetation seed mix should be tied to the agricultural soils and modified as recommended by the seed company.

Indian Ricegrass must be drill seeded at 2-4 inches below the surface. Pubescent Wheatgrass and Globe Mallow should be drill seeded to a depth of one-half inch below the surface. Kochia and Winterfat should be hydro seeded.

Basin Wildrye (elymus cinereus) should be substituted for ricegrass in clay soil areas. Wildrye is not adapted to shallow soils and placement should be monitored. The seed should be drill seeded no-deeper than 1/2 inch below the surface. Wildrye will require more supplemental irrigation water than ricegrass during the first year, but once established will survive with no additional water.

Seeding should be completed during late fall. This will assure seed is placed ready to germinate when soil moisture and temperature conditions are ideal the following spring. Temporary above-ground irrigation is not recommended but may be necessary in order to establish plants if seed is installed during summer months.
To improve establishment chances, seeded area should be hydro mulched at a rate of 1,000 lbs./acre with 180 lbs./acre of tackifier added. Supplemental irrigation water can be applied the first growing season. Irrigation should be light and infrequent. This will promote root development that will be essential once irrigation water is eliminated. Water used for this purpose must be deducted from the given available water. After the system is abandoned, the water may be relocated to other uses.

**Irrigation Requirements**

Each residential lot will be required to install an irrigation system with automatic controller and back flow prevention device to meet Washoe County/State health codes. The irrigation system shall include an overhead spray system for any turf areas, with uniform head to head coverage and matched sprinkler head precipitation rates. Temporary irrigation systems may be in use for two (2) seasons only. The system shall also include a drain down method for winterization. All trees, shrubs, and ground covers shall be watered with standard controllers allowing each tree, shrub, or ground cover to be watered with individual drip emitters or collectively in groups with micro sprayers.

**Landscape and Irrigation Plan Submittal Requirement**

Each future homeowner or builder will be required to submit landscape, grading, and irrigation plans to Homeowners Association and the Architectural Review Committee for approval as a part of the building permit application process. The plans shall be prepared by a qualified landscape industry professional, landscape contractor, or a landscape architect.
The landscape plan shall include a site base map prepared to a 1"=20' minimum scale with the house and driveway footprint, property lines, utility locations, etc. This base map must clearly show proposed landscape areas with square footage area calculations to meet the water usage requirement specified in this document. In addition to the above, the landscape plan must include:

- A plant species list keyed to plant locations on the plan. The plant list must include plant sizes and quantities;
- The amount of water calculated for established landscape;
- An indication of surface material(s) in non-landscaped areas; and
- Agricultural soils test results and proposed soils improvement/amendment methods.

The irrigation plan shall be prepared to scale on the same base map as the landscape plan. The irrigation plan must include the following:

- Point of connection to water source;
- Location, type of installation detail of back flow prevention device;
- Remote control valve location, manufacturer's name, product number, size and gallons per minute for each lateral zone;
- Irrigation main and lateral line type, size, and depth of bury;
- Sprinkler head locations, manufacturer's name, product number, nozzle size and number, radius gallons per minute and pounds per square inch (psi) operation rate;
- Drip system valve locations and sizes, lateral line type and location, emitter type, product number, and amount per plan and;
- Controller's manufacturer's name, product number, and installation location.

The grading plan shall be prepared to scale on the same base map as the landscape and irrigation plan. The grading plan must include the following:

- Limits of grading and construction;
- Dust control plan/permit measures required by Washoe County Code;
- Existing and proposed contours, including berming for energy conservation and drainage away from structures;
- Paving or surface treatment for walkways and driveways;
- Location and type of temporary fencing to protect open space and native vegetation from construction traffic; and
- Revegetation of disturbed areas, seeding quantity, and need for temporary irrigation. The revegetation seed mix should be tied to the agricultural soils test and modified as recommended by the seed company.
Maintenance
All irrigation systems shall be maintained in good operating condition. The irrigation system shall be extended to any new plant material at the time of installation.

Within twelve (12) months of completion of the main dwelling unit, each lot or parcel shall be completely landscaped with automatic irrigation systems in place and operating. All landscaping shall be maintained to harmonize with and sustain the attractiveness of the development.

Fencing
General Considerations:
All property from the building envelope to the street shall be kept free and open. Fencing will be consistent within the neighborhood for this development. Wood fencing will be treated with a light or medium brown stain that will increase wood durability. Stains should be consistent in tone on the individual properties but no one property will be required to match exactly with neighbors. Owners are required to keep fencing in good working order and have a well-maintained appearance. The type of fence will be controlled by the Architectural Review Committee.

Solid Wood or Synthetic Material (with the appearance of wood) Privacy Fence:
Privacy fence with a height of up to 6 feet, may be constructed within the building envelope as long as it is limited to the rear of the house. Such a fence may be used in the side yard for screening such features as RV storage area, satellite dishes, trash receptacles, fuel storage tanks, dog runs, or a patio. Otherwise, side yards will not be enclosed with a privacy fence. Fences should tie into a structure or other terminus point. (Refer to Privacy Fencing, page 19 under Figure 5.)

Open Ranch Style Fencing:
May be used in the side and rear yards within the building envelope, transition zone, or open space, may be used to define space and circulation areas or accent gardens and will be limited to no more than four feet in height. (Refer to Split Rail Fencing, page 19 under Figure 7) The fencing should be of a consistent height and end at some transition point such as the house. The fencing may be stained but not painted.

White Rail Synthetic Material Fencing:
This material may be used to enclose pasturlands, stable runs, corrals, and the perimeter of the property other than in the front yard area between the residence and the street. (Refer to White Rail Fencing, page 19 under Figure 6) White rail PVC fencing may also be constructed within the designated building envelope in substitute for the Open Ranch Style Fencing. Fencing for pasture beyond the limits of the building envelope will not be permitted unless pasture is established and grasses are irrigated in accordance with Table 2A, (page 12). Under this scenario, pasture fencing may be the white PVC rail and the irrigated pasture area should adjoin the building envelope on a least two sides.
Chainlink Fence, Woven Wire, or other wire fence:
This fence material may be used for backyard pet enclosures, vegetable gardens, or swimming pools. (Specialty fences, in accordance with Washoe County Code.) The wire fencing, posts, and rails will be vinyl or plastic coated in a color to harmonize with building colors, or be a dark brown or black. No barbed wire fencing will be allowed.

Exterior Lighting:
The functional objectives in providing exterior area lighting are to illuminate areas necessary for safe and comfortable use. In certain situations, area lighting can add to the aesthetic appeal of a site by highlighting architectural features of a building or illuminating pathways and landscape plantings. In these instances, only the special features of a building or landscape should be illuminated. It should be noted that the standards and guidelines contained in this section address area lighting on individual properties, and not overhead street lighting along public and private rights-of-way.

Standards.
Exterior lights shall not blink, flash, or change intensity. String lights, building or rooftop tube lighting, reflective or luminescent wall surfaces are prohibited. Exterior lighting shall not be attached to trees except for the Christmas season. Driveway, walkway, and building lights shall be directed downward. Fixture mounting height shall be as low as possible and appropriate to the purpose. Illumination for aesthetic or dramatic purposes of any building or surrounding landscape utilizing exterior light fixtures projected above the horizontal is prohibited. Seasonal lighting displays and lighting for special events which conflict with other provisions of this section may be permitted on a temporary basis.

Guidelines.
Lighting Design
Exterior lighting should be designed as an integral part of the architecture and landscape and should be located in a manner that minimizes the impact of lighting upon adjacent structures and properties.

Lighting Levels
Avoid consistent overall lighting and overly bright lighting. The location of lighting should respond to the anticipated use and should not exceed the amount of light actually required by users. Lighting for pedestrian movement should illuminate entrances, changes in grade, path intersections, and other areas along paths, which if left unlit, would cause the user to feel insecure. Lighting suppliers and manufacturers have lighting design handbooks that can be consulted to determine fixture types, illumination needs, and light standard heights.

Fixture Design
Exterior lighting fixtures should be simple in design and should be well integrated with other architectural site features.

Structural Lighting
Night lighting of building exteriors should be done in a selective fashion: highlight special recognizable features; keynote repeated features; or use the play of light and shadow to articulate the facade. The purpose of illuminating the building should be to add visual interest and support building identification. Harsh overall lighting of a facade tends to flatten features and diminish visual interest.

**Lighting Height**
As a rule, the light source should be kept as low to the ground as possible while ensuring safe and functional levels of illumination. Area lighting should be directed downward with no splay of lighting directed off-site. The height of light fixtures of standards must meet Washoe County standards. Lighting should be directed downward in order to avoid sky lighting. Any light source over 10 feet height must incorporate a cutoff shield to prevent the light source from being directly visible from areas off-site. The height of luminaries should be in scale with the setting.

**Permitted Land Uses.**
High Density Rural
Minimum Lot size 2.5 acres.

**Construction of Extension of Grass Valley Road.**
Grass Valley Road will be constructed to Palomino Valley General Improvement District standards, for their consideration for acceptance and maintenance.

ATTACHMENT A
Legal Description

All that real property situated in the County of Washoe, State of Nevada, described as follows:

Parcel 16-2-1-1, as shown on Record of Survey map filed in the office of Washoe County Recorder, Washoe County, Nevada on October 29, 1975, under file No. 383409, 383410 and 383412 and Division of land map filed October 29, 1975, under file No. 383418, Palomino Valley Unit 1.

A portion of the North West 1/4 Sec 16 township 22 North, Range 21 East M.D.E.& M; in the county of Washoe, state of Nevada, being more particularly described as follows;

Commencing at the NW corner of Sec 16; then South 89 Degree 28' 24" East, 46.12' thence S 89 Degree 28' 26E 2,203.98 feet thence N 1 Degree 01' 36E 1,321.95 feet, thence S 89 Degree 29' 20" E 2,025.00 feet thence North 416.50 N 31 Degree 21' 36" West 1,066.96 feet to true point of beginning.

APPENDIX B
APPENDIX B

EXCERPTED AND ABRIDGED INFORMATION FROM THE
WARM SPRINGS SPECIFIC PLAN

WATER BUDGET

INTRODUCTION
The Specific Plan Area (SPA) is within the Warm Springs Valley Hydrologic Basin No. 84. The average annual precipitation in the basin is estimated to be 9.76 inches. There are no perennial streams in the SPA, but intermitent external drainage to Pyramid Lake does exist. The Nevada State Engineer has designated the Warm Springs Valley Basin as an area requiring additional water resource supervision. Various reconnaissance level studies have been conducted to estimate the potential amount of groundwater resources in the basin.

In general, an estimate of the available water resource and the current consumption patterns will be used to identify the total number of residential dwelling units and commercial or quasi-public uses that can be served from the available supply. Land areas have been identified based on the maximum number of residential dwelling units and desired development densities achievable based on the water available to the SPA and the location of existing water rights. The total number of acres assigned to each land use category, with appropriate allowance factors, will provide an adequate base to develop the projected number of residential units at buildout.

It is important to recognize that new techniques are being developed to improve in the prediction of safe groundwater yields. The estimates used in this plan will probably be superseded with new information resulting in the need for refined land use allocations. This water budget, therefore, is a useful tool for generating a plan for the Warm Springs SPA, but it should not be considered as the final water budget for the basin.

Specific Plan 3,000 ACRE FEET PERENNIAL YIELD

The position of the State Engineer is that only the Water Resources Reconnaissance Series Report No. 43 can be used to establish the perennial yield for the basin. This report specifies 3,000 acre-feet as the perennial yield. The perennial yield is the amount of water that is naturally replenished when a long-term average is considered.

The following table, Table A-4, establishes the water allocation for the SPA when 3,000 acre-feet is used as the planning perennial yield. The table summarizes the Warm Springs Area Plan Water Budget, and details the allocation remaining for the SPA.

Residential

According to the current Warm Springs Area Plan, the subdivision of parcels creating new residential lots on individual domestic wells will require the dedication of 2.5 acre-feet/year (AFY) of water rights to Washoe County. The residential section of the budget is based on allocating water available per residential lot on an individual well at 1.12 acre-feet/year. This number is based on a mandatory water conservation program with low water demand vegetable landscaping and low demand water fixtures in the "Warm Springs Area Plan" of the Washoe County Comprehensive Plan dated December 3, 1991, page 5B, paragraph 2 and Action Program WS.4.6.1. The water use calculation is based on the following water consumption elements:

1. Domestic Use

   a. The average per capita domestic water use (not including irrigation), is 77 gallons/person/day. This is based on a non-conserving household. A conserving household using water conservation fixtures will reduce the domestic per capita water use to 60 gpd. Using current technology, ultra low flow fixtures could reduce domestic per capita water consumption to 52 gpd. (Source: "Residential Water Conservation Project, Summary Report" by Brown and Caldwell, June 1984.)

   b. The average household size is projected to be 2.5 persons.  
      \[ 77 \text{ gallons/day} \times 365 \text{ days} \times 2.5 \text{ people} = \]  
      \[ 70,262.5 \text{ gallons/year} = \]  
      \[ 0.216 \text{ AF/house/year} \]

   c. A monitoring system will be required to determine actual use and mandate design and allocation changes based on actual use. The monitoring system should include tensiometers on trees/shrubs at sample facility.

2. Landscape Irrigation Use

   a. Lawn Watering

      The watering requirements for the Warm Springs area are determined as follows:
Water 0.5" twice per week for 16 weeks; water 0.75" twice per week for 12 weeks during the summer months. For a 100 square foot lawn area, we used the following calculation:

\[
\begin{align*}
(-5 \times 2 \times 16 \times .52^\ast &= 9.92 \times 100) &= 992 \text{ gallons} \\
(\ 75 \times 2 \times 12 \times .62^\ast &= 14.16 \times 100) &= 1,416 \text{ gallons} \\
\ast &\text{ of water applied to one square feet surface area} = .62 \text{ gallons}
\end{align*}
\]

b. Trees and Shrubs

The shrub and tree water consumption budget figures were determined using the following method:

The bermed saucer watering area of a mature tree was determined to be 4' diameter (3 for mature shrubs). The area of a 4' diameter saucer equals 12.5 square feet (7 sq. ft. for shrubs). The square footage area was multiplied by two feet to represent the preferred depth of watering to promote deep rooting and resistance to adverse conditions. This number represents cubic foot volume of soil to be watered which is multiplied by the water holding capacity of the soil (1.33 gallons per cubic foot of clay loam soil. Source: "Effectively Irrigating Landscape Trees" by Janet Hartin). The resulting number of gallons represents the amount of water to be applied per watering:

- mature tree (12.5 s.f. x 2 x 1.33 gallons = 33.25 gallons) mature shrub (7.0 s.f. x 2 x 1.33 gallons = 18.60 gallons)

The watering frequency was determined as follows:

For an evergreen tree or shrubs, water twice per week for the 12 week summer season, once per week for the remaining 16 weeks of the growth season and twice per month for the additional five months of the year.

\[
\text{evergreen trees and shrubs } (2 \times 12) + (1 \times 16) = 50 \text{ waterings}
\]

For a deciduous tree or shrubs water twice per week for the 12 week hot summer season and once per week for the remaining 16 weeks of the growth season. No additional water is required for the winter months.

\[
\text{deciduous trees and shrubs } (2 \times 12) + (1 \times 16) = 40 \text{ waterings}
\]

The per tree water consumption budget figures are then derived by multiplying the amount of water per application times the watering frequency:

- evergreen tree 33.25 gallons x 50 waterings = 1,662 gallons
- evergreen shrub 18.60 gallons x 50 waterings = 930 gallons
- deciduous tree 33.25 gallons x 40 waterings = 1,330 gallons
- deciduous shrub 18.60 gallons x 40 waterings = 744 gallons

We have averaged the yearly water consumption of mature deciduous and evergreen trees to determine the budget amount per tree in our figures (1,496 gallons). The average yearly water consumption of mature deciduous and evergreen shrubs equals 837 gallons.
c. The intent of the plan is to mandate compliance the per lot water allocation while at the same time providing alternatives to permit variety in individual landscape designs. The following chart provides a list of optional water use estimates that can be used in any combination on any lot provided the water allocation per lot is not exceeded.

Table A

</tr>
</tbody>
</table>

3. Animal Use

Livestock uses an average of 20 gallons of water per day:

\[ 20 \times 365 = 7,300 \text{ gallons/animal/year} \]

Per Policy WS.3.1.A, uses such as pastures, require dedication of water rights in addition to domestic rights.

4. Residential Water Use

Residential water usage figures by average lot size are listed utilizing the following water demand figures.

Lawn: The water requirement for lawn areas is as follows:

Water 0.5" twice per week for 16 weeks and water .75" twice per week for 12 weeks during summer months

\[ (.50 \times 2 \times 16 \times .62 = 9.92 \times \text{sq. ft.}) = \text{gallons per 16 weeks} \]
\[ (.75 \times 2 \times 12 \times .62 = 11.16 \times \text{sq. ft.}) = \text{gallons per 12 weeks} \]

\[ \text{gallons total per season} \]

\[ (* 1" \text{ of water applied to one square foot surface area} = .62 \text{ gallons}) \]

Tree: Number trees X 1,496 = gallons per season

\[ 1,496 = \text{an average of deciduous and evergreen trees from Table A-8} \]

Domestic Use: Average household gallons per day based on 2.5 persons per household.

a. 2 acre and larger - 1.12 acres feet/year = 364,930 gallons
The recommended limit of lawn area for the 2 - 2 ½ acre or larger lots is 4,000 square feet.

\[
\begin{align*}
9.92 \times 4,000 &= 39,680 \text{ gallons} \\
11.46 \times 4,000 &= 44,640 \text{ gallons} \\
84,320 \text{ gallons}
\end{align*}
\]

The plan requires five trees per lot:

\[
5 \times 1,496 = 7,480 \text{ gallons}
\]

Domestic use = 70,260 gallons

162,000 gallons

364,930 gallons

-162,960 gallons

202,870 gallons

Optional uses: This leaves 202,870 gallons for selection of optional landscape elements (see Table A for landscaping usage figures).

5. Irrigation Requirements

Each residential lot will be required to install an irrigation system with automatic controller and backflow prevention device to meet Washoe County/State health codes. The irrigation system shall include an overhead spray system for any turf areas, with uniform heads to head coverage and matched sprinkler head precipitation rates. The system shall also include a drain down method for winterization.

All trees, shrubs, and groundcovers shall be watered a drip system with a separate control clock or a dual program controller. Each tree, shrub, or groundcover shall be watered with individual drip emitters or collectively in groups with microsprayers.

End of Excerpt
APPENDIX C
DEVELOPMENT AGREEMENT
Washoe County and LW Land Company, LLC

This Development Agreement (the "Agreement") is effective on the date of recordation by Washoe County of this Agreement following its adoption by ordinance by the Washoe County Board of Commissioners ("Effective Date"). and is entered into by and between Washoe County, Nevada (hereinafter "County") and LW Land Company, LLC its agents and successors including developers and eventual subdivided parcel owners (hereinafter "Owner") (collectively hereinafter the "Parties").

WITNESSETH:

WHEREAS, the County is authorized, pursuant to Nevada Revised Statutes ("NRS") 527B.8201, et seq., and Washoe County Development Code ("Code") 110.814.00, et seq., to enter into binding development agreements with persons having legal or equitable interests in real property, for the purpose of establishing and strengthening long range plans for property development and providing for developer funding of certain public facilities to serve new development;

WHEREAS, Owner represents that he has complete and sole fee title ownership of the subject real property, the legal description of which is set forth on Exhibit "A" attached hereto and shown in the next identified exhibit (hereinafter the "Property");

WHEREAS, Owner has submitted and County has tentatively approved the initial preliminary parcel maps for development of the Property ("Project"), copies of which are attached hereto as Exhibit "B" ("Maps"), and the expiration dates of which were recently extended by the parties until October 10, 2017 pursuant to an "interim development agreement" and ordinance approved by the County;

WHEREAS, the Parties desire to enter into this Agreement in accordance with NRS and Code, as applicable, to promote the health, safety and general welfare of the County's inhabitants, to help provide some public services, uses and infrastructure, for which Owner voluntarily offers to pay, to secure to Owner certain land development safeguards and rights, and to achieve the goals and purposes for which development agreement law was enacted;

WHEREAS, it is further the Parties' desire that this Agreement satisfy certain of the infrastructure and development provisions of the County's specific plan for part of the general

Page 1 of 13
WHEREAS, the County is underway with a review and update of the formal area plan for the general Warm Springs area ("Area Plan"), which may produce significant changes to the WSSP this year, including possible updated fees and schedule, different development vision, and altered infrastructure needs and financing structure.

NOW, THEREFORE, the Parties agree as follows:

1. **Incorporation of Recitals.** The foregoing recitals are incorporated herein by this reference and shall aid in the interpretation of this Agreement.

2. **Permitted Uses, Density, Height, and Size of Structures.** Pursuant to NRS 5278.0201 and Code 5110.814.20, this Agreement must set forth the maximum height and size of structures to be constructed on the Property as well as the density of uses and the permitted uses of the land. The Parties agree that the Property shall be divided and the Project constructed strictly for single-family residential用途 in accordance with the Maps, the WSSP, the Code, and the NRS all in effect on the date of the County's tentative parcel map approval of the Maps and as reflected in this Agreement, including its attached exhibits. Owner shall subdivide to a density only as shown on the Maps. However, Owner and his successors reserve the option to further subdivide the Property and its parcels in the future, pursuant to then existing law, if and when the WSSP, Area Plan, Code and the Washoe County Health Department permit it. This Paragraph 2 is, however, made subject to the provisions of Paragraph 6 below.

3. **Development and Infrastructure.**

   3.1 **Development Standards-Handbook.** The Parties have jointly drafted, in accordance with the Code and WSSP, the Project's Development Standards Handbook ("Handbook"), which is attached hereto as Exhibit "C" and incorporated herein by this reference. Construction and use of the Project shall be in accordance with the Handbook.

   3.2 **WSSPHOA & CC&R's.** As set forth in the WSSP, the Property shall be made subject to a master homeowners' association and master declaration of covenants, conditions and restrictions ("c&rs") governing the entire WSSP area for the purposes identified in the WSSP, until the related WSSP requirements are modified or repealed, if at all, through the Area Plan update process. The association and the c&rs shall be completed to the satisfaction of the County Community Development Department and the Washoe County District Attorney.

   3.3 **Disclosure Statement.** The Parties have jointly drafted, in accordance with the Code and WSSP, a Disclosure Statement ("Disclosure"), which is attached hereto as Exhibit "D" and incorporated herein by this reference. The purpose of the Disclosure is to provide all buyers specific information about certain aspects of the WSSP and this Agreement, and how those may affect their long-term ownership. The Disclosure is not intended to be comprehensive in all aspects of the acquisition of certain parcels. It is meant to only provide basic information about aspects of the WSSP and this Agreement that are required to be disclosed. A signed and notarized copy of the Disclosure must be provided to all future property owners and must accompany all building permit applications submitted to the County. The purpose of this
requirement is to ensure that all future owners of property within the Warm Springs community are aware of the requirements of the WSSP and this Agreement.

3.4 Water and Septic. Owner does not intend at this time to subdivide at any greater density than as shown on the Maps, which permits Owner to install septic and well facilities on each new parcel instead of connecting to community water and sewer facilities likely to be built by another area property owner known as the Warm Springs Ranch. Owner waives connection to community water and sewer systems at this time. Owner shall install the referenced septic and well facilities pursuant to applicable law and regulations existing at the time of issuance of each of the related well and septic permits. Owner and his successors may in the future connect to a community water or sewer system, pursuant to then existing law, if and when the WSSP, Area Plan, Code and the Washoe County Health Department permit it.

4. Financing.

4.1 Infrastructure Related Fees.

4.1.1 Fee Commitments. Owner offers to and agrees hereby to pay all fees described in this Agreement and its exhibits. The duty to pay said fees and any increased or decreased fees negotiated as mentioned below, shall run with the Property and be binding upon and inure to the benefit of the successors and assigns of the Parties. These fees shall be paid to County on or before the time of the recording of each final parcel map.

4.1.2 Fee Area: The area encompassed within the WSSP is hereby designated as the "Fee Area" for the imposition of fees and the collection of funds under the provisions of this Agreement.

4.1.3 Special Fee Revenue Fund: Except as otherwise specifically provided in this Agreement, all fees collected pursuant to this Agreement shall be placed in a special, segregated, interest-bearing revenue fund (a "Special Fund") for each fee category and shall be used solely for the purpose of constructing the applicable capital improvements or providing refunds or reimbursements (as defined in Paragraph 4.6 herein) in accordance with this Agreement. The County, through its Director of Community Development and/or its Finance Director, shall maintain detailed records to identify the development(s) from which fees were collected, for which purpose and how said fees were spent.

4.1.4 Fee Changes. So long as the Project does not change from the use described in the Maps and conditions thereto, and except as otherwise provided in this Agreement, the fees set forth in this Agreement shall not increase without the written consent of the Parties except that the fees shall be adjusted to reflect changes in actual construction costs, but only as such costs are adjusted during the regular review of the Capital Improvements Program (CIP) for the WSSP. The CIP is attached as Exhibit "E," entitled Financing Concept Plan for the WSSP, and is incorporated herein by this reference. Notwithstanding this, Owner's fee obligations as defined in this Agreement may be altered or repealed, but not increased, subject however to Paragraph 5 below, by the update to the Area Plan and WSSP, possibly to include refunds of certain fees paid. Owner understands and agrees that no guarantee is expressed herein by the County and that this Agreement does not affect the update process nor ultimate amended Area Plan and WSSP in any respect whatsoever.
4.2 Fees—Roads, Drainage, Planning, Water, Parks, Open Space, and Utilities. At the recording of each final map for any phase of the Project, the fees set forth in this Agreement shall be paid by Owner to County as follows:

4.2.1 Roadway Fees. Owner agrees to pay to the County all roadway fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Roadway Fees"). These fees shall be set aside in a Special Fund specifically for the construction of the first phase of the Spine Road or other collector roads as defined in the phasing plan for roadways set forth in Exhibit "E". County shall disburse these fees for the purpose of design and construction of the roadways or to reimburse Owner if Owner constructs collector roads to County specifications. These fees are separate and apart from the Regional Road Impact Fee (RRIF) (Paragraph 4.3.1), which is collected at building permit. The Roadway Fees are also separate and apart from the property owners’ current fees collected by PVGD for the maintenance of public road easements.

4.2.2 Storm Drainage Fees. Owner agrees to pay to the County all storm drainage fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Drainage Fees"). These fees shall be set aside in a Special Fund specifically for the construction of Spine Road Drainage Improvements as defined in the plan for storm drainage set forth in Exhibit "F". These fees shall be reimbursed to Owner only if Owner constructs said drainage improvements to County specifications.

4.2.3 Planning Fees. Only those planning fees paid pursuant to this Agreement (hereafter "Planning Fees") shall be placed in a Special Fund specifically for the repayment of certain planning costs incurred by particular property owners as noted in the CIP (Page G-xxii of Appendix G of the WSSP). Owner shall be credited Planning Fees as noted in the Fee Schedule attached as Exhibit "F". Pursuant to Paragraph 4.2.2 below, all Planning Fees accumulated in the Special Fund shall be used to reimburse said particular property owners who paid the cost of preparing the WSSP. Owner would otherwise pay Planning Fees as shown in the Fee Schedule (Exhibit "F").

4.2.4 Community Water System Fees. Owner agrees to pay to the County all community water system fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Water System Fees"). These fees shall be placed in a Special Fund specifically for the purchase of land for, as well as the design and construction of, the Community Water System as defined in the plan set forth in Exhibit "E". All Water System Fees accumulated in the account shall be applied by the County or other government entity to design and construct this water system or used to reimburse Owner if Owner constructs said system to County specifications.

4.2.5 Parks and Open Space Fees. Owner agrees to pay to the County all parks and open space fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Park Fees"). These fees shall be placed in a Special Fund specifically for the purchase of land for, as well as the design and construction of, certain parks and open space as defined in the plan set forth Exhibit "E". All Park Fees accumulated in the account shall be applied by the County or other government entity to design and construct the parks and open space or used to reimburse Owner if Owner constructs said parks and open space to County specifications. The Park Fees are separate and apart from the Residential Construction Tax (Paragraph 4.3.2 below), which is collected at building permit.
4.2.6 Public Facilities Fees—Police and Fire. Owner agrees to pay to the County all public facilities' fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Facilities Fees"). These fees shall be placed in a Special Fund specifically for the purchase of land for, as well as the design and construction of, the police and fire public facilities otherwise known in and defined in Exhibit "F" as "Community Facilities". All Facilities' Fees accumulated in the account shall be applied by the County or other government entity to design and construct these facilities or used to reimburse Owner if Owner constructs these facilities to County specifications.

4.3 Existing RTC and County Fees.

4.3.1 Existing RTC Regional Road Impact Fee (RRIF). Owner understands and agrees that in addition to the Roadway Fees discussed in Paragraph 4.2.1 above, the Project is subject to the current RRIF, which shall be paid by Owner to County pursuant to applicable RRIF law at issuance of building permits.

4.3.2 Existing Park Residential Construction (RCT). Owner understands and agrees that in addition to the Parks Fees discussed in Paragraph 4.2.5 above, the Project is subject to the current RCT for parks to be paid by Owner to County pursuant to applicable RCT law at issuance of building permits or as otherwise may be lawfully agreed to in by Washoe County Department of Regional Parks and Open Space. If Owner constructs the parks and open space to County specifications, then Owner shall be credited or refunded in accordance with such procedures for credit or refund.

4.4 Credits. The County's Director of Community Development shall make determinations of credit in accordance with this Agreement. Credits apply only to the respective Special Fund set forth in Paragraph 4.2.6 above and shall not be transferable to other Special Funds. Credits may only be used upon substantiation of the completion of improvements, or in the case of planning fees, evidence of payment of fees.

4.4.1 Credits for Roadway Fees, Drainage Fees, Water System Fees, Park Fees, and Facilities Fees. Credit against fees paid to the Special Funds shall be based on the actual cost of the provision of those facilities or the independently appraised value of the dedication, whichever is applicable. The actual cost or value shall be credited against the total amount due based upon the Per Fee Unit that is established by this Agreement and identified in Exhibit F hereto.

4.4.2 Credits for Planning Fees. Only those particular property owners who paid the cost of preparing the initial WSSP, or their successors, shall be eligible for Planning Fees credit. Owner is eligible for Planning Fees' credit as one of the original payees and the total amount of credits for the Maps, assuming all parcels are awarded, is estimated at the amount set forth in Exhibit F hereto.

4.5 Credit Waiver. Owner must apply any Credits at the time of the filing of a final parcel map. Owner's failure to do so for a particular final map shall be deemed a waiver of those Credits to that particular final map. Said Credits may be used on future parcel maps.

4.6 Refund/Reimbursements of Fees.
4.6.1 Refunds. Except as otherwise provided in this Agreement, upon completion of that category's capital improvements as identified in the CIP for the entire WSSP area, the County shall refund to current WSSP property owners all remaining fees in that category's fund (the "Refund"). In no event shall the administrative costs incurred by the County be deducted from such refund. The Refund shall be paid as follows:

(i) the actual cost of all improvements made in that category of CIP improvement is less than all respective fees paid into that category; (ii) excess funds exist in the Special Fund; and (iii) no additional funds are required to complete the respective improvements required within the WSSP.

4.6.2 Planning Fees' Reimbursement. In addition to the Credits provided for in this Agreement, the Owner may choose to be reimbursed for the actual Planning Fees paid through a reimbursement (the "Reimbursement"). However, in no event shall the combination of Credits and Reimbursements total more than the actual Planning Fees paid. Any Reimbursement made shall reduce the amount of Credits available. Conversely, any Credit obtained shall likewise reduce the amount of Reimbursement available. A request for Reimbursement shall be submitted by Owner to the County's Community Development Department within 30 days of the postmark date of notice mailed to Owner of the determination of actual costs made by the County's Director of Community Development. Should the Planning Fees Special Fund not have sufficient funds to allow for full Reimbursement, then the County shall repay, on a quarterly basis, from whatever funds have been collected during the preceding quarter into said fund until the full amount of Reimbursement is paid.

4.6.3 Pro Rata Refunds/Reimbursements. In the event that more than one valid application for a Refund or Reimbursement is made and approved, the County shall allocate the funds available for reimbursement between the applicants based on the ratio of the actual costs incurred in each respective fee category or the ratio of the planning fees paid by the applicants.

4.6.4 Director's Decision and Appeals. Administrative decisions regarding Refunds or Reimbursements may be appealed by the affected Owner to the Washoe County Planning Commission by filing with the County's Department of Community Development a statement of the grounds of the appeal within ten (10) days of the postmark date of notice mailed to Owner of the administrative decision. The County's Director of Community Development will schedule such appeal on the Planning Commission agenda for the next regularly scheduled meeting occurring at least twenty-one (21) calendar days after receipt of the appeal statement. If the Planning Commission reverses the decision of the Director of Community Development, it shall direct the Director to recalculate the fee in accordance with its findings. In no case shall the Planning Commission have the authority to negotiate the amount of the fee. If the Planning Commission affirms the decision of the Director of Community Development, the affected Owner may appeal to the County Board of Commissioners within ten (10) calendar days of the Planning Commission hearing by filing a notice of appeal with the County's Department of Community Development. The County shall consider and render a decision on the appeal in a prompt manner.

4.7 Dedication and Maintenance of Facilities. Owner may be required to offer certain facilities, to include roadways, for dedication to the County at the time of the filing of a final map. Dedication of facilities or roadways to PVGHD may also be required.
5. **SADs and GIDs.** Owner offers to and hereby agrees to waive protest to participation in any special assessment or general improvement district proceedings and agrees to cooperate fully therewith.

6. **Reliance, Uncertainties and Subsequent Actions.**

   6.1 **Reliance by the Parties.** The Parties understand and acknowledge that the other relies upon the assurances, arrangements, and promises set forth in this Agreement and its exhibits, all of which permit the construction and completion of the Project in accordance with the terms of and the uses, densities, heights, sizes and other similar matters defined in this Agreement and its exhibits.

   6.2 **Uncertainties.** The Parties understand and acknowledge that circumstances beyond the control of either party could defeat their mutual intent that the Project be constructed in the manner contemplated by this Agreement. Among such circumstances is water availability or other limited natural resources, waste disposal limitations, federal regulation of air and water quality, and the Area Plan update and possible amended WSSP. The parties recognize that unforeseeable circumstances could affect each other’s ability to perform obligations hereunder.

   6.3 **Subsequent Actions.** Owner acknowledges and agrees this Agreement does not relieve the from compliance with existing, changed, modified or amended rules, regulations, laws, ordinances, resolutions, fees or codes of other governmental agencies. Such rules, regulations, laws, ordinances, resolutions, fees or codes of governmental entities must be complied with by the Owner and are not locked in nor a part of this Agreement. Owner further acknowledges and agrees this Agreement does not prevent the County in a subsequent action applicable to the Property from adopting different law, provisions or conditions that do not conflict with the terms in and the law governing this Agreement, except that any subsequent action by the County shall not prevent the development of the Property pursuant to this Agreement. It is not the intent of the Parties nor shall this Paragraph be construed as excusing the County of any obligation hereunder or depriving Owner of any right under this Agreement, which can be performed and without impairment of the County's emergency powers and obligation to obey and enforce state and federal law (Cite 110.814.05(c) and (d)).

6.3.1 **Exceptions.**

   6.3.1.1 **Amended WSSP.** Notwithstanding this Paragraph 6 and any other contradictory term in this Agreement, Owner understands and agrees that certain possible changes to the WSSP as adopted through the current update process to the Warm Springs Area Plan shall be binding upon Owner, successors and the Property no matter whether the final map or a building permit has been approved or issued, and Owner agrees to immediately cooperate and comply with such changes as may be contained within the updated Area Plan and amended WSSP. This Paragraph 6.3.1.1 is limited to those certain possible changes to the WSSP that concern homeowners' associations, ccds, water and sewer, non-paved road maintenance and related costs and fees. This Paragraph 6.3.1.1 shall also constitute a covenant running with the land of the Property.

   6.3.1.2 **Public Health & Safety Law.** Notwithstanding this Paragraph 6 and any other contradictory term in this Agreement, Owner understands and agrees that at the time of submission to the County for any map or permit (including without limitation final maps and building permits) related to the Project the then existing laws (whether local, state or federal)
affecting public health and safety (as typically used for example in the building, health and fire codes' sectors) shall apply. This Paragraph 6.3.1.2 shall constitute a covenant running with the land of the Property.

7. Conflicting Laws.

7.1 Conflicting State or Federal Rules. In the event that any conflicting state or federal laws or regulations enacted after the date of this Agreement prevent or preclude compliance with one or more provisions of this Agreement or require changes in plans, maps or permits approved by the County, this Agreement shall remain in full force and effect as to those provisions not affected, and the conflicting laws or regulations shall not be applied retroactively.

7.1.1 Notice and Copies. Either party, upon learning of any such matter, will provide the other party with written notice thereof and provide a copy of any such law, regulation or policy on an account of any such action or inaction together with a statement of how any such matter conflicts with the provisions of this Agreement; and

7.1.2 Modification Conferences. The parties shall, within thirty (30) calendar days of the notice referred to in the preceding subsection, meet and confer in good faith and attempt to modify this Agreement to bring it into compliance with any such federal or state law or regulation, or accommodate any such action or inaction.

7.2 County Commission Hearings. In the event County believes that an amendment to this Agreement is necessary pursuant to this Paragraph 7, the proposed amendment shall be scheduled for hearing before the County Commission and notice pursuant to law (including NRS 52.78; 0205(2)). The County Commission shall determine the exact nature of the amendment or suspension necessitated by such federal or state law or regulation, or action or inaction. Owner shall have the right to offer oral and written testimony at the hearing. The Commission's decision is subject to judicial review as set forth in Paragraph 9.3 below.

7.3 Cooperation in Securing Permits. County shall use its best efforts to cooperate with Owner in securing any County permits, licenses or other authorizations that may be required as a result of the Commission's decision. It is the responsibility of the owner to pay all applicable fees in connection with securing the permits.

8. Review Default and Termination.

8.1 Frequency of Reviews. As required by NRS 278.0205 and Code 170.814.35, at least once every twenty-four (24) months during the Term of this Agreement Owner shall provide to the County's Community Development Department and County shall review in good faith a report demonstrating Owner's good faith and material compliance with the provisions of this Agreement and outlining any issues regarding the County's performance during the preceding twenty-four (24) months. The County's Director of Community Development shall promptly report to the County Commission on the topics of the Owner's report and satisfaction of this Agreement. If at the time of review an issue not previously identified in writing is required to be addressed, the review, at the request of either party, shall be continued to afford sufficient time for response.
8.2 Opportunity to be Heard. Any party requesting an opportunity to be heard by the County Commission on this review matter shall be given such opportunity within a reasonable time following submission of the Director's report to the Commission.

8.3 Procedures in the Event of Default. In the event of any default, with any provision of this Agreement, the nondefaulting party shall send by regular mail to the other a courtesy notice not less than thirty (30) calendar days prior to declaring a default under this Agreement. This thirty-day period shall be measured from the date of postmark of the notice. The courtesy notice shall detail the alleged default, any action necessary to cure the default and, where appropriate, the manner and period of time in which the alleged default may be satisfactorily cured. During the period of time the default letter is pending, the defaulting party shall not be considered in default for the purposes of termination of the Agreement or the institution of legal proceedings. If the default is corrected, then no default shall exist and the noticing party shall take no further action. If the default is not corrected within thirty (30) calendar days, the following shall occur:

8.3.1 Set Hearing Notice and Possible Freeze. The party noticing a default shall set the matter for hearing before the County Commission. This hearing shall occur at the County Commission meeting that follows after the minimum seven (7) business days mentioned in this Paragraph 8.3.1 plus the time necessary for publication and notification pursuant to law. Said parties shall send a notice to the other party, by certified mail return receipt requested, and by regular mail, providing notice of intent to present the matter to the Commission, the date set for the Commission's hearing of the same, and notice of at least seven (7) business days before the hearing date of an additional opportunity to correct the default. The seven (7) calendar business days will be measured from the date of postmark of the certified and regular mailing of the letter. If the default remains uncorrected at the expiration of these seven days, the Commission shall conduct its hearing on the matter. Furthermore, if the Owner is the alleged defaulting party, the Director of Community Development may also immediately direct County staff to condition all future zoning, land use, and mapping applications for the Property so that the building permits to be issued as a result of those approvals shall not be issued until the default is corrected, subject to review by the Commission.

8.3.2 Review by County Commission. Following consideration of the evidence presented before the County Commission and a finding based on substantial evidence that a default has occurred by the alleged defaulting party and the default remains uncorrected, the County Commission shall, in the event County is the defaulting party, direct County staff to immediately cure the default, and, if Owner is the defaulting party, the County may amend or terminate this Agreement and/or may notify or authorize the suspension of building permits for the Development. Termination shall not in any manner rescind, modify, or terminate any vested right in favor of Owner, existing or received, as of the date of the termination. Should Owner elect to appeal, Owner shall have twenty-five (25) calendar days after the date of the Commission's hearing to institute legal action as set forth in Paragraph 9.3 below to determine whether the County Commission abused its discretion.

8.3.3 Waiver. Failure or delay in giving any notice provided for herein shall not constitute a waiver of any default. Except as otherwise expressly provided in this Agreement, any failure or delay by any party in asserting any of its rights or remedies in respect to any default shall not operate as a waiver of any default or of any such rights or remedies, or deprive any party of its right to institute and maintain any actions or proceedings which it may deem necessary to protect, assert, or enforce any of its rights or remedies.
8.4 Unavoidable Delay or Default, Extension of Time for Performance. Neither party hereunder shall be deemed to be in default, and performance shall be excused, where delays or defaults are caused by war, acts of terrorism, insurrection, strikes, work stoppages, riots, floods, earthquakes, fires; casualties; acts of God, restrictions imposed or mandated by governmental entities, failure of governmental agencies (other than County) to perform acts or deeds necessary for the performance of this Agreement, enactment of conflicting state or federal laws or regulations or similar matters beyond the control of the parties. If written notice of any such delay is given to County within thirty (30) calendar days after the commencement thereof; an automatic extension of time, unless otherwise objected to by County within ten (10) business days of such written notice, shall be granted, coextensive with the period of the enforced delay, or longer as may be required by circumstances or as may be subsequently agreed to between County and Owner.

9.1 Termination of Agreement. The term of this Agreement shall be for three (3) years commencing on the date of this Agreement as defined at the beginning hereof. Owner may apply once to the County Board of Commissioners for a ten-year extension of this Term provided that the law and regulations existing at the time of action by the Board to grant the extension shall thereafter govern the Project, the Property, the Maps and this Agreement. The Board’s action shall be at its discretion.

9.2 Amendment or Cancellation of Agreement. Except as otherwise permitted by NRS Chapters 278.0205 and this Agreement, this Agreement may be amended from time to time or canceled only upon the mutual written agreement of the Parties.

9.3 Legal Action, Damages and Venue. The County and Owner agree that the County would not have entered into this Agreement if it were liable for damages under or with respect to this Agreement. Accordingly, the County and the Owner may pursue any remedy at law or in equity available for breach, except that neither the Owner nor the County shall be liable to the other or to any other person or entity for any monetary damages whatsoever. Prior to the institution of any legal action, the party seeking legal action must give the thirty (30) day notice of default as set forth in Paragraph 8.3 above. Following such notice, a public hearing must be held by the County Commission where the allegations will be considered and a decision regarding the merits will be reached. Any judicial review of the County Commission’s decision or any legal action taken pursuant to this Agreement will be heard by a court under the standard review applicable to county review of zoning actions; and the decision of the County Commission shall be upheld or overruled if its decision is clearly arbitrary and capricious. Judicial review of the decision of the County Commission shall be limited to the evidence presented to the County Commission at the public hearing. Any judicial review or other action to enforce or interpret this Agreement shall occur in and vest exclusively with the Second Judicial District Court, State of Nevada.

9.4 Governing Law. This Agreement shall be construed and enforced in accordance with and shall be governed by the law of the State of Nevada.

9.5 Assignments.

9.5.1 Transfer to an Affiliate of Owner. The rights of Owner under this Agreement may be freely transferred or assigned to any entity, partnership, or corporation, which Owner
controls, or in which Owner has a controlling interest, or which controls Owner, provided, such entity shall assume in writing all obligations of Owner hereunder.

9.5.2 Third Party Assignment. The rights and obligations of Owner under this Agreement may be freely transferred or assigned to a third party not affiliated with Owner, provided such third party assumes in writing all obligations of Owner hereunder as to the assigned or transferred portion of the Project along with a copy of the sale, transfer, conveyance, or assignment agreement wherein the third party assumes the obligations of the Owner. Upon any such assignment hereunder, the Owner shall be relieved of all obligations and liabilities under or in connection with this Agreement. In connection with the conveyance of any portion of the Property, Owner shall provide County with written notice of any sale, transfer, conveyance, or assignment of any unimproved portion of the Project.

9.5.3 Financial Transactions. Owner has full discretion and authority to transfer, assign or encumber the Project or portions thereof in connection with financing transactions, without limitation on the size or nature of any such transaction, the amount of land involved or the use of the proceeds there from, and may enter into such transaction at any time and from time to time without permission of an notice to County.

9.6 Indemnity: Hold Harmless. Except as expressly provided in this Agreement, Owner shall hold County, its officers, agents, employees, and representatives harmless from liability for damage or claims for damage for personal injury, including death and claims for property damage which may arise from the direct or indirect operations of Owner or those of its contractors, subcontractors, agents, employees, or other persons acting on Owner’s behalf, which relate to construction of the Project. Owner agrees to and shall defend County and its officers, agents, employees, and representatives from any claims and actions for damages caused or alleged to have been caused by reason of Owner’s activities in connection with the Project. Owner agrees to indemnify, hold harmless, and provide and pay all costs for a defense for County in any legal action filed in a court of competent jurisdiction by a third party challenging the validity of this Agreement. The provisions of this Paragraph 9.6 shall not apply to the extent such damage, liability, or claim is solely caused by the intentional or negligent act of County, its officers, agents, employees, or representatives.

9.7 Binding Effect of Agreement. The burdens of this Agreement bind, and the benefits of this Agreement inure to, the parties’ respective successors in interest and shall run with the land until the completion of performance of this Agreement or its earlier revocation or termination as provided herein.

9.8 Relationship of Parties. It is understood that the contractual relationship between County and Owner is such that Owner is an independent contractor and not an agent of County for any purpose.

9.9 Notices. Unless otherwise provided in this Agreement, all notices, demands and correspondence required or provided for under this Agreement shall be in writing and delivered in person or sent by overnight courier or mailed by certified mail postage prepaid, return receipt requested. Notices shall be addressed as follows:
To County: WASHOE COUNTY
Department of Community Development
Current Planning Division
PO Box 11130
Reno, NV 89520-0027

To Owner: L.W. Land Company LLC
A Nevada Limited Liability Company
Brian Murphy
695 Mile Circle Drive
Reno, Nevada 89511

Either party may change its address by giving notice in writing to the other and thereafter notices, demands and other correspondence shall be addressed and transmitted to the new address. Notices given in the manner described shall be deemed delivered on the day of personal delivery or the delivery date by overnight courier or mail is first attempted.

9.10 Entire Agreement. This Agreement constitutes the entire understanding and agreement of the parties. This Agreement integrates all of the terms and conditions mentioned herein or incidental hereto and supersedes all negotiations or previous agreements between the parties with respect to all or any part of the subject matter hereof.

9.11 Waivers. All waivers of the provisions of this Agreement must be in writing and consent of all parties hereto.

9.12 Recording Amendments. Promptly after County's execution of this Agreement, an executed original of this Agreement shall be recorded in the Official Records of Washoe County, Nevada. All amendments hereto must be in writing signed by the appropriate officers of County and Owner in a form suitable for recordation in the Official Records of Washoe County, Nevada. Upon the completion of performance of this Agreement or its earlier revocation or termination, a statement evidencing said completion or revocation signed by appropriate officers of County and Owner shall be recorded in the Official Records of Washoe County, Nevada.

9.13 Headings, Exhibits, Cross-references. The headings and captions used in this Agreement are for convenience and ease of reference only and shall not be used to construe, interpret, expand or limit the terms of this Agreement. All exhibits attached to this Agreement and the exhibits at the front of this Agreement are incorporated herein by the reference thereto contained herein. Any term used in an exhibit hereto shall have the same meaning as in this Agreement unless otherwise defined in such exhibit. All references in this Agreement to Paragraphs, Sections and Exhibits shall be to Paragraphs, Sections and Exhibits of or to this Agreement, unless otherwise specified. Copies of the Exhibits shall be retained and maintained by the Department of Community Development at 1101 East Ninth Street, Reno and shall be available for inspection.

9.14 Severability of Terms. If any term or other provision of this Agreement is held to be invalid, illegal or incapable of being enforced by any rule of law or public policy, all other
conditions and provisions of this Agreement shall nevertheless remain in full force and effect, provided that the invalidity, illegality or unenforceability of such term does not materially impair the parties' ability to consummate the transactions contemplated hereby. If any term or other provision is invalid, illegal or incapable of being enforced, the parties hereto shall, if possible, amend this Agreement so as to effect the original intention of the parties.

9.15 Voluntary Agreement. Owner acknowledges that he had the option of conducting his own public facilities needs assessment but instead voluntarily chose to accept the WSSP. Owner further acknowledges and agrees that he voluntarily, willingly and without protest and duress freely, enters into this Agreement and accepts the terms and conditions hereina.

IN WITNESS WHEREOF, this Agreement has been executed by the parties on the date stated.

LEGAL DESCRIPTION
Legal Description

All that real property situate in the County of Washoe, State of Nevada, described as follows:

Parcel 16-2-1-1, as shown on Record of Survey map filed in the office of Washoe County Recorder, Washoe County, Nevada on October 29, 1975, under file No. 383409, 383410 and 383412 and Division of land map filed October 29, 1975, under file No. 383418, Palomino Valley Unit 1.

A portion of the North West ¼ Sec 16 township 22 North, Range 21 East M.D.& M., in the county of Washoe, state of Nevada, being more particularly described as follows:

Commencing at the NW corner of Sec 16; then South 89° Degree 28' 24" East, 46.12'; thence S 89° Degree 28' 26" E 2,603.98 feet thence N 1° Degree 01' 36" E 1,321.95 feet, thence S 89° Degree 29' 20" E 2,025.00 feet thence North 416.50 N31° Degree 21' 36" West 1,066.96 feet to true point of beginning.

Disclosure Statement
DISCLOSURE STATEMENT

Because you are considering the purchase of a parcel of property or a home in the Warm Springs area of Washoe County, you need to know about the formal plans and rules that govern your purchase and your use of the property. This Disclosure Statement is required by the Warm Springs Specific Plan (WSSP), which is a formal document adopted by Washoe County for the purpose of planning land development and the public services needed to serve this development.

This Disclosure Statement will not tell you everything you need to know about buying and using property in Warm Springs pursuant to the WSSP. You need to study all documents related to your purchase and legal use of Warm Springs property, which are available from your seller and Washoe County. These documents may include a proposed purchase agreement and escrow instructions, title report, seller's property advisories, the WSSP, the WSSP Development Standards Handbook, the project-specific Development Standards Handbook, a development agreement with Washoe County, and a possible declaration of covenants, conditions, and restrictions. This Disclosure Statement will attempt to summarize some of the major features of the WSSP and its exhibits.

THE WSSP

There are several attachments to this Disclosure Statement, which convey in summary manner some of the major features of the WSSP. They are referred to as exhibits. Exhibit A is a colored map that illustrates all of the land use types and densities currently approved under the WSSP. Exhibit B is a copy of a part of the Washoe County Development Code (Washoe County Code Chapter 110, Article 302), which displays the legal and illegal uses of both your property and neighboring properties. Exhibit C is a copy of another part of the Development Code (Article 304), which describes the use types set forth in Exhibit B. Exhibit D is a copy of a part of the County's Area Plan Regulations for the Warm Springs Area (Article 226 of the Development Code).

It is important that you study these exhibits at a minimum and understand what you are allowed to do with your property. Your property is within the area that has been outlined on Exhibit A, and your signature on this Disclosure Statement ensures that you were informed of all land uses permitted on and adjacent to your property as well as within the entire Warm Springs Specific Plan community. Please note that you are agreeing NOT to file any written or verbal complaints or any lawsuits or other legal proceedings regarding any existing legal agricultural uses.

WARM SPRINGS AREA PLAN UPDATE

Washoe County is conducting this year of 2006 a review and update of the formal area plan for the general Warm Springs area ("Area Plan"), of which the WSSP is a part. This update may produce significant changes to the WSSP this year, including possible updated fees and schedule, different development vision, and altered infrastructure needs and financing structure. A few of these possible changes could apply to you now and require certain actions or payments. This is all discussed in the development agreement entered into by your developer/seller and Washoe County, a copy of which is attached as Exhibit B. Please read it now.

DEVELOPMENT AGREEMENT

Exhibit E is the referenced development agreement. It controls what may happen to and on the property you are buying or have bought. It requires, among other things, certain appearances to your home and landscape, the payment of certain fees (which your seller may or may not have satisfied), and your possible participation in a homeowner's association as well as special assessment or general improvement districts. Please study this agreement.

HANDBOOK FOR DESIGN

All development within the WSSP community must satisfy the minimum criteria established in the WSSP Development Standards Handbook as well as the more specific criteria set forth in the project's specific development standards handbook created by the developers of the project in which you may be purchasing property. These two handbooks are intended to provide future homeowners and businesses with design guidelines to be followed to conserve natural resources, primarily water supply, enhance the quality of the community, and ensure long-term design consistency and land use consistency, as
envisioned by the WSSP. A copy of this Project’s Development Standards Handbook is included as Exhibit F. This handbook is attached to this Disclosure Statement for your reference at the time you prepare to design your future home or business.

INFRASTRUCTURE FEE PAYMENT

The WSSP contains a plan for funding, building and maintaining public services needed for the development of Warm Springs, such as roads, drainage, water, parks, police and fire. This plan is referred to as the financing plan, and it requires payment of fees to cover a proportionate share of these community services. The amount and payment of these fees was established by your property developer in the Development Agreement (Exhibit E). If the property you may purchase is located within a subdivided area in Warm Springs, you will be bound by the development agreement and must pay a fair share at purchase. Note that some of the fees apply only to property that will subsequently be subdivided. Other fees are applicable to parcels that will not be further subdivided.

Attached as an exhibit to the Development Agreement (Exhibit E) is a copy of the Schedule of Fees. The WSSP Development Standards Handbook notes that there will be a yearly escalation of these fees, based upon the Consumer Price Index.

ROADWAY MAINTENANCE

The Palomino Valley General Improvement District (PVGID) will review public roadways, major or minor, for acceptance for maintenance. PVGID probably affects your property. Any private roads must be the responsibility of your homeowners association, if any, and will not be maintained by PVGID or Washoe County.

FUTURE ASSESSMENT DISTRICTS

Please be advised that an assessment district or general improvement district could be created in the future to provide community water service, community sewer service, drainage systems, or roadways in the WSSP area. At the time you file for a building permit, such a district may or may not be in place. The attached waiver (that will require your signature at the closing of your property) will limit your ability to oppose any future assessment district that may be imposed to fund a community water system, community sewer service, drainage system, or roadway construction/maintenance.

ACCEPTANCE

I (we) have read and understand all the provisions of this Disclosure Statement and agree to all the stated provisions.

Financing Concept Plan
GENERAL

The major element of each development agreement to be entered into by a subdividing property owner and Washoe County would be the capital improvement program elements, which have significance within the entire WSSP area, or are required to serve more than one development. These elements form the "backbone" of the infrastructure system. The development agreement identifies specific elements of the infrastructure system that must be funded or constructed prior to issuance of certificates of occupancy by the County. The Capital Improvements Program (CIP) for the WSSP is found in Appendix G of the Warm Springs Specific Plan and is incorporated herein by this reference.

Reno, NV 89511

DECLARATION OF
COVENANTS, CONDITIONS AND RESTRICTIONS
OF
PALOMINO RANCH ESTATES

This declaration made this ______ day of __________________

2017 by LW Land Company LLC _______________________, a
Nevada Limited Liability Company _______________________, hereafter
referred to as 'DECLARANT'.

WHEREAS, DECLARANT is the owner of that certain real property
located in the County of Washoe evidenced by the certain official
subdivision map recorded in the office of the County Recorder of
the County of Washoe, State of Nevada, on, in Book ______ of
Subdivision Maps, at Page ________, and more particularly described
as Palomino Ranch Estates and

WHEREAS, DECLARANT desires to impose upon said lots mutual and beneficial
covenants, conditions and restrictions under a plan of improvement for
the benefit of all owners and future owners thereof.

NOW THEREFORE, DECLARANT hereby declares that said lots, numbered
______ through ________ inclusive, are held and shall be held,
conveyed, hypothecated, used, improved and occupied subject to the
following covenants, conditions, restrictions, easements and
agreements which are imposed pursuant to a common plan and are intended
to create equitable servitudes designed to preserve the quality of said
land for the benefit of the various owners thereof, their heirs, successors
in interest and assigns. To wit:
RESTRICTIVE PROVISIONS

1. Use and Improvements
No buildings, other than one detached, single-family private dwelling, private garage for the use of the occupants of such dwelling and a barn or other usual and appropriate outbuildings strictly incident and appurtenant to a private dwelling, shall be erected or maintained on any lots, except that a guest house may be permitted subject to County requirements. No use whatsoever, except in connection with its use and improvement as a site and grounds of a private dwelling as above set forth shall be made of any lot or plot therein and furthermore, no driveway, road, right of way, or any easements for public or private use shall be granted for any reason whatsoever, across or through any lot to any other piece of property without complying fully with County requirements.

2. Temporary Dwellings, Outbuildings and Accessory Outbuildings
No trailers, except temporary contractors' trailers used in connection with construction and not provided for dwelling accommodations, tents, garage or other outbuildings shall be used as a temporary or permanent residence, nor shall any residential structure be moved on to the tract from some other location, nor shall "used" lumber be utilized in the construction of any building, whether it be of temporary or permanent nature, unless approved prior to use by an architectural control committee. No accessory outbuildings shall be erected on any lot prior to the erection of a dwelling thereon. In no event shall any such accessory outbuilding, partially-completed or temporary structure ever be used for human occupancy or habitation.
3. Minimum Building Requirements

The construction of all dwellings on all lots, regardless of size of dwelling, must conform to F. H. A. or better specifications. On all lots, no dwelling shall be erected or permitted to remain thereon having a ground floor area, exclusive of open porches and garages, of less than 1,500 square feet for a one-story building, or 750 square feet for a two-story building, with the total size no less than 1,500 square feet.

4. Building Setback Requirements

On lots 50,000 square feet or smaller, building setbacks will vary, providing a more rural atmosphere in the streetscape. No building or projection thereof shall be located nearer than 20 feet to any street or driveway access easement.

No building shall be located nearer than 25 feet to any rear lot line. All lots larger than 10,000 square feet will have an established building envelope with a minimum setback of 30 feet. Buildings may be located anywhere within the envelope; however, all buildings, structures or storage of any type, will be confined to this area on each lot. The size and shape of envelope may vary from lot to lot. The envelope's depth and setback will be related to overall lot size. These established setback lines notwithstanding, no structure shall be located nearer than 100 feet from any perennial stream. Areas within 100 feet of said perennial streams shall be maintained in their natural state. In accordance with fish and game codes, the Department of Fish and Game must be notified at least 30 days prior to any activity that alters a stream. Stream crossings and culvert installations are subject to this code section.

5. Heating and Fireplaces

The use of efficient, non-polluting heating systems shall be encouraged within the SPA Primary heating sources for residences
shall be standard conventional electric or propane gas systems distributing heat through ducts within the home. Applicants who prefer stoves as the major heat source in the home will be encouraged to use pellet stoves. Approved pellet stoves will be accepted as a major heat source within the residence. Wood-burning stoves and fireplace inserts are prohibited as a major heat source. Applicants with standard conventional electric or propane heating systems designed for use as the major heat source within the residence will be allowed the installation of one wood stove as a secondary backup heat system, provided the wood stove meets the new County clean-burning, low-pollution standards. Open fireplaces are prohibited except for gas burning fireplaces which have false logs and are used purely for aesthetic purposes and are not considered a heat source within the residence.

6. Architecture

All buildings must incorporate a "western ranch" theme or identity architecturally, in a manner that is complementary and compatible with the plan area and its surroundings. No mobile homes are allowed except for construction purposes within the SPA. To enhance the development and maintain its rural character, buildings and structures shall adhere to the following guidelines:

a. Exterior Walls and Trim. Wood, brick, stucco, or stone material finishes are required for all exterior walls. Siding must run one consistent direction on all exterior walls. Exterior colors must be earth tone and harmonize with the surrounding landscape. No true primary or secondary colors are allowed, nor any gloss or semi-gloss finishes. All reflective metal such as chimney stacks, flashings, exhaust vents and pipes, must be painted to match or blend with surrounding materials. All draperies
and window coverings should also be of materials and colors which harmonize with the surroundings. Aluminum windows, door frames, solar panels, and skylights must be bronzed or anodized. Steel windows and door frames must be painted to match or blend with surrounding materials.

b. Animals. On lots greater than one acre, horses or 4-H animals, limited to cattle or sheep, will be allowed provided they are not adjacent to the center spine road, village center, community facilities center, or school sites. No lot shall have more than two such animals. All other lots may have the usual household pets provided they are not kept for commercial purposes and are kept reasonably confined so as not to become a nuisance. Horses, animals, and household pets shall not unreasonably interfere with the comfort, privacy, or safety or other properties. No lot shall have more than four household pets.

If horses/4-H animals are to be allowed in an area, that area shall be designated on tentative and final maps for those uses, and water rights dedicated to provide irrigated pasture in areas where the animals must be kept when not stabled.

c. Roofs. Roofs must be constructed of fire-retardant materials.

The use of standard wooden shakes or shingles will be prohibited. Roofing materials shall be restricted to tile, asphalt, fiberglass, fire-retardant treated shakes, or any new fire-retardant roofing materials in use which have pleasing aesthetic values. Roofing materials shall be of a color that harmonizes
with the surrounding area and color scheme of the structure. Flat roofs will be discouraged.

d. **Mailboxes.** Architectural structures of natural materials and natural colors shall be provided for grouped neighborhood mailboxes. The grouped neighborhood boxes of 15 or less per site shall be placed at neighborhood entry points, with adequate access from main roadways.

e. **Garbage and Refuse Disposal.** There shall be no burning of trash, garbage or other like household refuse, nor shall any property owner accumulate on their lot junked or unsightly vehicles or litter, refuse or garbage, except in receptacles provided for such purposes.

f. **Concealment of Fuel Storage Tanks and Trash Receptacles.** Fuel storage tanks and every receptacle for ashes, trash, rubbish or garbage shall be so placed and kept as not to be visible from any street, lot, parcel, or open space in the SPA, except at the times when refuse collections are made.

g. **Travel Trailers, Motor Homes and Boat Storage.** Travel trailers, motor homes (R.V.), or boats and trailers shall be stored within the building envelope and screened from any street, lot, parcel, or open space by screen fences. If stored in side yards, the minimum side yard shall be 12 feet.

h. **Nuisances.** No noxious or offensive activities, odors, or nuisances shall be permitted on any lot or parcel in the development. No refuse, unsightly or abandoned vehicles, debris, noxious material, discarded personal effects, or construction materials not for immediate use shall be permitted on any lot or portion thereof. It is incumbent
upon all property owners to maintain their lots and yards in a neat, orderly and well-groomed manner, whether said lots are vacant or improved.

1. Completion of Construction. Construction of any improvement, once commenced, shall be pursued diligently to completion. Improvements not so completed or upon which construction has ceased for 90 consecutive days, or which have been partially or totally destroyed and not rebuilt within a reasonable period, shall be deemed nuisances. The County may remove any such nuisance or repair or complete the same at cost to the owner provided the owner has not commenced required work within 30 days from posting a notice to commence such work upon the property. Such notice shall state the steps to be taken to eliminate the nuisance.

j. Clothes Lines. No clothes lines shall be constructed or erected which would be visible from any street, other lot, or open space.

k. Garage. Every single-family dwelling unit constructed within the SPA shall have on the same lot or parcel enough covered and completely enclosed automobile storage space for at least two automobiles. On one-acre or large lots, garage doors shall be encouraged to face side yards away from streets.

7. Landscaping

Landscape design should fit the particular use and blend with the natural environment. The lot concept limits the area in which a home owner may provide landscaping. The plant material must be selected from a predetermined list incorporated in this plan. The plant selection includes only drought tolerant and low water demand material. These factors contribute to a decreased average annual
residential demand that is mandatory for implementation of this plan.

A specified number of trees are required in the front yard setback and transition zone to provide a "sense of place". Plant material selected from the incorporated list, per neighborhood, should be kept similar to strengthen neighborhood unity and identity.

Selection of materials should contain a mixture of plants with fast, medium, and slow growth rates and a variety of sizes should be planted to provide a more natural appearance.

The use of plants around dwelling units to reduce heating and cooling needs is encouraged. Evergreens along the north and west act as a windbreak to deflect winter winds. Deciduous trees planted on the south around the perimeter of the unit are encouraged to provide summer shade while allowing winter sun. Creation of earth berms to the windward side can also reduce heat loss.

Drainageways should be lined with native wildflowers, grasses, shrubs, and rocks and boulders to slow velocities. They will be graded to resemble a natural drainage swale and incorporated in the overall design. Irrigation of plant material will utilize drip irrigation and other water conservation features as practical. The use of plumbed gray water storage systems will be investigated with the Health Department.

Within nine months of completion of the main dwelling unit, each lot or parcel shall be completely landscaped consistent with the landscape design guidelines and water budget incorporated in this plan. All landscaping shall be maintained to harmonize with and sustain the attractiveness of the development.

8. Fencing

All property lines from single-family dwelling units to the street shall be kept free and open.
A solid privacy fence may be constructed within the building envelope and limited to the rear of the house. Side yards will not be enclosed with a privacy fence in lots larger than 10,000 square feet. Fences shall be constructed of wood or masonry material and no fence will be over six feet in height. Developers will establish a typical privacy fence per neighborhood to promote neighborhood unity.

The transition zone and side yard may be fenced with open-ranch style fencing. Fencing will be consistent within all neighborhoods. There shall be no chain link, woven wire or any type of wire fence within the development except for back yard pet enclosures and swimming pools.

9. Public Street and Monument Signs

On public streets the style of signage will be unique to the SPA. It will be uniform in style throughout the area. Subdivision entry signage shall be limited to monument signs of native materials and in conformance with design guidelines set forth in the commercial section of the plan.

10. Exterior Lighting

The functional objectives in providing exterior area lighting are to illuminate areas necessary for safe and comfortable use. In certain situations, area lighting can add to the aesthetic appeal of a site by highlighting architectural features of a building or illuminating pathways and landscape plantings. In these instances, only the special features of a building or landscape should be illuminated. It should be noted that the standards and guidelines contained in this section address area lighting on individual
properties, and not overhead street lighting along public and private rights-of-way.

On public streets, the style of lighting standard will be unique to the SPA. It will be decorative and uniform in style and intensity throughout the area. Lighting shall be directed downward with no splay of lighting directed outward.

a. Standards.

1. Exterior lights shall not blink, flash or change intensity. String lights, building or roofline tube lighting, reflective or luminescent wall surfaces are prohibited.

2. Exterior lighting shall not be attached to trees except for the Christmas season.

3. Driveway, walkway, and building lights shall be directed downward.

4. Fixture mounting height shall be appropriate to the purpose.

5. Illumination for aesthetic or dramatic purposes of any building or surrounding landscape utilizing exterior light fixtures projected above the horizontal is prohibited.

6. Seasonal lighting displays and lighting for special events which conflict with other provisions of this section may be permitted on a temporary basis.

b. Guidelines.

1. Lighting Design. Exterior lighting should be designed as an integral part of the architecture and
landscape and located in a manner that minimizes the impact of lighting upon adjacent structures and properties.

ii. Lighting Levels. Avoid consistent overall lighting and overly bright lighting. The location of lighting should respond to the anticipated use and should not exceed the amount of light actually required by users. Lighting for pedestrian movement should illuminate entrances, changes in grade, path intersections, and other areas along paths which, if left unlit, would cause the user to feel insecure. Lighting suppliers and manufacturers have lighting design handbooks which can be consulted to determine fixture types, illumination needs and light standard heights.

iii. Fixture Design. Exterior lighting fixtures should be simple in design and should be well-integrated with other architectural site features.

iv. Structural Lighting. Night lighting of building exteriors should be done in a selective fashion: highlight special recognizable features; keynote repeated features; or use the play of light and shadow to articulate the facade. The purpose of illuminating the building should be to add visual interest and support building identification. Harsh overall lighting of a facade tends to flatten features and diminish visual interest.
1. Lighting Height. As a rule, the light source should be kept as low to the ground as possible while ensuring safe and functional levels of illumination. Area lighting should be directed downward with no splay of lighting directed offsite. The height of light fixtures or standards must meet the County standards. Direct light downward in order to avoid sky lighting. Any light source over 10 feet high should incorporate a cut-off shield to prevent the light source from being directly visible from areas offsite. The height of luminaries should be in scale with the setting and generally should not exceed 10-12 feet.

11. Utilities
All utilities shall be underground on lots less than one acre. Undergrounding shall be encouraged for lots from one to two and a half acres and overhead on lots larger than two and a half acres. All individual services to each unit for all lot sizes shall be undergrounded from the neighborhood service line.

12. Prohibition Against Used Structures
No used buildings or structures, intended for use as a dwelling, shall be placed on any lot.

13. Ditches and Swales.
Each owner shall keep drainage ditches and swales located on his lot free and unobstructed and in good repair and shall provide for the installation of such culverts upon his lot as may reasonably be required for proper drainage.

14. Resubdivision or Joiner Lots
No lot shall be further subdivided, unless permitted by the SPA Plan and regulatory zoning category applicable.

15. Drilling and Mining
No drilling, refining, quarrying, or mining operation of any kind shall be permitted on any lot.

16. Television or Radio Antennas and Towers

No television or radio antennas or tower shall be erected or used outdoors, whether attached to a building or structure, or otherwise. The placement of satellite discs shall be screened from view from any adjacent parcels, streets, or open space by locating in rear yards behind screened fences at a minimum. At such time as a community antenna television (CATV) system may be installed to service the development, each lot owner shall pay his proportionate share of standby, installation or service charges made pursuant to the franchise governing such system. This is provided, however, that such charges shall be comparable to those of similar installations in the CATV industry.

17. Failure to Enforce

The various restrictive measures and provision of this declaration are declared to constitute mutual equitable covenants and servitudes for the protection and benefit of each lot in said subdivision and failure by DECLARANT or any other person or persons entitled so to do shall not serve to create any liability or responsibility to DECLARANT for its alleged failure to act. Failure to enforce any measure or provision upon violation thereof shall not stop nor prevent enforcement thereafter or be deemed a waiver of the right so to do.

18. Severability

The various measures and provisions of this declaration are declared to be severable, and the invalidity of one measure or provision shall not affect any other measure or provision.

19. Subordination to Mortgages and Deeds of Trust

Nothing contained in this declaration shall impair or defeat the lien of any mortgage or deed of trust made in good faith and for
value, but title to any property is subject to this declaration obtained through the sale or satisfaction of any such mortgage or deed of trust shall thereafter be held subject to all of the restrictions and provisions hereof.

20. Enforcement and Remedy

Each grantee of a conveyance or purchaser under a contract or agreement of sale by accepting a deed or contract of sale or agreement of purchase accepts the same subject to all of other covenants, restrictions, easements and agreements set forth in this declaration and agrees to be bound by the same.

Damages for any breach of the terms, restrictions and provisions of this declaration are hereby declared not to be adequate compensation, but such breach and/or the continuation thereof may be enjoined or abated by appropriate proceedings by the DECLARANT, or by an owner or owners of any other lot or lots in said subdivision. Court costs and attorney fees shall be awarded the prevailing parties of any legal action as deemed appropriate and awarded by the court.

21. Terms of Restrictions

These covenants, restrictions and agreements shall run with the land and shall continue in full force and effect until __________ at which time the same shall be automatically extended for successive periods of five years unless by a duly executed and recorded statement of the then owners of 75% or more of the lots in said subdivision elect to terminate or amend these restrictions in whole or in part. Said declarations of restrictions can be amended or modified at any time when 75% of the owners election to do so, provided however, that said amendment or modification is in compliance with the provisions of the Washoe County Code.

Note:
The following two items will be applicable in the event of an active architectural control committee.
22. Maintenance of Lots

All lots, whether occupied or unoccupied, and any improvements placed thereon, shall at all times be maintained in such a manner as to prevent their becoming unsightly, unsanitary or a hazard to health. If not so maintained, the architectural control committee shall have the right, through its agents and employees, to do so, the cost of which shall be borne by the owner. Neither the architectural control committee, nor its agents, employees or contractors, nor the DECLARANT, nor its agents, employees, or contractors shall be liable for any damage which may result from any maintenance work as performed.

23. Real Estate Signs

Professionally prepared signs of customary and reasonable dimension may be displayed on any lot advertising it, together with any improvements located thereon, for sale or lease. All other signs, bill boards, or advertising structures of any kind are prohibited except upon application to and written permission from the architectural control committee.

Note:

The following is an example of the architectural control committee section of the C. C. & Rs. Not all development projects within the plan area will be required to have an architectural control committee. In the event a project does not have an architectural control committee, then applicants will be required to submit an application to the citizen advisory board with definitive design, materials and color combinations for their review and recommendation prior to submittal to the County of Washoe.

24. Architectural Control Committee

a. General Powers. All improvements constructed or placed on any lot must first have the approval of the committee as
evidenced by the signatures of at least two of the members affixed to the plans submitted. Two sets of plans and specifications shall be submitted to the committee, which plans shall show the location of all improvements, if any, easting upon said lot, the location of the improvement proposed to be constructed, the color and composition of all exterior materials to be used, proposed landscaping, and any other information which the committee may require, including soil, engineering and geologic reports and recommendations.

b. Committee Membership. The committee shall be composed of three members, to be appointed by DECLARANT, at least one of whom shall be a representative of DECLARANT. Committee member shall be subject to removal by DECLARANT and any vacancies from time to time existing shall be filled by appointment by DECLARANT, or in the event of DECLARANTS failure to do so within two months after any such vacancy, the then majority of the lot owners. The power to appoint or remove Committee members shall be transferred permanently to the lot owners upon:

i. A lapse of 18 months between the filing of the final map of the development, provided that 90% of the aggregate number of lots of the development have been sold by the DECLARANT; or

ii. A lapse of three years from the date of Final Subdivision Public Report of the Nevada Department of Real Estate.

c. Grounds for Disapproval. The committee may disapprove any plan of development:

i. Because of the reasonable dissatisfaction of the committee with grading plans, location of the proposed improvement on a lot, finished ground elevation, color scheme, finish, design, proportions, architecture,
shape, height or style of the proposed improvement, the materials used therein, the kind, pitch or type of roof proposed to be placed thereon; or

ii. If, in the judgment of a majority of the committee reasonably exercised, the proposed improvement will be inharmonious with the development, or with the improvements erected on other lots.

d. Rules and Regulations. The committee may, from time to time, adopt written rules and regulations of general application governing its procedures which may include, among other things, required number of copies of plans and specifications: provisions for notice of approval or disapproval, including a reasonable time period for approval by reason of failure to disapprove.

e. Variances. The committee may grant reasonable variances or adjustments from the provisions of this declaration where literal application thereof results in unnecessary hardship and if granting thereof will not be materially detrimental or injurious to owners of the other lots.

f. Certification of Compliance. At any time prior to completion of construction of an improvement, the committee may require a certification, upon such form as it shall furnish, from the contractor, owner, or a licensed surveyor, that such improvement does not violate any setback rule, ordinance or statute, nor encroach upon any easement or right-of-way of record.

g. Administrative Fees. As a means of defraying its expense, the committee may institute and require a reasonable filing fee to accompany the submission of plans and specifications, to be not more than one-fourth of 1% of the estimated cost of
the proposed improvement, subject to a minimum fee of $75.00. No additional fee shall be required for resubmittal.

h. **Liability.** Notwithstanding the approval by the committee of plans and specification of its inspection of the work in progress, neither it, DECLARANT, nor any person acting in behalf of any of them shall be responsible in any way for any defects in any plans or specifications or other materials submitted to the committee, nor for any defects in any work done pursuant thereto. Each person submitting such plans or specifications shall be responsible for the sufficiency thereof and the adequacy of improvements constructed pursuant thereto.

All covenants, conditions and restrictions herein contained which are required by the County of Washoe may also be enforced by the County of Washoe.

Tentative Parcel Map Application
Supplemental Information

(All required information may be separately attached)

Chapter 110 of the Washoe County Code is commonly known as the Development Code. Specific references to tentative parcel maps may be found in Article 606, Parcel Maps.

1. What is the location (address or distance and direction from nearest intersection)?

South end of Grass Valley Road; approximately half a mile south of Whiskey Springs Road.

a. Please list the following:

<table>
<thead>
<tr>
<th>APN of Parcel</th>
<th>Land Use Designation</th>
<th>Existing Acres</th>
</tr>
</thead>
<tbody>
<tr>
<td>077-130-23 Remainder</td>
<td>120 - Vacant, Single Family</td>
<td>45.06</td>
</tr>
</tbody>
</table>

2. Please describe the existing conditions, structures, and uses located at the site:

Vacant land.

3. What are the proposed lot standards?

<table>
<thead>
<tr>
<th>Minimum Lot Area</th>
<th>Parcel 1</th>
<th>Parcel 2</th>
<th>Parcel 3</th>
<th>Parcel 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>6,00 ac.</td>
<td>5,00 ac.</td>
<td>5,00 ac.</td>
<td>30.00</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Minimum Lot Width</th>
<th>Parcel 1</th>
<th>Parcel 2</th>
<th>Parcel 3</th>
<th>Parcel 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>254.76'</td>
<td>334.85'</td>
<td>180.45'</td>
<td>2087.00'</td>
<td></td>
</tr>
</tbody>
</table>
4. Was the parcel or lot that is proposed for division created (recorded) within the last 5 years? (If yes, public review of the parcel map will be required. See Planning and Building staff for additional materials that are required to be submitted.)

☐ Yes  ☐ No

5. Utilities:

<table>
<thead>
<tr>
<th>a. Sewer Service</th>
<th>Septic</th>
</tr>
</thead>
<tbody>
<tr>
<td>b. Electrical Service/Generator</td>
<td>N/E</td>
</tr>
<tr>
<td>c. Water Service</td>
<td>Well</td>
</tr>
</tbody>
</table>

6. Please describe the source of the water facilities necessary to serve the proposed tentative parcel map:

a. Water System Type:

☐ Individual wells
☐ Private water Provider:
☐ Public water Provider:

b. Available:

☐ Now  ☐ 1-3 years  ☐ 3-5 years  ☐ 5+ years

c. Washoe County Capital Improvements Program project?

☐ Yes  ☐ No

7. What sewer services are necessary to accommodate the proposed tentative parcel map?

a. Sewage System Type:

☐ Individual septic
☐ Public system Provider:

b. Available:

☐ Now  ☐ 1-3 years  ☐ 3-5 years  ☐ 5+ years

c. Washoe County Capital Improvements Program project?

☐ Yes  ☐ No

8. For most uses, the Washoe County Code, Chapter 110, Article 422, Water and Sewer Resource Requirements, requires the dedication of water rights to Washoe County when creating new parcels. Please indicate the type and quantity of water rights you have available should dedication be required:

<table>
<thead>
<tr>
<th>a. Permit #</th>
<th>acre-feet per year</th>
</tr>
</thead>
<tbody>
<tr>
<td>b. Certificate #</td>
<td>acre-feet per year</td>
</tr>
<tr>
<td>c. Surface Claim #</td>
<td>acre-feet per year</td>
</tr>
<tr>
<td>d. Other, #</td>
<td>acre-feet per year</td>
</tr>
</tbody>
</table>
e. Title of those rights (as filed with the State Engineer in the Division of Water Resources of the Department of Conservation and Natural Resources):

9. Does the property contain wetlands? (If yes, please attach a preliminary delineation map and describe the impact the proposal will have on the wetlands. Impacts to the wetlands may require a permit issued from the U.S. Army Corps of Engineers.)

☐ Yes ☐ No If yes, include a separate set of attachments and maps.

10. Does property contain slopes or hillsides in excess of 15 percent and/or significant ridgelines? (If yes, and this is the second parcel map dividing this property, Article 424, Hillside Development of the Washoe County Development Code will apply.)

☐ Yes ☐ No If yes, include a separate set of attachments and maps.

11. Does property contain geologic hazards such as active faults; hillside or mountainous areas; is it subject to avalanches, landslides, or flash floods; is it near a water body, stream, Significant Hydrologic Resource as defined in Article 418, or riparian area such as the Truckee River, and/or an area of groundwater recharge

☐ Yes ☐ No If yes, include a separate set of attachments and maps.

12. Does the tentative parcel map involve common open space as defined in Article 408 of the Washoe County Development Code? (If so, please identify all proposed non-residential uses and all the open space parcels.)

☐ Yes ☐ No If yes, include a separate set of attachments and maps.

13. If private roads are proposed, will the community be gated? If so, is a public trail system easement provided through the subdivision?

\[\text{[Signature]}\]
14. Are there any applicable policies of the adopted area plan in which the project is located that require compliance? If so, which policies and how does the project comply?

☐ Yes  ☐ No  If yes, include a separate set of attachments and maps.

15. Are there any applicable area plan modifiers in the Development Code in which the project is located that require compliance? If so, which modifiers and how does the project comply?

16. Is the project subject to Article 418, Significant Hydrologic Resources? If yes, please address Special Review Considerations within Section 110.418.30 in a separate attachment.

☐ Yes  ☐ No  If yes, include a separate set of attachments and maps.

Grading

Please complete the following additional questions if the project anticipates grading that involves: (1) Disturbed area exceeding twenty-five thousand (25,000) square feet not covered by streets, buildings and landscaping; (2) More than one thousand (1,000) cubic yards of earth to be imported and placed as fill in a special flood hazard area; (3) More than five thousand (5,000) cubic yards of earth to be imported and placed as fill; (4) More than one thousand (1,000) cubic yards to be excavated, whether or not the earth will be exported from the property; or (5) If a permanent earthen structure will be established over four and one-half (4.5) feet high. If your project exceeds any of the above criteria, you shall either provide a preliminary grading and roadway design plan for review OR if these criteria are exceeded with the final construction drawings and not disclosed at the Tentative Parcel Map Application, you shall be required to apply for a special use permit for grading and you will be delayed up to three months, if approved.

17. How many cubic yards of material are you proposing to excavate on site?

N/A
18. How many cubic yards of material are you exporting or importing? If exporting of material is anticipated, where will the material be sent? If the disposal site is within unincorporated Washoe County, what measures will be taken for erosion control and revegetation at the site? If none, how are you balancing the work on-site?

N/A

19. Can the disturbed area be seen from off-site? If yes, from which directions, and which properties or roadways? What measures will be taken to mitigate their impacts?

N/A

20. What is the slope (Horizontal/Vertical) of the cut and fill areas proposed to be? What methods will be used to prevent erosion until the revegetation is established?

N/A
21. Are you planning any berms and, if so, how tall is the berm at its highest? How will it be stabilized and/or revegetated?

N/A

22. Are retaining walls going to be required? If so, how high will the walls be, will there be multiple walls with intervening terracing, and what is the wall construction (i.e. rockery, concrete, timber, manufactured block)? How will the visual impacts be mitigated?

N/A

23. Will the grading proposed require removal of any trees? If so, what species, how many, and of what size?

N/A

24. What type of revegetation seed mix are you planning to use and how many pounds per acre do you intend to broadcast? Will you use mulch and, if so, what type?

N/A
25. How are you providing temporary irrigation to the disturbed area?

N/A

26. Have you reviewed the revegetation plan with the Washoe Storey Conservation District? If yes, have you incorporated their suggestions?

N/A

27. Surveyor:

Development Standards Handbook for

PALOMINO RANCH ESTATES

DEVELOPMENT STANDARDS

Introduction
LW Land Company L.L.C, the owner of the property Palomino Ranch Estates, is one of the parcels within the Warm Springs Specific Plan (WSSP). (Refer to the Land Use Plan showing the project within the Warm Springs area in Appendix C) The property is 67.60 acres in size. There will be a total of 15 lots, 3 lots will each be 2.50 acres, with remaining 12 lots will be 5+ acres.(Refer to Vicinity Map and Parcel Map)

Objective
To develop a community that capitalizes on the rural and equine character of the Warm Springs area while utilizing resources efficiently and effectively, and giving consideration to design, marketability, and aesthetics.

Agriculture
The Specific Plan protects existing adjacent agricultural uses from potential development conflicts. The CC&Rs and all final maps shall contain a note of restriction that states, "No formal written or verbal complaints can be filed with Washoe County and no lawsuits or other legal proceedings can be brought against any legal agricultural use." Each purchaser will sign a disclosure statement that reiterates the same information.

Residential Design Guidelines
The purpose of this handbook is to describe the principles, policies, standards, and deed restrictions that will control development of Tumbleweed Estates to ensure that it is built and maintained as envisioned in the master planning process for the Warm Springs Specific Plan area.

Lot Concepts Standards
The individual lot concepts are designed to promote the rural character of the Warm Springs Valley. The lots have designated building envelopes, transition zones, and required open space. Where there is a difference between what is illustrated in the Individual Lot Concept Plans and what the text states, the plans shall take precedence over the text. (Refer to the Individual Lot Concept Plans, pages 4-5.)
Building Envelopes
The building setbacks from the street vary to provide a more rural atmosphere to the streetscape. All lots have an established building envelope as defined by the Individual Lot Concept Plans. Building side and rear yard setbacks shall conform to current Washoe County Code requirements.

Buildings may be located anywhere within the designated building envelope. All buildings, structures, or storage of any type will be confined to this area on each lot.

A landscaped/irrigated zone with a minimum depth of 30 feet is required around all dwellings. This landscaped/irrigated zone must utilize fire retardant/resistant landscaping. For additional fire protection, the landscaping within the building envelope should be thinned and maintained so as not to present a hazard to the homeowner or adjacent property owners.

The landscaped/irrigated zone may encroach into the transition zone. All disturbed areas within the building envelope that are not landscaped, will be revegetated with a combination of native shrubs, grass, and wildflower seed mixtures specified in this document. The relationship between building envelopes is designed to provide an open space corridor and to provide necessary space for additional possible division of the property. (Refer to the Individual Lot Concept, Figures 1-A through 3-A pages 4-14.)

Transition Zone
The designated transition zone portion of the lot provides an extension of usable yard area but does not permit structures. The zone provides a transition from the open space to the developed portion of each lot. The only fencing that shall be permitted within the transition zone is Open Ranch Style Fencing, White Rail PVC Fencing, or temporary painted-metal panelized fencing. The landscaping for the transition zone has been considered under and is incorporated into the Water Allocation. Horses and 4-H animals are limited to the transition zone and building envelope unless pasture has been provided by securing the requisite water rights.

Open Space
Please see Plate 9 map, Appendix D, which shows the proposed open space, trails and the golf course in the Warm Springs master plan.

The designated open space portion of each lot will be left undisturbed. All open space areas shall be maintained by the individual property owner. These open space corridors are designated to protect the existing, rural character of the valley. Open space areas may continue existing, established agricultural or ranching uses and are exempt from the limitations imposed by the section on "Animals" later in this Development Standards Handbook.
No use of motorized vehicles, other than vehicles actively engaged in ranching or farming activities, is allowed within the designated open space areas. Open space corridors may be utilized as a non-motorized trail system for equestrian use. The only fencing that shall be permitted within the open space area is Open Ranch Style Fencing, White Rail Synthetic Fencing, or temporary painted-metal Panelized Fencing. Water rights, in accordance with the Optional Water Usage Landscape (see page 20 under Water Allocation), must be purchased for maintenance of pasture for animals enclosed within the open space. The open space in the Warm Springs Specific Plan shall be left in natural vegetation or agricultural use. If disturbed, it shall be reseeded as specified in the section on Revegetation of Open Space/Drainage ways. Plant selection should include only drought tolerant and low water demand material (refer to plant list in Appendix A). These attributes contribute to the decreased average annual residential water demand that is mandated for implementation of the Warm Springs Specific Plan.

View sheds
The proposed building envelopes, as illustrated by Figure 1-A, page 4, Figures 2-A, page 5, and by 3-A, page 11, are staggered and setbacks are increased to afford views and vistas from each building envelope to the surrounding valleys and mountains.

Architecture
All buildings must incorporate an architectural theme or identity that is complementary and compatible with the Warm Springs Specific Plan area and its surroundings. All building plans shall be submitted to the WSSP Architectural Review Committee to ensure this policy is enforced in a way that encourages creative design. No mobile homes are allowed except for construction purposes. To enhance the development and maintain the rural character, buildings and structures shall adhere to the following guidelines. (Refer to Conceptual "Western Ranch" Theme Home, Figures 8a and 8b page 26.)

Exterior Walls and Trims
Building materials must support the "western ranch" theme and be approved by the WSSP Architectural Review Committee. Exterior siding and wall colors must be earth tone and harmonize with the surrounding landscape. No gloss finishes are allowed.

Large unbroken expanses of the same wall material shall be avoided. Trim shall be used on all exterior walls to create highlight and shadow. All reflective material (e.g., chimney stacks, flashings, exhaust vents and pipes, etc.) must be painted to match or blend with surrounding materials.
Figure 1-A
Lot Concept for 2.5 Acre Parcels

Sketch: 2 1/2 Acre Concept
Figure 2-A

Individual Lot Concept for 5(+) Acre Parcels
Roofing
Roofing materials shall be earth tone and of a color that harmonizes with the surrounding area and color scheme of the structure. To support an architectural theme consistent with the Warm Springs Specific Plan, building materials for roofs shall be limited to slate, concrete tile, or architectural composition, extra-dimensional 30-year roofing. Flat roofs shall not be allowed. Metal non-reflective and colored roofs may be permitted with Architectural Review Committee approval. All reflective material (e.g., chimney stacks, flashings, exhaust vents and pipes, etc.) must be painted to match or blend with surrounding materials.

Building Heights
To promote an architectural theme consistent with the Warm Springs Specific Plan, single story homes are encouraged, but all homes shall be limited to two stories and, in accordance with Washoe County Development Code requirements, 35 feet in height. (Refer to Conceptual "Western Ranch" Theme Home, Figures 8a and 8b, page 20.)

Completion of Construction
Construction of any improvement, once commenced, shall be pursued diligently to completion within 18 months of commencement. Improvements not so completed or upon which construction has ceased for ninety (90) consecutive days or which have been partially or totally destroyed and not rebuilt within a reasonable period shall be deemed nuisances. The Homeowners Association may remove any such nuisance or repair or complete the same at the cost of the owner provided the owner has not commenced required work within thirty (30) days from the posting of a notice by the Homeowners Association to commence such work upon the property. Such notice shall state the steps that will be taken to eliminate the nuisance.

Miscellaneous Animals
No more than four (4) Horses or 4-H animals, limited to cattle or sheep, will be allowed. Such animals will only be permitted within the building envelope and transition zone unless additional water rights are acquired for pastureland within the open space. Adequate ground cover to eliminate dust and prevent erosion shall be maintained at all times. As many as four (4) customary household pets are allowed provided they are not kept for commercial purposes and are kept reasonably confined so as not be become a nuisance. Horses, animals, and household pets shall not unreasonably interfere with the comfort, privacy, or safety of other properties. Animals shall be kept in accordance with Washoe County rules and regulations. The homeowners association shall have the authority to determine whether the animals unreasonably interfere with the comfort, privacy or safety of other properties.
Homeowners may provide irrigated pasture as an exercise area or for supplemental feed in which the animals may be kept when not stabled or corralled. Livestock may be considered an optional use for water allocated for landscape use. Pasturelands for animals will require additional water rights to be dedicated to Washoe County. Irrigated pastures require additional water rights at 4 acre-feet/year per acre. 1-1/4 acres of irrigated pasture would require the dedication of a total of 5 acre-feet of water. (Refer to Optional Usage Water Consumption Table A & B, pages 30-31 in the Landscape/Irrigation Section.)

Travel Trailers, Motor Homes, and Boat Storage
Travel trailers, motor homes, other recreational vehicles, or boats and trailers may only be stored within the building envelope. This may occur either within enclosed structures or in the side or rear yards if such yards are completely screened from any street, lot parcel, or open space area and the minimum distance from the screening material maintains the zoning requirements for that yard. Screening shall be consistent with the designated neighborhood privacy fence. (Refer to Figure 5 page 19) The architectural review committee will approve all fencing material.

Utilities
All individual services to each unit for all lot sizes shall be underground from the neighborhood service line. All on site utility lines to outbuildings, detached accessory structures, pump houses, etc., shall be underground.

Mailboxes
Individual property owners will not have US Mail delivered to their property. The Post Office has community mail boxes located at Grass Valley Road and Whiskey Springs Road 1/2 mile from proposed project. Per the post office if needed more community mail boxes will be put in place at that location.

Garbage and Refuse Disposal
There shall be no burning of trash, garbage or other like household refuse, nor shall any property owner accumulate on their lot junked or unsightly vehicles or litter, refuse or garbage, except in receptacles provided for such purposes.

Concealment of Fuel Storage Tanks and Trash Receptacles
Fuel storage tanks, limited to propane or heating oil and every receptacle for ashes, trash, rubbish or garbage shall be so placed and kept as not to be visible from any street, lot, parcel, or open space except at the times when refuse collections are made.

Antennas
Satellite dishes and home radio antennas shall be screened from view from any adjacent parcels, streets, or open space by locating in side or rear yards behind screen fences at a minimum. Screen fences for this purpose shall maintain the minimum distance from the screening material to that yard property line that meets the zoning requirements.
Nuisances
No noxious or offensive activities, odors, or nuisances shall be permitted on any lot or parcel in the development. No refuse, animal manure, unsightly or abandoned vehicles, debris, noxious materials, discarded personal effects, and construction materials not for immediate use shall be permitted on any lot or portion thereof. It is incumbent upon all property owners to maintain their lots and yards in a neat, orderly, and well-mannered, whether said lots are vacant or improved. The Homeowners Association shall be responsible for timely enforcement for this provision.

Conservation
All building construction shall utilize methods of energy conservation and the use of low water demand features. Table 1 provides a list of recommended and mandatory energy and water conservation features, which will be incorporated into the building construction.

<p>| TABLE 1                                      |</p>

2 More information may be obtained from the Passive Solar Industries Council, 1090 Vermont Avenue, Suite 1200, Washington D.C. 20035, (202) 371-0357.
Building design and orientation shall be considered in conservation of energy. All buildings will be designed and oriented to benefit from passive solar heating if practicable. Passive solar construction guidelines and energy conservation measures for Northern Nevada are available through the Sierra Pacific Power Company.

Homes will be designed to utilize the following minimum guidelines of energy conservation in site and architectural design. Simple alterations in building design can enable the use of the sun, wind, landform, and vegetation to provide for supplemental heating, cooling, and insulation for a structure.

Energy Conservation Guidelines
All buildings should be located and oriented to benefit from passive solar heating. The desirable exposure is towards the south, southeast, or southwest. The simple east-west orientation of a rectangular building in northern Nevada has been found to reduce energy consumption by 40%. Site development should use plant materials and landforms to enhance energy conservation. Coniferous trees planted along the windward side of the property can act as a windbreak to deflect winter winds. Shrubs and trees planted against the structure can help to insulate the building. Deciduous trees planted on the south side of the structure will shade the building during the summer and enable sun to penetrate during the winter. The creation of earth berms on the windward side can reduce heat loss due to wind and help to insulate the structure. (Refer to the Minimum Landscape Elements - Figure 3-A page 11) The structure should be designed to keep energy needs for heating and cooling to a minimum. Passive energy conservation measures include the following:

Good insulation.
Location of active living spaces on south side
Location of closets, mud-room, garages, or storage space on north and east sides
Air-lock entries
Concentration of windows on south side
Reduction in number and size of openings on north side
Maximum use of double-glazing
Building overhangs to shield windows from summer sun and to admit winter sun
Use of paved surfaces, rock or masonry on south side to absorb radiation

Active solar energy systems shall be permitted if the solar panels are integrated into the architectural design. If not integrated into the roof or body of the structure, they may not be placed on the roof and they must be screened from public view.
Domestic Water Allocation

The Warm Springs Specific Plan mandates compliance with a per lot water allocation. The designated water allocation for this project is 1.12 acre-feet/year per lot, which is equivalent to 364,896 gallons per year. Domestic water use for the average household is 70,260 gallons per year and landscape water use is at a minimum of 75,208 gallons per year. This leaves 217,428 gallons of water for selection of optional landscape elements. Livestock pasture irrigation may require dedication of additional water rights beyond the 1.12 acre-feet/year. Each lot owner is required to incorporate the following list of minimum required landscape elements into their landscaping. No less than 50% of the required landscaping shall be oriented to the front yard of the lot.

The plant selection includes only drought tolerant and low water demand material. Those aspects of the permitted plants contribute to the decreased average annual residential demand for water that is mandated for implementation of this plan.

The landscaping and irrigation plans must be submitted to the Architectural Control Committee for review and approval. This should be done at time of building permits for structures but may also be done separately.

The minimum landscape elements for each lot shall be:

2,000 square feet of lawn area. Half of which can be in the rear yard.
5 evergreen or deciduous trees within the front yard setback (1 must be a specimen tree, (15 gallon minimum); 5 deciduous or evergreen trees within the building envelope (15 gallon minimum); 12 evergreen shrubs (1 gallon minimum); and 12 deciduous shrubs (1 gallon minimum.)

A minimum of five (5) trees are required within the front yard(s) as defined by Washoe County Code. Plant material per neighborhood, should be kept similar to strengthen neighborhood unity and identity. (Refer to Figure 3-A, page 11)

For a list of suggested shrub/groundcover and trees for home owner review, see Appendix A.
The required landscape elements, plus the estimated domestic water use, utilize approximately 147,468 gallons per year. 217,428 gallons per year remains for optional use.

Table 2
Residential Water Usage - Gallons Per Year

<table>

<td>70,260 gal.</td>
<td>77,208 gal.</td>
</tr>
</tbody>
</table>

Table 2A provides a list of optional water use estimates for differing types of landscaping. These may be used in any combination on any lot provided the water allocation per lot is not exceeded. The intent is to mandate compliance with the designated water allocation while at the same time providing alternatives to permit variety in individual landscape designs. The plant selection includes only drought tolerant and low water demand material. Those aspects of the permitted plants contribute to the deceased average annual residential demand for water that is mandated for implementation of this plan.
Selection of materials should contain a mixture of plants with fast, medium and slow growth rates and a variety of sizes should be planted to provide a more natural appearance.

All surface water drainage ways within the subdivision shall be graded to resemble a natural drainage swale and incorporated in the overall design. There will be no linear, uniform width drainage ways. Drainage ways should be lined with native wildflowers, grasses, shrubs, and scattered rocks and boulders to slow water velocities.

The amount of water required for one acre of pasture irrigation is 4 acre-feet/year. For 1 1/4 acres of pasture, a total of 5 acre-feet/year is required. As many as 5 acre-feet/year per lot of water rights may be permitted through the State Engineers Office. These water rights will be used to irrigate the pasture and/or livestock on each lot.

</tbody>
</table>

*The Water Allocation for Pasture applies only when additional water rights have been purchased from a private party and transferred to the receiving parcel by the State Engineer.

As long as no more than 1,800 gallons per day are utilized, additional optional landscaping may be installed. The total utilization does not equal 364,896 gallons due to the fact that much less water is used during the winter months. (Refer to Optional Landscape use Table 2-A)

Additional information on the constraints placed upon the use of water and the standards employed are located within the Warm Springs Specific Plan (WSSP) are included with this document as Appendix B, Excerpted and Abridged Information from the Warm Springs Specific Plan.
Maintenance
All plant material and lawn areas shall be kept in healthy condition. Any dead plant material shall be removed and replaced within 30 days.

References
Appendix B includes an abridged excerpt from the Warm Springs Specific Plan that explains the water budget for the hydrographic basin and provides part of the rational for stringent landscaping and irrigation requirements. The excerpt has been slightly amended from the text of the actual plan to reflect some updates and actions by the State Engineer.

Revegetation of Open Space/Drainage Ways
All open space areas, other than those in agricultural use, shall be left in native material.

Areas designated as Open Space that are currently in agricultural use will allow grading. If noxious weeds are in abundance, the owner may employ a weed management plan developed by an appropriate land reclamation specialist. As development occurs and agricultural practices are abandoned, it will be the property owner's responsibility to ensure that these areas will be over-seeded with a native grass mixture as described in Table 3, page 14. A gradual transition of plant material is desired.

The soils and precipitation in Warm Springs Valley greatly reduce plant species available for revegetation. The species selected will survive with no supplemental irrigation water being applied after establishment. After two years there will not be any temporary water to the revegetation. The revegetation seed mix should be tied to the agricultural soils and modified as recommended by the seed company.

Indian Ricegrass must be drill seeded at 3-4 inches below the surface. Pubescent Wheatgrass and Globe Mallow should be drill seeded to a depth of one-half inch below the surface. Kochia and Winterfat should be hydro seeded.

Basin Wildrye (elymus cinereus) should be substituted for ricegrass in clay soil areas. Wildrye is not adapted to shallow soils and placement should be monitored. The seed should be drill seeded no deeper than 1/2 inch below the surface. Wildrye will require more supplemental irrigation water than ricegrass during the first year, but once established well survive with no additional water.

Seeding should be completed during late fall. This will assure seed is placed ready to germinate when soil moisture and temperature conditions are ideal the following spring. Temporary above-ground irrigation is not recommended but may be necessary in order to establish plants if seed is installed during summer months.
To improve establishment chances, seeded area should be hydro mulched at a rate of 1,000 lbs./acre with 180 lbs./acre of tackifier added. Supplemental irrigation water can be applied the first growing season. Irrigation should be light and infrequent. This will promote root development that will be essential once irrigation water is eliminated. Water used for this purpose must be deducted from the given available water. After the system is abandoned, the water may be relocated to other uses.

Irrigation

Irrigation Requirements

Each residential lot will be required to install an irrigation system with automatic controller and back flow prevention device to meet Washoe County/State health codes. The irrigation system shall include an overhead spray system for any turf areas, with uniform head to head coverage and matched sprinkler head precipitation rates. Temporary irrigation systems may be in use for two (2) seasons only. The system shall also include a drain down method for winterization. All trees, shrubs, and ground covers shall be watered with standard controllers allowing each tree, shrub, or ground cover to be watered with individual drip emitters or collectively in groups with micro sprayers.

Landscape and Irrigation Plan Submittal Requirement

Each future homeowner or builder will be required to submit landscape, grading, and irrigation plans to Homeowners Association and the Architectural Review Committee for approval as a part of the building permit application process. The plans shall be prepared by a qualified landscape industry professional, landscape contractor, or a landscape architect.
The landscape plan shall include a site base map prepared to a 1"=20' minimum scale with the house and driveway footprint, property lines, utility locations, etc. This base map must clearly show proposed landscape areas with square footage area calculations to meet the water usage requirement specified in this document. In addition to the above, the landscape plan must include:

- A plant species list keyed to plant locations on the plan. The plant list must include plant sizes and quantities;
- The amount of water calculated for established landscape;
- An indication of surface material(s) in non-landscaped areas; and
- Agricultural soils test results and proposed soils improvement/amendment methods.

The irrigation plan shall be prepared to scale on the same base map as the landscape plan. The irrigation plan must include the following:

- Point of connection to water source;
- Location, type of installation detail of back flow prevention device;
- Remote control valve location, manufacturer's name, product number, size and gallons per minute for each lateral zone;
- Irrigation main and lateral line type, size, and depth of bury;
- Sprinkler head locations, manufacturer's name, product number, nozzle size and number, radius gallons per minute and pounds per square inch (psi) operation rate;
- Drip system valve locations and sizes, lateral line type and location, emitter type, product number, and amount per plan and;
- Controller's manufacturer's name, product number, and installation location.

The grading plan shall be prepared to scale on the same base map as the landscape and irrigation plan. The grading plan must include the following:

- Limits of grading and construction;
- Dust control plan/permit measures required by Washoe County Code;
- Existing and proposed contours, including berming for energy conservation and drainage away from structures;
- Paving or surface treatment for walkways and driveways;
- Location and type of temporary fencing to protect open space and native vegetation from construction traffic; and
- Revegetation of disturbed areas, seeding quantity, and need for temporary irrigation. The revegetation seed mix should be tied to the agricultural soils test and modified as recommended by the seed company.
Maintenance

All irrigation systems shall be maintained in good operating condition. The irrigation system shall be extended to any new plant material at the time of installation.

Within twelve (12) months of completion of the main dwelling unit, each lot or parcel shall be completely landscaped with automatic irrigation systems in place and operating. All landscaping shall be maintained to harmonize with and sustain the attractiveness of the development.

Fencing

General Considerations:

All property from the building envelope to the street shall be kept free and open. Fencing will be consistent within the neighborhood for this development. Wood fencing will be treated with a light or medium brown stain that will increase wood durability. Stains should be consistent in tone on the individual properties but no one property will be required to match exactly with neighbors. Owners are required to keep fencing in good working order and have a well-maintained appearance. The type of fence will be controlled by the Architectural Review Committee.

Solid Wood or Synthetic Material (with the appearance of wood) Privacy Fence:

Privacy fence with a height of up to 6 feet, may be constructed within the building envelope as long as it is limited to the rear of the house. Such a fence may be used in the side yard for screening such features as RV storage area, satellite dishes, trash receptacles, fuel storage tanks, dog runs, or a patio. Otherwise, side yards will not be enclosed with a privacy fence. Fences should tie into a structure or other terminus point. (Refer to Privacy Fencing, page 19 under Figure 5.)

Open Ranch Style Fencing:

May be used in the side and rear yards within the building envelope, transition zone, or open space, may be used to define space and circulation areas or accent gardens and will be limited to no more than four feet in height. (Refer to Split Rail Fencing, page 19 under Figure 7) The fencing should be of a consistent height and end at some transition point such as the house. The fencing may be stained but not painted.

White Rail Synthetic Material Fencing:

This material may be used to enclose pastur and stables, runs, corrals, and the perimeter of the property other than in the front yard area between the residence and the street. (Refer to White Rail Fencing, page 19 under Figure 6.) White rail PVC fencing may also be constructed within the designated building envelope in substitute for the Open Ranch Style Fencing. Fencing for pasture beyond the limits of the building envelope will not be permitted unless pasture is established and grasses are irrigated in accordance with Table 2A, (page 12). Under this scenario, pasture fencing may be the white PVC rail and the irrigated pasture area should adjoin the building envelope on at least two sides.
Chainlink Fence, Woven Wire, or other wire fence:
This fence material may be used for backyard pet enclosures, vegetable gardens, or swimming pools. (Specialty fences, in accordance with Washoe County Code.) The wire fencing, posts, and rails will be vinyl or plastic coated in a color to harmonize with building colors, or be a dark brown or black. No barbed wire fencing will be allowed.

Exterior Lighting.
The functional objectives in providing exterior area lighting are to illuminate areas necessary for safe and comfortable use... In certain situations, area lighting can add to the aesthetic appeal of a site by highlighting architectural features of a building or illuminating pathways and landscape plantings. In these instances, only the special features of a building or landscape should be illuminated: it should be noted that the standards and guidelines contained in this section address area lighting on individual properties, and not overhead street lighting along public and private rights-of-way.

Standards.
Exterior lights shall not blink, flash, or change intensity. String lights, building or roofline tube lighting, reflective or luminescent wall surfaces are prohibited. Exterior lighting shall not be attached to trees except for the Christmas season. Driveway, walkway, and building lights shall be directed downward. Fixture mounting height shall be as low as possible and appropriate to the purpose illumination for aesthetic or dramatic purposes of any building or surrounding landscape utilizing exterior light fixtures projected above the horizontal is prohibited. Seasonal lighting displays and lighting for special events which conflict with other provisions of this section may be permitted on a temporary basis.

Guidelines.

Lighting Design
Exterior lighting should be designed as an integral part of the architecture and landscape and should be located in a manner that minimizes the impact of lighting upon adjacent structures and properties.

Lighting Levels
Avoid consistent overall lighting and overly bright lighting. The location of lighting should respond to the anticipated use and should not exceed the amount of light actually required by users. Lighting for pedestrian movement should illuminate entrances, changes in grade, path intersections, and other areas along paths, which if left unlit, would cause the user to feel insecure. Lighting suppliers and manufacturers have lighting design handbooks that can be consulted to determine fixture types, illumination needs, and light standard heights.

Fixture Design
Exterior lighting fixtures should be simple in design and should be well integrated with other architectural site features.

Structural Lighting
Night lighting of building exteriors should be done in a selective fashion: highlight special recognizable features; keynote repeated features; or use the play of light and shadow to articulate the facade. The purpose of illuminating the building should be to add visual interest and support building identification. Harsh overall lighting of a facade tends to flatten features and diminish visual interest.

**Lighting Height**

As a rule, the light source should be kept as low to the ground as possible while ensuring safe and functional levels of illumination. Area lighting should be directed downward with no splay of lighting directed off-site. The height of light fixtures of standards must meet Washoe County standards. Lighting should be directed downward in order to avoid sky lighting. Any light source over 10 feet height must incorporate a cutoff shield to prevent the light source from being directly visible from areas off-site. The height of luminaries should be in scale with the setting.

**Permitted Land Uses.**

High Density Rural
Minimum Lot size 2.5 acres.

**Construction of Extension of Grass Valley Road.**

Grass Valley Road will be constructed to Palomino Valley General Improvement District standards, for their consideration for acceptance and maintenance.

APPENDIX B
APPENDIX B

EXCERPTED AND ABRIDGED INFORMATION FROM THE WARM SPRINGS SPECIFIC PLAN

WATER BUDGET

INTRODUCTION

The Specific Plan Area (SPA) is within the Warm Springs Valley Hydrologic Basin No. 84. The average annual precipitation in the basin is estimated to be 9.76 inches. There are no perennial streams in the SPA, but intermittent external drainage to Pyramid Lake does exist. The Nevada State Engineer has designated the Warm Springs Valley Basin as an area requiring additional water resource supervision. Various reconnaissance level studies have been conducted to estimate the potential amount of groundwater resources in the basin.

In general, an estimate of the available water resource and the current consumption patterns will be used to identify the total number of residential dwelling units and commercial or quasi-public uses that can be served from the available supply. Land areas have been identified based on the maximum number of residential dwelling units and desired development densities achievable based on the water available to the SPA and the location of existing water rights. The total number of acres assigned to each land use category, with appropriate allowance factors, will provide an adequate base to develop the projected number of residential units at buildout.

It is important to recognize that new techniques are being developed to improve in the prediction of safe groundwater yields. The estimates used in this plan will probably be superseded with new information resulting in the need for refined land use allocations. This water budget, therefore, is a useful tool for generating a plan for the Warm Springs SPA, but it should not be considered as the final water budget for the basin.

Specific Plan 3,000 ACRE FEET PERENNIAL YIELD

The position of the State Engineer is that only the Water Resources Reconnaissance Series Report No. 43 can be used to establish the perennial yield for the basin. This report specifies 3,000 acre-feet as the perennial yield. The perennial yield is the amount of water that is naturally replenished when a long-term average is considered.

The following table, Table A-4, establishes the water allocation for the SPA when 3,000 acre-feet is used as the planning perennial yield. The table summarizes the Warm Springs Area Plan Water Budget, and details the allocation remaining for the SPA.

Residential
According to the current Warm Springs Area Plan, the subdivision of parcels creating new residential lots on individual domestic wells will require the dedication of 2.5 acre-feet/year (AFY) of water rights to Washoe County. The residential section of the budget is based on allocating water available per residential lot on an individual well at 1.12 acre-feet/year. This number is based on a mandatory water conservation program with low water demand vegetation landscaping and low demand water fixtures in the "Warm Springs Area Plan" of the Washoe County Comprehensive Plan dated December 3, 1991, page 5B, paragraph 2 and Action Program WS.4.6.1
The water use calculation is based on the following water consumption elements:
1. Domestic Use
   a. The average per capita domestic water use (not including irrigation), is 77 gallons/person/day. This is based on a non-conserving household. A conserving household using water conservation fixtures will reduce the domestic per capita water use to 60 gpd. Using current technology, ultra low flow fixtures could reduce domestic per capita water consumption to 52 gpd. (Source: "Residential Water Conservation Project, Summary Report" by Brown and Caldwell, June 1984.)
   b. The average household size is projected to be 2.5 persons.
      77 gallons/day x 365 days x 2.5 people =
      70,262.5 gallons/house/year =
      0.216 AF/house/year
   c. A monitoring system will be required to determine actual use and mandate design and allocation changes based on actual use. The monitoring system should include tensiometers on trees/shrubs at sample facility.
2. Landscape Irrigation Use
   a. Lawn Watering
      The watering requirements for the Warm Springs area are determined as follows:
Water 0.5" twice per week for 16 weeks; water 0.75" twice per week for 12 weeks during the summer months. For a 100 square foot lawn area, we used the following calculation:

\[
\begin{align*}
( -5\times2 \times 16 \times .62^* & = 9.92 \times 100) = & 992 \text{ gallons} \\
(7.5\times2\times32 \times .62^* = 14.46 \times 100) = & 1,446 \text{ gallons} \\
2,108 \text{ gallons} \\
\end{align*}
\]

(*1" of water applied to one square foot surface area = .62 gallons)

b. Trees and Shrubs

The shrub and tree water consumption budget figures were determined using the following method:

The beamed saucer watering area of a mature tree was determined to be 4' diameter (3' for mature shrubs). The area of a 4' diameter saucer equals 12.5 square feet (7 sq. ft. for shrubs). The square footage area was multiplied by two feet to represent the preferred depth of watering to promote deep rooting and resistance to adverse conditions. This number represents cubic foot volume of soil to be watered which is multiplied by the water holding capacity of the soil (1.33 gallons per cubic foot of clay loam soil, Source: “Effectively Irrigating Landscape Trees” by Janet Hartin). The resulting number of gallons represents the amount of water to be applied per watering:

- mature tree (12.5 s.f. x 2 x 1.33 gallons = 33.25 gallons) mature shrub (7.0 s.f. x 2 x 1.33 gallons = 18.60 gallons)

The watering frequency was determined as follows:

For an evergreen tree or shrubs, water twice per week for the 12 week summer season, once per week for the remaining 16 weeks of the growth season and twice per month for the additional five months of the year.

\[
\text{evergreen trees and shrubs (2 x 12) + (1 x 16) + (2 x 5) = 50 waterings}
\]

For a deciduous tree or shrubs water twice per week for the 12 week hot summer season and once per week for the remaining 16 weeks of the growth season. No additional water is required for the winter months.

\[
\text{deciduous trees and shrubs (2 x 12) + (1 x 16) = 40 waterings}
\]

The per tree water consumption budget figures are then derived by multiplying the amount of water per application times the watering frequency =

- evergreen tree 33.25 gallons x 50 waterings = 1,662 gallons
- evergreen shrub 18.60 gallons x 50 waterings = 930 gallons
- deciduous tree 33.25 gallons x 40 waterings = 1,330 gallons
- deciduous shrub 18.60 gallons x 40 waterings = 744 gallons

We have averaged the yearly water consumption of mature deciduous and evergreen trees to determine the budget amount per tree in our figures (1,496 gallons). The average yearly water consumption of mature deciduous and evergreen shrubs equals 837 gallons.
o. The intent of the plan is to mandate compliance the per lot water allocation while at the same time providing alternatives to permit variety in individual landscape designs. The following chart provides a list of optional water use estimates that can be used in any combination on any lot provided the water allocation per lot is not exceeded.

![Table A](https://via.placeholder.com/150)

### Table A

**OPTIONAL LANDSCAPE USES - WATER CONSUMPTION**

<table>

<tbody>
<tr>
<td>Turf</td>
<td>100 sq. ft</td>
<td>2,108 gallons</td>
</tr>
<tr>
<td>Vegetable / Flower Garden</td>
<td>100 sq. ft</td>
<td>1,612 gallons (based on 16 week watering season)</td>
</tr>
<tr>
<td>Deciduous Shrub</td>
<td>1 each</td>
<td>744 gallons</td>
</tr>
<tr>
<td>Evergreen Shrub</td>
<td>1 each</td>
<td>930 gallons</td>
</tr>
<tr>
<td>Deciduous Tree</td>
<td>1 each</td>
<td>1,330 gallons</td>
</tr>
<tr>
<td>Evergreen Tree</td>
<td>1 each</td>
<td>1,662 gallons</td>
</tr>
</tbody>
</table>

3. **Animal Use**

Livestock uses an average of 20 gallons of water per day:

\[ 20 \times 365 = 7,300 \text{ gallons/animal/year} \]

Per Policy WS.3.1.A, uses such as pastures, require dedication of water rights in addition to domestic rights.

4. **Residential Water Use**

Residential water usage figures by average lot size are fisted utilizing the following water demand figures.

**Lawn:** The water requirement for lawn areas is as follows:

Water 0.5" twice per week for 16 weeks and water .75" twice per week for 12 weeks during summer months

\[ \begin{align*}
(0.50 \times 16 \times 0.62^* &= 9.92 \text{ sq. ft.}) = \\
(0.75 \times 12 \times 0.62^* &= 11.16 \text{ sq. ft.}) = \\
\text{gallons per 16 weeks} \\
\text{gallons total per season} \\
(* 1" \text{ of water applied to one square foot surface area} = 0.62 \text{ gallons})
\end{align*} \]

**Tree:** Number trees X 1,496 = gallons per season

1,496 = an average of deciduous and evergreen trees from Table A-8

**Domestic Use:** Average household gallons per day based on 2.5 persons per household.

- 2 acres and larger - 4.12 acre feet/year = 364,930 gallons
The recommended limit of lawn area for the 2 – 2 ½ acre or larger lots is 4,000 square feet.

9.92x4,000 = 39,680 gallons
71.16 x 4,000 = 446,640 gallons
84,320 gallons

The plan requires five trees per lot:
5x 1,496 = 7,480 gallons

Domestic use = 70,260 gallons
162,060 gallons
364,930 gallons
-162,060 gallons
202,870 gallons

Optional uses: This leaves 202,870 gallons for selection of optional landscape elements (see Table A for landscaping usage figures).

5. Irrigation Requirements

Each residential lot will be required to install an irrigation system with automatic controller and backflow prevention device to meet Washoe County/State health codes. The irrigation system shall include an overhead spray system for any lawn areas, with uniform heads to head coverage and matched sprinkler head precipitation rates. The system shall also include a drain down method for winterization.

All trees, shrubs, and groundcovers shall be watered a drip system with a separate control clock or a dual program controller. Each tree, shrub, or groundcover shall be watered with individual drip emitters or collectively in groups with micro sprayers.

End of Excerpt
APPENDIX D
DEVELOPMENT AGREEMENT
Washoe County and LW Land Company, LLC

This Development Agreement (the "Agreement") is effective on the date of recordation by Washoe County of this Agreement following its adoption by ordinance by the Washoe County Board of Commissioners ("Effective Date"), and is entered into by and between Washoe County, Nevada (hereinafter "County") and LW Land Company, LLC its agents and successors including developers and eventual subdivided-parcel-owners (hereinafter "Owner") (collectively hereinafter the "Parties").

WITNESSETH:

WHEREAS, the County is authorized, pursuant to Nevada Revised Statutes ("NRS") 3278.0261, et seq., and Washoe County Development Code ("Code") 110.814.00, et seq., to enter into binding development agreements with persons having legal or equitable interests in real property for the purpose of establishing and strengthening long range plans for property development and providing for developer funding of certain public facilities to serve new development;

WHEREAS, Owner represents that he has complete and sole fee title ownership of the subject real property, the legal description of which is set forth on Exhibit "A" attached hereto and shown in the next identified exhibit (hereinafter the "Property");

WHEREAS, Owner has submitted to County an initial preliminary parcel maps for development of the Property ("Project"), copies of which are attached hereto as Exhibit "B" ("Maps"), and the expiration dates of which were recently extended by the parties until October 10, 2017 pursuant to an "interim development agreement" and ordinance approved by the County;

WHEREAS, the Parties desire to enter into this Agreement in accordance with NRS and Code, as applicable, to promote the health, safety and general welfare of the County's inhabitants; to help provide some public services, uses and infrastructure, for which Owner voluntarily offers to pay, to secure to Owner certain land development safeguards and rights, and to achieve the goals and purposes for which development agreement law was enacted;

WHEREAS, it is further the Parties' desire that this Agreement satisfy certain of the infrastructure and development provisions of the County's specific plan for part of the general

Page 1 of 13.
WHEREAS, the County is underway with a review and update of the formal area plan for the general Warm Springs area ("Area Plan"), which may produce significant changes to the WSSP this year, including possible updated fees and schedule, different development vision, and altered infrastructure needs and financing structure.

NOW, THEREFORE, the Parties agree as follows:

1. **Incorporation of Recitals.** The foregoing recitals are incorporated herein by this reference and shall aid in the interpretation of this Agreement.

2. **Permitted Uses, Density, Height, and Size of Structures.** Pursuant to NRS 527.8.0201 and Code 5110.814.20, this Agreement must set forth the maximum height and size of structures to be constructed on the Property as well as the density of uses and the permitted uses of the land. The Parties agree that the Property shall be divided and the Project-constructed strictly for single residential purposes in accordance with the Maps, the WSSP, the Code, and the NRS all in effect on the date of the County's tentative parcel map approval of the Maps and as reflected in this Agreement, including its attached exhibits. Owner shall subdivide to a density only as shown on the Maps. However, Owner and his successors reserve the option to further subdivide the Property and its parcels in the future, pursuant to then existing law, if and when the WSSP, Area Plan, Code and the Washoe County Health Department permit it. This Paragraph 2 is, however, made subject to the provisions of Paragraph 6 below.

3. **Development And Infrastructure.**

   3.1 **Development Standards Handbook.** The Parties have jointly drafted, in accordance with the Code and WSSP, the Project's Development Standards Handbook ("Handbook"), which is attached hereto as Exhibit "C" and incorporated herein by this reference. Construction and use of the Project shall be in accordance with the Handbook.

   3.2 **WSSPHOA & CC&Rs.** As set forth in the WSSP, the Property shall be made subject to a master homeowners' association and master declaration of covenants, conditions and restrictions ("cc&rs") governing the entire WSSP area for the purposes identified in the WSSP, until the related WSSP requirements are modified or repealed, if at all, through the Area Plan update process. The association and the cc&rs shall be completed to the satisfaction of the County Community Development Department and the Washoe County District Attorney.

   3.3 **Disclosure Statement.** The Parties have jointly drafted, in accordance with the Code and WSSP, a Disclosure Statement ("Disclosure"), which is attached hereto as Exhibit "D" and incorporated herein by this reference. The purpose of the Disclosure is to provide all buyers specific information about certain aspects of the WSSP and this Agreement, and how those may affect their long-term ownership. The Disclosure is not intended to be comprehensive in all aspects of the acquisition of certain parcels. It is meant to only provide basic information about aspects of the WSSP and this Agreement that are required to be disclosed. A signed and notarized copy of the Disclosure must be provided to all future property owners and must accompany all building permit applications submitted to the County. The purpose of this
requirement is to ensure that all future owners of property within the Warm Springs community are aware of the requirements of the WSSP and this Agreement.

3.4 Water and Septic. Owner does not intend at this time to subdivide at any greater density than as shown on the Maps, which permits Owner to install septic and well facilities on each new parcel instead of connecting to community water and sewer facilities likely to be built by another area property owner known as the Warm Springs Ranch. Owner waives connection to community water and sewer systems at this time. Owner shall install the referenced septic and well facilities pursuant to applicable law and regulations existing at the time of issuance of each of the related well and septic permits. Owner and his successors may in the future connect to a community water or sewer system, pursuant to then existing law, if and when the WSSP, Area Plan, Code and the Washoe County Health Department permit it.

4. Financing.

4.1 Infrastructure Related Fees.

4.1.1 Fee Commitments. Owner offers to and agrees hereby to pay all fees described in this Agreement and its exhibits. The duty to pay said fees and any increased or decreased fees negotiated as mentioned below, shall run with the Property and be binding upon and inure to the benefit of the successors and assigns of the Parties. These fees shall be paid to County on or before the time of the recording of each final parcel map.

4.1.2 Fee Area: The area encompassed within the WSSP is hereby designated as the "Fee Area" for the imposition of fees and the collection of funds under the provisions of this Agreement.

4.1.3 Special Fee Revenue Fund: Except as otherwise specifically provided in this Agreement, all fees collected pursuant to this Agreement shall be placed in a special, segregated, interest-bearing revenue fund (a "Special Fund") for each fee category and shall be used solely for the purpose of constructing the applicable capital improvements or providing refunds or reimbursements (as defined in Paragraph 4.6 herein) in accordance with this Agreement. The County, through its Director of Community Development and/or its Finance Director, shall maintain detailed records to identify the development(s) from which fees were collected, for which purpose and how said fees were spent.

4.1.4 Fee Changes. So long as the Project does not change from the use described in the Maps and conditions thereto, and except as otherwise provided in this Agreement, the fees set forth in this Agreement shall not increase without the written consent of the Parties except that the fees shall be adjusted to reflect changes in actual construction costs, but only as such costs are adjusted during the regular review of the Capital Improvements Program (CIP) for the WSSP. The CIP is attached as Exhibit "E," entitled Financing Concept Plan for the WSSP, and is incorporated herein by this reference. Notwithstanding this, Owner's fee obligations as defined in this Agreement may be altered or repealed, but not increased, subject however to Paragraph 3 below, by the update to the Area Plan and WSSP, possibly to include refunds of certain fees paid. Owner understands and agrees that no guarantee is expressed herein by the County and that this Agreement does not affect the update process nor ultimate amended Area Plan and WSSP in any respect whatsoever.
4.2 **Fees—Roads, Drainage, Planning, Water, Parks, Open Space, and Utilities.** At the recording of each final map for any phase of the Project, the fees set forth in this Agreement shall be paid by Owner to County as follows:

4.2.1 **Roadway Fees.** Owner agrees to pay to the County all roadway fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Roadway Fees"). These fees shall be set aside in a Special Fund specifically for the construction of the first phase of the Spine Road or other collector roads as defined in the phasing plan for roadways set forth in Exhibit "E". County shall disburse these fees for the purpose of design and construction of the roadways or to reimburse Owner if Owner constructs collector roads to County specifications. These fees are separate and apart from the Regional Road Impact Fee (RRIF) (Paragraph 4.3.1), which is collected at building permit. The Roadway Fees are also separate and apart from the property owners' current fees collected by PVGD for the maintenance of public roadway easements.

4.2.2 **Storm Drainage Fees.** Owner agrees to pay to the County all storm drainage fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Drainage Fees"). These fees shall be set aside in a Special Fund specifically for the construction of Spine Road Drainage improvements as defined in the plan for storm drainage set forth in Exhibit "F". These fees shall be reimbursed to Owner only if Owner constructs said drainage improvements to County specifications.

4.2.3 **Planning Fees.** Only those planning fees paid pursuant to this Agreement (hereafter "Planning Fees") shall be placed in a Special Fund specifically for the repayment of certain planning costs incurred by particular property owners as noted in the CIP (Page G-xxii of Appendix G of the WSSP). Owner shall be credited Planning Fees as noted in the Fee Schedule attached as Exhibit "F". Pursuant to Paragraph 4.2.2 below, all Planning Fees accumulated in the Special Fund shall be used to reimburse said particular property owners who paid the cost of preparing the WSSP. Owner would otherwise pay Planning Fees as shown in the Fee Schedule (Exhibit "F").

4.2.4 **Community Water System Fees.** Owner agrees to pay to the County all community water system fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Water System Fees"). These fees shall be placed in a Special Fund specifically for the purchase of land for, as well as the design and construction of, the Community Water System as defined in the plan set forth in Exhibit "E". All Water System Fees accumulated in the account shall be applied by the County or other government entity to design and construct this water system or used to reimburse Owner if Owner constructs said system to County specifications.

4.2.5 **Parks and Open Space Fees.** Owner agrees to pay to the County all parks and open space fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Park Fees"). These fees shall be placed in a Special Fund specifically for the purchase of land for, as well as the design and construction of, certain parks and open space as defined in the plan set forth Exhibit "E". All Park Fees accumulated in the account shall be applied by the County or other government entity to design and construct the parks and open space or used to reimburse Owner if Owner constructs said parks and open space to County specifications. The Park Fees are separate and apart from the Residential Construction Tax (Paragraph 4.3.2 below), which is collected at building permit.
4.2.6 Public Facilities Fees—Police and Fire. Owner agrees to pay to the
County all public facilities' fees shown in the Fee Schedule for the Project attached hereto as
Exhibit "E" (hereafter "Facilities Fees"). These fees shall be placed in a Special Fund
specifically for the purchase of land for, as well as the design and construction of, the police and
fire public facilities otherwise known in and defined in Exhibit "E" as "Community Facilities".
All Facilities Fees accumulated in the account shall be applied by the County or other
government entity to design and construct these public facilities or used to reimburse Owner if
Owner constructs these facilities to County specifications.

4.3 Existing RTC and County Fees.

4.3.1 Existing RTC Regional Road Impact Fee (RRIF). Owner understands and
agrees that in addition to the Roadway Fees discussed in Paragraph 4.2.1 above, the Project is
subject to the current RRIF, which shall be paid by Owner to County pursuant to applicable RRIF
law at issuance of building permits.

4.3.2 Existing Park Residential Construction (RTC). Owner understands and
agrees that in addition to the Park Fees discussed in Paragraph 4.2.5 above, the Project is subject
to the current RTC for parks to be paid by Owner to County pursuant to applicable RTC law at
issuance of building permits or as otherwise may be lawfully agreed to in by Washoe County
Department of Regional Parks and Open Space. If Owner constructs the parks and open space to
County specifications, then Owner shall be credited or refunded in accordance with such
procedures for credit or refund.

4.4 Credits. The County's Director of Community Development shall make
determinations of credit in accordance with this Agreement. Credits apply only to the respective
Special Fund set forth in Paragraph 4.2 above and shall not be transferable to other Special
Funds. Credits may only be used upon substantiation of the completion of improvements, or in
the case of planning fees, evidence of payment of fees.

4.4.1 Credits for Roadway Fees, Drainage Fees, Water System Fees, Park Fees,
and Facilities' Fees. Credit against fees paid to Special Fund shall be based on the actual cost of
the provision of those facilities or the independently appraised value of the dedication, whichever
is applicable. The actual cost or value shall be credited against the total amount due based upon
the Per Fee Unit that is established by this Agreement and identified in Exhibit F hereto.

4.4.2 Credits for Planning Fees. Only those particular property owners who paid
the cost of preparing the initial WSSP, or their successors, shall be eligible for Planning Fees
credit. Owner is eligible for Planning Fees' credit as one of the original payees and the total
amount of credits for the Maps, assuming all parcels are recorded, is estimated at the amount set
forth in Exhibit F hereto.

4.5 Credit Waiver. Owner must apply any Credits at the time of the filing of a final
parcel map. Owner's failure to do so for a particular final map shall be deemed a waiver of those
Credits to that particular final map. Said Credits may be used on future parcel maps.

4.6 Refund/Reimbursements of Fees:
4.6.1 Refunds. Except as otherwise provided in this Agreement, upon completion of that category’s capital improvements as identified in the CIP for the entire WSSP area, the County shall refund to current WSSP property owners all remaining fees in that category’s fund (the “Refund”), less an administrative fee equal to the administrative costs incurred by the County. Refunds may be awarded only if the Director finds from all circumstances and evidence that: (i) the actual cost of all improvements made in that category of CIP improvement is less than all respective fees paid into that category; (ii) excess funds exist in the Special Fund; and (iii) no additional funds are required to complete the respective improvements required within the WSSP.

4.6.2 Planning Fees’ Reimbursement. In addition to the Credits provided for in this Agreement, the Owner may choose to be reimbursed for the actual Planning Fees paid through a reimbursement (the “Reimbursement”). However, in no event shall the combination of Credits and Reimbursements total more than the actual Planning Fees paid. Any Reimbursement made shall reduce the amount of Credit available. Conversely, any Credit obtained shall likewise reduce the amount of Reimbursement available. A request for Reimbursement shall be submitted by Owner to the County’s Community Development Department within 30 days of the postmark date of notice mailed to Owner of the determination of actual costs made by the County’s Director of Community Development. Should the Planning Fees Special Fund not have sufficient funds to allow for full Reimbursement, then the County shall repay, on a quarterly basis, from whatever funds have been collected during the preceding quarter into said fund until the full amount of Reimbursement is paid.

4.6.3 Prorata Refunds/Reimbursements. If more than one valid application for a Refund or Reimbursement is made and approved, the County shall allocate the funds available for reimbursement between the applicants based on the ratio of the actual costs incurred in each respective fee category or the ratio of the planning fees paid by the applicants.

4.6.4 Director’s Decision and Appeals. Administrative decisions regarding Refunds or Reimbursements may be appealed by the affected Owner to the Washoe County Planning Commission by filing with the County’s Department of Community Development a statement of the grounds of the appeal within ten (10) days of the postmark date of notice mailed to Owner of the administrative decision. The County’s Director of Community Development will schedule such appeal on the Planning Commission agenda for the next regularly scheduled meeting occurring at least twenty-one (21) calendar days after receipt of the appeal statement. If the Planning Commission reverses the decision of the Director of Community Development, it shall direct the Director to recalculate the fee in accordance with its findings. In no case shall the Planning Commission have the authority to negotiate the amount of the fee. If the Planning Commission affirms the decision of the Director of Community Development, the affected Owner may appeal to the County Board of Commissioners within ten (10) calendar days of the Planning Commission hearing by filing a notice of appeal with the County’s Department of Community Development. The County shall consider and render a decision on the appeal in a prompt manner.

4.7 Dedication and Maintenance of Facilities. Owner may be required to offer certain facilities, to include roadways, for dedication to the County at the time of the filing of a final map. Dedication of facilities or roadways to PVGH may also be required.
5. **SADs and GIDs.** Owner agrees to and hereby agrees to waive protest to participation in any special assessment or general improvement district proceedings and agrees to cooperate fully therewith.

6. **Reliance, Uncertainties and Subsequent Actions.**

   6.1 **Reliance by the Parties.** The Parties understand and acknowledge that the other relies upon the assurances, arrangements, and promises set forth in this Agreement and its exhibits, all of which permit the construction and completion of the Project in accordance with the terms of and the uses, densities, heights, sizes and other similar matters defined in this Agreement and its exhibits.

   6.2 **Uncertainties.** The Parties understand and acknowledge that circumstances beyond the control of either party could defeat their mutual intent that the Project be constructed in the manner contemplated by this Agreement. Among such circumstances is water availability or other limited natural resources, waste disposal limitations, federal regulation of air and water quality, and the Area Plan update and possible amended WSSP. The parties recognize that unforeseeable circumstances could affect each other's ability to perform obligations hereunder.

   6.3 **Subsequent Actions.** Owner acknowledges and agrees this Agreement does not relieve the from compliance with existing, changed, modified or amended rules, regulations, laws, ordinances, resolutions, fees or codes of other governmental agencies. Such rules, regulations, laws, ordinances, resolutions, fees or codes of governmental entities must be complied with by the Owner and are not locked in nor a part of this Agreement. Owner further acknowledges and agrees this Agreement does not prevent the County in a subsequent action applicable to the Property from adopting different law, provisions or conditions that do not conflict with the terms in and the law governing this Agreement, except that any subsequent action by the County shall not prevent the development of the Property pursuant to this Agreement. It is not the intent of the Parties nor shall this Paragraph be construed as excusing the County of any obligation hereunder or depriving Owner of any right under this Agreement, which can be performed and without impairment of the County's emergency powers and obligations to obey and enforce state and federal law (Códex 11.0.814.05(e) and (d)).

6.3.1 **Exceptions.**

   6.3.1.1 **Amended WSSP.** Notwithstanding this Paragraph 6 and any other contradictory term in this Agreement, Owner understands and agrees that certain possible changes to the WSSP as adopted through the current update process to the Warm Springs Area Plan shall be binding upon Owner, successors and the Property no matter whether the final map or a building permit has been approved or issued, and Owner agrees to immediately cooperate and comply with such changes as may be contained within the updated Area Plan and amended WSSP. This Paragraph 6.3.1.1 is limited to those certain possible changes to the WSSP that concern homeowners associations, cc&rs, water and sewer, non-paved-road maintenance and related costs and fees. This Paragraph 6.3.1.1 shall also constitute a covenant running with the land of the Property.

6.3.1.2 **Public Health & Safety Law.** Notwithstanding this Paragraph 6 and any other contradictory term in this Agreement, Owner understands and agrees that at the time of submission to the County for any map or permit (including without limitation final maps and building permits) related to the Project the then existing laws (whether local, state or federal)
affecting public health and safety (as typically used for example in the building, health and fire codes' sectors) shall apply. This Paragraph 6.3.1.2 shall constitute a covenant running with the land of the Property.

7. **Conflicting Laws.**

7.1 **Conflicting State or Federal Rules.** In the event that any conflicting state or federal laws or regulations enacted after the date of this Agreement prevent or preclude compliance with one or more provisions of this Agreement or require changes in plans, maps or permits approved by the County, this Agreement shall remain in full force and effect as to those provisions not affected, and the conflicting laws or regulations shall not be applied retroactively.

7.1.1 **Notice and Copies.** Either party, upon learning of any such matter, will provide the other party with written notice thereof and provide a copy of any such law, regulation or policy or an account of any such action or inaction together with a statement of how any such matter conflicts with the provisions of this Agreement; and

7.1.2 **Modification Conferences.** The parties shall, within thirty (30) calendar days of the notice referred to in the preceding subsection, meet and confer in good faith and attempt to modify this Agreement to bring it into compliance with any such federal or state law or regulation, or accommodate any such action or inaction.

7.2 **County Commission Hearings.** In the event County believes that an amendment to this Agreement is necessary pursuant to this Paragraph 7, the proposed amendment shall be scheduled for hearing before the County Commission and noticed pursuant to law (including NRS 527.0205(2)). The County Commission shall determine the exact nature of the amendment or suspension necessitated by such federal or state law or regulation or action or inaction. Owner shall have the right to offer oral and written testimony at the hearing. The Commission's decision is subject to judicial review as set forth in Paragraph 9.3 below.

7.3 **Cooperation in Securing Permits.** County shall use its best efforts to cooperate with Owner in securing any County permits, licenses or other authorizations that may be required as a result of the Commission's decision. It is the responsibility of the owner to pay all applicable fees in connection with securing the permits.

8. **Review Default and Termination.**

8.1 **Frequency of Reviews.** As required by NRS 278.0215 and Code 110.0343.5, at least once every twenty-four (24) months during the Term of this Agreement Owner shall provide to the County's Community Development Department and County shall review in good faith a report demonstrating Owner's good faith and material compliance with the provisions of this Agreement and outlining any issues regarding the County's performance during the preceding twenty-four (24) months. The County's Director of Community Development shall promptly report to the County Commission on the topics of the Owner's report and satisfaction of this Agreement. If at the time of review an issue not previously identified in writing is required to be addressed, the review, at the request of either party, shall be continued to afford sufficient time for response.
8.2 Opportunity to be Heard. Any party requesting an opportunity to be heard by the County Commission on this review matter shall be given such opportunity within a reasonable time following submission of the Director's report to the Commission.

8.3 Procedures in the Event of Default. In the event of any default with any provision of this Agreement, the nondefaulting party shall send by regular mail to the other a courtesy notice not less than thirty (30) calendar days prior to declaring a default under this Agreement. This thirty-day period shall be measured from the date of postmark of the notice. The courtesy notice shall detail the alleged default, any action necessary to cure the default and, where appropriate, the manner and period of time in which the alleged default may be satisfactorily cured. During the period of time the default letter is pending, the defaulter party shall not be considered in default for the purposes of termination or institution of legal proceedings. If the default is corrected, then no default shall exist and the noticing party shall take no further action. If the default is not corrected within thirty (30) calendar days, the following shall occur:

8.3.1 Set Hearing Notice and Possible Freeze. The party noticing a default shall set the matter for hearing before the County Commission. This hearing shall occur at the Commissioners' meeting that follows after the minimum seven (7) business days mentioned in this Paragraph 8.3.1 plus the time necessary for publication and noticing pursuant to law. Said parties shall send a letter to the other party, by certified mail: return receipt requested, and by regular mail, providing notice of intent to present the matter to the Commission, the date set for the Commission's public hearing of same, and notice of at least seven (7) business days before the hearing date of an additional opportunity to correct the default. The seven (7) or more business days will be measured from the date of postmark of the certified and regular mailing of the letter. If the default remains uncorrected at the expiration of these seven days the Commission shall conduct its hearing on the matter. Furthermore, if the Owner is the alleged defaulting party, then the Director of Community Development may immediately direct County staff to condition all future zoning, land use, and mapping applications for the Property so that the building permits to be issued as a result of those approvals shall not be issued until the default is corrected, subject to review by the Commission.

8.3.2 Review by County Commission. Following consideration of the evidence presented before the County Commission and a finding based on substantial evidence that a default has occurred by the alleged defaulting party and the default remains uncorrected, the County Commission shall, in the event County is the defaulting party, direct County staff to immediately cure the default, and, if Owner is the defaulting party, the County may amend or terminate this Agreement and/or may refuse or authorize the suspension of building permits for the development. Termination shall not in any manner rescind, modify, or terminate any vested right in favor of Owner, existing or received, as of the date of the termination. Should Owner elect to appeal, Owner shall have twenty-five (25) calendar days after the date of the Commission's hearing to institute legal action as set forth in Paragraph 9.3 below to determine whether the County Commission abused its discretion.

8.3.3 Waiver. Failure or delay in giving any notice provided for herein shall not constitute a waiver of any default. Except as otherwise expressly provided in this Agreement, any failure or delay by any party in asserting any of its rights or remedies in respect to any default shall not operate as a waiver of any default or of any such rights or remedies, or deprive such party of its right to institute and maintain any actions or proceedings which it may deem necessary to protect, assert, or enforce any of its right or remedies.
8.4 Unavoidable Delay or Default, Extension of Time for Performance. Neither party hereunder shall be deemed to be in default, and performance shall be excused, where delays or defaults are caused by war, acts of terrorism, insurrection, strikes, walkouts, riots, floods, earthquakes, fires, casualties, acts of God, restrictions imposed or mandated by governmental entities, failure of governmental agencies (other than County) to perform acts or deeds necessary for the performance of this Agreement, enactment of conflicting state or federal laws or regulations or similar matters beyond the control of the parties. If written notice of any such delay is given to County within thirty (30) calendar days after the commencement thereof, an automatic extension of time, unless otherwise objected to by County within ten (10) business days of such written notice, shall be granted coextensive with the period of the enforced delay, or longer as may be required by circumstances or as may be subsequently agreed to between County and Owner.

9.1 Expiration of Agreement. The term of this Agreement shall be for three (3) years commencing on the date of this Agreement as defined at the beginning hereof. Owner may apply once to the County Board of Commissioners for a two-year-extension of this Term, provided that the law and regulations existing at the time of action by the Board to grant the extension shall thereafter govern the Property, the Project, the Maps and this Agreement. The Board's action shall be at its discretion.

9.2 Amendment or Cancellation of Agreement. Except as otherwise permitted by NRS 278.0205 and this Agreement, this Agreement may be amended from time to time or canceled only upon the mutual written agreement of the Parties.

9.3 Legal Action, Damages and Venue. The County and Owner agree that the County would not have entered into this agreement if it were liable for damages under or with respect to this Agreement. Accordingly, the County and the Owner may pursue any remedy at law or equity available for breach, except that neither the Owner nor the County shall be liable to the other or to any other party or entity for any monetary damages whatsoever. Prior to the institution of any legal action, the party seeking legal action must give the thirty (30) day notice of default as set forth in Paragraphs 8.3 above. Following such notice, a public hearing must be held by the County Commission where the allegations will be considered and a decision regarding their merits will be reached. Any judicial review of the County Commission's decision or any legal action taken pursuant to this Agreement will be heard by a court under the standard review appropriate to court review of zoning actions, and the decision of the County Commission shall be overturned or overruled if its decision is clearly arbitrary and capricious. Judicial review of the decision of the County Commission shall be limited to the evidence presented to the County Commission at the public hearing. Any judicial review or other action to enforce or interpret this Agreement shall occur in and rest exclusively with the Second Judicial District Court, State of Nevada.

9.4 Governing Law. This Agreement shall be construed and enforced in accordance with and shall be governed by the law of the State of Nevada.

9.5 Assignment.

9.5.1 Transfer to an Affiliate of Owner. The rights of Owner under this Agreement may be freely transferred or assigned to any entity, partnership, or corporation, which Owner
controls, or in which Owner has a controlling interest, or which controls Owner, provided, such entity shall assume in writing all obligations of Owner hereunder.

9.5.2 Third Party Assignment. The rights and obligations of Owner under this Agreement may be freely transferred or assigned to a third party not affiliated with Owner, provided such third party assumes in writing all obligations of Owner hereunder as to the assigned or transferred portion of the Project along with a copy of the sale, transfer, conveyance, or assignment agreement wherein the third party assumes the obligations of the Owner. Upon any such assignment hereunder, the Owner shall be relieved of all obligations and liabilities under or in connection with this Agreement. In connection with the conveyance of any portion of the Property, Owner shall provide County with written notice of any sale, transfer, conveyance or assignment of any unimproved portion of the Project.

9.5.3 Financial Transactions. Owner has full discretion and authority to transfer, assign or encumber the Project or portions thereof in connection with financing transactions, without limitation on the size or nature of any such transaction, the amount of land involved or the use of the proceeds there from, and may enter into such transaction at any time and from time to time without permission of or notice to County.

9.6 Indemnity; Hold Harmless. Except as expressly provided in this Agreement, Owner shall hold County, its officers, agents, employees, and representatives harmless from liability for damage or claims for damage for personal injury, including death and claims for property damage which may arise from the direct or indirect operations of Owner or those of its contractors, subcontractors, agents, employees, or other persons acting on Owner’s behalf, which relate to construction of the Project. Owner agrees to and shall defend County and its officers, agents, employees, and representatives from any claims and actions for damages caused or alleged to have been caused by reason of Owner’s activities in connection with the Project. Owner agrees to indemnify, hold harmless, and provide and pay all costs for a defense for County in any legal action filed in a court of competent jurisdiction by a third party challenging the validity of this Agreement. The provisions of this Paragraph 9.6 shall not apply to the extent such damage, liability, or claim is solely caused by the intentional or negligent act of County, its officers, agents, employees, or representatives.

9.7 Binding Effect of Agreement. The burdens of this Agreement bind, and the benefits of this Agreement inure to, the parties’ respective successors in interest and shall run with the land until the completion of performance of this Agreement or its earlier revocation or termination as provided herein.

9.8 Relationship of Parties. It is understood that the contractual relationship between County and Owner is such that Owner is an independent contractor and not an agent of County for any purpose.

9.9 Notices. Unless otherwise provided in this Agreement, all notices, demands and correspondence required or provided for under this Agreement shall be in writing and delivered in person or sent by overnight courier or mailed by certified mail postage prepaid, return receipt requested. Notices shall be addressed as follows:

Page 11 of 13
To County: WASHOE COUNTY
Department of Community Development
Current Planning Division
PO Box 11130
Reno, NV 89520-0027

To Owner: J.W. Land Company LLC
A Nevada Limited Liability Company
Brian Murphy
695 Mile Circle Drive
Reno, Nevada 89511

Either party may change its address by giving notice in writing to the other and thereafter notices, demands and other correspondence shall be addressed and transmitted to the new address. Notices given in the manner described shall be deemed delivered on the day of personal delivery or the delivery date by overnight courier or mail is first attempted.

9.10 Entire Agreement. This Agreement constitutes the entire understanding and agreement of the parties. This Agreement integrates all of the terms and conditions mentioned herein or incidental hereof and supersedes all negotiations or previous agreements between the parties with respect to all or any part of the subject matter hereof.

9.11 Waivers. All waivers of the provisions of this Agreement must be in writing and consent of all parties hereto.

9.12 Recording Amendments. Promptly after County's execution of this Agreement, an executed original of this Agreement shall be recorded in the Official Records of Washoe County, Nevada. All amendments hereto must be in writing signed by the appropriate officers of County and Owner in a form suitable for recording in the Official Records of Washoe County, Nevada. Upon the completion of performance of this Agreement or its earlier termination, a statement evidencing said completion or revocation signed by appropriate officers of County and Owner shall be recorded in the Official Records of Washoe County, Nevada.

9.13 Headings, Exhibits, Cross-references. The headings and captions used in this Agreement are for convenience and ease of reference only and shall not be used to construe, interpret, expand or limit the terms of this Agreement. All exhibits attached to this Agreement and the recitals at the front of this Agreement are incorporated herein by the references thereto contained herein. Any term used in an exhibit hereto shall have the same meaning as in this Agreement unless otherwise defined in such exhibit. All references in this Agreement to Paragraphs, Sections and Exhibits shall be to Paragraphs, Sections and Exhibits of or to this Agreement, unless otherwise specified. Copies of the Exhibits shall be retained and maintained by the Department of Community Development at 1101 East Ninth Street, Reno and shall be available for inspection.

9.14 Severability of Terms. If any term or other provision of this Agreement is held to be invalid, illegal or incapable of being enforced by any rule of law or public policy, all other
conditions and provisions of this Agreement shall nevertheless remain in full force and effect,
provided that the invalidity, illegality or unenforceability of such term does not materially impair
the parties' ability to consummate the transactions contemplated hereby. If any term or other
provision is invalid, illegal or incapable of being enforced, the parties hereto shall, if possible,
ampend this Agreement so as to affect the original intention of the parties.

9.15 Voluntary Agreement. Owner acknowledges that he had the option of conducting
his own public facilities needs assessment but instead voluntarily chose to accept the WSSP.
Owner further acknowledges and agrees that he voluntarily, willingly and without protest and
duress freely enters into this Agreement and accepts the terms and conditions herein.

IN WITNESS WHEREOF, this Agreement has been executed by the parties on the date stated.

MAP
Disclosure Statement
DISCLOSURE STATEMENT

Because you are considering the purchase of a parcel of property or a home in the Warm Springs area of Washoe County you need to know about the formal plans and rules that govern your purchase and your use of the property. This Disclosure Statement is required by the Warm Springs Specific Plan (WSSP), which is a formal document adopted by Washoe County for the purpose of planning land development and the public services needed to serve this development.

This Disclosure Statement will not tell you everything you need to know about buying and using property in Warm Springs pursuant to the WSSP. You need to study all documents related to your purchase and legal use of Warm Springs property, which are available from your seller and Washoe County. These documents may include a proposed purchase agreement and escrow instructions, title report, seller’s property advisories, the WSSP, the WSSP Development Standards Handbook, the project-specific Development Standards Handbook, a development agreement with Washoe County, and a possible declaration of covenants, conditions, and restrictions. This Disclosure Statement will attempt to summarize some of the major features of the WSSP and its exhibits.

THE WSSP

There are several attachments to this Disclosure Statement, which convey in summary manner some of the major features of the WSSP. They are referred to as exhibits. Exhibit A is a colored map that illustrates all of the land use types and densities currently approved under the WSSP. Exhibit B is a copy of a part of the Washoe County Development Code (Washoe County Code Chapter 110, Article 302), which displays the legal and illegal uses of both your property and neighboring properties. Exhibit C is a copy of another part of the Development Code (Article 304), which describes the use types set forth in Exhibit B. Exhibit D is a copy of a part of the County’s Area Plan Regulations for the Warm Springs Area (Article 225 of the Development Code).

It is important that you study these exhibits at a minimum and understand what you are allowed to do with your property. Your property is within the area that has been outlined on Exhibit A, and your signature on this Disclosure Statement ensures that you were informed of all land uses permitted on and adjacent to your property as well as within the entire Warm Springs Specific Plan community. Please note that you are agreeing NOT to file any written or verbal complaints or any lawsuits or other legal proceedings regarding any existing legal agricultural uses.

WARM SPRINGS AREA PLAN UPDATE

Washoe County is conducting this year of 2006 a review and update of the formal area plan for the general Warm Springs area ("Area Plan"), of which the WSSP is a part. This update may produce significant changes to the WSSP this year, including possible updated fees and schedule, different development vision, and altered infrastructure needs and financing structure. A few of these possible changes could apply to you now and require certain actions or payments. This is all discussed in the development agreement entered into by your developer/seller and Washoe County, a copy of which is attached as Exhibit E. Please read it now.

DEVELOPMENT AGREEMENT

Exhibit E is the referenced development agreement. It controls what may happen to and on the property you are buying or have bought. It requires, among other things, certain appearances to your home and landscape, the payment of certain fees (which your seller may or may not have satisfied), and your possible participation in a homeowner’s association as well as special assessment or general improvement districts. Please study this agreement.

HANDBOOK FOR DESIGN

All development within the WSSP community must satisfy the minimum criteria established in the WSSP Development Standards Handbook as well as the more specific criteria set forth in the project’s specific development standards handbook created by the developers of the project in which you may be purchasing property. These two handbooks are intended to provide future homeowners and businesses with design guidelines to be followed to conserve natural resources, primarily water supply, enhance the quality of the community, and ensure long-term design consistency and land use consistency, as
envisioned by the WSSP. A copy of this Project’s Development Standards Handbook is included as Exhibit F. This handbook is attached to this Disclosure Statement for your reference at the time you prepare to design your future home or business.

INFRASTRUCTURE FEE PAYMENT

The WSSP contains a plan for funding, building and maintaining public services needed for the development of Warm Springs, such as roads, drainage, water, parks, police and fire. This plan is referred to as the financing plan, and it requires payment of fees to cover a proportionate share of these community services. The amount and payment of these fees was established by your property developer in the Development Agreement (Exhibit E). If the property you may purchase is located within a subdivided area in Warm Springs, you will be bound by the development agreement and must pay a fair share at purchase. Note that some of the fees apply only to property that will subsequently be subdivided. Other fees are applicable to parcels that will not be further subdivided.

Attached as an exhibit to the Development Agreement (Exhibit E) is a copy of the Schedule of Fees. The WSSP Development Standards Handbook notes that there will be a yearly escalation of these fees, based upon the Consumer Price Index.

ROADWAY MAINTENANCE

The Palomino Valley General Improvement District (PVGID) will review public roadways, major or minor, for acceptance for maintenance. PVGID probably affects your property. Any private roads must be the responsibility of your homeowners association, if any, and will not be maintained by PVGID or Washoe County.

FUTURE ASSESSMENT DISTRICTS

Please be advised that an assessment district or general improvement district could be created in the future to provide community water service, community sewer service, drainage systems, or roadways in the WSSP area. At the time you file for a building permit, such a district may or may not be in place. The attached waiver (that will require your signature at the closing of your property) will limit your ability to oppose any future assessment district that may be imposed to fund a community water system, community sewer service, drainage system, or roadway construction/maintenance.

ACCEPTANCE

I (we) have read and understand all the provisions of this Disclosure Statement and agree to all the stated provisions.

Financing Concept Plan
GENERAL

The major element of each development agreement to be entered into by a subdividing property owner and Washoe County would be the capital improvement program elements, which have significance within the entire WSSP area, or are required to serve more than one development. These elements form the "backbone" of the infrastructure system. The development agreement identifies specific elements of the infrastructure system that must be funded or constructed prior to issuance of certificates of occupancy by the County. The Capital Improvements Program (CIP) for the WSSP is found in Appendix G of the Warm Springs Specific Plan and is incorporated herein by this reference.

Palomino Ranch Estates
CC&R's
WHEN RECORDED RETURN TO:

LW Land Company LLC
695 Mile Circle Drive
Reno, NV 89511

DECLARATION OF
COVENANTS, CONDITIONS AND RESTRICTIONS
OF
PALOMINO RANCH ESTATES

This declaration made this _________ day of __________________________
2017 by LW Land Company LLC __________________________, a
Nevada Limited Liability Company __________________________, hereafter
referred to as 'DECLARANT'.

WHEREAS, DECLARANT is the owner of that certain real property
located in the County of Washoe evidenced by the certain official
subdivision map recorded in the office of the County Recorder of
the County of Washoe, State of Nevada, on, in Book _______ of
Subdivision Maps, at Page ________, and more particularly described
as Palomino Ranch Estates and

WHEREAS, DECLARANT desires to impose upon said lots mutual and beneficial
covenants, conditions and restrictions under a plan of improvement for
the benefit of all owners and future owners thereof.

NOW THEREFORE, DECLARANT hereby declares that said lots, numbered
_______ through _______ inclusive, are held and shall be held,
conveyed, hypothecated, used, improved and occupied subject to the
following covenants, conditions, restrictions, easements and
agreements which are imposed pursuant to a common plan and are intended
to create equitable servitudes designed to preserve the quality of said
land for the benefit of the various owners thereof, their heirs, successors
in interest and assigns. To wit:
RESTRICTIVE PROVISIONS

1. Use and Improvements

No buildings, other than one detached single-family private dwelling, private garage for the use of the occupants of such dwelling and a barn or other usual and appropriate outbuildings strictly incident and appurtenant to a private dwelling, shall be erected or maintained on any lots, except that a guest house may be permitted subject to County requirements. No use whatsoever, except in connection with its use and improvement as a site and grounds of a private dwelling as above set forth shall be made of any lot or plot therein and furthermore, no driveway, road, right of way, or any easements for public or private use shall be granted for any reason whatsoever, across or through any lot to any other piece of property without complying fully with County requirements.

2. Temporary Dwellings, Outbuildings and Accessory Outbuildings

No trailers, except temporary contractors' trailers used in connection with construction and not provided for dwelling accommodations, tents, garage or other outbuildings shall be used as a temporary or permanent residence, nor shall any residential structure be moved on to the tract from some other location, nor shall “used” lumber be utilized in the construction of any building, whether it be of temporary or permanent nature, unless approved prior to use by an architectural control committee. No accessory outbuildings shall be erected on any lot prior to the erection of a dwelling thereon. In no event shall any such accessory outbuilding, partially-completed or temporary structure ever be used for human occupancy or habitation.
3. Minimum Building Requirements

The construction of all dwellings on all lots, regardless of size of dwelling, must conform to F. H. A. or better specifications. On all lots, no dwelling shall be erected or permitted to remain thereon having a ground floor area, exclusive of open porches and garages, of less than 1,500 square feet for a one-story building, or 750 square feet for a two-story building, with the total size no less than 1,500 square feet.

4. Building Setback Requirements

On lots 10,000 square feet or smaller, building setbacks will vary, providing a more rural atmosphere in the streetscape. No building or projection thereof shall be located nearer than 20 feet to any street or driveway access easement.

No building shall be located nearer than 25 feet to any rear lot line. All lots larger than 10,000 square feet will have an established building envelope with a minimum setback of 30 feet. Buildings may be located anywhere within the envelope; however, all buildings, structures or storage of any type, will be confined to this area on each lot. The size and shape of envelope may vary from lot to lot. The envelopes depth and setback will be related to overall lot size. These established setback lines notwithstanding, no structure shall be located nearer than 100 feet from any perennial stream. Areas within 100 feet of said perennial streams shall be maintained in their natural state. In accordance with fish and game codes, the Department of Fish and Game must be notified at least 30 days prior to any activity that alters a stream. Stream crossings and culvert installations are subject to this code section.

5. Heating and Fireplaces

The use of efficient, non-polluting heating systems shall be encouraged within the SPA Primary heating sources for residences
shall be standard conventional electric or propane gas systems distributing heat through ducts within the home. Applicants who prefer stoves as the major heat source in the home will be encouraged to use pellet stoves. Approved pellet stoves will be accepted as a major heat source within the residence. Wood-burning stoves and fireplace inserts are prohibited as a major heat source. Applicants with standard conventional electric or propane heating systems designed for use as the major heat source within the residence will be allowed the installation of one wood stove as a secondary backup heat system, provided the wood stove meets the new County clean-burning, low-pollution standards. Open fireplaces are prohibited except for gas burning fireplaces which have false logs and are used purely for aesthetic purposes and are not considered a heat source within the residence.

6. Architecture

All buildings must incorporate a "western ranch" theme or identity architecturally, in a manner that is complementary and compatible with the plan area and its surroundings. No mobile homes are allowed except for construction purposes within the SPA. To enhance the development and maintain its rural character, buildings and structures shall adhere to the following guidelines:

a. Exterior Walls and Trim. Wood, brick, stucco, or stone material finishes are required for all exterior walls. Siding must run one consistent direction on all exterior walls. Exterior colors must be earth tone and harmonize with the surrounding landscape. No true primary or secondary colors are allowed, nor any gloss or semi-gloss finishes. All reflective metal such as chimney stacks, flashings, exhaust vents and pipes, must be painted to match or blend with surrounding materials. All draperies
and window coverings should also be of materials and colors which harmonize with the surroundings. Aluminum windows, door frames, solar panels, and skylights must be bronzed or anodized. Steel windows and door frames must be painted to match or blend with surrounding materials.

b. Animals. On lots greater than one acre, horses or 4-H animals, limited to cattle or sheep, will be allowed provided they are not adjacent to the center spine road, village center, community facilities center, or school sites. No lot shall have more than two such animals. All other lots may have the usual household pets provided they are not kept for commercial purposes and are kept reasonably confined so as not to become a nuisance. Horses, animals, and household pets shall not unreasonably interfere with the comfort, privacy, or safety or other properties. No lot shall have more than four household pets.

If horses/4-H animals are to be allowed in an area, that area shall be designated on tentative and final maps for those uses, and water rights dedicated to provide irrigated pasture in areas where the animals must be kept when not stabled.

c. Roofs. Roofs must be constructed of fire-retardant materials.

The use of standard wooden shakes or shingles will be prohibited. Roofing materials shall be restricted to tile, asphalt, fiberglass, fire-retardant treated shakes, or any new fire-retardant roofing materials in use which have pleasing aesthetic values. Roofing materials shall be of a color that harmonizes
with the surrounding area and color scheme of the structure. Flat roofs will be discouraged.

d. Mailboxes. Architectural structures of natural materials and natural colors shall be provided for grouped neighborhood mailboxes. The grouped neighborhood boxes of 15 or less per site shall be placed at neighborhood entry points, with adequate access from main roadways.

e. Garbage and Refuse Disposal. There shall be no burning of trash, garbage or other like household refuse, nor shall any property owner accumulate on their lot junked or unsightly vehicles or litter, refuse or garbage, except in receptacles provided for such purposes.

f. Concealment of Fuel Storage Tanks and Trash Receptacles. Fuel storage tanks and every receptacle for ashes, trash, rubbish or garbage shall be so placed and kept as not to be visible from any street. lot, parcel, or open space in the SPA, except at the times when refuse collections are made.

g. Travel Trailers, Motor Homes and Boat Storage. Travel trailers, motor homes (R.V.), or boats and trailers shall be stored within the building envelope and screened from any street, lot, parcel, or open space area by screen fences. If stored in side yards, the minimum side yard shall be 12 feet.

h. Nuisances. No noxious or offensive activities, odors, or nuisances shall be permitted on any lot or parcel in the development. No refuse, unsightly or abandoned vehicles, debris, noxious material, discarded personal effects, or construction materials not for immediate use shall be permitted on any lot or portion thereof. It is incumbent
upon all property owners to maintain their lots and yards in a neat, orderly and well-groomed manner, whether said lots are vacant or improved.

i. Completion of Construction. Construction of any improvement, once commenced, shall be pursued diligently to completion. Improvements not so completed or upon which construction has ceased for 90 consecutive days, or which have been partially or totally destroyed and not rebuilt within a reasonable period, shall be deemed nuisances. The County may remove any such nuisance or repair or complete the same at cost to the owner provided the owner has not commenced required work within 30 days from posting a notice to commence such work upon the property. Such notice shall state the steps to be taken to eliminate the nuisance.

j. Clothes Lines. No clothes lines shall be constructed or erected which would be visible from any street, other lot, or open space.

k. Garage. Every single-family dwelling unit constructed within the SPA shall have on the same lot or parcel enough covered and completely enclosed automobile storage space for at least two automobiles. On one-acre or large lots, garage doors shall be encouraged to face side yards away from streets.

7. Landscaping

Landscape design should fit the particular use and blend with the natural environment. The lot concept limits the area in which a home owner may provide landscaping. The plant material must be selected from a predetermined list incorporated in this plan. The plant selection includes only drought tolerant and low water demand material. These factors contribute to a decreased average annual
residential demand that is mandatory for implementation of this plan.
A specified number of trees are required in the front yard setback
and transition zone to provide a "sense of place": Plant material
selected from the incorporated list, per neighborhood, should be
kept similar to strengthen neighborhood unity and identity.
Selection of materials should contain a mixture of plants with
fast, medium, and slow growth rates and a variety of sizes should
be planted to provide a more natural appearance.
The use of plants around dwelling units to reduce heating and
cooling needs is encouraged. Evergreens along the north and west
act as a windbreak to deflect winter winds. Deciduous trees planted
on the south around the perimeter of the unit are encouraged to
provide summer shade while allowing winter sun. Creation of earth
terms to the windward side can also reduce heat loss.
Drainageways should be lined with native wildflowers, grasses,
shrubs, and rocks and boulders to slow velocities. They will be
graded to resemble a natural drainage swale and incorporated in the
overall design. Irrigation of plant material will utilize drip
irrigation and other water conservation features as practical. The
use of plumed gray water storage systems will be investigated with
the Health Department.
Within nine months of completion of the main dwelling unit, each
lot or parcel shall be completely landscaped consistent with the
landscape design guidelines and water budget incorporated in this
plan. All landscaping shall be maintained to harmonize with and
sustain the attractiveness of the development.
8. Fencing
All property lines from single-family dwelling units to the street
shall be kept free and open.
A solid privacy fence may be constructed within the building envelope and limited to the rear of the house. Side yards will not be enclosed with a privacy fence in lots larger than 10,000 square feet. Fences shall be constructed of wood or masonry material and no fence will be over six feet in height. Developers will establish a typical privacy fence per neighborhood to promote neighborhood unity.

The transition zone and side yard may be fenced with open ranch style fencing. Fencing will be consistent within all neighborhoods. There shall be no chain link, woven wire or any type of wire fence within the development except for back yard pet enclosures and swimming pools.

9. Public Street and Monument Signs

On public streets the style of signage will be unique to the SPA. It will be uniform in style throughout the area. Subdivision entry signage shall be limited to monument signs of native materials and in conformance with design guidelines set forth in the commercial section of the plan.

10. Exterior Lighting

The functional objectives in providing exterior area lighting are to illuminate areas necessary for safe and comfortable use. In certain situations, area lighting can add to the aesthetic appeal of a site by highlighting architectural features of a building or illuminating pathways and landscape plantings. In these instances, only the special features of a building or landscape should be illuminated. It should be noted that the standards and guidelines contained in this section address area lighting on individual
properties, and not overhead street lighting along public and private rights-of-way.

On public streets, the style of lighting standard will be unique to the SPA. It will be decorative and uniform in style and intensity throughout the area. Lighting shall be directed downward with no splay of lighting directed outward.

a. Standards.

i. Exterior lights shall not blink, flash or change intensity. String lights, building or roofline tube lighting, reflective or luminescent wall surfaces are prohibited.

ii. Exterior lighting shall not be attached to trees except for the Christmas season.

iii. Driveway, walkway, and building lights shall be directed downward.

iv. Fixture mounting height shall be appropriate to the purpose.

v. Illumination for aesthetic or dramatic purposes of any building or surrounding landscape utilizing exterior light fixtures projected above the horizontal is prohibited.

vi. Seasonal lighting displays and lighting for special events which conflict with other provisions of this section may be permitted on a temporary basis.

b. Guidelines.

i. Lighting Design. Exterior lighting should be designed as an integral part of the architecture and
landscape and located in a manner that minimizes the impact of lighting upon adjacent structures and properties.

iv. Lighting Levels. Avoid consistent overall lighting and overly bright lighting. The location of lighting should respond to the anticipated use and should not exceed the amount of light actually required by users. Lighting for pedestrian movement should illuminate entrances, changes in grade, path intersections, and other areas along paths which, if left unlit, would cause the user to feel insecure. Lighting suppliers and manufacturers have lighting design handbooks which can be consulted to determine fixture types, illumination needs and light standard heights.

v. Fixture Design. Exterior lighting fixtures should be simple in design and should be well-integrated with other architectural site features.

vi. Structural Lighting. Night lighting of building exteriors should be done in a selective fashion: highlight special recognizable features; keynote repeated features; or use the play of light and shadow to articulate the facade. The purpose of illuminating the building should be to add visual interest and support building identification. Harsh overall lighting of a facade tends to flatten features and diminish visual interest.
x. **Lighting Height.** As a rule, the light source should be kept as low to the ground as possible while ensuring safe and functional levels of illumination. Area lighting should be directed downward with no splay of lighting directed offsite. The height of light fixtures or standards must meet the County standards. Direct light downward in order to avoid sky lighting. Any light source over 10 feet high should incorporate a cut-off shield to prevent the light source from being directly visible from areas offsite. The height of luminaries should be in scale with the setting and generally should not exceed 10-12 feet.

11. **Utilities**
All utilities shall be underground on lots less than one acre. Undergrounding shall be encouraged for lots from one to two and a half acres and overhead on lots larger than two and a half acres. All individual services to each unit for all lot sizes shall be undergrounded from the neighborhood service line.

12. **Prohibition Against Used Structures**
No used buildings or structures intended for use as a dwelling shall be placed on any lot.

13. **Ditches and Swales.**
Each owner shall keep drainage ditches and swales located on his lot free and unobstructed and in good repair and shall provide for the installation of such culverts upon his lot as may reasonably be required for proper drainage.

14. **Resubdivision or Joinder Lots**
No lot shall be further subdivided, unless permitted by the SPA Plan and regulatory zoning category applicable.

15. **Drilling and Mining**
No drilling, refrining, quarrying, or mining operation of any kind shall be permitted on any lot.

16. Television or Radio Antennae and Towers

No television or radio antennae or tower shall be erected or used outdoors, whether attached to a building or structure, or otherwise. The placement of satellite discs shall be screened from view from any adjacent parcels, streets, or open space by locating in rear yards behind screened fences at a minimum. At such time as a community antenna television (CATV) system may be installed to serve the development, each lot owner shall pay his proportionate share of standby, installation or service charges made pursuant to the franchise governing such system. This is provided, however, that such charges shall be comparable to those of similar installations in the CATV industry.

17. Failure to Enforce.

The various restrictive measures and provision of this declaration are declared to constitute mutual equitable covenants and servitudes for the protection and benefit of each lot in said subdivision and failure by DECLARANT or any other person or persons entitled so to do shall not serve to create any liability or responsibility to DECLARANT for its alleged failure to act. Failure to enforce any measure or provision upon violation thereof shall not stop nor prevent enforcement thereafter or be deemed a waiver of the right so to do.

18. Severability

The various measures and provisions of this declaration are declared to be severable, and the invalidity of one measure or provision shall not affect any other measure or provision.

19. Subordination to Mortgages and Deeds of Trust

Nothing contained in this declaration shall impair or defeat the lien of any mortgage or deed of trust made in good faith and for
value, but title to any property is subject to this declaration
obtained through the sale or satisfaction of any such mortgage or
deed of trust shall thereafter be held subject to all of the
restrictions and provisions hereof.

20. Enforcement and Remedy

Each grantee of a conveyance or purchaser under a contract or
agreement of sale by accepting a deed or contract of sale or
agreement of purchase accepts the same subject to all of other
covenants, restrictions, easements and agreements set forth in this
declaration and agrees to be bound by the same.

Damages for any breach of the terms, restrictions and provisions of
this declaration are hereby declared not to be adequate
compensation, but such breach and/or the continuation thereof may
be enjoined or abated by appropriate proceedings by the DECLARANT,
or by an owner or owners of any other lot or lots in said
subdivision. Court costs and attorney fees shall be awarded the
prevailing parties of any legal action as deemed appropriate and
awarded by the court.

21. Terms of Restrictions

These covenants, restrictions and agreements shall run with the land
and shall continue in full force and effect until ____________ at
which time the same shall be automatically extended for successive
periods of five years unless by a duly executed and recorded
statement of the then owners of 75% or more of the lots in said
subdivision elect to terminate or amend these restrictions in whole
or in part. Said declarations of restrictions can be amended or
modified at any time when 75% of the owners election to do so,
provided however; that said amendment or modification is in
compliance with the provisions of the Washoe County Code.

Note:
The following two items will be applicable in the event of an
active architectural control committee.
22. Maintenance of Lots

All lots, whether occupied or unoccupied, and any improvements placed thereon, shall at all times be maintained in such a manner as to prevent their becoming unsightly, unsanitary or a hazard to health. If not so maintained, the architectural control committee shall have the right, through its agents and employees, to do so, the cost of which shall be borne by the owner. Neither the architectural control committee, nor its agents, employees or contractors, nor the DECLARANT, nor its agents, employees, or contractors shall be liable for any damage which may result from any maintenance work as performed.

23. Real Estate Signs

Professionally prepared signs of customary and reasonable dimension may be displayed on any lot advertising it, together with any improvements located thereon, for sale or lease. All other signs, bill boards, or advertising structures of any kind are prohibited except upon application to and written permission from the architectural control committee.

Note:

The following is an example of the architectural control committee section of the C. C. & Rs. Not all development projects within the plan area will be required to have an architectural control committee. In the event a project does not have an architectural control committee, then applicants will be required to submit an application to the citizen advisory board with definitive design, materials and color combinations for their review and recommendation prior to submittal to the County of Washoe.

24. Architectural Control Committee

a. General Powers. All improvements constructed or placed on any lot must first have the approval of the committee as
evidenced by the signatures of at least two of the members affixed to the plans submitted. Two sets of plans and specifications shall be submitted to the committee, which plans shall show the location of all improvements, if any, easting upon said lot, the location of the improvement proposed to be constructed, the color and composition of all exterior materials to be used, proposed landscaping, and any other information which the committee may require, including soil, engineering and geologic reports and recommendations.

b. Committee Membership. The committee shall be composed of three members, to be appointed by DECLARANT, at least one of whom shall be a representative of DECLARANT. Committee members shall be subject to removal by DECLARANT and any vacancies from time to time existing shall be filled by appointment by DECLARANT, or in the event of DECLARANT's failure to do so within two months after any such vacancy, the then majority of the lot owners. The power to appoint or remove Committee members shall be transferred permanently to the lot owners upon:

i. A lapse of 18 months between the filing of the final map of the development, provided that 90% of the aggregate number of lots of the development have been sold by the DECLARANT; or

ii. A lapse of three years from the date of Final Subdivision Public Report of the Nevada Department of Real Estate.

c. Grounds for Disapproval. The committee may disapprove any plan of development:

i. Because of the reasonable dissatisfaction of the committee with grading plans, location of the proposed improvement on a lot, finished ground elevation, color scheme, finish, design, proportions, architecture,
shape, height or style of the proposed improvement, the materials used therein, the kind, pitch or type of roof proposed to be placed thereon; or ii. If, in the judgment of a majority of the committee reasonably exercised, the proposed improvement will be inharmonious with the development, or with the improvements erected on other lots.

d. Rules and Regulations. The committee may, from time to time, adopt written rules and regulations of general application governing its procedures which may include, among other things, required number of copies of plans and specifications: provisions for notice of approval or disapproval, including a reasonable time period for approval by reason of failure to disapprove.

e. Variances. The committee may grant reasonable variances or adjustments from the provisions of this declaration where literal application thereof results in unnecessary hardship and if the granting thereof will not be materially detrimental or injurious to owners of other lots.

f. Certification of Compliance. At any time prior to completion of construction of an improvement, the committee may require a certification, upon such form as it shall furnish, from the contractor, owner, or a licensed surveyor, that such improvement does not violate any setback rule, ordinance or statute, nor encroach upon any easement or right-of-way of record.

g. Administrative Fees. As a means of defraying its expense, the committee may institute and require a reasonable filing fee to accompany the submission of plans and specifications, to be not more than one-fourth of 1% of the estimated cost of
the proposed improvement, subject to a minimum fee of $75.00. No additional fee shall be required for resubmittal.

h. Liability. Notwithstanding the approval by the committee of plans and specification of its inspection of the work in progress, neither it, DECLARANT, nor any person acting in behalf of any of them shall be responsible in any way for any defects in any plans or specifications or other material submitted to the committee, nor for any defects in any work done pursuant thereto. Each person submitting such plans or specifications shall be responsible for the sufficiency thereof and the adequacy of improvements constructed pursuant thereto.

All covenants, conditions and restrictions herein contained which are required by the County of Washoe may also be enforced by the County of Washoe.

Notary Public in and for said county and state

My commission expires: 7/15/2021

*Owner refers to the following: (Please mark appropriate box.)

☐ Owner

☐ Corporate Officer/Partner (Provide copy of record document indicating authority to sign.)

☐ Power of Attorney (Provide copy of Power of Attorney.)

☐ Owner Agent (Provide notarized letter from property owner giving legal authority to agent.)

☐ Property Agent (Provide copy of record document indicating authority to sign.)

☐ Letter from Government Agency with Stewardship

July 1, 2017
Tentative Parcel Map Application
Supplemental Information

(All required information may be separately attached)

Chapter 110 of the Washoe County Code is commonly known as the Development Code. Specific references to tentative parcel maps may be found in Article 608, Parcel Maps.

1. What is the location (address or distance and direction from nearest intersection)?

   South end of Grass Valley Road; approximately half a mile south of Whiskey Springs Road.

   a. Please list the following:

<table>
<thead>
<tr>
<th>APN of Parcel</th>
<th>Land Use Designation</th>
<th>Existing Acres</th>
</tr>
</thead>
<tbody>
<tr>
<td>077-130-23 Remainder</td>
<td>120 - Vacant, Single Family</td>
<td>30.05</td>
</tr>
</tbody>
</table>

2. Please describe the existing conditions, structures, and uses located at the site:

   Vacant land.

3. What are the proposed lot standards?

<table>
<thead>
<tr>
<th>Minimum Lot Area</th>
<th>Parcel 1</th>
<th>Parcel 2</th>
<th>Parcel 3</th>
<th>Parcel 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.00 ac</td>
<td>5.03 ac.</td>
<td>5.01 ac.</td>
<td>15.02 ac.</td>
<td></td>
</tr>
<tr>
<td>Minimum Lot Width</td>
<td>326.16'</td>
<td>788.28'</td>
<td>557.39'</td>
<td>446.47'</td>
</tr>
</tbody>
</table>
4. Was the parcel or lot that is proposed for division created (recorded) within the last 5 years? (If yes, public review of the parcel map will be required. See Planning and Building staff for additional materials that are required to be submitted.)

| Yes | No |

5. Utilities:

| a. Sewer Service | Septic |
| b. Electrical Service/Generator | N/A Energy |
| c. Water Service | Well |

6. Please describe the source of the water facilities necessary to serve the proposed tentative parcel map:

   a. Water System Type:

   | Individual wells |
   | Private water Provider: |
   | Public water Provider: |

   b. Available:

   | Now | 1-3 years | 3-5 years | 5+ years |

   c. Washoe County Capital Improvements Program project?

   | Yes | No |

7. What sewer services are necessary to accommodate the proposed tentative parcel map?

   a. Sewage System Type:

   | Individual septic |
   | Public system Provider: |

   b. Available:

   | Now | 1-3 years | 3-5 years | 5+ years |

   c. Washoe County Capital Improvements Program project?

   | Yes | No |

8. For most uses, the Washoe County Code, Chapter 110, Article 422, Water and Sewer Resource Requirements, requires the dedication of water rights to Washoe County when creating new parcels. Please indicate the type and quantity of water rights you have available should dedication be required:

   | a. Permit # | TBD |
   | b. Certificate # | acre-feet per year |
   | c. Surface Claim # | acre-feet per year |
   | d. Other, # | acre-feet per year |
e. Title of those rights (as filed with the State Engineer in the Division of Water Resources of the Department of Conservation and Natural Resources):

9. Does the property contain wetlands? (If yes, please attach a preliminary delineation map and describe the impact the proposal will have on the wetlands. Impacts to the wetlands may require a permit issued from the U.S. Army Corps of Engineers.)

☐ Yes  ☐ No  If yes, include a separate set of attachments and maps.

10. Does property contain slopes or hillside in excess of 15 percent and/or significant ridgelines? (If yes, and this is the second parcel map dividing this property, Article 424, Hillside Development of the Washoe County Development Code will apply.)

☐ Yes  ☐ No  If yes, include a separate set of attachments and maps.

11. Does property contain geologic hazards such as active faults; hillside or mountainous areas; is it subject to avalanches, landslides, or flash floods; is it near a water body, stream, Significant Hydrologic Resource as defined in Article 418, or riparian area such as the Truckee River, and/or an area of groundwater recharge

☐ Yes  ☐ No  If yes, include a separate set of attachments and maps.

12. Does the tentative parcel map involve common open space as defined in Article 408 of the Washoe County Development Code? (If so, please identify all proposed non-residential uses and all the open space parcels.)

☐ Yes  ☐ No  If yes, include a separate set of attachments and maps.

13. If private roads are proposed, will the community be gated? If so, is a public trail system easement provided through the subdivision?

N/A

Washoe County Planning and Building
TENTATIVE PARCEL MAP SUPPLEMENTAL INFORMATION

WTPM17-0015, 0017, 0018, 0019, 0020

EXHIBIT D
14. Are there any applicable policies of the adopted area plan in which the project is located that require compliance? If so, which policies and how does the project comply?

☐ Yes ☐ No  If yes, include a separate set of attachments and maps.

15. Are there any applicable area plan modifiers in the Development Code in which the project is located that require compliance? If so, which modifiers and how does the project comply?

16. Is the project subject to Article 418, Significant Hydrologic Resources? If yes, please address Special Review Considerations within Section 110.418.30 in a separate attachment.

☐ Yes ☐ No  If yes, include a separate set of attachments and maps.

Grading

Please complete the following additional questions if the project anticipates grading that involves:
(1) Disturbed area exceeding twenty-five thousand (25,000) square feet not covered by streets, buildings and landscaping;
(2) More than one thousand (1,000) cubic yards of earth to be imported and placed as fill in a special flood hazard area;
(3) More than five thousand (5,000) cubic yards of earth to be imported and placed as fill;
(4) More than one thousand (1,000) cubic yards to be excavated, whether or not the earth will be exported from the property; or
(5) If a permanent earthen structure will be established over four and one-half (4.5) feet high. If your project exceeds any of the above criteria, you shall either provide a preliminary grading and roadway design plan for review OR if these criteria are exceeded with the final construction drawings and not disclosed at the Tentative Parcel Map Application, you shall be required to apply for a special use permit for grading and you will be delayed up to three months, if approved.

17. How many cubic yards of material are you proposing to excavate on site?

N/A
18. How many cubic yards of material are you exporting or importing? If exporting of material is anticipated, where will the material be sent? If the disposal site is within unincorporated Washoe County, what measures will be taken for erosion control and revegetation at the site? If none, how are you balancing the work on-site?

N/A

19. Can the disturbed area be seen from off-site? If yes, from which directions, and which properties or roadways? What measures will be taken to mitigate their impacts?

N/A

20. What is the slope (Horizontal/Vertical) of the cut and fill areas proposed to be? What methods will be used to prevent erosion until the revegetation is established?

N/A
21. Are you planning any berms and, if so, how tall is the berm at its highest? How will it be stabilized and/or revegetated?

N/A

22. Are retaining walls going to be required? If so, how high will the walls be, will there be multiple walls with intervening terracing, and what is the wall construction (i.e. rockery, concrete, timber, manufactured block)? How will the visual impacts be mitigated?

N/A

23. Will the grading proposed require removal of any trees? If so, what species, how many, and of what size?

N/A

24. What type of revegetation seed mix are you planning to use and how many pounds per acre do you intend to broadcast? Will you use mulch and, if so, what type?

N/A
25. How are you providing temporary irrigation to the disturbed area?

N/A

26. Have you reviewed the revegetation plan with the Washoe Storey Conservation District? If yes, have you incorporated their suggestions?

N/A

Development Standards Handbook for

PALOMINO RANCH ESTATES

DEVELOPMENT STANDARDS

Introduction
LW Land Company LLC, the owner of the property Palomino Ranch Estates, is one of the parcels within the Warm Springs Specific Plan (WSSP). (Refer to the Land Use Plan showing the project with in the Warm Springs area in Appendix C) The property is 67.60 acres in size. There will be a total of 15 lots, 3 lots will each be 2.50 acres, with remaining 12 lots will be 5+ acres.(Refer to Vicinity Map and Parcel Map)

Objective
To develop a community that capitalizes on the rural and equine character of the Warm Springs area while utilizing resources efficiently and effectively, and giving consideration to design, marketability, and aesthetics.

Agriculture
The Specific Plan protects existing adjacent agricultural uses from potential development conflicts. The CC&Rs and all final maps shall contain a note of restriction that states, "No formal written or verbal complaints can be filed with Washoe County and no lawsuits or other legal proceedings can be brought against any legal agricultural use." Each purchaser will sign a disclosure statement that reiterates the same information.

Residential Design Guidelines
The purpose of this handbook is to describe the principles, policies, standards, and deed restrictions that will control development of Tumbleweed Estates to ensure that it is built and maintained as envisioned in the master planning process for the Warm Springs Specific Plan area.

Lot Concepts Standards
The individual lot concepts are designed to promote the rural character of the Warm Springs Valley. The lots have designated building envelopes, transition zones, and required open space. Where there is a difference between what is illustrated in the Individual Lot Concept Plans and what the text states, the plans shall take precedence over the text. (Refer to the Individual Lot Concept Plans, pages 4-5.)
Building Envelopes
The building setbacks from the street vary to provide a more rural atmosphere to the streetscape. All lots have an established building envelope as defined by the Individual Lot Concept Plans. Building side and rear yard setbacks shall conform to current Washoe County Code requirements.

Buildings may be located anywhere within the designated building envelope. All buildings, structures, or storage of any type will be confined to this area on each lot.

A landscaped/irrigated zone with a minimum depth of 30 feet is required around all dwellings. This landscaped/irrigated zone must utilize fire retardant/resistant landscaping. For additional fire protection, the landscaping within the building envelope should be thinned and maintained so as not to present a hazard to the homeowner or adjacent property owners.

The landscaped/irrigated zone may encroach into the transition zone. All disturbed areas within the building envelope that are not landscaped, will be revegetated with a combination of native shrubs, grass, and wildflower seed mixtures specified in this document. The relationship between building envelopes is designed to provide an open space corridor and to provide necessary space for additional possible division of the property. (Refer to the Individual Lot Concept, Figures 1-A through 3-A pages 4-14.)

Transition Zone
The designated transition zone portion of the lot provides an extension of usable yard area but does not permit structures. The zone provides a transition from the open space to the developed portion of each lot. The only fencing that shall be permitted within the transition zone is Open Ranch Style Fencing, White Rail PVC Fencing, or temporary painted-metal panelized fencing. The landscaping for the transition zone has been considered under and is incorporated into the Water Allocation. Horses and 4-H animals are limited to the transition zone and building envelope unless pasture has been provided by securing the requisite water rights.

Open Space
Please see Plate 9 map, Appendix D, which shows the proposed open space, trails and the golf course in the Warm Springs master plan.

The designated open space portion of each lot will be left undisturbed. All open space areas shall be maintained by the individual property owner. These open space corridors are designated to protect the existing, rural character of the valley. Open space areas may continue existing, established agricultural or ranching uses and are exempt from the limitations imposed by the section on "Animals" later in this Development Standards Handbook.
No use of motorized vehicles, other than vehicles actively engaged in ranching or farming activities, is allowed within the designated open space areas. Open space corridors may be utilized as a non-motorized trail system for equestrian use. The only fencing that shall be permitted within the open space area is Open Ranch Style Fencing, White Rail Synthetic Fencing, or temporary painted-metal Panelized Fencing. Water rights, in accordance with the Optional Water Usage Landscape (see page 26 under Water Allocation), must be purchased for maintenance of pasture for animals enclosed within the open space. The open space in the Warm Springs Specific Plan shall be left in natural vegetation or agricultural use. If disturbed, it shall be reseeded as specified in the section on Revegetation of Open Space/Drainage ways. Plant selection should include only drought tolerant and low water demand material (refer to plant list in Appendix A). These attributes contribute to the decreased average annual residential water demand that is mandated for implementation of the Warm Springs Specific Plan.

View sheds
The proposed building envelopes, as illustrated by Figure 1-A, page 4, Figures 2-A, page 5, and by 3-A, page 11, are staggered and setbacks are increased to afford views and vistas from each building envelope to the surrounding valleys and mountains.

Architecture
All buildings must incorporate an architectural theme or identity that is complementary and compatible with the Warm Springs Specific Plan area and its surroundings. All building plans shall be submitted to the WSSP Architectural Review Committee to ensure this policy is enforced in a way that encourages creative design. No mobile homes are allowed except for construction purposes. To enhance the development and maintain the rural character, buildings and structures shall adhere to the following guidelines. (Refer to Conceptual "Western Ranch" Theme Home, Figures 8a and 8b page 26.)

Exterior Walls and Trims
Building materials must support the "western ranch" theme and be approved by the WSSP Architectural Review Committee. Exterior siding and wall colors must be earth tone and harmonize with the surrounding landscape. No gloss finishes are allowed.

Large unbroken expanses of the same wall material shall be avoided. Trim shall be used on all exterior walls to create highlight and shadow. All reflective material (e.g., chimney stacks, flashings, exhaust vents and pipes, etc.) must be painted to match or blend with surrounding materials.
Figure 1-A
Lot Concept for 2.5 Acre Parcels
Figure 2-A

Individual Lot Concept for 5(+) Acre Parcels

5 Acne Concept
Roofing
Roofing materials shall be earth tone and of a color that harmonizes with the surrounding area and color scheme of the structure. To support an architectural theme consistent with the Warm Springs Specific Plan, building materials for roofs shall be limited to slate, concrete tile, or architectural composition, extra-dimensional 30-year roofing. Flat roofs shall not be allowed. Metal non-reflective and colored roofs may be permitted with Architectural Review Committee approval. All reflective material (e.g., chimneys stacks, flashings, exhaust vents and pipes, etc.) must be painted to match or blend with surrounding materials.

Building Heights
To promote an architectural theme consistent with the Warm Springs Specific Plan, single story homes are encouraged, but all homes shall be limited to two stories and, in accordance with Washoe County Development Code requirements, 35 feet in height. (Refer to Conceptual "Western Ranch" Theme Home, Figures 8a and 8b, page 20.)

Completion of Construction
Construction of any improvement, once commenced, shall be pursued diligently to completion within 18 months of commencement. Improvements not so completed or upon which construction has ceased for ninety (90) consecutive days or which have been partially or totally destroyed and not rebuilt within a reasonable period shall be deemed nuisances. The Homeowners Association may remove any such nuisance or repair or complete the same at the cost of the owner provided the owner has not commenced required work within thirty (30) days from the posting of a notice by the Homeowners Association to commence such work upon the property. Such notice shall state the steps that will be taken to eliminate the nuisance.

Miscellaneous Animals
No more than four (4) Horses or 4-H animals, limited to cattle or sheep, will be allowed. Such animals will only be permitted within the building envelope and transition zone unless additional water rights are acquired for pastureland within the open space. Adequate ground cover to eliminate dust and prevent erosion shall be maintained at all times. As many as four (4) customary household pets are allowed provided they are not kept for commercial purposes and are kept reasonably confined so as not to become a nuisance. Horses, animals, and household pets shall not unreasonably interfere with the comfort, privacy, or safety of other properties. Animals shall be kept in accordance with Washoe County rules and regulations. The homeowners association shall have the authority to determine whether the animals unreasonably interfere with the comfort, privacy or safety of other properties.
Homeowners may provide irrigated pasture as an exercise area or for supplemental feed in which the animals may be kept when not stabled or corralled. Livestock may be considered an optional use for water allocated for landscape use. Pasturelands for animals will require additional water rights to be dedicated to Washoe County. Irrigated pastures require additional water rights at 4 acre-feet/year per acre. 1-1/4 acres of irrigated pasture would require the dedication of a total of 5 acre-feet of water. (Refer to Optional Usage Water Consumption Table A & B, pages 30-31 in the Landscape/Irrigation Section.)

Travel Trailers, Motor Homes, and Boat Storage
Travel trailers, motor homes, other recreational vehicles, or boats and trailers may only be stored within the building envelope. This may occur either within enclosed structures or in the side or rear yards if such yards are completely screened from any street, lot parcel, or open space area and the minimum distance from the screening material maintains the zoning requirements for that yard. Screening shall be consistent with the designated neighborhood privacy fence. (Refer to Figure 5 page 19) The architectural review committee will approve all fencing material.

Utilities
All individual services to each unit for all lot sizes shall be underground from the neighborhood service line. All on site utility lines to outbuildings, detached accessory structures, pump houses, etc., shall be underground.

Mailboxes
Individual property owners will not have US Mail delivered to their property. The Post Office has community mail boxes located at Grass Valley Road and Whiskey Springs Road 1/2 mile from proposed project. Per the post office if needed more community mail boxes will be put in place at that location.

Garbage and Refuse Disposal
There shall be no burning of trash, garbage or other like household refuse, nor shall any property owner accumulate on their lot, junked or unsightly vehicles or litter, refuse or garbage, except in receptacles provided for such purposes.

Concealment of Fuel Storage Tanks and Trash Receptacles
Fuel storage tanks, limited to propane or heating oil and every receptacle for ashes, trash, rubbish or garbage shall be so placed and kept as not to be visible from any street, lot, parcel, or open space except at the times when refuse collections are made.

Antennas
Satellite dishes and home radio antennas shall be screened from view from any adjacent parcels, streets, or open space by locating in side or rear yards behind screen fences at a minimum. Screen fences for this purpose shall maintain the minimum distance from the screening material to that yard property line that meets the zoning requirements.
Nuisances
No noxious or offensive activities, odors, or nuisances shall be permitted on any lot or parcel in the development. No refuse, animal manure, unsightly or abandoned vehicles, debris, noxious materials, discarded personal effects, and construction materials not for immediate use shall be permitted on any lot or portion thereof. It is incumbent upon all property owners to maintain their lots and yards in a neat, orderly, and well-mannered state, whether said lots are vacant or improved. The Homeowners Association shall be responsible for timely enforcement for this provision.

Conservation
All building construction shall utilize methods of energy conservation and the use of low water demand features. Table 1 provides a list of recommended and mandatory energy and water conservation features, which will be incorporated into the building construction.

**TABLE 1**

2 More information may be obtained from the Passive Solar Industries Council, 1090 Vermont Avenue, Suite 1200, Washington D.C. 20005, (202) 371-0357.
Building design and orientation shall be considered in conservation of energy. All buildings will be designed and oriented to benefit from passive solar heating if practicable. Passive solar construction guidelines and energy conservation measures for Northern Nevada are available through the Sierra Pacific Power Company. 

Homes will be designed to utilize the following minimum guidelines of energy conservation in site and architectural design. Simple alterations in building design can enable the use of the sun, wind, landform, and vegetation to provide for supplemental heating, cooling, and insulation for a structure.

Energy Conservation Guidelines
All buildings should be located and oriented to benefit from passive solar heating. The desirable exposure is towards the south, southeast, or southwest. The simple east-west orientation of a rectangular building in northern Nevada has been found to reduce energy consumption by 40%. Site development should use plant materials and landforms to enhance energy conservation. Coniferous trees planted along the windward side of the property can act as a windbreak to deflect winter winds. Shrubs and trees planted against the structure can help to insulate the building. Deciduous trees planted on the south side of the structure will shade the building during the summer and enable sun to penetrate during the winter. The creation of earth berms on the windward side can reduce heat loss due to wind and help to insulate the structure. (Refer to the Minimum Landscape Elements - Figure 3-A page 11) The structure should be designed to keep energy needs for heating and cooling to a minimum. Passive energy conservation measures include the following:

Good insulation.
Location of active living spaces on south side
Location of closets, mud-room, garages, or storage space on north and east sides
Air-lock entries
Concentration of windows on south side
Reduction in number and size of openings on north side
Maximum use of double-glazing
Building overhangs to shield windows from summer sun and to admit winter sun
Use of paved surfaces, rock or masonry on south side to absorb radiation

Active solar energy systems shall be permitted if the solar panels are integrated into the architectural design. If not integrated into the roof or body of the structure, they may not be placed on the roof and they must be screened from public view.
Domestic Water Allocation
The Warm Springs Specific Plan mandates compliance with a per lot water allocation. The designated water allocation for this project is 1.12 acre-feet/year per lot, which is equivalent to 364,896 gallons per year. Domestic water use for the average household is 70,260 gallons per year and landscape water use is at a minimum of 75,208 gallons per year. This leaves 217,428 gallons of water for selection of optional landscape elements. Livestock pasture irrigation may require dedication of additional water rights beyond the 1.12 acre-feet/year. Each lot owner is required to incorporate the following list of minimum required landscape elements into their landscaping. No less than 50% of the required landscaping shall be oriented to the front yard of the lot.

The plant selection includes only drought tolerant and low water demand material. Those aspects of the permitted plants contribute to the decreased average annual residential demand for water that is mandated for implementation of this plan.

The landscaping and irrigation plans must be submitted to the Architectural Control Committee for review and approval. This should be done at time of building permits for structures but may also be done separately.

The minimum landscape elements for each lot shall be:

2,000 square feet of lawn area. Half of which can be in the rear yard.
5 evergreen or deciduous trees within the front yard setback (1 must be a specimen tree, (15 gallon minimum); 5 deciduous or evergreen trees within the building envelope (15 gallon minimum); 12 evergreen shrubs (1 gallon minimum); and 12 deciduous shrubs (1 gallon minimum.)

A minimum of five (5) trees are required within the front yard(s) as defined by Washoe County Code. Plant material per neighborhood, should be kept similar to strengthen neighborhood unity and identity. (Refer to Figure 3-A, page 11)

For a list of suggested shrub/groundcover and trees for homeowner review, see Appendix A.
The required landscape elements, plus the estimated domestic water use, utilize approximately 147,468 gallons per year. 217,428 gallons per year remains for optional use.

<table>
<thead>
<tr>
<th>Lot</th>
<th>Residential Water Usage - Gallons Per Year</th>

</thead>
<tbody>
<tr>
<td></td>
<td>Allocated Use</td>
</tr>
<tr>
<td>+/-</td>
<td>Water</td>
</tr>
<tr>
<td>acre</td>
<td>364,896 gal.</td>
</tr>
</tbody>
</table>

Table 2A provides a list of optional water use estimates for differing types of landscaping. These may be used in any combination on any lot provided the water allocation per lot is not exceeded. The intent is to mandate compliance with the designated water allocation while at the same time providing alternatives to permit variety in individual landscape designs. The plant selection includes only drought tolerant and low water demand material. Those aspects of the permitted plants contribute to the deceased average annual residential demand for water that is mandated for implementation of this plan.
Selection of materials should contain a mixture of plants with fast, medium and slow growth rates and a variety of sizes should be planted to provide a more natural appearance.

All surface water drainage ways within the subdivision shall be graded to resemble a natural drainage swale and incorporated in the overall design. There will be no linear, uniform width drainage ways. Drainage ways should be lined with native wildflowers, grasses, shrubs, and scattered rocks and boulders to slow water velocities.

The amount of water required for one acre of pasture irrigation is 4 acre-feet/year. For 1 1/4 acres of pasture, a total of 5 acre-feet/year is required. As many as 5 acre-feet/year per lot of water rights may be permitted through the State Engineers Office. These water rights will be used to irrigate the pasture and/or livestock on each lot.

<table>

</tr>
</tbody>
</table>

*The Water Allocation for Pastures applies only when additional water rights have been purchased from a private party and transferred to the receiving parcel by the State Engineer.*

As long as no more than 1,800 gallons per day are utilized, additional optional landscaping may be installed. The total utilization does not equal 364,896 gallons due to the fact that much less water is used during the winter months. (Refer to Optional Landscape use Table 2-A)

Additional information on the constraints placed upon the use of water and the standards employed are located within the Warm Springs Specific Plan (WSSP) are included with this document as Appendix B, Excerpted and Abridged Information from the Warm Springs Specific Plan.
Maintenance
All plant material and lawn areas shall be kept in healthy condition. Any dead plant material shall be removed and replaced within 30 days.

References
Appendix B includes an abridged excerpt from the Warm Springs Specific Plan that explains the water budget for the hydrographic basin and provides part of the rationale for stringent landscaping and irrigation requirements. The excerpt has been slightly amended from the text of the actual plan to reflect some updates and actions by the State Engineer.

Revegetation of Open Space/Drainage ways
All open space areas, other than those in agricultural use, shall be left in native material.

Areas designated as Open Space that are currently in agricultural use will allow grading. If noxious weeds are in abundance, the owner may employ a weed management plan developed by an appropriate land reclamation specialist. As development occurs and agricultural practices are abandoned, it will be the property owner’s responsibility to ensure that these areas will be over-seeded with a native grass mixture as described in Table 3, page 14. A gradual transition of plant material is desired.

The soils and precipitation in Warm Springs Valley greatly reduce plant species available for revegetation. The species selected will survive with no supplemental irrigation water being applied after establishment. After two years there will not be any temporary water to the revegetation. The revegetation seed mix should be tied to the agricultural soils and modified as recommended by the seed company.

Indian Ricegrass must be drill seeded at 3-4 inches below the surface. Pubescent Wheatgrass and Globe Mallow should be drill seeded to a depth of one-half inch below the surface. Kochia and Winterfat should be hydro seeded.

Basin Wildrye (elymus cinereus) should be substituted for ricegrass in clay soil areas. Wildrye is not adapted to clay soils and placement should be monitored. The seed should be drill seeded no deeper than 1/2 inch below the surface. Wildrye will require more supplemental irrigation water than ricegrass during the first year, but once established well survive with no additional water.

Seeding should be completed during late fall. This will assure seed is placed ready to germinate when soil moisture and temperature conditions are ideal the following spring. Temporary above ground irrigation is not recommended but may be necessary in order to establish plants if seed is installed during summer months.
To improve establishment chances, seeded area should be hydro mulched at a rate of 1,000 lbs./acre with 180 lbs./acre of tackifier added. Supplemental irrigation water can be applied the first growing season. Irrigation should be light and infrequent. This will promote root development that will be essential once irrigation water is eliminated. Water used for this purpose must be deducted from the given available water. After the system is abandoned, the water may be relocated to other uses.

Irrigation

Irrigation Requirements
Each residential lot will be required to install an irrigation system with automatic controller and back flow prevention device to meet Washoe County/State health codes. The irrigation system shall include an overhead spray system for any turf areas, with uniform head to head coverage and matched sprinkler head precipitation rates. Temporary irrigation systems may be in use for two (2) seasons only. The system shall also include a drain down method for winterization. All trees, shrubs, and ground covers shall be watered with standard controllers allowing each tree, shrub, or ground cover to be watered with individual drip emitters or collectively in groups with micro sprayers.

Landscape and Irrigation Plan Submittal Requirement
Each future homeowner or builder will be required to submit landscape, grading, and irrigation plans to Homeowners Association and the Architectural Review Committee for approval as a part of the building permit application process. The plans shall be prepared by a qualified landscape industry professional, landscape contractor, or a landscape architect.
The landscape plan shall include a site base map prepared to a 1"=20' minimum scale with the house and driveway footprint, property lines, utility locations, etc. This base map must clearly show proposed landscape areas with square footage area calculations to meet the water usage requirement specified in this document. In addition to the above, the landscape plan must include:

A plant species list keyed to plant locations on the plan. The plant list must include plant sizes and quantities;
The amount of water calculated for established landscape;
An indication of surface material(s) in non-landscaped areas; and
Agricultural soils test results and proposed soils improvement/amendment methods.

The irrigation plan shall be prepared to scale on the same base map as the landscape plan. The irrigation plan must include the following:

Point of connection to water source;
Location, type of installation detail of back flow prevention device;
Remote control valve location, manufacturer's name, product number, size and gallons per minute for each lateral zone;
Irrigation main and lateral line type, size, and depth of bury;
Sprinkler head locations, manufacturer's name, product number, nozzle size and number, radius gallons per minute and pounds per square inch (psf) operation rate;
Drip system valve locations and sizes, lateral line type and location, emitter type, product number, and amount per plan and;
Controller's manufacturer's name, product number, and installation location.

The grading plan shall be prepared to scale on the same base map as the landscape and irrigation plan. The grading plan must include the following:

Limits of grading and construction:
Dust control plan/permit measures required by Washoe County Code.
Existing and proposed contours, including berming for energy conservation and drainage away from structures;
Paving or surface treatment for walkways and driveways;
Location and type of temporary fencing to protect open space and native vegetation from construction traffic; and
Revegetation of disturbed areas, seeding quantity, and need for temporary irrigation. The revegetation seed mix should be tied to the agricultural soils test and modified as recommended by the seed company.
Maintenance
All irrigation systems shall be maintained in good operating condition. The irrigation system shall be extended to any new plant material at the time of installation.

Within twelve (12) months of completion of the main dwelling unit, each lot or parcel shall be completely landscaped with automatic irrigation systems in place and operating. All landscaping shall be maintained to harmonize with and sustain the attractiveness of the development.

Fencing
General Considerations:
All property from the building envelope to the street shall be kept free and open. Fencing will be consistent within the neighborhood for this development. Wood fencing will be treated with a light or medium brown stain that will increase wood durability. Stains should be consistent in tone on the individual properties but no one property will be required to match exactly with neighbors. Owners are required to keep fencing in good working order and have a well-maintained appearance. The type of fence will be controlled by the Architectural Review Committee.

Solid Wood or Synthetic Material (with the appearance of wood) Privacy Fence:
Privacy fence with a height of up to 6 feet, may be constructed within the building envelope as long as it is limited to the rear of the house. Such a fence may be used in the side yard for screening such features as RV storage area, satellite dishes, trash receptacles, fuel storage tanks, dog runs, or a patio. Otherwise, side yards will not be enclosed with a privacy fence. Fences should tie into a structure or other terminus point. (Refer to Privacy Fencing, page 19 under Figure 5.)

Open Ranch Style Fencing:
May be used in the side and rear yards within the building envelope, transition zone, or open space, may be used to define space and circulation areas or accent gardens and will be limited to no more than four feet in height. (Refer to Split Rail Fencing, page 19 under Figure 7) The fencing should be of a consistent height and end at some transition point such as the house. The fencing may be stained but not painted.

White Rail Synthetic Material Fencing:
This material may be used to enclose pasturelands, stable runs, corrals, and the perimeter of the property other than in the front yard area between the residence and the street. (Refer to White Rail Fencing, page 19 under Figure 6.) White rail PVC fencing may also be constructed within the designated building envelope in substitute for the Open Ranch Style Fencing. Fencing for pasture beyond the limits of the building envelope will not be permitted unless pasture is established and grasses are irrigated in accordance with Table 2A, (page 12). Under this scenario, pasture fencing may be the white PVC rail and the irrigated pasture area should adjoin the building envelope on at least two sides.
Chainlink Fence, Woven Wire, or other wire fence:
This fence material may be used for backyard pet enclosures, vegetable gardens, or
swimming pools. (Specially fences, in accordance with Washoe County Code.) The wire
fencing, posts, and rails will be vinyl or plastic coated in a color to harmonize with building
colors, or be a dark brown or black. No barbed wire fencing will be allowed.

Exterior Lighting.
The functional objectives in providing exterior area lighting are to illuminate areas
necessary for safe and comfortable use...In certain situations, area lighting can add to the
aesthetic appeal of a site by highlighting architectural features of a building or illuminating
pathways and landscape plantings. In these instances, only the special features of a building
or landscape should be illuminated: it should be noted that the standards and guidelines
contained in this section address area lighting on individual properties, and not overhead
street lighting along public and private rights-of-way.

Standards.
Exterior lights shall not blink, flash, or change intensity. String lights, building or rooftop
tube lighting, reflective or luminescent wall surfaces are prohibited. Exterior lighting shall
not be attached to trees except for the Christmas season. Driveway, walkway, and building
lights shall be directed downward. Fixture mounting height shall be as low as possible and
appropriate to the purpose illumination for aesthetic or dramatic purposes of any building
or surrounding landscape utilizing exterior light fixtures projected above the horizontal is
prohibited. Seasonal lighting displays and lighting for special events which conflict with
other provisions of this section may be permitted on a temporary basis.

Guidelines.
Lighting Design
Exterior lighting should be designed as an integral part of the architecture and landscape
and should be located in a manner that minimizes the impact of lighting upon adjacent
structures and properties.

Lighting Levels
Avoid consistent overall lighting and overly bright lighting. The location of lighting should
respond to the anticipated use and should not exceed the amount of light actually required
by users. Lighting for pedestrian movement should illuminate entrances, changes in grade,
path intersections, and other areas along paths, which if left unlit, would cause the user to
feel insecure. Lighting suppliers and manufacturers have lighting design handbooks that
can be consulted to determine fixture types, illumination needs, and light standard heights.

Fixture Design
Exterior lighting fixtures should be simple in design and should be well integrated with other
architectural site features.

Structural Lighting
Night lighting of building exteriors should be done in a selective fashion: highlight special recognizable features; keynote repeated features; or use the play of light and shadow to articulate the facade. The purpose of illuminating the building should be to add visual interest and support building identification. Harsh overall lighting of a facade tends to flatten features and diminish visual interest.

**Lighting Height**
As a rule, the light source should be kept as low to the ground as possible while ensuring safe and functional levels of illumination. Area lighting should be directed downward with no spay of lighting directed off-site. The height of light fixtures of standards must meet Washoe County standards. Lighting should be directed downward in order to avoid sky lighting. Any light source over 10 feet height must incorporate a cutoff shield to prevent the light source from being directly visible from areas off-site. The height of luminaries should be in scale with the setting.

**Permitted Land Uses.**
- High Density Rural
- Minimum Lot size 2.5 acres.

**Construction of Extension of Grass Valley Road.**
Grass Valley Road will be constructed to Palomino Valley General Improvement District standards, for their consideration for acceptance and maintenance.

Legal Description

All that real property situated in the County of Washoe, State of Nevada, described as follows:

Parcel 16-2-1-1, as shown on Record of Survey map filed in the office of Washoe County Recorder, Washoe County, Nevada on October 29, 1975, under file No. 383409, 383410 and 383412 and Division of land map filed October 29, 1975, under file No. 383418, Palomino Valley Unit 1.

A portion of the North West 1/4 Sec 16 township 22 North, Range 21 East M.D.E. & M; in the county of Washoe, state of Nevada, being more particularly described as follows:

Commencing at the NW corner of Sec 16; then South 89 Degree 28' 24" East, 46.12' thence S 89 Degree 28' 26E 2,603.98 feet thence N 1 Degree 01' 36E 1,321.95 feet, thence S 89 Degree 29" 20' E 2,025.00 feet thence North 416.50 N 31 Degree 21' 36" West 1,066.96 feet to true point of beginning.

APPENDIX B

EXCERPTED AND ABRIDGED INFORMATION FROM THE WARM SPRINGS SPECIFIC PLAN

WATER BUDGET

INTRODUCTION

The Specific Plan Area (SPA) is within the Warm Springs Valley Hydrologic Basin No. 84. The average annual precipitation in the basin is estimated to be 9.76 inches. There are no perennial streams in the SPA, but intermittent external drainage to Pyramid Lake does exist. The Nevada State Engineer has designated the Warm Springs Valley Basin as an area requiring additional water resource supervision. Various reconnaissance level studies have been conducted to estimate the potential amount of groundwater resources in the basin.

In general, an estimate of the available water resource and the current consumption patterns will be used to identify the total number of residential dwelling units and commercial or quasi-public uses that can be served from the available supply. Land areas have been identified based on the maximum number of residential dwelling units and desired development densities achievable based on the water available to the SPA and the location of existing water rights. The total number of acres assigned to each land use category, with appropriate allowance factors, will provide an adequate base to develop the projected number of residential units at buildout.

It is important to recognize that new techniques are being developed to improve the prediction of safe groundwater yields. The estimates used in this plan will probably be superseded with new information resulting in the need for refined land use allocations. This water budget, therefore, is a useful tool for generating a plan for the Warm Springs SPA, but it should not be considered as the final water budget for the basin.

Specific Plan 3,000 ACRE FEET PERENNIAL YIELD

The position of the State Engineer is that only the Water Resources Reconnaissance Series Report No. 43 can be used to establish the perennial yield for the basin. This report specifies 3,000 acre-feet as the perennial yield. The perennial yield is the amount of water that is naturally replenished when a long-term average is considered.

The following table, Table A-4, establishes the water allocation for the SPA when 3,000 acre-feet is used as the planning perennial yield. The table summarizes the Warm Springs Area Plan Water Budget, and details the allocation remaining for the SPA.

### Residential

According to the current Warm Springs Area Plan, the subdivision of parcels creating new residential lots on individual domestic wells will require the dedication of 2.5 acre-feet/year (AFY) of water rights to Washoe County. The residential section of the budget is based on allocating water available per residential lot on an individual well at 1.12 acre-feet/year. This number is based on a mandatory water conservation program with low water demand vegetation landscaping and low demand water fixtures in the "Warm Springs Area Plan" of the Washoe County Comprehensive Plan dated December 3, 1991, page 5B, paragraph 2 and Action Program WS.4.6.1.

The water use calculation is based on the following water consumption elements:

1. **Domestic Use**
   a. The average per capita domestic water use (not including irrigation), is 77 gallons/person/day. This is based on a non-conserving household. A conserving household using water conservation fixtures will reduce the domestic per capita water use to 60 gpd. Using current technology, ultra low flow fixtures could reduce domestic per capita water consumption to 52 gpd. (Source: "Residential Water Conservation Project, Summary Report" by Brown and Caldwell, June 1984.)

   b. The average household size is projected to be 2.5 persons.

   \[77 \text{ gallons/day} \times 365 \text{ days} \times 2.5 \text{ people} = 79,262.5 \text{ gallons/house/year} = 0.216 \text{ AF/house/year}\]

   c. A monitoring system will be required to determine actual use and mandate design and allocation changes based on actual use. The monitoring system should include tensiometers on trees/shrubs at sample facility.

2. **Landscape Irrigation Use**
   a. **Lawn Watering**

   The watering requirements for the Warm Springs area are determined as follows:
Water 0.5" twice per week for 16 weeks; water 0.75" twice per week for 12 weeks during the summer months. For a 100 square foot lawn area, we used the following calculation:

\[ (-5 \times 2 \times 16 \times 0.62^* = 9.92 \times 100) = 992 \text{ gallons} \]
\[ (0.75 \times 2 \times 16 \times 0.62^* = 11.16 \times 100) = 1,116 \text{ gallons} \]
\[ (*\frac{1}{3}\text{ of water applied to one square foot surface area} = 0.62 \text{ gallons}) \]

b. Trees and Shrubs

The shrub and tree water consumption budget figures were determined using the following method:

The bermed saucer watering area of a mature tree was determined to be 4' diameter (3' for mature shrubs). The area of a 4' diameter saucer equals 12.5 square feet (7 sq. ft. for shrubs). The square footage area was multiplied by two feet to represent the preferred depth of watering to promote deep rooting and resistance to adverse conditions. This number represents cubic feet volume of soil to be watered which is multiplied by the water holding capacity of the soil (1.33 gallons per cubic foot of clay loam soil, Source: "Effectively Irrigating Landscape Trees" by Janet Hartin). The resulting number of gallons represents the amount of water to be applied per watering:

mature tree (12.5 s.f. x 2 x 1.33 gallons = 33.25 gallons) mature shrub (7.0 s.f. x 2 x 1.33 gallons = 18.60 gallons)

The watering frequency was determined as follows:

For an evergreen tree or shrubs, water twice per week for the 12 week summer season, once per week for the remaining 16 weeks of the growth season and twice per month for the additional five months of the year.

\[ \text{evergreen trees and shrubs (2 x 12) + (1 x 16) + (2 x 5) = 50 waterings} \]

For a deciduous tree or shrubs water twice per week for the 12 week hot summer season and once per week for the remaining 16 weeks of the growth season. No additional water is required for the winter months.

\[ \text{deciduous trees and shrubs (2 x 12) + (1 x 16) = 40 waterings} \]

The per tree water consumption budget figures are then derived by multiplying the amount of water per application times the watering frequency =

evergreen tree 33.25 gallons x 50 waterings = 1,662 gallons
evergreen shrub 18.60 gallons x 50 waterings = 930 gallons
deciduous tree 33.25 gallons x 40 waterings = 1,330 gallons
deciduous shrub 18.60 gallons x 40 waterings = 744 gallons

We have averaged the yearly water consumption of mature deciduous and evergreen trees to determine the budget amount per tree in our figures (1,496 gallons). The average yearly water consumption of mature deciduous and evergreen shrubs equals 837 gallons.
o. The intent of the plan is to mandate compliance the per lot water allocation while at the same time providing alternatives to permit variety in individual landscape designs. The following chart provides a list of optional water use estimates that can be used in any combination on any lot provided the water allocation per lot is not exceeded.

3. Animal Use

Livestock uses an average of 20 gallons of water per day:

\[20 \times 365 = 7,300 \text{ gallons/animal/year}\]

Per Policy WS.3.1.A, uses such as pastures, require dedication of water rights in addition to domestic rights.

4. Residential Water Use

Residential water usage figures by average lot size are fisted utilizing the following water demand figures.

Lawn: The water requirement for lawn areas is as follows:

- Water 0.5" twice per week for 16 weeks and water 0.75" twice per week for 12 weeks during summer months

\[.50 \times 2 \times 16 \times .62^* = 9.92 \times \text{sq. ft.}] = \text{gallons per 16 weeks}\]
\[.75 \times 2 \times 12 \times .62^* = 11.16 \times \text{sq. ft.}] = \text{gallons per 12 weeks}\]

\text{gallons total per season}\]
\[(* 1^" \text{of water applied to one square foot surface area = .62 gallons})\]

Tree: Number trees X 1,496 = gallons per season

\[1,496 = \text{an average of deciduous and evergreen trees from Table A-8}^*\]

Domestic Use: Average household gallons per day based on 2.5 persons per household.

\[2 \text{ acre and larger - 1.42 acre feet/year} = 364,930 \text{ gallons}\]
The recommended limit of lawn area for the 2 – 2 ½ acre or larger lots is 4,000 square feet.

\[
\begin{align*}
9.92 \times 4,000 & = 39,680 \text{ gallons} \\
11.46 \times 4,000 & = 44,640 \text{ gallons} \\
84,320 \text{ gallons}
\end{align*}
\]

The plan requires five trees per lot:

\[
5 \times 1,496 = 7,480 \text{ gallons}
\]

Domestic use =

\[
\begin{align*}
364,930 \text{ gallons} \\
-162,060 \text{ gallons} \\
202,870 \text{ gallons}
\end{align*}
\]

Optional uses: This leaves 202,870 gallons for selection of optional landscape elements (see Table A for landscaping usage figures).

5. Irrigation Requirements

Each residential lot will be required to install an irrigation system with automatic controller and backflow prevention device to meet Washoe County/State health codes. The irrigation system shall include an overhead spray system for any turf areas, with uniform head to head coverage and matched sprinkler head precipitation rates. The system shall also include a drain down method for winterization.

All trees, shrubs, and groundcovers shall be watered a drip system with a separate control clock or a dual program controller. Each tree, shrub, or groundcover shall be watered with individual drip emitters or collectively in groups with micro sprayers.

DEVELOPMENT AGREEMENT
Washoe County and LW Land Company, LLC

This Development Agreement (the "Agreement") is effective on the date of recordation by Washoe County of this Agreement following its adoption by ordinance by the Washoe County Board of Commissioners ("Effective Date"), and is entered into by and between Washoe County, Nevada (hereinafter "County") and LW Land Company, LLC its agents and successors including developers and eventual subdivided-parcel-owners (hereinafter "Owner") (collectively hereinafter the "Parties").

WITNESSETH:

WHEREAS, the County is authorized, pursuant to Nevada Revised Statutes ("NRS") 5278.3261, et seq., and Washoe County Development Code ("Code") 110.314.00, et seq., to enter into binding development agreements with persons having legal or equitable interests in real property for the purpose of establishing and strengthening long range plans for property development and providing for developer funding of certain public facilities to serve new development;

WHEREAS, Owner represents that he has complete and sole fee title ownership of the subject real property, the legal description of which is set forth on Exhibit "A" attached hereto and shown in the next identified exhibit (hereinafter the "Property");

WHEREAS, Owner has submitted, and County has tentatively approved the initial preliminary parcel maps for development of the Property ("Project"), copies of which are attached hereto as Exhibit "B" ("Maps"), and the expiration dates of which were recently extended by the parties until October 10, 2017 pursuant to an "interim development agreement" and ordinance approved by the County;

WHEREAS, the Parties desire to enter into this Agreement in accordance with NRS and Code, as applicable, to promote the health, safety and general welfare of the County's inhabitants, to help provide some public services, uses and infrastructure, for which Owner voluntarily offers to pay, to secure to Owner certain land development safeguards and rights, and to achieve the goals and purposes for which development agreement law was enacted;

WHEREAS, it is further the Parties' desire that this Agreement satisfy certain of the infrastructure and development provisions of the County's specific plan for part of the general
WHEREAS, the County is underway with a review and update of the formal area plan for the general Warm Springs area ("Area Plan"), which may produce significant changes to the WSSP this year, including possible updated fees and schedule, different development vision, and altered infrastructure needs and financing structure.

NOW, THEREFORE, the Parties agree as follows:

1. **Incorporation of Recitals.** The foregoing recitals are incorporated herein by this reference and shall aid in the interpretation of this Agreement.

2. **Permitted Uses, Density, Height, and Size of Structures.** Pursuant to NRS 527.80201 and Code 5110.814.20, this Agreement must set forth the maximum height and size of structures to be constructed on the property as well as the density of uses and the permitted uses of the land. The Parties agree that the Property shall be divided and the Project constructed strictly for single residential purposes in accordance with the Maps, the WSSP, the Code, and the NRS all in effect on the date of the County's tentative parcel map approval of the Maps and as reflected in this Agreement, including its attached exhibits. Owner shall subdivide to a density only as shown on the Maps. However, Owner and his successors reserve the option to further subdivide the Property and its parcels in the future, pursuant to then existing law, if and when the WSSP, Area Plan, Code and the Washoe County Health Department permit it. This Paragraph 2 is, however, made subject to the provisions of Paragraph 6 below.

3. **Development And Infrastructure.**

   3.1 **Development Standards Handbook.** The Parties have jointly drafted, in accordance with the Code and WSSP, the Project's Development Standards Handbook ("Handbook"), which is attached hereto as Exhibit "C" and incorporated herein by this reference. Construction and use of the Project shall be in accordance with the Handbook.

   3.2 **WSSP/PHOA & CC&Rs.** As set forth in the WSSP, the Property shall be made subject to a master homeowners' association and master declaration of covenants, conditions and restrictions ("CC&Rs") governing the entire WSSP area for the purposes identified in the WSSP, until the related WSSP requirements are modified or repealed, if at all, through the Area Plan update process. The association and the CC&Rs shall be completed to the satisfaction of the County Community Development Department and the Washoe County District Attorney.

   3.3 **Disclosure Statement.** The Parties have jointly drafted, in accordance with the Code and WSSP, a Disclosure Statement ("Disclosure"), which is attached hereto as Exhibit "D" and incorporated herein by this reference. The purpose of the Disclosure is to provide all buyers specific information about certain aspects of the WSSP and this Agreement, and how those may affect their long-term ownership. The Disclosure is not intended to be comprehensive in all aspects of the acquisition of certain parcels. It is meant to only provide basic information about certain aspects of the WSSP and this Agreement that are required to be disclosed. A signed and notarized copy of the Disclosure must be provided to all future property owners and must accompany all building permit applications submitted to the County. The purpose of this
requirement is to ensure that all future owners of property within the Warm Springs community are aware of the requirements of the WSSP and this Agreement.

3.4 Water and Septic. Owner does not intend at this time to subdivide at any greater density than as shown on the Maps, which permits Owner to install septic and well facilities on each new parcel instead of connecting to community water and sewer facilities likely to be built by another area property owner known as the Warm Springs Ranch. Owner waives connection to community water and sewer systems at this time. Owner shall install the referenced septic and well facilities pursuant to applicable law and regulations existing at the time of issuance of each of the related well and septic permits. Owner and his successors may in the future connect to a community water or sewer system, pursuant to then existing law, if and when the WSSP, Area Plan, Code and the Washoe County Health Department permit it.

4. Financing.

4.1 Infrastructure Related Fees.

4.1.1 Fee Commitments. Owner offers to and agrees hereby to pay all fees described in this Agreement and its exhibits. The duty to pay said fees and any increased or decreased fees negotiated as mentioned below, shall run with the Property and be binding upon and inure to the benefit of the successors and assigns of the Parties. These fees shall be paid to County on or before the time of the recording of each final parcel map.

4.1.2 Fee Area. The area encompassed within the WSSP is hereby designated as the "Fee Area" for the imposition of fees and the collection of funds under the provisions of this Agreement.

4.1.3 Special Fee Revenue Fund: Except as otherwise specifically provided in this Agreement, all fees collected pursuant to this Agreement shall be placed in a special, segregated, interest-bearing revenue fund (a "Special Fund") for each fee category and shall be used solely for the purpose of constructing the applicable capital improvements or providing refunds or reimbursements (as defined in Paragraph 4.6 herein) in accordance with this Agreement. The County, through its Director of Community Development and/or its Finance Director, shall maintain detailed records to identify the development(s) from which fees were collected, for which purpose and how said fees were spent.

4.1.4 Fee Changes. So long as the Project does not change from the use described in the Maps and conditions thereto, and except as otherwise provided in this Agreement, the fees set forth in this Agreement shall not increase without the written consent of the Parties except that the fees shall be adjusted to reflect changes in actual construction costs, but only as such costs are adjusted during the regular review of the Capital Improvements Program (CIP) for the WSSP. The CIP is attached as Exhibit "E," entitled Financing Concept Plan for the WSSP, and is incorporated herein by this reference. Notwithstanding this, Owner's fee obligations as defined in this Agreement may be altered or repealed, but not increased, subject however to Paragraph 5 below, by the update to the Area Plan and WSSP, possibly to include refunds of certain fees paid. Owner understands and agrees that no guarantee is expressed herein by the County and that this Agreement does not affect the update process nor ultimate amended Area Plan and WSSP in any respect whatsoever.
4.2  Fees — Roads, Drainage, Planning, Water, Parks, Open Space, and Utilities. At the recording of each final map for any phase of the Project, the fees set forth in this Agreement shall be paid by Owner to County as follows:

4.2.1  Roadway Fees. Owner agrees to pay to the County all roadway fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Roadway Fees"). These fees shall be set aside in a Special Fund specifically for the construction of the first phase of the Spine Road or other collector roads as defined in the phasing plan for roadways set forth in Exhibit "E". County shall disburse these fees for the purpose of design and construction of the roadways or to reimburse Owner if Owner constructs collector roads to County specifications. These fees are separate and apart from the Regional Road Impact Fee (RRIF) (Paragraph 4.3.1), which is collected at building permit. The Roadway Fees are also separate and apart from the property owners’ current fees collected by PVGD for the maintenance of public roadway easements.

4.2.2  Storm Drainage Fees. Owner agrees to pay to the County all storm drainage fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Storm Drainage Fees"). These fees shall be set aside in a Special Fund specifically for the construction of Storm Drainage Improvements as defined in the plan for storm drainage set forth in Exhibit "F". These fees shall be reimbursed to Owner only if Owner constructs said drainage improvements to County specifications.

4.2.3  Planning Fees. Only those planning fees paid pursuant to this Agreement (hereafter "Planning Fees") shall be placed in a Special Fund specifically for the repayment of certain planning costs incurred by particular property owners as noted in the CIP (Page G-xxii of Appendix G of the WSSP). Owner shall be credited Planning Fees as noted in the Fee Schedule attached as Exhibit "F." Pursuant to Paragraph 4.6.2 below, all Planning Fees accumulated in the Special Fund shall be used to reimburse said particular property owners who paid the cost of preparing the WSSP. Owner would otherwise pay Planning Fees as shown in the Fee Schedule (Exhibit "F").

4.2.4  Community Water System Fees. Owner agrees to pay to the County all community water system fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Water System Fees"). These fees shall be placed in a Special Fund specifically for the purchase of land for, as well as the design and construction of, the Community Water System as defined in the plan set forth in Exhibit "E". All Water System Fees accumulated in the account shall be applied by the County or other government entity to design and construct this water system or used to reimburse Owner if Owner constructs said system to County specifications.

4.2.5  Parks and Open Space Fees. Owner agrees to pay to the County all parks and open space fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Parks Fees"). These fees shall be placed in a Special Fund specifically for the purchase of land for, as well as the design and construction of, certain parks and open space as defined in the plan set forth Exhibit "E". All Park Fees accumulated in the account shall be applied by the County or other government entity to design and construct the parks and open space or used to reimburse Owner if Owner constructs said parks and open space to County specifications. The Park Fees are separate and apart from the Residential Construction Tax (Paragraph 4.3.2 below), which is collected at building permit.
4.2.6 Public Facilities Fees—Police and Fire. Owner agrees to pay to the County all public facilities' fees shown in the Fee Schedule for the Project attached hereto as Exhibit "E" (hereafter "Facilities Fees"). These fees shall be placed in a Special Fund specifically for the purchase of land for, as well as the design and construction of, the police and fire public facilities otherwise known in and defined in Exhibit "E" as "Community Facilities". All Facilities Fees accumulated in the account shall be applied by the County or other government entity to design and construct these public facilities or used to reimburse Owner if Owner constructs these facilities to County specifications.

4.3 Existing RTC and County Fees.

4.3.1 Existing RTC Regional Road Impact Fee (RRIF). Owner understands and agrees that in addition to the Roadway Fees discussed in Paragraph 4.2.1 above, the Project is subject to the current RRIF, which shall be paid by Owner to County pursuant to applicable RRIF law at issuance of building permits.

4.3.2 Existing Park Residential Construction (RCT). Owner understands and agrees that in addition to the Park Fees discussed in Paragraph 4.2.5 above, the Project is subject to the current RCT for parks to be paid by Owner to County pursuant to applicable RCT law at issuance of building permits or as otherwise may be lawfully agreed to in by Washoe County Department of Regional Parks and Open Space. If Owner constructs the parks and open space to County specifications, then Owner shall be credited or refunded in accordance with such procedures for credit or refund.

4.4 Credits. The County's Director of Community Development shall make determinations of credit in accordance with this Agreement. Credits apply only to the respective Special Fund set forth in Paragraph 4.2 above and shall not be transferable to other Special Funds. Credits may only be used upon substantiation of the completion of improvements, or in the case of planning fees, evidence of payment of fees.

4.4.1 Credits for Roadway Fees, Drainage Fees, Water System Fees, Park Fees, and Facilities Fees. Credit against fees paid to Special Funds shall be based on the actual cost of the provision of those facilities or the independently appraised value of the dedication, whichever is applicable. The actual cost or value shall be credited against the total amount due based upon the Per Fee Unit that is established by this Agreement and identified in Exhibit F hereto.

4.4.2 Credits for Planning Fees. Only those particular property owners who paid the cost of preparing the initial WSSP, or their successors, shall be eligible for Planning Fees credit. Owner is eligible for Planning Fees credit as one of the original payees and the total amount of credits for the Maps, assuming all parcels are recorded, is estimated at the amount set forth in Exhibit F hereto.

4.5 Credit Waiver. Owner must apply any Credits at the time of the filing of a final parcel map. Owner's failure to do so for a particular final map shall be deemed a waiver of those Credits to that particular final map. Said Credits may be used on future parcel maps.

4.6 Refund/Reimbursements of Fees.
4.6.1 Refugees. Except as otherwise provided in this Agreement, upon completion of that category's capital improvements as identified in the CIP for the entire WSSP area, the County shall refund to current WSSP property owners all remaining fees in that category's fund (the "Refund"), less an administrative fee equal to the administrative costs incurred by the County. Refunds may be awarded only if the Director finds from all circumstances and evidence that: (i) the actual cost of all improvements made in that category of CIP improvement is less than all respective fees paid into that category; (ii) excess funds exist in the Special Fund; and (iii) no additional funds are required to complete the respective improvements required within the WSSP.

4.6.2 Planning Fees Reimbursement. In addition to the Credits provided for in this Agreement, the Owner may choose to be reimbursed for the actual Planning Fees paid: through a reimbursement (the "Reimbursement"). However, in no event shall the combination of Credits and Reimbursements total more than the actual Planning Fees paid. Any Reimbursement made shall reduce the amount of Credit available. Conversely, any Credit obtained shall likewise reduce the amount of Reimbursement available. A request for Reimbursement shall be submitted by Owner to the County's Community Development Department within 30 days of the postmark date of notice mailed to Owners of the determination of actual costs made by the County's Director of Community Development. Should the Planning Fees Special Fund not have sufficient funds to allow for full Reimbursement, then the County shall repay, on a quarterly basis, from whatever funds have been collected during the preceding quarter into said fund until the full amount of Reimbursement is paid.

4.6.3 Prorata Refunds/Reimbursements. If more than one valid application for a Refund or Reimbursement is made and approved, the County shall allocate the funds available for reimbursement between the applicants based on the ratio of the actual costs incurred in each respective fee category or the ratio of the planning fees paid by the applicants.

4.6.4 Director's Decision and Appeals. Administrative decisions regarding Refunds or Reimbursements may be appealed by the affected Owner to the Washoe County Planning Commission by filing with the County's Department of Community Development a statement of the grounds of the appeal within ten (10) days of the postmark date of notice mailed to Owner of the administrative decision. The County's Director of Community Development will schedule such appeal on the Planning Commission agenda for the next regularly scheduled meeting occurring at least twenty-one (21) calendar days after receipt of the appeal statement. If the Planning Commission reverses the decision of the Director of Community Development, it shall direct the Director to recalculate the fee in accordance with its findings. In no case shall the Planning Commission have the authority to negotiate the amount of the fee. If the Planning Commission affirms the decision of the Director of Community Development, the affected Owner may appeal to the County Board of Commissioners within ten (10) calendar days of the Planning Commission hearing by filing a notice of appeal with the County's Department of Community Development. The County shall consider and render a decision on the appeal in a prompt manner.

4.7 Dedication and Maintenance of Facilities. Owner may be required to offer certain facilities, to include roadways, for dedication to the County at the time of the filing of a final map. Dedication of facilities or roadways to PVGID may also be required.
5. **SADs and GIDs.** Owner offers to and hereby agrees to waive protest to participation in any special assessment or general improvement district proceedings and agrees to cooperate fully therewith.

6. **Reliance, Uncertainties and Subsequent Actions.**

6.1 **Reliance by the Parties.** The Parties understand and acknowledge that the other relies upon the assurances, arrangements, and promises set forth in this Agreement and its exhibits, all of which permit the construction and completion of the Project in accordance with the terms of and the uses, densities, heights, sizes and other similar matters defined in this Agreement and its exhibits.

6.2 **Uncertainties.** The Parties understand and acknowledge that circumstances beyond the control of either party could defeat their mutual intent that the Project be constructed in the manner contemplated by this Agreement. Among such circumstances is water availability or other limited natural resources, waste disposal limitations, federal regulation of air and water quality, and the Area Plan update and possible amended WSSP. The parties recognize that unforeseeable circumstances could affect each other's ability to perform obligations hereunder.

6.3 **Subsequent Actions.** Owner acknowledges and agrees this Agreement does not relieve the from compliance with existing, changed, modified or amended rules, regulations, laws, ordinances, resolutions, fees or codes of other governmental agencies. Such rules, regulations, laws, ordinances, resolutions, fees or codes of governmental entities must be complied with by the Owner and are not locked in nor a part of this Agreement. Owner further acknowledges and agrees this Agreement does not prevent the County in a subsequent action applicable to the Property from adopting different law, provisions or conditions that do not conflict with the terms in and the law governing this Agreement, except that any subsequent action by the County shall not prevent the development of the Property pursuant to this Agreement. It is not the intent of the Parties nor shall this Paragraph be construed as excusing the County of any obligation hereunder or depriving Owner of any right under this Agreement, which can be performed and without impairment of the County's emergency powers and obligation to obey and enforce state and federal law (Code 110.814.05(c) and (d)).

6.3.1 **Exceptions.**

6.3.1.1 **Amended WSSP.** Notwithstanding this Paragraph 6 and any other contradictory term in this Agreement, Owner understands and agrees that certain possible changes to the WSSP as adopted through the current update process to the Warm Springs Area Plan shall be binding upon Owner, successors and the Property no matter whether the final map or a building permit has been approved or issued, and Owner agrees to immediately cooperate and comply with such changes as may be contained within the updated Area Plan and amended WSSP. This Paragraph 6.3.1.1 is limited to those certain possible changes to the WSSP that concern homeowners' associations, co&rs, water and sewer, non-paved-road maintenance and related costs and fees. This Paragraph 6.3.1.1 shall also constitute a covenant running with the land of the Property.

6.3.1.2 **Public Health & Safety Law.** Notwithstanding this Paragraph 6 and any other contradictory term in this Agreement, Owner understands and agrees that at the time of submission to the County for any map or permit (including without limitation final maps and building permits) related to the Project the then existing laws (whether local, state or federal)
affecting public health and safety (as typically used for example in the building, health and fire codes' sectors) shall apply. This Paragraph 6.3.1.2 shall constitute a covenant running with the land of the Property.

7. **Conflicting Laws.**

7.1 **Conflicting State or Federal Rules.** In the event that any conflicting state or federal laws or regulations enacted after the date of this Agreement prevent or preclude compliance with one or more provisions of this Agreement or require changes in plans, maps or permits approved by the County, this Agreement shall remain in full force and effect as to those provisions not affected, and the conflicting laws or regulations shall not be applied retroactively.

7.1.1 **Notice and Copies.** Either party, upon learning of any such matter, will provide the other party with written notice thereof and provide a copy of any such law, regulation or policy or an account of any such action or inaction together with a statement of how any such matter conflicts with the provisions of this Agreement; and

7.1.2: **Modification Conferences.** The parties shall, within thirty (30) calendar days of the notice referred to in the preceding subsection, meet and confer in good faith and attempt to modify this Agreement to bring it into compliance with any such federal or state law or regulation, or accommodate any such action or inaction.

7.2 **County Commission Hearings.** In the event County believes that an amendment to this Agreement is necessary pursuant to this Paragraph 7, the proposed amendment shall be scheduled for hearing before the County Commission and noticed pursuant to law (including NRS 527.0205(2)). The County Commission shall determine the exact nature of the amendment or suspension necessitated by such federal or state law or regulation or action or inaction. Owner shall have the right to offer oral and written testimony at the hearing. The Commission's decision is subject to judicial review as set forth in Paragraph 9.3 below.

7.3 **Cooperation in Securing Permits.** County shall use its best efforts to cooperate with Owner in securing any County permits, licenses or other authorizations that may be required as a result of the Commission's decision. It is the responsibility of the owner to pay all applicable fees in connection with securing the permits.

8. **Review Default and Termination.**

8.1 **Frequency of Reviews.** As required by NRS 278.0205 and Code 110.814.35, at least once every twenty-four (24) months during the Term of this Agreement Owner shall provide to the County's Community Development Department and County shall review in good faith a report demonstrating Owner's good faith and material compliance with the provisions of this Agreement and outlining any issues regarding the County's performance during the preceding twenty-four (24) months. The County's Director of Community Development shall promptly report to the County Commission on the topics of the Owner's report and satisfaction of this Agreement. If at the time of review an issue not previously identified in writing is required to be addressed, the review, at the request of either party, shall be continued to afford sufficient time for response.
8.2. **Opportunity to be Heard.** Any party requesting an opportunity to be heard by the County Commission on this review matter shall be given such opportunity within a reasonable time following submission of the Director's report to the Commission.

8.3. **Procedures in the Event of Default.** In the event of any default with any provision of this Agreement, the nondefaulting party shall send by regular mail to the other a courtesy notice not less than thirty (30) calendar days prior to declaring a default under this Agreement. This thirty-day period shall be measured from the date of postmark of the notice. The courtesy notice shall detail the alleged default, any action necessary to cure the default and, where appropriate, the manner and period of time in which the alleged default may be satisfactorily cured. During the period of time the default letter is pending, the defaulting party shall not be considered in default for the purposes of termination or institution of legal proceedings. If the default is corrected, then no default shall exist and the notifying party shall take no further action. If the default is not corrected within thirty (30) calendar days, the following shall occur:

8.3.1 **Set Hearing Notice and Possible Freeze.** The party noticing a default shall set the matter for hearing before the County Commission. This hearing shall occur at the Commissions' meeting that follows after the minimum seven (7) business days mentioned in this Paragraph 8.3.1 plus the time necessary for publication and noticing pursuant to law. Said parties shall send a letter to the other party, by certified mail, return receipt requested, and by regular mail, providing notice of intent to present the matter to the Commission, the date set for the Commission's public hearing of same, and notice of at least seven (7) business days before the hearing date of an additional opportunity to correct the default. The seven (7) or more business days will be measured from the date of postmark of the certified and regular mailing of the letter. If the default remains uncorrected at the expiration of these seven days the Commission shall conduct its hearing on the matter. Furthermore, if the Owner is the alleged defaulting party then the Director of Community Development may also immediately direct County staff to condition all future zoning, land use, and mapping applications for the Property so that the building permits to be issued as a result of those approvals shall not be issued until the default is corrected, subject to review by the Commission.

8.3.2 **Review by County Commission.** Following consideration of the evidence presented before the County Commission and a finding based on substantial evidence that a default has occurred by the alleged defaulting party and the default remains uncorrected, the County Commission shall, in the event County is the defaulting party, direct County staff to immediately cure the default, and, if Owner is the defaulting party, the County may amend or terminate this Agreement and/or may ratify or authorize the suspension of building permits for the Development. Termination shall not in any manner rescind, modify, or terminate any vested right in favor of Owner, existing or received, as of the date of the termination. Should Owner elect to appeal, Owner shall have twenty-five (25) calendar days after the date of the Commission's hearing to institute legal action as set forth in Paragraph 9.3 below to determine whether the County Commission abused its discretion.

8.3.3 **Waiver.** Failure or delay in giving any notice provided for herein shall not constitute a waiver of any default. Except as otherwise expressly provided in this Agreement, any failure or delay by any party in asserting any of its rights or remedies in respect to any default shall not operate as a waiver of any default or of any such rights or remedies, or deprive such party of its right to institute and maintain any actions or proceedings which it may deem necessary to protect, assert, or enforce any of its right or remedies.
§4 - Unavoidable Delay or Default. Extension of Time for Performance. Neither party hereunder shall be deemed to be in default, and performance shall be excused, where delays or defaults are caused by war, acts of terrorism, insurrection, strikes, walkouts, riots, floods, earthquakes, fires, casualties, acts of God, restrictions imposed or mandated by governmental entities, failure of governmental agencies (other than County) to perform acts or deeds necessary for the performance of this Agreement, enactment of conflicting state or federal laws or regulations or similar matters beyond the control of the parties. If written notice of any such delay is given to County within thirty (30) calendar days after the commencement thereof, an automatic extension of time, unless otherwise objected to by County within ten (10) business days of such written notice, shall be granted or extensive with the period of the enforced delay, or longer as may be required by circumstances or as may be subsequently agreed to between County and Owner.

9.1 - Expiration of Agreement. The term of this Agreement shall be for three (3) years commencing on the date of this Agreement as defined at the beginning hereof. Owner may apply once to the County Board of Commissioners for a two-year extension of this Term provided that the law and regulations existing at the time of action by the Board to grant the extension shall thereafter govern the Property, the Project, the Maps and this Agreement. The Board's action shall be at its discretion.

9.2 - Amendment or Cancellation of Agreement. Except as otherwise permitted by NRS 278.0205 and this Agreement, this Agreement may be amended from time to time or canceled only upon the mutual written agreement of the Parties.

9.3 - Legal Action, Damages and Venue. The County and Owner agree that the County would not have entered into this agreement if it were liable for damages under or with respect to this Agreement. Accordingly, the County and the Owner may pursue any remedy at law or equity available for breach, except that neither the Owner nor the County shall be liable to the other or to any other person or entity for any monetary damages whatsoever. Prior to the institution of any legal action, the party seeking legal action must give the thirty (30) day notice of default as set forth in Paragraph 8.3 above. Following such notice, a public hearing must be held by the County Commission where the allegations will be considered and a decision regarding their merits will be reached. Any judicial review of the County Commission's decision or any legal action taken pursuant to this Agreement will be heard by a court under the standard review applicable to court review of zoning actions; and the decision of the County Commission shall be overruled or overturned if its decision is clearly arbitrary and capricious. Judicial review of the decision of the County Commission shall be limited to the evidence presented to the County Commission at the public hearing. Any judicial review or other action to enforce or interpret this Agreement shall occur in and rest exclusively with the Second Judicial District Court, State of Nevada.

9.4 - Governing Law. This Agreement shall be construed and enforced in accordance with and shall be governed by the law of the State of Nevada.

9.5 - Assignment.

9.5.1 Transfer to an Affiliate of Owner. The rights of Owner under this Agreement may be freely transferred or assigned to any entity, partnership, or corporation, which Owner
controls; or in which Owner has a controlling interest, or which controls. Owner; provided, such entity shall assume in writing all obligations of Owner hereunder.

9.5.2 Third-Party Assignment. The rights and obligations of Owner under this Agreement may be freely transferred or assigned to a third party not affiliated with Owner, provided such third party assumes in writing all obligations of Owner hereunder as to the assigned or transferred portion of the Project along with a copy of the sale, transfer, conveyance, or assignment agreement wherein the third party assumes the obligations of the Owner. Upon any such assignment hereunder, the Owner shall be relieved of all obligations and liabilities under or in connection with this Agreement. In connection with the conveyance of any portion of the Property, Owner shall provide County with written notice of any sale, transfer, conveyance, or assignment of any unimproved portion of the Project.

9.5.3 Financial Transactions. Owner has full discretion and authority to transfer, assign or encumber the Project, or portions thereof, in connection with financing transactions, without limitation on the size or nature of any such transaction, the amount of land involved or the use of the proceeds therefrom, and may enter into such transaction at any time and from time to time without permission of or notice to County.

9.6 Indemnity; Hold Harmless. Except as expressly provided in this Agreement, Owner shall hold County, its officers, agents, employees, and representatives harmless from liability for damage or claims for damage for personal injury, including death, and claims for property damage which may arise from the direct or indirect operations of Owner or those of its contractors, subcontractors, agents, employees, or other persons acting on Owner's behalf, which relate to construction of the Project. Owner agrees to and shall defend County and its officers, agents, employees, and representatives from any claims and actions for damages or alleged to have been caused by reason of Owner's activities in connection with the Project. Owner agrees to indemnify, hold harmless, and provide and pay all costs for a defense for County in any legal action filed in a court of competent jurisdiction by a third-party challenging the validity of this Agreement. The provisions of this Paragraph 9.6 shall not apply to the extent such damage, liability, or claim is solely caused by the intentional or negligent act of County, its officers, agents, employees, or representatives.

9.7 Binding Effect of Agreement. The burdens of this Agreement bind and the benefits of this Agreement inure to, the parties' respective successors in interest and shall run with the land until the completion of performance of this Agreement or its earlier revocation or termination as provided herein.

9.8 Relationship of Parties. It is understood that the contractual relationship between County and Owner is such that Owner is an independent contractor and not an agent of County for any purpose.

9.9 Notices. Unless otherwise provided in this Agreement, all notices, demands and correspondence required or provided for under this Agreement shall be in writing and delivered in person or sent by overnight courier or mailed by certified mail postage prepaid, return receipt requested. Notices shall be addressed as follows:
To County:  WASHOE COUNTY  
Department of Community Development  
Current Planning Division  
PO Box 11130  
Reno, NV 89520-0027

To Owner:  LW Land Company LLC  
A Nevada Limited Liability Company  
Brian Murphy  
695 Mile Circle Drive  
Reno, Nevada 89511

Either party may change its address by giving notice in writing to the other and thereafter notices, demands and other correspondence shall be addressed and transmitted to the new address. Notices given in the manner described shall be deemed delivered on the day of personal delivery or the delivery date by overnight courier or mail is first attempted.

9.10 Entire Agreement. This Agreement constitutes the entire understanding and agreement of the parties. This Agreement integrates all of the terms and conditions mentioned herein or incidental hereto and supersedes all negotiations or previous agreements between the parties with respect to all or any part of the subject matter hereof.

9.11 Waivers. All waivers of the provisions of this Agreement must be in writing, consent of all parties hereto.

9.12 Recording Amendments. Promptly after County's execution of this Agreement, an executed original of this Agreement shall be recorded in the Official Records of Washoe County, Nevada. All amendments hereto must be in writing signed by the appropriate officers of County and Owner in a form suitable for recordation in the Official Records of Washoe County, Nevada. Upon the completion of performance of this Agreement or its earlier revocation or termination, a statement evidencing said completion or revocation signed by appropriate officers of County and Owner shall be recorded in the Official Records of Washoe County, Nevada.

9.13 Headings, Exhibits, Cross-references. The headings and captions used in this Agreement are for convenience and ease of reference only and shall not be used to construe, interpret, expand or limit the terms of this Agreement. All exhibits attached to this Agreement and the recitals at the front of this Agreement are incorporated herein by the references thereto contained herein. Any term used in an exhibit hereto shall have the same meaning as in this Agreement unless otherwise defined in such exhibit. All references in this Agreement to Paragraphs, Sections and Exhibits shall be to Paragraphs, Sections and Exhibits of or to this Agreement, unless otherwise specified. Copies of the Exhibits shall be retained and maintained by the Department of Community Development at 1101 East Ninth Street, Reno and shall be available for inspection.

9.14 Severability of Terms. If any term or other provision of this Agreement is held to be invalid, illegal or incapable of being enforced by any rule of law or public policy, all other
conditions and provisions of this Agreement shall nevertheless remain in full force and effect, provided that the invalidity, illegality or unenforceability of such term does not materially impair the parties' ability to consummate the transactions contemplated hereby. If any term or other provision is invalid, illegal or incapable of being enforced, the parties hereto shall, if possible, amend this Agreement so as to affect the original intention of the parties.

9.15 Voluntary Agreement. Owner acknowledges that he had the option of conducting his own public facilities needs assessment but instead voluntarily chose to accept the WSSP. Owner further acknowledges and agrees that he voluntarily, willingly and without protest and duress freely enters into this Agreement and accepts the terms and conditions herein.

IN WITNESS WHEREOF, this Agreement has been executed by the parties on the date stated.

Disclosure Statement
DISCLOSURE STATEMENT

Because you are considering the purchase of a parcel of property or a home in the Warm Springs area of Washoe County you need to know about the formal plans and rules that govern your purchase and your use of the property. This Disclosure Statement is required by the Warm Springs Specific Plan (WSSP), which is a formal document adopted by Washoe County for the purpose of planning land development and the public services needed to serve this development.

This Disclosure Statement will not tell you everything you need to know about buying and using property in Warm Springs pursuant to the WSSP. You need to study all documents related to your purchase and legal use of Warm Springs property, which are available from your seller and Washoe County. These documents may include a proposed purchase agreement and escrow instructions, title report, seller’s property advisories, the WSSP, the WSSP Development Standards Handbook, the project-specific Development Standards Handbook, a development agreement with Washoe County, and a possible declaration of covenants, conditions, and restrictions. This Disclosure Statement will attempt to summarize some of the major features of the WSSP and its exhibits.

THE WSSP

There are several attachments to this Disclosure Statement, which convey in summary manner some of the major features of the WSSP. They are referred to as exhibits. Exhibit A is a colored map that illustrates all of the land use types and densities currently approved under the WSSP. Exhibit B is a copy of a part of the Washoe County Development Code (Washoe County Code Chapter 110, Article 302), which displays the legal and illegal uses of both your property and neighboring properties. Exhibit C is a copy of another part of the Development Code (Article 304), which describes the use types set forth in Exhibit B. Exhibit D is a copy of a part of the County’s Area Plan Regulations for the Warm Springs Area (Article 226 of the Development Code).

It is important that you study these exhibits at a minimum and understand what you are allowed to do with your property. Your property is within the area that has been outlined on Exhibit A, and your signature on this Disclosure Statement ensures that you were informed of all land uses permitted on and adjacent to your property as well as within the entire Warm Springs Specific Plan community. Please note that you are agreeing NOT to file any written or verbal complaints or any lawsuits or other legal proceedings regarding any existing legal agricultural uses.

WARM SPRINGS AREA PLAN UPDATE

Washoe County is conducting this year of 2006 a review and update of the formal area plan for the general Warm Springs area ("Area Plan"), of which the WSSP is a part. This update may produce significant changes to the WSSP this year, including possible updated fees and schedule, different development vision, and altered infrastructure needs and financing structure. A few of these possible changes could apply to you now and require certain actions or payments. This is all discussed in the development agreement entered into by your developer/seller and Washoe County, a copy of which is attached as Exhibit E. Please read it now.

DEVELOPMENT AGREEMENT

Exhibit E is the referenced development agreement. It controls what may happen to and on the property you are buying or have bought. It requires, among other things, certain appearances to your home and landscape, the payment of certain fees (which your seller may or may not have satisfied), and your possible participation in a homeowner’s association as well as special assessment or general improvement districts. Please study this agreement.

HANDBOOK FOR DESIGN

All development within the WSSP community must satisfy the minimum criteria established in the WSSP Development Standards Handbook as well as the more specific criteria set forth in the project’s specific development standards handbook created by the developers of the project in which you may be purchasing property. These two handbooks are intended to provide future homeowners and businesses with design guidelines to be followed to conserve natural resources, primarily water supply, enhance the quality of the community, and ensure long-term design consistency and land use consistency, as
envisioned by the WSSP. A copy of this Project’s Development Standards Handbook is included as Exhibit F. This handbook is attached to this Disclosure Statement for your reference at the time you prepare to design your future home or business.

INFRASTRUCTURE FEE PAYMENT

The WSSP contains a plan for funding, building and maintaining public services needed for the development of Warm Springs, such as roads, drainage, water, parks, police and fire. This plan is referred to as the financing plan, and it requires payment of fees to cover a proportionate share of these community services. The amount and payment of these fees was established by your property developer in the Development Agreement (Exhibit E). If the property you may purchase is located within a subdivided area in Warm Springs, you will be bound by the development agreement and must pay a fair share at purchase. Note that some of the fees apply only to property that will subsequently be subdivided. Other fees are applicable to parcels that will not be further subdivided.

Attached as an exhibit to the Development Agreement (Exhibit E) is a copy of the Schedule of Fees. The WSSP Development Standards Handbook notes that there will be a yearly escalation of these fees, based upon the Consumer Price Index.

ROADWAY MAINTENANCE

The Palomino Valley General Improvement District (PVGID) will review public roadways, major or minor, for acceptance for maintenance. PVGID probably affects your property. Any private roads must be the responsibility of your homeowners association, if any, and will not be maintained by PVGID or Washoe County.

FUTURE ASSESSMENT DISTRICTS

Please be advised that an assessment district or general improvement district could be created in the future to provide community water service, community sewer service, drainage systems, or roadways in the WSSP area. At the time you file for a building permit, such a district may or may not be in place. The attached waiver (that will require your signature at the closing of your property) will limit your ability to oppose any future assessment district that may be imposed to fund a community water system, community sewer service, drainage system, or roadway construction/maintenance.

ACCEPTANCE

I (we) have read and understand all the provisions of this Disclosure Statement and agree to all the stated provisions.

Financing Concept Plan
GENERAL

The major element of each development agreement to be entered into by a subdividing property owner and Washoe County would be the capital improvement program elements, which have significance within the entire WSSP area, or are required to serve more than one development. These elements form the "backbone" of the infrastructure system. The development agreement identifies specific elements of the infrastructure system that must be funded or constructed prior to issuance of certificates of occupancy by the County. The Capital Improvements Program (CIP) for the WSSP is found in Appendix G of the Warm Springs Specific Plan and is incorporated herein by this reference.

Reno, NV 89511

DECLARATION OF
Covenants, Conditions and Restrictions
OF
Palomino Ranch Estates

This declaration made this ______ day of ____________, 2017 by LW Land Company LLC, a Nevada Limited Liability Company, hereafter referred to as 'DECLARANT'.

WHEREAS, DECLARANT is the owner of that certain real property located in the County of Washoe evidenced by the certain official subdivision map recorded in the office of the County Recorder of the County of Washoe, State of Nevada, on, in Book ______ of Subdivision Maps, at Page_______, and more particularly described as Palomino Ranch Estates and

WHEREAS, DECLARANT desires to impose upon said lots mutual and beneficial covenants, conditions and restrictions under a plan of improvement for the benefit of all owners and future owners thereof.

NOW THEREFORE, DECLARANT hereby declares that said lots, numbered ______ through ______ inclusive, are held and shall be held, conveyed, hypothecated, used, improved and occupied subject to the following covenants, conditions, restrictions, easements and agreements which are imposed pursuant to a common plan and are intended to create equitable servitudes designed to preserve the quality of said land for the benefit of the various owners thereof, their heirs, successors in interest and assigns. To wit:

Page 1 of 19
RESTRICTIVE PROVISIONS

1. Use and Improvements

No buildings, other than one detached single-family private dwelling, private garage for the use of the occupants of such dwelling and a barn or other usual and appropriate outbuildings strictly incident and appurtenant to a private dwelling, shall be erected or maintained on any lots, except that a guest house may be permitted subject to County requirements. No use whatsoever, except in connection with its use and improvement as a site and grounds of a private dwelling as above set forth shall be made of any lot or plot therein and furthermore, no driveway, road, right of way, or any easements for public or private use shall be granted for any reason whatsoever, across or through any lot to any other piece of property without complying fully with County requirements.

2. Temporary Dwellings. Outbuildings and Accessory Outbuildings

No trailers, except temporary contractors' trailers used in connection with construction and not provided for dwelling accommodations, tents, garage or other outbuildings shall be used as a temporary or permanent residence, nor shall any residential structure be moved on to the tract from some other location, nor shall "used" lumber be utilized in the construction of any building, whether it be of temporary or permanent nature, unless approved prior to use by an architectural control committee. No accessory outbuildings shall be erected on any lot prior to the erection of a dwelling thereon. In no event shall any such accessory outbuilding, partially-completed or temporary structure ever be used for human occupancy or habitation.
3. Minimum Building Requirements

The construction of all dwellings on all lots, regardless of size of dwelling, must conform to F. H. A. or better specifications.

On all lots, no dwelling shall be erected or permitted to remain thereon having a ground floor area, exclusive of open porches and garages, of less than 1,500 square feet for a one-story building, or 750 square feet for a two-story building, with the total size no less than 1,500 square feet.

4. Building Setback Requirements

On lots 10,000 square feet or smaller, building setbacks will vary, providing a more rural atmosphere in the streetscape. No building or projection thereof shall be located nearer than 20 feet to any street or driveway access easement.

No building shall be located nearer than 25 feet to any rear lot line. All lots larger than 10,000 square feet will have an established building envelope with a minimum setback of 30 feet.

Buildings may be located anywhere within the envelope; however, all buildings, structures or storage of any type, will be confined to this area on each lot. The size and shape of envelope may vary from lot to lot. The envelopes depth and setback will be related to overall lot size. These established setback lines notwithstanding, no structure shall be located nearer than 100 feet from any perennial stream. Areas within 100 feet of said perennial streams shall be maintained in their natural state. In accordance with fish and game codes, the Department of Fish and Game must be notified at least 30 days prior to any activity that alters a stream. Stream crossings and culvert installations are subject to this code section.

5. Heating and Fireplaces

The use of efficient, non-polluting heating systems shall be encouraged within the SPA Primary heating sources for residences
shall be standard conventional electric or propane gas systems
distributing heat through ducts within the home. Applicants who
prefer stoves as the major heat source in the home will be
encouraged to use pellet stoves. Approved pellet stoves will be
accepted as a major heat source within the residence. Wood-burning
stoves and fireplace inserts are prohibited as a major heat source.
Applicants with standard conventional electric or propane heating
systems designed for use as the major heat source within the
residence will be allowed the installation of one wood stove as a
secondary backup heat system, provided the wood stove meets the new
County clean-burning, low-pollution standards. Open fireplaces are
prohibited except for gas burning fireplaces which have false logs
and are used purely for aesthetic purposes and are not considered
a heat source within the residence.

6. Architecture

All buildings must incorporate a "western ranch" theme or identity
architecturally, in a manner that is complementary and compatible
with the plan area and its surroundings. No mobile homes are allowed
except for construction purposes within the SPA. To enhance the
development and maintain its rural character, buildings and
structures shall adhere to the following guidelines:

a. Exterior Walls and Trim. Wood, brick, stucco, or stone
material finishes are required for all exterior walls.
Siding must run one consistent direction on all exterior
walls. Exterior colors must be earth tone and harmonize
with the surrounding landscape. No true primary or
secondary colors are allowed, nor any gloss or semi-gloss
finishes. All reflective metal such as chimney stacks,
flashings, exhaust vents and pipes, must be painted to
match or blend with surrounding materials. All draperies
and window coverings should also be of materials and colors which harmonize with the surroundings. Aluminum windows, door frames, solar panels, and skylights must be bronzed or anodized. Steel windows and door frames must be painted to match or blend with surrounding materials.

b. Animals. On lots greater than one acre, horses or 4-H animals, limited to cattle or sheep, will be allowed provided they are not adjacent to the center spine road, village center, community facilities center, or school sites. No lot shall have more than two such animals. All other lots may have the usual household pets provided they are not kept for commercial purposes and are kept reasonably confined so as not to become a nuisance. Horses, animals, and household pets shall not unreasonably interfere with the comfort, privacy, or safety or other properties. No lot shall have more than four household pets.

If horses/4-H animals are to be allowed in an area, that area shall be designated on tentative and final maps for those uses, and water rights dedicated to provide irrigated pasture in areas where the animals must be kept when not stabled.

c. Roofs. Roofs must be constructed of fire-retardant materials.

The use of standard wooden shakes or shingles will be prohibited. Roofing materials shall be restricted to tile, asphalt, fiberglass, fire-retardant treated shakes, or any new fire-retardant roofing materials in use which have pleasing aesthetic values. Roofing materials shall be of a color that harmonizes
with the surrounding area and color scheme of the structure. Flat roofs will be discouraged.

d. Mailboxes. Architectural structures of natural materials and natural colors shall be provided for grouped neighborhood mailboxes. The grouped neighborhood boxes of 15 or less per site shall be placed at neighborhood entry points, with adequate access from main roadways.

e. Garbage and Refuse Disposal. There shall be no burning of trash, garbage or other like household refuse, nor shall any property owner accumulate on their lot junked or unsightly vehicles or litter, refuse or garbage, except in receptacles provided for such purposes.

f. Concealment of Fuel Storage Tanks and Trash Receptacles. Fuel storage tanks and every receptacle for ashes, trash, rubbish or garbage shall be so placed and kept as not to be visible from any street, lot, parcel, or open space in the SPA, except at the times when refuse collections are made.

 g. Travel Trailers, Motor Homes and Boat Storage. Travel trailers, motor homes (R.V.), or boats and trailers shall be stored within the building envelope and screened from any street, lot, parcel, or open space area by screen fences. If stored in side yards, the minimum side yard shall be 12 feet.

h. Nuisances. No noxious or offensive activities, odors, or nuisances shall be permitted on any lot or parcel in the development. No refuse, unsightly or abandoned vehicles, debris, noxious material, discarded personal effects, or construction materials not for immediate use shall be permitted on any lot or portion thereof. It is incumbent
upon all property owners to maintain their lots and yards in a neat, orderly and well-groomed manner, whether said lots are vacant or improved.

i. Completion of Construction. Construction of any improvement, once commenced, shall be pursued diligently to completion. Improvements not so completed or upon which construction has ceased for 90 consecutive days, or which have been partially or totally destroyed and not rebuilt within a reasonable period, shall be deemed nuisances. The County may remove any such nuisance or repair or complete the same at cost to the owner provided the owner has not commenced required work within 30 days from posting a notice to commence such work upon the property. Such notice shall state the steps to be taken to eliminate the nuisance.

j. Clothes Lines. No clothes lines shall be constructed or erected which would be visible from any street, other lot, or open space.

k. Garage. Every single-family dwelling unit constructed within the SPA shall have on the same lot or parcel enough covered and completely enclosed automobile storage space for at least two automobiles. On one-acre or large lots, garage doors shall be encouraged to face side yards away from streets.

7. Landscaping

Landscape design should fit the particular use and blend with the natural environment. The lot concept limits the area in which a home owner may provide landscaping. The plant material must be selected from a predetermined list incorporated in this plan. The plant selection includes only drought tolerant and low water demand material. These factors contribute to a decreased average annual
residential demand that is mandatory for implementation of this plan.
A specified number of trees are required in the front yard setback and transition zone to provide a "sense of place". Plant material selected from the incorporated list, per neighborhood, should be kept similar to strengthen neighborhood unity and identity.
Selection of materials should contain a mixture of plants with fast, medium, and slow growth rates and a variety of sizes should be planted to provide a more natural appearance.
The use of plants around dwelling units to reduce heating and cooling needs is encouraged. Evergreens along the north and west act as a windbreak to deflect winter winds. Deciduous trees planted on the south around the perimeter of the unit are encouraged to provide summer shade while allowing winter sun. Creation of earth berms to the windward side can also reduce heat loss.
Drainageways should be lined with native wildflowers, grasses, shrubs, and rocks and boulders to slow velocities. They will be graded to resemble a natural drainage swale and incorporated in the overall design. Irrigation of plant material will utilize drip irrigation and other water conservation features as practical. The use of plumbed gray water storage systems will be investigated with the Health Department.
Within nine months of completion of the main dwelling unit, each lot or parcel shall be completely landscaped consistent with the landscape design guidelines and water budget incorporated in this plan. All landscaping shall be maintained to harmonize with and sustain the attractiveness of the development.
8. Fencing
All property lines from single-family dwelling units to the street shall be kept free and open.
A solid privacy fence may be constructed within the building envelope and limited to the rear of the house. Side yards will not be enclosed with a privacy fence in lots larger than 10,000 square feet. Fences shall be constructed of wood or masonry material and no fence will be over six feet in height. Developers will establish a typical privacy fence per neighborhood to promote neighborhood unity.

The transition zone and side yard may be fenced with open-ranch style fencing. Fencing will be consistent within all neighborhoods. There shall be no chain link, woven wire or any type of wire fence within the development except for back yard pet enclosures and swimming pools.

9. Public Street and Monument Signs

On public streets the style of signage will be unique to the SPA. It will be uniform in style throughout the area. Subdivision entry signage shall be limited to monument signs of native materials and in conformance with design guidelines set forth in the commercial section of the plan.

10. Exterior Lighting

The functional objectives in providing exterior area lighting are to illuminate areas necessary for safe and comfortable use. In certain situations, area lighting can add to the aesthetic appeal of a site by highlighting architectural features of a building or illuminating pathways and landscape plantings. In these instances, only the special features of a building or landscape should be illuminated. It should be noted that the standards and guidelines contained in this section address area lighting on individual
properties, and not overhead street lighting along public and private rights-of-way.

On public streets, the style of lighting standard will be unique to the SPA. It will be decorative and uniform in style and intensity throughout the area. Lighting shall be directed downward with no splay of lighting directed outward.

a. Standards.

1. Exterior lights shall not blink, flash or change intensity. String lights, building or roffline tube lighting, reflective or luminescent wall surfaces are prohibited.

2. Exterior lighting shall not be attached to trees except for the Christmas season.

3. Driveway, walkway, and building lights shall be directed downward.

4. Fixture mounting height shall be appropriate to the purpose.

5. Illumination for aesthetic or dramatic purposes of any building or surrounding landscape utilizing exterior light fixtures projected above the horizontal is prohibited.

6. Seasonal lighting displays and lighting for special events which conflict with other provisions of this section may be permitted on a temporary basis.

b. Guidelines.

1. Lighting Design. Exterior lighting should be designed as an integral part of the architecture and
landscape and located in a manner that minimizes the impact of lighting upon adjacent structures and properties.

iv. Lighting Levels. Avoid consistent overall lighting and overly bright lighting. The location of lighting should respond to the anticipated use and should not exceed the amount of light actually required by users. Lighting for pedestrian movement should illuminate entrances, changes in grade, path intersections, and other areas along paths which, if left unlit, would cause the user to feel insecure. Lighting suppliers and manufacturers have lighting design handbooks which can be consulted to determine fixture types, illumination needs and light standard heights.

v. Fixture Design. Exterior lighting fixtures should be simple in design and should be well-integrated with other architectural site features.

vi. Structural Lighting. Night lighting of building exteriors should be done in a selective fashion: highlight special recognizable features; keynote repeated features; or use the play of light and shadow to articulate the facade. The purpose of illuminating the building should be to add visual interest and support building identification. Harsh overall lighting of a facade tends to flatten features and diminish visual interest.

x. **Lighting Height.** As a rule, the light source should be kept as low to the ground as possible while ensuring safe and functional levels of illumination. Area lighting should be directed downward with no splay of lighting directed offsite. The height of light fixtures or standards must meet the County standards. Direct light downward in order to avoid sky lighting. Any light source over 10 feet high should incorporate a cut-off shield to prevent the light source from being directly visible from areas offsite. The height of luminaries should be in scale with the setting and generally should not exceed 10-12 feet.

11. **Utilities**
All utilities shall be underground on lots less than one acre. Undergrounding shall be encouraged for lots from one to two and a half acres and overhead on lots larger than two and a half acres. All individual services to each unit for all lot sizes shall be undergrounded from the neighborhood service line.

12. **Prohibition Against Used Structures**
No used buildings or structures, intended for use as a dwelling, shall be placed on any lot.

13. **Ditches and Swales.**
Each owner shall keep drainage ditches and swales located on his lot free and unobstructed and in good repair and shall provide for the installation of such culverts upon his lot as may reasonably be required for proper drainage.

14. **Resubdivision or Joinder Lots**
No lot shall be further subdivided, unless permitted by the SPA Plan and regulatory zoning category applicable.

15. **Drilling and Mining**
No drilling, refining, quarrying, or mining operation of any kind shall be permitted on any lot.

16. Television or Radio Antennas and Towers

No television or radio antennae or tower shall be erected or used outdoors, whether attached to a building or structure, or otherwise. The placement of satellite discs shall be screened from view from any adjacent parcels, streets, or open space by locating in rear yards behind screened fences at a minimum. At such time as a community antenna television (CATV) system may be installed to service the development, each lot owner shall pay his proportionate share of standby, installation or service charges made pursuant to the franchise governing such system. This is provided, however, that such charges shall be comparable to those of similar installations in the CATV industry.

17. Failure to Enforce

The various restrictive measures and provision of this declaration are declared to constitute mutual equitable covenants and servitudes for the protection and benefit of each lot in said subdivision and failure by DECLARANT or any other person or persons entitled so to do shall not serve to create any liability or responsibility to DECLARANT for its alleged failure to act. Failure to enforce any measure or provision upon violation thereof shall not stop nor prevent enforcement thereafter or be deemed a waiver of the right so to do.

18. Severability

The various measures and provisions of this declaration are declared to be severable, and the invalidity of one measure or provision shall not affect any other measure or provision.

19. Subordination to Mortgages and Deeds of Trust

Nothing contained in this declaration shall impair or defeat the lien of any mortgage or deed of trust made in good faith and for
value, but title to any property is subject to this declaration obtained through the sale or satisfaction of any such mortgage or deed of trust shall thereafter be held subject to all of the restrictions and provisions hereof.

20. Enforcement and Remedy

Each grantee of a conveyance or purchaser under a contract or agreement of sale by accepting a deed or contract of sale or agreement of purchase accepts the same subject to all of other covenants, restrictions, easements and agreements set forth in this declaration and agrees to be bound by the same.

Damages for any breach of the terms, restrictions and provisions of this declaration are hereby declared not to be adequate compensation, but such breach and/or the continuation thereof may be enjoined or abated by appropriate proceedings by the DECLARANT, or by an owner or owners of any other lot or lots in said subdivision. Court costs and attorney fees shall be awarded the prevailing parties of any legal action as deemed appropriate and awarded by the court.

21. Terms of Restrictions

These covenants, restrictions and agreements shall run with the land and shall continue in full force and effect until ___________ at which time the same shall be automatically extended for successive periods of five years unless by a duly executed and recorded statement of the then owners of 75% or more of the lots in said subdivision elect to terminate or amend these restrictions in whole or in part. Said declarations of restrictions can be amended or modified at any time when 75% of the owners election to do so, provided however; that said amendment or modification is in compliance with the provisions of the Washoe County Code.

Note:
The following two items will be applicable in the event of an active architectural control committee.
22. Maintenance of Lots

All lots, whether occupied or unoccupied, and any improvements placed thereon, shall at all times be maintained in such a manner as to prevent their becoming unsightly, unsanitary or a hazard to health. If not so maintained, the architectural control committee shall have the right, through its agents and employees, to do so, the cost of which shall be borne by the owner. Neither the architectural control committee, nor its agents, employees or contractors, nor the DECLARANT, nor its agents, employees, or contractors shall be liable for any damage which may result from any maintenance work as performed.

23. Real Estate Signs

Professionally prepared signs of customary and reasonable dimension may be displayed on any lot advertising it, together with any improvements located thereon, for sale or lease. All other signs, bill boards, or advertising structures of any kind are prohibited except upon application to and written permission from the architectural control committee.

Note:

The following is an example of the architectural control committee section of the C. C. & Rs. Not all development projects within the plan area will be required to have an architectural control committee. In the event a project does not have an architectural control committee, then applicants will be required to submit an application to the citizen advisory board with definitive design, materials and color combinations for their review and recommendation prior to submittal to the County of Washoe.

24. Architectural Control Committee

a. General Powers. All improvements constructed or placed on any lot must first have the approval of the committee as
evidenced by the signatures of at least two of the members affixed to the plans submitted. Two sets of plans and specifications shall be submitted to the committee, which plans shall show the location of all improvements, if any, easting upon said lot, the location of the improvement proposed to be constructed, the color and composition of all exterior materials to be used, proposed landscaping, and any other information which the committee may require, including soil, engineering and geologic reports and recommendations.

b. Committee Membership. The committee shall be composed of three members, to be appointed by DECLARANT, at least one of whom shall be a representative of DECLARANT. Committee member shall be subject to removal by DECLARANT and any vacancies from time to time existing shall be filled by appointment by DECLARANT, or in the event of DECLARANTS failure to do so within two months after any such vacancy, the then majority of the lot owners. The power to appoint or remove Committee members shall be transferred permanently to the lot owners upon:

i. A lapse of 18 months between the filing of the final map of the development, provided that 90% of the aggregate number of lots of the development have been sold by the DECLARANT; or

ii. A lapse of three years from the date of Final Subdivision Public Report of the Nevada Department of Real Estate.

c. Grounds for Disapproval. The committee may disapprove any plan of development:

i. Because of the reasonable dissatisfaction of the committee with grading plans, location of the proposed improvement on a lot, finished ground elevation, color scheme, finish, design, proportions, architecture,
shape, height or style of the proposed improvement, the materials used therein, the kind, pitch or type of roof proposed to be placed thereon; or

ii. If, in the judgment of a majority of the committee reasonably exercised, the proposed improvement will be inharmonious with the development, or with the improvements erected on other lots.

d. **Rules and Regulations.** The committee may, from time to time, adopt written rules and regulations of general application governing its procedures which may include, among other things, required number of copies of plans and specifications: provisions for notice of approval or disapproval, including a reasonable time period for approval by reason of failure to disapprove.

e. **Variances.** The committee may grant reasonable variances or adjustments from the provisions of this declaration where literal application thereof results in unnecessary hardship and if the granting thereof will not be materially detrimental or injurious to owners of other lots.

f. **Certification of Compliance.** At any time prior to completion of construction of an improvement, the committee may require a certification, upon such form as it shall furnish, from the contractor, owner, or a licensed surveyor, that such improvement does not violate any setback rule, ordinance or statute, nor encroach upon any easement or right-of-way of record.

g. **Administrative Fees.** As a means of defraying its expense, the committee may institute and require a reasonable filing fee to accompany the submission of plans and specifications, to be not more than one-fourth of 1% of the estimated cost of
the proposed improvement, subject to a minimum fee of $75.00. No additional fee shall be required for resubmittal.

h. Liability. Notwithstanding the approval by the committee of plans and specification of its inspection of the work in progress, neither it, DECLARANT, nor any person acting in behalf of any of them shall be responsible in any way for any defects in any plans or specifications or other material submitted to the committee, nor for any defects in any work done pursuant thereto. Each person submitting such plans or specifications shall be responsible for the sufficiency thereof and the adequacy of improvements constructed pursuant thereto.

All covenants, conditions and restrictions herein contained which are required by the County of Washoe may also be enforced by the County of Washoe.

EXHIBIT D
Tentative Parcel Map Application
Supplemental Information

(All required information may be separately attached)

Chapter 110 of the Washoe County Code is commonly known as the Development Code. Specific references to tentative parcel maps may be found in Article 606, Parcel Maps.

1. What is the location (address or distance and direction from nearest intersection)?

South end of Grass Valley Road; approximately half a mile south of Whiskey Springs Road.

a. Please list the following:

<table>
<thead>
<tr>
<th>APN of Parcel</th>
<th>Land Use Designation</th>
<th>Existing Acres</th>
</tr>
</thead>
<tbody>
<tr>
<td>077-130-23 Remainder</td>
<td>120 - Vacant, Single Family</td>
<td>15.02</td>
</tr>
</tbody>
</table>

2. Please describe the existing conditions, structures, and uses located at the site:

Vacant land.

3. What are the proposed lot standards?

<table>
<thead>
<tr>
<th></th>
<th>Parcel 1</th>
<th>Parcel 2</th>
<th>Parcel 3</th>
<th>Parcel 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum Lot Area</td>
<td>5.00 ac</td>
<td>5.01 ac</td>
<td>5.01 ac</td>
<td></td>
</tr>
<tr>
<td>Minimum Lot Width</td>
<td>436.55</td>
<td>436.50</td>
<td>446.47&quot;</td>
<td></td>
</tr>
</tbody>
</table>
4. Was the parcel or lot that is proposed for division created (recorded) within the last 5 years? (If yes, public review of the parcel map will be required. See Planning and Building staff for additional materials that are required to be submitted.)

☐ Yes  ☐ No

5. Utilities:

a. Sewer Service  Septic
b. Electrical Service/Generator  NV Energy
c. Water Service  Well

6. Please describe the source of the water facilities necessary to serve the proposed tentative parcel map:

a. Water System Type:

☐ Individual wells
☐ Private water  Provider:
☐ Public water  Provider:

b. Available:

☐ Now  ☐ 1-3 years  ☐ 3-5 years  ☐ 5+ years

c. Washoe County Capital Improvements Program project?

☐ Yes  ☐ No

7. What sewer services are necessary to accommodate the proposed tentative parcel map?

a. Sewage System Type:

☐ Individual septic
☐ Public system  Provider:

b. Available:

☐ Now  ☐ 1-3 years  ☐ 3-5 years  ☐ 5+ years

c. Washoe County Capital Improvements Program project?

☐ Yes  ☐ No

8. For most uses, the Washoe County Code, Chapter 110, Article 422, Water and Sewer Resource Requirements, requires the dedication of water rights to Washoe County when creating new parcels. Please indicate the type and quantity of water rights you have available should dedication be required:

<table>
<thead>
<tr>
<th>a. Permit #</th>
<th>b. Certificate #</th>
<th>c. Surface Claim #</th>
<th>d. Other, #</th>
</tr>
</thead>
<tbody>
<tr>

<td>☒ ☐ ☐ ☐</td>
<td>☒ ☐ ☐ ☐</td>
<td>☒ ☐ ☐ ☐</td>
</tr>
<tr>
<td>acre-feet per year</td>
<td>acre-feet per year</td>
<td>acre-feet per year</td>
<td>acre-feet per year</td>
</tr>
</tbody>
</table>
e. Title of those rights (as filed with the State Engineer in the Division of Water Resources of the Department of Conservation and Natural Resources):

9. Does the property contain wetlands? (If yes, please attach a preliminary delineation map and describe the impact the proposal will have on the wetlands. Impacts to the wetlands may require a permit issued from the U.S. Army Corps of Engineers.)

☐ Yes ☐ No  If yes, include a separate set of attachments and maps.

10. Does property contain slopes or hillsides in excess of 15 percent and/or significant ridgelines? (If yes, and this is the second parcel map dividing this property, Article 424, Hillside Development of the Washoe County Development Code will apply.)

☐ Yes ☐ No  If yes, include a separate set of attachments and maps.

11. Does property contain geologic hazards such as active faults; hillside or mountainous areas; is it subject to avalanches, landslides, or flash floods; is it near a water body, stream, Significant Hydrologic Resource as defined in Article 418, or riparian area such as the Truckee River, and/or an area of groundwater recharge

☐ Yes ☐ No  If yes, include a separate set of attachments and maps.

12. Does the tentative parcel map involve common open space as defined in Article 408 of the Washoe County Development Code? (If so, please identify all proposed non-residential uses and all the open space parcels.)

☐ Yes ☐ No  If yes, include a separate set of attachments and maps.

13. If private roads are proposed, will the community be gated? If so, is a public trail system easement provided through the subdivision?

Washoe County Planning and Building
TENTATIVE PARCEL MAP SUPPLEMENTAL INFORMATION

July 2017

WTPM17-0015, 0017, 0018, 0019, 0020

EXHIBIT D
14. Are there any applicable policies of the adopted area plan in which the project is located that require compliance? If so, which policies and how does the project comply?

☐ Yes  ☐ No  If yes, include a separate set of attachments and maps.

15. Are there any applicable area plan modifiers in the Development Code in which the project is located that require compliance? If so, which modifiers and how does the project comply?

16. Is the project subject to Article 418, Significant Hydrologic Resources? If yes, please address Special Review Considerations within Section 110.418.30 in a separate attachment.

☐ Yes  ☐ No  If yes, include a separate set of attachments and maps.

Grading

Please complete the following additional questions if the project anticipates grading that involves: (1) Disturbed area exceeding twenty-five thousand (25,000) square feet not covered by streets, buildings, and landscaping; (2) More than one thousand (1,000) cubic yards of earth to be imported and placed as fill in a special flood hazard area; (3) More than five thousand (5,000) cubic yards of earth to be imported and placed as fill; (4) More than one thousand (1,000) cubic yards to be excavated, whether or not the earth will be exported from the property; or (5) If a permanent earthen structure will be established over four and one-half (4.5) feet high. If your project exceeds any of the above criteria, you shall either provide a preliminary grading and roadway design plan for review OR if these criteria are exceeded with the final construction drawings and not disclosed at the Tentative Parcel Map Application, you shall be required to apply for a special use permit for grading and you will be delayed up to three months, if approved.

17. How many cubic yards of material are you proposing to excavate on site?

N/A
18. How many cubic yards of material are you exporting or importing? If exporting of material is anticipated, where will the material be sent? If the disposal site is within unincorporated Washoe County, what measures will be taken for erosion control and revegetation at the site? If none, how are you balancing the work on-site?

N/A

19. Can the disturbed area be seen from off-site? If yes, from which directions, and which properties or roadways? What measures will be taken to mitigate their impacts?

N/A

20. What is the slope (Horizontal/Vertical) of the cut and fill areas proposed to be? What methods will be used to prevent erosion until the revegetation is established?

N/A
21. Are you planning any berms and, if so, how tall is the berm at its highest? How will it be stabilized and/or revegetated?
N/A

22. Are retaining walls going to be required? If so, how high will the walls be, will there be multiple walls with intervening terracing, and what is the wall construction (i.e. rockery, concrete, timber, manufactured block)? How will the visual impacts be mitigated?
N/A

23. Will the grading proposed require removal of any trees? If so, what species, how many, and of what size?
N/A

24. What type of revegetation seed mix are you planning to use and how many pounds per acre do you intend to broadcast? Will you use mulch and, if so, what type?
N/A
25. How are you providing temporary irrigation to the disturbed area?

N/A

26. Have you reviewed the revegetation plan with the Washoe Storey Conservation District? If yes, have you incorporated their suggestions?

N/A

27. Surveyor:

Development Standards Handbook for

PALOMINO RANCH ESTATES

DEVELOPMENT STANDARDS

Introduction
LW Land Company LLC, the owner of the property Palomino Ranch Estates, is one of the parcels within the Warm Springs Specific Plan (WSSP). (Refer to the Land Use Plan showing the project with in the Warm Springs area in Appendix C) The property is 67.60 acres in size. There will be a total of 15 lots, 3 lots will each be 2.50 acres, with remaining 12 lots will be 5+ acres.(Refer to Vicinity Map and Parcel Map)

Objective
To develop a community that capitalizes on the rural and equine character of the Warm Springs area while utilizing resources efficiently and effectively, and giving consideration to design, marketability, and aesthetics.

Agriculture
The Specific Plan protects existing adjacent agricultural uses from potential development conflicts. The CC&Rs and all final maps shall contain a note of restriction that states, "No formal written or verbal complaints can be filed with Washoe County and no lawsuits or other legal proceedings can be brought against any legal agricultural use." Each purchaser will sign a disclosure statement that reiterates the same information.

Residential Design Guidelines
The purpose of this handbook is to describe the principles, policies, standards, and deed restrictions that will control development of Tumbleweed Estates to ensure that it is built and maintained as envisioned in the master planning process for the Warm Springs Specific Plan area.

Lot Concepts Standards
The individual lot concepts are designed to promote the rural character of the Warm Springs Valley. The lots have designated building envelopes, transition zones, and required open space. Where there is a difference between what is illustrated in the individual Lot Concept Plans and what the text states, the plans shall take precedence over the text. (Refer to the Individual Lot Concept Plans, pages 4-5.)
Building Envelopes
The building setbacks from the street vary to provide a more rural atmosphere to the street. All lots have an established building envelope as defined by the Individual Lot Concept Plans. Building side and rear yard setbacks shall conform to current Washoe County Code requirements.

Buildings may be located anywhere within the designated building envelope. All buildings, structures, or storage of any type will be confined to this area on each lot.

A landscaped/irrigated zone with a minimum depth of 30 feet is required around all dwellings. This landscaped/irrigated zone must utilize fire retardant/resistant landscaping. For additional fire protection, the landscaping within the building envelope should be thinned and maintained so as not to present a hazard to the homeowner or adjacent property owners.

The landscaped/irrigated zone may encroach into the transition zone. All disturbed areas within the building envelope that are not landscaped, will be revegetated with a combination of native shrubs, grass, and wildflower seed mixtures specified in this document. The relationship between building envelopes is designed to provide an open space corridor and to provide necessary space for additional possible division of the property. (Refer to the Individual Lot Concept, Figures 1-A through 3-A pages 4-14.)

Transition Zone
The designated transition zone portion of the lot provides an extension of usable yard area but does not permit structures. The zone provides a transition from the open space to the developed portion of each lot. The only fencing that shall be permitted within the transition zone is Open Ranch Style Fencing, White Rail PVC Fencing, or temporary painted-metal panelized fencing. The landscaping for the transition zone has been considered under and is incorporated into the Water Allocation. Horses and 4-H animals are limited to the transition zone and building envelope unless pasture has been provided by securing the requisite water rights.

Open Space
Please see Plate 9 map, Appendix D, which shows the proposed open space, trails and the golf course in the Warm Springs master plan.

The designated open space portion of each lot will be left undisturbed. All open space areas shall be maintained by the individual property owner. These open space corridors are designated to protect the existing, rural character of the valley. Open space areas may continue existing, established agricultural or ranching uses and are exempt from the limitations imposed by the section on "Animals" later in this Development Standards Handbook.
No use of motorized vehicles, other than vehicles actively engaged in ranching or farming activities, is allowed within the designated open space areas. Open space corridors may be utilized as a non-motorized trail system for equestrian use. The only fencing that shall be permitted within the open space area is Open Ranch Style Fencing, White Rail Synthetic Fencing, or temporary painted-metal Panelized Fencing. Water rights, in accordance with the Optional Water Usage Landscape (see page 20 under Water Allocation), must be purchased for maintenance of pasture for animals enclosed within the open space. The open space in the Warm Springs Specific Plan shall be left in natural vegetation or agricultural use. If disturbed, it shall be reseeded as specified in the section on Revegetation of Open Space/Drainage ways. Plant selection should include only drought tolerant and low water demand material (refer to plant list in Appendix A). These attributes contribute to the decreased average annual residential water demand that is mandated for implementation of the Warm Springs Specific Plan.

View sheds
The proposed building envelopes, as illustrated by Figure 1-A, page 4, Figures 2-A, page 5, and by 3-A, page 11, are staggered and setbacks are increased to afford views and vistas from each building envelope to the surrounding valleys and mountains.

Architecture
All buildings must incorporate an architectural theme or identity that is complementary and compatible with the Warm Springs Specific Plan area and its surroundings. All building plans shall be submitted to the WSSP Architectural Review Committee to ensure this policy is enforced in a way that encourages creative design. No mobile homes are allowed except for construction purposes. To enhance the development and maintain the rural character, buildings and structures shall adhere to the following guidelines. (Refer to Conceptual "Western Ranch" Theme Home, Figures 8a and 8b page 20.)

Exterior Walls and Trims
Building materials must support the "western ranch" theme and be approved by the WSSP Architectural Review Committee. Exterior siding and wall colors must be earth tone and harmonize with the surrounding landscape. No gloss finishes are allowed.

Large unbroken expanses of the same wall material shall be avoided. Trim shall be used on all exterior walls to create highlight and shadow. All reflective material (e.g., chimney stacks, flashings, exhaust vents and pipes, etc.) must be painted to match or blend with surrounding materials.

BOULDER ENVELOPE

5 ACRE CONCEPT
Roofing Materials shall be earth tone and of a color that harmonizes with the surrounding area and color scheme of the structure. To support an architectural theme consistent with the Warm Springs Specific Plan, building materials for roofs shall be limited to slate, concrete tile, or architectural composition, extra-dimensional 30-year roofing. Flat roofs shall not be allowed. Metal non-reflective and colored roofs may be permitted with Architectural Review Committee approval. All reflective material (e.g., chimney stacks, flashings, exhaust vents and pipes, etc.) must be painted to match or blend with surrounding materials.

Building Heights
To promote an architectural theme consistent with the Warm Springs Specific Plan, single story homes are encouraged, but all homes shall be limited to two stories and, in accordance with Washoe County Development Code requirements, 35 feet in height. (Refer to Conceptual "Western Ranch" Theme Home, Figures 8a and 8b, page 20.)

Completion of Construction
Construction of any improvement, once commenced, shall be pursued diligently to completion within 18 months of commencement. Improvements not so completed or upon which construction has ceased for ninety (90) consecutive days or which have been partially or totally destroyed and not rebuilt within a reasonable period shall be deemed nuisances. The Homeowners Association may remove any such nuisance or repair or complete the same at the cost of the owner provided the owner has not commenced required work within thirty (30) days from the posting of a notice by the Homeowners Association to commence such work upon the property. Such notice shall state the steps that will be taken to eliminate the nuisance.

Miscellaneous Animals
No more than four (4) Horses or 4-H animals, limited to cattle or sheep, will be allowed. Such animals will only be permitted within the building envelope and transition zone unless additional water rights are acquired for pastureland within the open space. Adequate ground cover to eliminate dust and prevent erosion shall be maintained at all times. As many as four (4) customary household pets are allowed provided they are not kept for commercial purposes and are kept reasonably confined so as not be become a nuisance. Horses, animals, and household pets shall not unreasonably interfere with the comfort, privacy, or safety of other properties. Animals shall be kept in accordance with Washoe County rules and regulations. The homeowners association shall have the authority to determine whether the animals unreasonably interfere with the comfort, privacy or safety of other properties.
Homeowners may provide irrigated pasture as an exercise area or for supplemental feed in which the animals may be kept when not stabled or corralled. Livestock may be considered an optional use for water allocated for landscape use. Pasturelands for animals will require additional water rights to be dedicated to Washoe County. Irrigated pastures require additional water rights at 4 acre-feet/year per acre. 1-1/4 acres of irrigated pasture would require the dedication of a total of 5 acre-feet of water. (Refer to Optional Usage Water Consumption Table A & B, pages 30-31 in the Landscape/Irrigation Section.)

Travel Trailers, Motor Homes, and Boat Storage
Travel trailers, motor homes, other recreational vehicles, or boats and trailers may only be stored within the building envelope. This may occur either within enclosed structures or in the side or rear yards if such yards are completely screened from any street, lot parcel, or open space area and the minimum distance from the screening material maintains the zoning requirements for that yard. Screening shall be consistent with the designated neighborhood privacy fence. (Refer to Figure 5 page 19) The architectural review committee will approve all fencing material.

Utilities
All individual services to each unit for all lot sizes shall be underground from the neighborhood service line. All on site utility lines to outbuildings, detached accessory structures, pump houses, etc., shall be underground.

Mailboxes
Individual property owners will not have US Mail delivered to their property. The Post Office has community mail boxes located at Grass Valley Road and Whiskey Springs Road 1/2 mile from proposed project. Per the post office if needed more community mail boxes will be put in place at that location.

Garbage and Refuse Disposal
There shall be no burning of trash, garbage or other like household refuse, nor shall any property owner accumulate on their lot junked or unsightly vehicles or litter, refuse or garbage, except in receptacles provided for such purposes.

Concealment of Fuel Storage Tanks and Trash Receptacles
Fuel storage tanks, limited to propane or heating oil and every receptacle for ashes, trash, rubbish or garbage shall be so placed and kept as not to be visible from any street, lot, parcel, or open space except at the times when refuse collections are made.

Antennas
Satellite dishes and home radio antennas shall be screened from view from any adjacent parcels, streets, or open space by locating in side or rear yards behind screen fences at a minimum. Screen fences for this purpose shall maintain the minimum distance from the screening material to that yard property line that meets the zoning requirements.
Nuisances
No noxious or offensive activities, odors, or nuisances shall be permitted on any lot or parcel in the development. No refuse, animal manure, unsightly or abandoned vehicles, debris, noxious materials, discarded personal effects, and construction materials not for immediate use shall be permitted on any lot or portion thereof. It is incumbent upon all property owners to maintain their lots and yards in a neat, orderly, and well-manner, whether said lots are vacant or improved. The Homeowners Association shall be responsible for timely enforcement for this provision.

Conservation
All building construction shall utilize methods of energy conservation and the use of low water demand features. Table 1 provides a list of recommended and mandatory energy and water conservation features, which will be incorporated into the building construction.

<table>
<thead>

¹ Upon approval of the Washoe County District Health Department.

Building design and orientation shall be considered in conservation of energy. All buildings will be designed and oriented to benefit from passive solar heating if practicable. Passive solar construction guidelines and energy conservation measures for Northern Nevada are available through the Sierra Pacific Power Company.

Homes will be designed to utilize the following minimum guidelines of energy conservation in site and architectural design. Simple alterations in building design can enable the use of the sun, wind, landform, and vegetation to provide for supplemental heating, cooling, and insulation for a structure.

Energy Conservation Guidelines
All buildings should be located and oriented to benefit from passive solar heating. The desirable exposure is towards the south, southeast, or southwest. The simple east-west orientation of a rectangular building in northern Nevada has been found to reduce energy consumption by 40%. Site development should use plant materials and landforms to enhance energy conservation. Coniferous trees planted along the windward side of the property can act as a windbreak to deflect winter winds. Shrubs and trees planted against the structure can help to insulate the building. Deciduous trees planted on the south side of the structure will shade the building during the summer and enable sun to penetrate during the winter. The creation of earth berms on the windward side can reduce heat loss due to wind and help to insulate the structure. (Refer to the Minimum Landscape Elements - Figure 3-A page 11) The structure should be designed to keep energy needs for heating and cooling to a minimum. Passive energy conservation measures include the following:

Good insulation.
Location of active living spaces on south side
Location of closets, mud-room, garages, or storage space on north and east sides
Air-lock entries
Concentration of windows on south side
Reduction in number and size of openings on north side.
Maximum use of double-glazing
Building overhangs to shield windows from summer sun and to admit winter sun
Use of paved surfaces, rock or masonry on south side to absorb radiation

Active solar energy systems shall be permitted if the solar panels are integrated into the architectural design. If not integrated into the roof or body of the structure, they may not be placed on the roof and they must be screened from public view.
Domestic Water Allocation

The Warm Springs Specific Plan mandates compliance with a per lot water allocation. The designated water allocation for this project is 1.12 acre-feet/year per lot, which is equivalent to 364,896 gallons per year. Domestic water use for the average household is 70,260 gallons per year and landscape water use is at a minimum of 75,208 gallons per year. This leaves 217,428 gallons of water for selection of optional landscape elements. Livestock pasture irrigation may require dedication of additional water rights beyond the 1.12 acre-feet/year. Each lot owner is required to incorporate the following list of minimum required landscape elements into their landscaping. No less than 50% of the required landscaping shall be oriented to the front yard of the lot.

The plant selection includes only drought tolerant and low water demand material. Those aspects of the permitted plants contribute to the decreased average annual residential demand for water that is mandated for implementation of this plan.

The landscaping and irrigation plans must be submitted to the Architectural Control Committee for review and approval. This should be done at time of building permits for structures but may also be done separately.

The minimum landscape elements for each lot shall be:

2,000 square feet of lawn area. Half of which can be in the rear yard.
5 evergreen or deciduous trees within the front yard setback (1 must be a specimen tree, (15 gallon minimum); 5 deciduous or evergreen trees within the building envelope (15 gallon minimum); 12 evergreen shrubs (1 gallon minimum); and 12 deciduous shrubs (1 gallon minimum.)

A minimum of-five (5) trees are required within the front yard(s) as defined by Washoe County Code. Plant material per neighborhood, should be kept similar to strengthen neighborhood unity and identity. (Refer to Figure 3-A, page 11)

For a list of suggested shrub/groundcover and trees for home owner review, see Appendix A.
The required landscape elements, plus the estimated domestic water use, utilize approximately 147,468 gallons per year. 217,428 gallons per year remains for optional use.

Table 2

<td>147,468 gal.</td>
</tr>
</tbody>
</table>

Table 2A provides a list of optional water use estimates for differing types of landscaping. These may be used in any combination on any lot provided the water allocation per lot is not exceeded. The intent is to mandate compliance with the designated water allocation while at the same time providing alternatives to permit variety in individual landscape designs. The plant selection includes only drought tolerant and low water demand material. Those aspects of the permitted plants contribute to the deceased average annual residential demand for water that is mandated for implementation of this plan.
Selection of materials should contain a mixture of plants with fast, medium and slow growth rates and a variety of sizes should be planted to provide a more natural appearance.

All surface water drainage ways within the subdivision shall be graded to resemble a natural drainage swale and incorporated in the overall design. There will be no linear, uniform width drainage ways. Drainage ways should be lined with native wildflowers, grasses, shrubs, and scattered rocks and boulders to slow water velocities.

The amount of water required for one acre of pasture irrigation is 4 acre-feet/year. For 1 1/4 acres of pasture, a total of 5 acre-feet/year is required. As many as 5 acre-feet/year per lot of water rights may be permitted through the State Engineers Office. These water rights will be used to irrigate the pasture and/or livestock on each lot.

<td>29,645 gallons</td>
</tr>
</tbody>
</table>

*The Water Allocation for Pasture applies only when additional water rights have been purchased from a private party and transferred to the receiving parcel by the State Engineer.*

As long as no more than 1,800 gallons per day are utilized, additional optional landscaping may be installed. The total utilization does not equal 364,896 gallons due to the fact that much less water is used during the winter months. (Refer to Optional Landscape use Table 2-A)

Additional information on the constraints placed upon the use of water and the standards employed are located within the Warm Springs Specific Plan (WSSP) are included with this document as Appendix B, Excerpted and Abridged Information from the Warm Springs Specific Plan.
Maintenance
All plant material and lawn areas shall be kept in healthy condition. Any dead plant material shall be removed and replaced within 30 days.

References
Appendix B includes an abridged excerpt from the Warm Springs Specific Plan that explains the water budget for the hydrographic basin and provides part of the rational for stringent landscaping and irrigation requirements. The excerpt has been slightly amended from the text of the actual plan to reflect some updates and actions by the State Engineer.

Revegetation of Open Space/Drainage ways
All open space areas, other than those in agricultural use, shall be left in native material.

Areas designated as Open Space that are currently in agricultural use will allow grading. If noxious weeds are in abundance, the owner may employ a weed management plan developed by an appropriate land reclamation specialist. As development occurs and agricultural practices are abandoned, it will be the property owner’s responsibility to ensure that these areas will be over-seeded with a native grass mixture as described in Table 3, page 14. A gradual transition of plant material is desired.

The soils and precipitation in Warm Springs Valley greatly reduce plant species available for revegetation. The species selected will survive with no supplemental irrigation water being applied after establishment. After two years there will not be any temporary water to the revegetation. The revegetation seed mix should be tied to the agricultural soils and modified as recommended by the seed company.

Indian Ricegrass must be drill seeded at 3-4 inches below the surface. Pubescent Wheatgrass and Globe Mallow should be drill seeded to a depth of one-half inch below the surface. Kochia and Winterfat should be hydro seeded.

Basin Wildrye (elymus cinereus) should be substituted for ricegrass in clay soil areas. Wildrye is not adapted to shallow soils and placement should be monitored. The seed should be drill seeded no deeper than 1/2 inch below the surface. Wildrye will require more supplemental irrigation water than ricegrass during the first year, but once established well survive with no additional water.

Seeding should be completed during late fall. This will assure seed is placed ready to germinate when soil moisture and temperature conditions are ideal the following spring. Temporary above-ground irrigation is not recommended but may be necessary in order to establish plants if seed is installed during summer months.
To improve establishment chances, seeded area should be hydro mulched at a rate of 1,000 lbs./acre with 180 lbs./acre of tackifier added. Supplemental irrigation water can be applied the first growing season. Irrigation should be light and infrequent. This will promote root development that will be essential once irrigation water is eliminated. Water used for this purpose must be deducted from the given available water. After the system is abandoned, the water may be relocated to other uses.

### Irrigation

#### Irrigation Requirements

Each residential lot will be required to install an irrigation system with automatic controller and back flow prevention device to meet Washoe County/State health codes. The irrigation system shall include an overhead spray system for any turf areas, with uniform head to head coverage and matched sprinkler head precipitation rates. Temporary irrigation systems may be in use for two (2) seasons only. The system shall also include a drain down method for winterization. All trees, shrubs, and ground covers shall be watered with standard controllers allowing each tree, shrub, or ground cover to be watered with individual drip emitters or collectively in groups with micro sprayers.

### Landscape and Irrigation Plan Submittal Requirement

Each future homeowner or builder will be required to submit landscape, grading, and irrigation plans to Homeowners Association and the Architectural Review Committee for approval as a part of the building permit application process. The plans shall be prepared by a qualified landscape industry professional, landscape contractor, or a landscape architect.
The landscape plan shall include a site base map prepared to a 1″=20′ minimum scale with
the house and driveway footprint, property lines, utility locations, etc. This base map must
clearly show proposed landscape areas with square footage area calculations to meet the
water usage requirement specified in this document. In addition to the above, the landscape
plan must include:

A plant species list keyed to plant locations on the plan. The plant list must include
plant sizes and quantities;
The amount of water calculated for established landscape;
An indication of surface material(s) in non-landscaped areas; and
Agricultural soils test results and proposed soils improvement/amendment methods.

The irrigation plan shall be prepared to scale on the same base map as the landscape plan. The
irrigation plan must include the following:

Point of connection to water source;
Location, type of installation detail of back flow prevention device;
Remote control valve location, manufacturer’s name, product number, size and
gallons per minute for each lateral zone;
Irrigation main and lateral line type, size, and depth of bury;
Sprinkler head locations, manufacturer’s name, product number, nozzle size and
number, radius gallons per minute and pounds per square inch (psi) operation rate;
Drip system valve locations and sizes, lateral line type and location, emitter type,
product number, and amount per plan and;
Controller’s manufacturer’s name, product number, and installation location.

The grading plan shall be prepared to scale on the same base map as the landscape and irrigation
plan. The grading plan must include the following:

Limits of grading and construction;
Dust control plan/permit measures required by Washoe County Code.
Existing and proposed contours, including berming for energy conservation and
drainage away from structures;
Paving or surface treatment for walkways and driveways;
Location and type of temporary fencing to protect open space and native vegetation
from construction traffic; and
Revegetation of disturbed areas, seeding quantity, and need for temporary irrigation.
The revegetation seed mix should be tied to the agricultural soils test and modified as
recommended by the seed company.
Maintenance
All irrigation systems shall be maintained in good operating condition. The irrigation system shall be extended to any new plant material at the time of installation.

Within twelve (12) months of completion of the main dwelling unit, each lot or parcel shall be completely landscaped with automatic irrigation systems in place and operating. All landscaping shall be maintained to harmonize with and sustain the attractiveness of the development.

Fencing
General Considerations:
All property from the building envelope to the street shall be kept free and open. Fencing will be consistent within the neighborhood for this development. Wood fencing will be treated with a light or medium brown stain that will increase wood durability. Stains should be consistent in tone on the individual properties but no one property will be required to match exactly with neighbors. Owners are required to keep fencing in good working order and have a well-maintained appearance. The type of fence will be controlled by the Architectural Review Committee.

Solid Wood or Synthetic Material (with the appearance of wood) Privacy Fence:
Privacy fence with a height of up to 6 feet, may be constructed within the building envelope as long as it is limited to the rear of the house. Such a fence may be used in the side yard for screening such features as RV storage area, satellite dishes, trash receptacles, fuel storage tanks, dog runs, or a patio. Otherwise, side yards will not be enclosed with a privacy fence. Fences should tie into a structure or other terminus point. (Refer to Privacy Fencing, page 19 under Figure 5.)

Open Ranch Style Fencing:
May be used in the side and rear yards within the building envelope, transition zone, or open space, may be used to define space and circulation areas or accent gardens and will be limited to no more than four feet in height. (Refer to Split Rail Fencing, page 19 under Figure 7) The fencing should be of a consistent height and end at some transition point such as the house. The fencing may be stained but not painted.

White Rail Synthetic Material Fencing:
This material may be used to enclose pasturelands, stable runs, corrals, and the perimeter of the property other than in the front yard area between the residence and the street. (Refer to White Rail Fencing, page 19 under Figure 6.) White rail PVC fencing may also be constructed within the designated building envelope in substitute for the Open Ranch Style Fencing. Fencing for pasture beyond the limits of the building envelope will not be permitted unless pasture is established and grasses are irrigated in accordance with Table 2A, (page 12). Under this scenario, pasture fencing may be the white PVC rail and the irrigated pasture area should adjoin the building envelope on at least two sides.
Chainlink Fence, Woven Wire, or other wire fence:
This fence material may be used for backyard pet enclosures, vegetable gardens, or swimming pools. (Specialty fences, in accordance with Washoe County Code.) The wire fencing, posts, and rails will be vinyl or plastic coated in a color to harmonize with building colors, or be a dark brown or black. No barbed wire fencing will be allowed.

Exterior Lighting.
The functional objectives in providing exterior area lighting are to illuminate areas necessary for safe and comfortable use. In certain situations, area lighting can add to the aesthetic appeal of a site by highlighting architectural features of a building or illuminating pathways and landscape plantings. In these instances, only the special features of a building or landscape should be illuminated. It should be noted that the standards and guidelines contained in this section address area lighting on individual properties, and not overhead street lighting along public and private rights-of-way.

Standards.
Exterior lights shall not blink, flash, or change intensity. String lights, building or rooftop tube lighting, reflective or luminescent wall surfaces are prohibited. Exterior lighting shall not be attached to trees except for the Christmas season. Driveway, walkway, and building lights shall be directed downward. Fixture mounting height shall be as low as possible and appropriate to the purpose illumination for aesthetic or dramatic purposes of any building or surrounding landscape utilizing exterior light fixtures projected above the horizontal is prohibited. Seasonal lighting displays and lighting for special events which conflict with other provisions of this section may be permitted on a temporary basis.

Guidelines.
Lighting Design
Exterior lighting should be designed as an integral part of the architecture and landscape and should be located in a manner that minimizes the impact of lighting upon adjacent structures and properties.

Lighting Levels
Avoid consistent overall lighting and overly bright lighting. The location of lighting should respond to the anticipated use and should not exceed the amount of light actually required by users. Lighting for pedestrian movement should illuminate entrances, changes in grade, path intersections, and other areas along paths, which if left unlit, would cause the user to feel insecure. Lighting suppliers and manufacturers have lighting design handbooks that can be consulted to determine fixture types, illumination needs, and light standard heights.

Fixture Design
Exterior lighting fixtures should be simple in design and should be well integrated with other architectural site features.

Structural Lighting
Night lighting of building exteriors should be done in a selective fashion: highlight special recognizable features; keynote repeated features; or use the play of light and shadow to articulate the facade. The purpose of illuminating the building should be to add visual interest and support building identification. Harsh overall lighting of a facade tends to flatten features and diminish visual interest.

Lighting Height
As a rule, the light source should be kept as low to the ground as possible while ensuring safe and functional levels of illumination. Area lighting should be directed downward with no splay of lighting directed off-site. The height of light fixtures of standards must meet Washoe County standards. Lighting should be directed downward in order to avoid sky lighting. Any light source over 10 feet height must incorporate a cutoff shield to prevent the light source from being directly visible from areas off-site. The height of luminaries should be in scale with the setting.

Permitted Land Uses.
High Density Rural
Minimum Lot size 2.5 acres.

Construction of Extension of Grass Valley Road.
Grass Valley Road will be constructed to Palomino Valley General Improvement District standards, for their consideration for acceptance and maintenance.

Legal Description

All that real property situated in the County of Washoe, State of Nevada, described as follows;

Parcel 16-2-1-1, as shown on Record of Survey map filed in the office of Washoe County Recorder, Washoe County, Nevada on October 29, 1975, under file No. 383409, 383410 and 383412 and Division of land map filed October 29, 1975, under file No. 383418, Palomino Valley Unit 1.

A portion of the North West 1/4 Sec 16 township 22 North, Range 21 East M.D.E. & M; in the county of Washoe, state of Nevada, being more particularly described as follows;

Commencing at the NW corner of Sec 16; then South 89 Degree 28' 24" East, 46.12' thence S 89 Degree 28' 26E 2,603.98 feet thence N 1 Degree 01' 36E 1,321.95 feet, thence S 89 Degree 29' 20" E 2,025.00 feet thence North 416.50 N 37 Degree 21' 36" West 1,066.96 feet to true point of beginning.

APPENDIX B
APPENDIX B

EXCERPTED AND ABRIDGED INFORMATION FROM THE
WARM SPRINGS SPECIFIC PLAN

WATER BUDGET

INTRODUCTION
The Specific Plan Area (SPA) is within the Warm Springs Valley Hydrologic Basin No. 84. The average annual precipitation in the basin is estimated to be 9.76 inches. There are no perennial streams in the SPA, but intermittent external drainage to Pyramid Lake does exist. The Nevada State Engineer has designated the Warm Springs Valley Basin as an area requiring additional water resource supervision. Various reconnaissance level studies have been conducted to estimate the potential amount of groundwater resources in the basin.

In general, an estimate of the available water resource and the current consumption patterns will be used to identify the total number of residential dwelling units and commercial or quasi-public uses that can be served from the available supply. Land areas have been identified based on the maximum number of residential dwelling units and desired development densities achievable based on the water available to the SPA and the location of existing water rights. The total number of acres assigned to each land use category, with appropriate allowance factors, will provide an adequate base to develop the projected number of residential units at buildout.

It is important to recognize that new techniques are being developed to improve in the prediction of safe groundwater yields. The estimates used in this plan will probably be superseded with new information resulting in the need for refined land use allocations. This water budget, therefore, is a useful tool for generating a plan for the Wan Springs SPA, but it should not be considered as the final water budget for the basin.

Specific Plan 3,000 ACRE FEET PERENNIAL YIELD
The position of the State Engineer is that only the Water Resources Reconnaissance Series Report No. 43 can be used to establish the perennial yield for the basin. This report specifies 3,000 acre-feet as the perennial yield. The perennial yield is the amount of water that is naturally replenished when a long-term average is considered.

The following table, Table A-4, establishes the water allocation for the SPA when 3,000 acre-feet is used as the planning perennial yield. The table summarizes the Warm Springs Area Plan Water Budget, and details the allocation remaining for the SPA.

Residential

According to the current Warm Springs Area Plan, the subdivision of parcels creating new residential lots on individual domestic wells will require the dedication of 2.5 acre-feet/year (AFY) of water rights to Washoe County. The residential section of the budget is based on allocating water available per residential lot on an individual well at 1.12 acre-feet/year. This number is based on a mandatory water conservation program with low water demand vegetation landscaping and low demand water fixtures in the "Warm Springs Area Plan" of the Washoe County Comprehensive Plan dated December 3, 1991, page 5B, paragraph 2 and Action Program WS.4.6.1. The water use calculation is based on the following water consumption elements:

1. **Domestic Use**
   a. The average per capita domestic water use (not including irrigation) is 77 gallons/person/day. This is based on a non-conserving household. A conserving household using water conservation fixtures will reduce the domestic per capita water use to 60 gpd. Using current technology, ultra low flow fixtures could reduce domestic per capita water consumption to 52 gpd. (Source: "Residential Water Conservation Project, Summary Report" by Brown and Caldwell, June 1984.)
   b. The average household size is projected to be 2.5 persons.
      77 gallons/day x 365 days x 2.5 people =
      70,262.5 gallons/house/year =
      0.216 AF/house/year
   c. A monitoring system will be required to determine actual use and mandate design and allocation changes based on actual use. The monitoring system should include tensiometers on trees/shrubs at sample facility.

2. **Landscape Irrigation Use**
   a. Lawn Watering

   The watering requirements for the Warm Springs area are determined as follows:
Water 0.5" twice per week for 16 weeks; water 0.75" twice per week for 12 weeks during the summer months. For a 100 square foot lawn area, we used the following calculation:

\[
\begin{align*}
(\ & - 5 \times 2 \times 16 \times .62'' = 9.92 \times 100) = \\
(\ & .75 \times 2 \times 12 \times .62'' = 11.16 \times 100) = \\
992 \text{ gallons} & \\
1116 \text{ gallons} & \\
2, 108 \text{ gallons} & \\
\end{align*}
\]

(*1" of water applied to one square foot surface area = .62 gallons)

b. Trees and Shrubs

The shrub and tree water consumption budget figures were determined using the following method:

The bermed saucer watering area of a mature tree was determined to be 4' diameter (3 for mature shrubs). The area of a 4' diameter saucer equals 12.5 square feet (7 sq. ft. for shrubs). The square footage area was multiplied by two feet to represent the preferred depth of watering to promote deep root growth and resistance to adverse conditions. This number represents cubic foot volume of soil to be watered, which is multiplied by the water holding capacity of the soil (1.33 gallons per cubic foot of clay loam soil, Source: "Effectively Irrigating Landscape Trees" by Janet Hartin). The resulting number of gallons represents the amount of water to be applied per watering:

- mature tree (12.5 s.f. x 2 x 1.33 gallons = 33.25 gallons) mature shrub (7.0 s.f. x 2 x 1.33 gallons = 18.60 gallons)

The watering frequency was determined as follows:

For an evergreen tree or shrubs, water twice per week for the 12 week summer season, once per week for the remaining 16 weeks of the growth season and twice per month for the additional five months of the year,

\[\text{evergreen trees and shrubs (2 x 1.2) + (1 x 16) + (2 x 5)} = 50 \text{ waterings} \]

For a deciduous tree or shrubs, water twice per week for the 12 week hot summer season and once per week for the remaining 16 weeks of the growth season. No additional water is required for the winter months.

\[\text{deciduous trees and shrubs (2 x 12) + (1 x 16)} = 40 \text{ waterings} \]

The per tree water consumption budget figures are then derived by multiplying the amount of water per application times the watering frequency =

- evergreen tree 33.25 gallons x 50 waterings = 1,662 gallons
- evergreen shrub 18.60 gallons x 50 waterings = 930 gallons
- deciduous tree 33.25 gallons x 40 waterings = 1,330 gallons
- deciduous shrub 18.60 gallons x 40 waterings = 744 gallons

We have averaged the yearly water consumption of mature deciduous and evergreen trees to determine the budget amount per tree in our figures (1,496 gallons). The average yearly water consumption of mature deciduous and evergreen shrubs equals 837 gallons.
The intent of the plan is to mandate compliance the per lot water allocation while at the same time providing alternatives to permit variety in individual landscape designs. The following chart provides a list of optional water use estimates that can be used in any combination on any lot provided the water allocation per lot is not exceeded.

<table>
<thead>

<td>1 each</td>
<td>1,350 gallons</td>
</tr>
<tr>
<td>Evergreen Tree</td>
<td>1 each</td>
<td>1,662 gallons</td>
</tr>
</tbody>
</table>

3. **Animal Use**

Livestock uses an average of 20 gallons of water per day:

\[
20 \times 365 = 7,300 \text{ gallons/animal/year}
\]

Per Policy WS.3.1.A, uses such as pastures, require dedication of water rights in addition to domestic rights.

4. **Residential Water Use**

Residential water usage figures by average lot size are fisted utilizing the following water demand figures.

**Lawn:** The water requirement for lawn areas is as follows:

Water 0.5" twice per week for 16 weeks and water .75" twice per week for 12 weeks during summer months

\[
(0.50 \times 2 \times 16 \times 0.62^* = 9.92 \text{ sq. ft.}) = \text{gallons per 16 weeks}
\]

\[
(0.75 \times 2 \times 12 \times 0.62^* = 11.16 \text{ sq. ft.}) = \text{gallons per 12 weeks}
\]

\[\text{gallons total per season}\]

\[\text{(* 1" of water applied to one square foot surface area = .62 gallons)}\]

**Tree:** Number trees X 1,496 = gallons per season

1,496 = an average of deciduous and evergreen trees from Table A-8

**Domestic Use:** Average household gallons per day based on 2.5 persons per household.

a. 2 acre and larger - 4.12 acre feet/year = 364,930 gallons
The recommended limit of lawn area for the 2-2 1/2 acre or larger lots is 4,000 square feet.

\[
\begin{align*}
9.92 \times 4,000 &= 39,680 \text{ gallons} \\
11.36 \times 4,000 &= 444,640 \text{ gallons} \\
\end{align*}
\]

The plan requires five trees per lot:

\[
5 \times 1,496 = 7,480 \text{ gallons}
\]

Domestic use = 70,260 gallons

162,060 gallons

364,930 gallons

-162,060 gallons

202,870 gallons

Optional uses: This leaves 202,870 gallons for selection of optional landscape elements (see Table A for landscaping usage figures).

5. **Irrigation Requirements**

Each residential lot will be required to install an irrigation system with automatic controller and backflow prevention device to meet Washoe County/State health codes. The irrigation system shall include an overhead spray system for any turf areas, with uniform head to head coverage and matched sprinkler head precipitation rates. The system shall also include a drain down method for winterization.

All trees, shrubs, and groundcovers shall be watered a drip system with a separate control clock or a dual program controller. Each tree, shrub, or groundcover shall be watered with individual drip emitters or collectively in groups with micro sprayers.

End of Excerpt
APPENDIX D
DEVELOPMENT AGREEMENT
Washoe County and LW Land Company, LLC

This Development Agreement (the "Agreement") is effective on the date of recordation by Washoe County of this Agreement following its adoption by ordinance by the Washoe County Board of Commissioners ("Effective Date"), and is entered into by and between Washoe County, Nevada (hereinafter "County") and LW Land Company, LLC his agents and successors including developers and eventual subdivided-parcel-owners (hereinafter "Owner") (collectively hereinafter the "Parties").

WITNESSETH:

WHEREAS, the County is authorized, pursuant to Nevada Revised Statutes ("NRS") 5278.020, et seq., and Washoe County Development Code ("Code") 110.814.00, et seq., to enter into binding development agreements with persons having legal or equitable interests in real property for the purpose of establishing and strengthening long range plans for property development and providing for developer funding of certain public facilities to serve new development;

WHEREAS, Owner represents that he has complete and sole fee title ownership of the subject real property, the legal description of which is set forth on Exhibit "A" attached hereto and shown in the next identified exhibit (hereinafter the "Property");

WHEREAS, Owner has submitted and County has tentatively approved the initial preliminary parcel maps for development of the Property ("Project"), copies of which are attached hereto as Exhibit "B" ("Maps"), and the expiration dates of which were recently extended by the parties until October 10, 2017 pursuant to an "interim development agreement" and ordinance approved by the County;

WHEREAS, the Parties desire to enter into this Agreement in accordance with NRS and Code, as applicable, to promote the health, safety and general welfare of the County's inhabitants; to help provide some public services, uses and infrastructure, for which Owner voluntarily offers to pay, to secure to Owner certain land development safeguards and rights, and to achieve the goals and purposes for which development agreement law was enacted;

WHEREAS, it is further the Parties' desire that this Agreement satisfy certain of the infrastructure and development provisions of the County's specific plan for part of the general...
WHEREAS, the County is underway with a review and update of the formal area plan for the general Warm Springs area ("Area Plan"), which may produce significant changes to the WSSP this year, including possible updated fees and schedule, different development vision, and altered infrastructure needs and financing structure.

NOW, THEREFORE, the Parties agree as follows:

1. **Incorporation of Recitals.** The foregoing recitals are incorporated herein by this reference and shall aid in the interpretation of this Agreement.

2. **Permitted Uses, Density, Height, and Size of Structures.** Pursuant to NRS 5278.0201 and Code 5110.2.14.20, this Agreement must set forth the maximum height and size of structures to be constructed on the Property as well as the density of uses and the permitted uses of the land. The Parties agree that the Property shall be divided and the Project constructed strictly for single-residential purposes in accordance with the Maps, the WSSP, the Code, and the NRS all in effect on the date of the County’s tentative parcel map approval of the Maps and as reflected in this Agreement, including its attached exhibits. Owner shall subdivide to a density only as shown on the Maps. However, Owner and his successors reserve the option to further subdivide the Property and its parcels in the future, pursuant to then existing law, if and when the WSSP, Area Plan, Code and the Washoe County Health Department permit it. This Paragraph 2 is, however, made subject to the provisions of Paragraph 6 below.

3. **Development And Infrastructure.**

3.1 **Development Standards Handbook.** The Parties have jointly drafted, in accordance with the Code and WSSP, the Project’s Development Standards Handbook ("Handbook"), which is attached hereto as Exhibit "C" and incorporated herein by this reference. Construction and use of the Project shall be in accordance with the Handbook.

3.2 **WSSPHOA & CC&Rs.** As set forth in the WSSP, the Property shall be made subject to a master homeowners’ association and master declaration of covenants, conditions and restrictions ("cc&rs") governing the entire WSSP area for the purposes identified in the WSSP, until the related WSSP requirements are modified or repealed, if at all, through the Area Plan update process. The association and the cc&rs shall be completed to the satisfaction of the County Community Development Department and the Washoe County District Attorney.

3.3 **Disclosure Statement.** The Parties have jointly drafted, in accordance with the Code and WSSP, a Disclosure Statement ("Disclosure"), which is attached hereto as Exhibit "D" and incorporated herein by this reference. The purpose of the Disclosure is to provide all buyers specific information about certain aspects of the WSSP and this Agreement, and how those may affect their long-term ownership. The Disclosure is not intended to be comprehensive in all aspects of the acquisition of certain parcels. It is meant only to provide basic information about aspects of the WSSP and this Agreement that are required to be disclosed. A signed and notarized copy of the Disclosure must be provided to all future property owners and must accompany all building permit applications submitted to the County. The purpose of this
requirement is to ensure that all future owners of property within the Warm Springs community are aware of the requirements of the WSSP and this Agreement.

3.4 Water and Septic. Owner does not intend at this time to subdivide at any greater density than as shown on the Maps, which permits Owner to install septic and well facilities on each new parcel instead of connecting to community water and sewer facilities likely to be built by another area property owner known as the Warm Springs Ranch. Owner waives connection to community water and sewer systems at this time. Owner shall install the referenced septic and well facilities pursuant to applicable law and regulations existing at the time of issuance of each of the related well and septic permits. Owner and his successors may in the future connect to a community water or sewer system, pursuant to then-existing law, if and when the WSSP, Area Plan, Code and the Washoe County Health Department permit it.

4. Financing.

4.1 Infrastructure Related Fees.

4.1.1 Fee Commitments. Owner offers to and agrees hereby to pay all fees described in this Agreement and its exhibits. The duty to pay said fees and any increased or decreased fees negotiated as mentioned below, shall run with the Property and be binding upon and inure to the benefit of the successors and assigns of the Parties. These fees shall be paid to County on or before the time of recording of each final parcel map.

4.1.2 Fee Area. The area encompassed within the WSSP is hereby designated as the "Fee Area" for the imposition of fees and the collection of funds under the provisions of this Agreement.

4.1.3 Special Fee Revenue Fund: Except as otherwise specifically provided in this Agreement, all fees collected pursuant to this Agreement shall be placed in a special, segregated, interest-bearing revenue fund (a "Special Fund") for each fee category and shall be used solely for the purpose of constructing the applicable capital improvements or providing refunds or reimbursements (as defined in Paragraph 4.6 herein) in accordance with this Agreement. The County, through its Director of Community Development and/or its Finance Director, shall maintain detailed records to identify the development(s) from which fees were collected, for which purpose and how said fees were spent.

4.1.4 Fee Changes. So long as the Project does not change from the use described in the Maps and conditions thereto, and except as otherwise provided in this Agreement, the fees set forth in this Agreement shall not increase without the written consent of the Parties except that the fees shall be adjusted to reflect changes in actual construction costs, but only as such costs are adjusted during the regular review of the Capital Improvements Program (CIP) for the WSSP. The CIP is attached as Exhibit "E," entitled Financing Concept Plan for the WSSP, and is incorporated herein by this reference. Notwithstanding this, Owner's fee obligations as defined in this Agreement may be altered or repealed, but not increased, subject however to Paragraph 5 below, by the update to the Area Plan and WSSP, possibly to include refunds of certain fees paid. Owner understands and agrees that no guarantee is expressed herein by the County and that this Agreement does not affect the update process nor ultimate amended Area Plan and WSSP in any respect whatsoever.
4.2 **Fees — Roads, Drainage, Planning, Water, Parks, Open Space, and Utilities.** At the recording of each final map for any phase of the Project, the fees set forth in this Agreement shall be paid by Owner to County, as follows:

4.2.1 **Roadway Fees.** Owner agrees to pay to the County all roadway fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Roadway Fees"). These fees shall be set aside in a Special Fund specifically for the construction of the first phase of the Spine Road or other collector roads as defined in the phasing plan for roadways set forth in Exhibit "E". County shall disburse these fees for the purpose of design and construction of the roadways or to reimburse Owner if Owner constructs collector roads to County specifications. These fees are separate and apart from the Regional Road Impact Fee (RRIF) (Paragraph 4.3.1), which is collected at building permit. The Roadway Fees are also separate and apart from the property owners' current fees collected by PVGD for the maintenance of public roadway easements.

4.2.2 **Storm Drainage Fees.** Owner agrees to pay to the County all storm drainage fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Drainage Fees"). These fees shall be set aside in a Special Fund specifically for the construction of Spine Road Improvements as defined in the plan for storm drainage set forth in Exhibit "E". These fees shall be reimbursed to Owner only if Owner constructs said drainage improvements to County specifications.

4.2.3 **Planning Fees.** Only those planning fees paid pursuant to this Agreement (hereafter "Planning Fees") shall be placed in a Special Fund specifically for the repayment of certain planning costs incurred by particular property owners as noted in the CIP (Page G-xxii of Appendix G of the WSSP). Owner shall be credited Planning Fees as noted in the Fee Schedule attached as Exhibit "F". Pursuant to Paragraph 4.6.2 below, all Planning Fees accumulated in the Special Fund shall be used to reimburse said particular property owners who paid the cost of preparing the WSSP. Owner would otherwise pay Planning Fees as shown in the Fee Schedule (Exhibit "F").

4.2.4 **Community Water System Fees.** Owner agrees to pay to the County all community water system fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Water System Fees"). These fees shall be placed in a Special Fund specifically for the purchase of land for, as well as the design and construction of, the Community Water System as defined in the plan set forth in Exhibit "E". All Water System Fees accumulated in the account shall be applied by the County or other government entity to design and construct this water system or used to reimburse Owner if Owner constructs said system to County specifications.

4.2.5 **Parks and Open Space Fees.** Owner agrees to pay to the County all parks and open space fees shown in the Fee Schedule for the Project attached hereto as Exhibit "F" (hereafter "Park Fees"). These fees shall be placed in a Special Fund specifically for the purchase of land for, as well as the design and construction of, certain parks and open space as defined in the plan set forth Exhibit "E". All Park Fees accumulated in the account shall be applied by the County or other government entity to design and construct the parks and open space or used to reimburse Owner if Owner constructs said parks and open space to County specifications. The Park Fees are separate and apart from the Residential Construction Tax (Paragraph 4.3.2 below), which is collected at building permit.
4.2.6 Public Facilities Fees.—Police and Fire. Owner agrees to pay to the
County all public facilities' fees shown in the Fee Schedule for the Project attached hereto as
Exhibit "E" (hereafter "Facilities' Fees"). These fees shall be placed in a Special Fund
specifically for the purchase of land for, as well as the design and construction of, the police and
fire public facilities otherwise known in and defined in Exhibit "E" as "Community Facilities".
All Facilities' Fees accumulated in the account shall be applied by the County or other
government entity to design and construct these public facilities or used to reimburse Owner if
Owner constructs these facilities to County specifications.

4.3 Existing RTC and County Fees.

4.3.1 Existing RTC Regional Road Impact Fee (RRIF). Owner understands and
agrees that in addition to the Roadway Fees discussed in Paragraph 4.2.1 above, the Project is
subject to the current RRIF, which shall be paid by Owner to County pursuant to applicable RRIF
law at issuance of building permits.

4.3.2 Existing Park Residential Construction (RCT). Owner understands and
agrees that in addition to the Park Fees discussed in Paragraph 4.2.5 above, the Project is subject
to the current RCT for parks to be paid by Owner to County pursuant to applicable RCT law at
issuance of building permits or as otherwise may be lawfully agreed to in by Washoe County
Department of Regional Parks and Open Space. If Owner constructs the parks and open space to
County specifications, then Owner shall be credited or refunded in accordance with such
procedures for credit or refund.

4.4 Credits. The County's Director of Community Development shall make
determinations of credit in accordance with this Agreement. Credits apply only to the respective
Special Fund set forth in Paragraph 4.2 above and shall not be transferable to other Special
Funds. Credits may only be used upon substantiation of the completion of improvements, or in
the case of planning fees, evidence of payment of fees.

4.4.1 Credits for Roadway Fees, Drainage Fees, Water System Fees, Park Fees,
and Facilities' Fees. Credit against fees paid to Special Funds shall be based on the actual cost of
the provision of those facilities or the independently appraised value of the dedication, whichever
is applicable. The actual cost or value shall be credited against the total amount due based upon
the Per Fee Unit that is established by this Agreement and identified in Exhibit F hereto.

4.4.2 Credits for Planning Fees. Only those particular property owners who paid
the cost of preparing the initial WSSP, or their successors, shall be eligible for Planning Fees
credit. Owner is eligible for Planning Fees' credit as one of the original payees and the total
amount of credits for the Maps, assuming all parcels are recorded, is estimated at the amount set
forth in Exhibit F hereto.

4.5 Credit Waiver. Owner must apply any Credits at the time of the filing of a final
parcel map. Owner's failure to do so for a particular final map shall be deemed a waiver of those
Credits to that particular final map. Said Credits may be used on future parcel maps.

4.6 Refund/Reimbursements of Fees.
4.6.1 Refunds. Except as otherwise provided in this Agreement, upon completion of that category's capital improvements as identified in the CIP for the entire WSSP area, the County shall refund to current WSSP property owners all remaining fees in that category's fund (the "Refund"), less an administrative fee equal to the administrative costs incurred by the County. Refunds may be awarded only if: (i) the actual cost of all improvements made in that category of CIP improvement is less than all respective fees paid into that category; (ii) excess funds exist in the Special Fund; and (iii) no additional funds are required to complete the respective improvements required within the WSSP.

4.6.2 Planning Fees Reimbursement. In addition to the Credits provided for in this Agreement, the Owner may choose to be reimbursed for the actual Planning Fees paid through a reimbursement (the "Reimbursement"). However, in no event shall the combination of Credits and Reimbursements total more than the actual Planning Fees paid. Any Reimbursement made shall reduce the amount of Credit available. Conversely, any Credit obtained shall likewise reduce the amount of Reimbursement available. A request for Reimbursement shall be submitted by Owner to the County's Community Development Department within 30 days of the postmark date of notice mailed to Owner of the determination of actual costs made by the County's Director of Community Development. Should the Planning Fees Special Fund not have sufficient funds to allow for full Reimbursement, then the County shall repay, on a quarterly basis, from whatever funds have been collected during the preceding quarter into said fund until the full amount of Reimbursement is paid.

4.6.3 Prorata Refunds/Reimbursements. If more than one valid application for a Refund or Reimbursement is made and approved, the County shall allocate the funds available for reimbursement between the applicants based on the ratio of the actual costs incurred in each respective fee category or the ratio of the planning fees paid by the applicants.

4.6.4 Director's Decision and Appeals. Administrative decisions regarding Refunds or Reimbursements may be appealed by the affected Owner to the Wasco County Planning Commission by filing with the County's Department of Community Development a statement of the grounds of the appeal within ten (10) days of the postmark date of notice mailed to Owner of the administrative decision. The County's Director of Community Development will schedule such appeal on the Planning Commission agenda for the next regularly scheduled meeting occurring at least twenty-one (21) calendar days after receipt of the appeal statement. If the Planning Commission reverses the decision of the Director of Community Development, it shall direct the Director to recalculate the fee in accordance with its findings. In no case shall the Planning Commission have the authority to negotiate the amount of the fee. If the Planning Commission affirms the decision of the Director of Community Development, the affected Owner may appeal to the County Board of Commissioners within ten (10) calendar days of the Planning Commission hearing by filing a notice of appeal with the County's Department of Community Development. The County shall consider and render a decision on the appeal in a prompt manner.

4.7 Dedication and Maintenance of Facilities. Owner may be required to offer certain facilities, to include roadways, for dedication to the County at the time of the filing of a final map. Dedication of facilities or roadways to PVGHD may also be required.
5. **SADs and GIDs.** Owner offers to and hereby agrees to waive protest to participation in any special assessment or general improvement district proceedings and agrees to cooperate fully therewith.

6. **Reliance, Uncertainties and Subsequent Actions.**

6.1 **Reliance by the Parties.** The Parties understand and acknowledge that the other relies upon the assurances, arrangements and promises set forth in this Agreement and its exhibits, all of which permit the construction and completion of the Project in accordance with the terms of and the uses, densities, heights, sizes and other similar matters defined in this Agreement and its exhibits.

6.2 **Uncertainties.** The Parties understand and acknowledge that circumstances beyond the control of either party could defeat their mutual intent that the Project be constructed in the manner contemplated by this Agreement. Among such circumstances is water availability or other limited natural resources, waste disposal limitations, federal regulation of air and water quality, and the Area Plan update and possible amended WSSP. The parties recognize that unforeseeable circumstances could affect each other’s ability to perform obligations hereunder.

6.3 **Subsequent Actions.** Owner acknowledges and agrees this Agreement does not relieve the from compliance with existing, changed, modified or amended rules, regulations, laws, ordinances, resolutions, fees or codes of governmental agencies. Such rules, regulations, laws, ordinances, resolutions, fees or codes of governmental entities must be complied with by the Owner and are not locked in nor a part of this Agreement. Owner further acknowledges and agrees this Agreement does not prevent the County in a subsequent action applicable to the Property from adopting different law, provisions or conditions that do not conflict with the terms in and the law governing this Agreement, except that any subsequent action by the County shall not prevent the development of the Property pursuant to this Agreement. It is not the intent of the Parties nor shall this Paragraph be construed as excusing the County of any obligation hereunder or depriving Owner of any right under this Agreement, which can be performed and without impairment of the County's emergency powers and obligation to obey and enforce state and federal law (Code 110.816.05(c) and (d)).

6.3.1 **Exceptions.**

6.3.1.1 **Amended WSSP.** Notwithstanding this Paragraph 6 and any other contradictory term in this Agreement, Owner understands and agrees that certain possible changes to the WSSP as adopted through the current update process to the Warm Springs Area Plan shall be binding upon Owner, successors and the Property no matter whether the final map or a building permit has been approved or issued; and Owner agrees to immediately cooperate and comply with such changes as may be contained within the updated Area Plan and amended WSSP. This Paragraph 6.3.1.1 is limited to those certain possible changes to the WSSP that concern homeowners' associations, c&rs, water and sewer, non-paved-road maintenance and related costs and fees. This Paragraph 6.3.1.1 shall also constitute a covenant running with the land of the Property.

6.3.1.2 **Public Health & Safety Law.** Notwithstanding this Paragraph 6 and any other contradictory term in this Agreement, Owner understands and agrees that at the time of submission to the County for any map or permit (including without limitation final maps and building permits) related to the Project the then existing laws (whether local, state or federal)
affecting public health and safety (as typically used for example in the building, health and fire codes' sectors) shall apply. This Paragraph 6.3.1.2 shall constitute a covenant running with the land of the Property.

7: Conflicting Laws.

7.1 Conflicting State or Federal Rules. In the event that any conflicting state or federal laws or regulations enacted after the date of this Agreement prevent or preclude compliance with one or more provisions of this Agreement or require changes in plans, maps or permits approved by the County, this Agreement shall remain in full force and effect as to those provisions not affected, and the conflicting laws or regulations shall not be applied retroactively.

7.1.1 Notice and Copies. Either party, upon learning of any such matter, will provide the other party with written notice thereof and provide a copy of any such law, regulation or policy or an account of any such action or inaction together with a statement of how any such matter conflicts with the provisions of this Agreement; and

7.1.2 Modification Conferences. The parties shall, within thirty (30) calendar days of the notice referred to in the preceding subsection, meet and confer in good faith and attempt to modify this Agreement to bring it into compliance with any such federal or state law or regulation, or accommodate any such action or inaction.

7.2 County Commission Hearings. In the event County believes that an amendment to this Agreement is necessary pursuant to this Paragraph 7, the proposed amendment shall be scheduled for hearing before the County Commission and noticed pursuant to law (including NRS 527.805(2)). The County Commission shall determine the exact nature of the amendment or suspension necessitated by such federal or state law or regulation or action or inaction. Owner shall have the right to offer oral and written testimony at the hearing. The Commission's decision is subject to judicial review as set forth in Paragraph 9.3 below.

7.3 Cooperation in Securing Permits. County shall use its best efforts to cooperate with Owner in securing any County permits, licenses or other authorizations that may be required as a result of the Commission's decision. It is the responsibility of the Owner to pay all applicable fees in connection with securing the permits.

8. Review Default and Termination.

8.1 Frequency of Reviews. As required by NRS 278.0205 and Code 110.814.35, at least once every twenty-four (24) months during the Term of this Agreement Owner shall provide to the County's Community Development Department and County shall review in good faith a report demonstrating Owner's good faith and material compliance with the provisions of this Agreement and outlining any issues regarding the County's performance during the preceding twenty-four (24) months. The County's Director of Community Development shall promptly report to the County Commission on the topics of the Owner's report and satisfaction of this Agreement. If at the time of review an issue not previously identified in writing is required to be addressed, the review, at the request of either party, shall be continued to afford sufficient time for response.
8.2 Opportunity to be Heard: Any party requesting an opportunity to be heard by the County Commission on this review matter shall be given such opportunity within a reasonable time following submission of the Director's report to the Commission.

8.3 Procedures in the Event of Default: In the event of any default, with any provision of this Agreement, the nondefaulting party shall send by regular mail to the other a courtesy notice not less than thirty (30) calendar days prior to declaring a default under this Agreement. This thirty-day period shall be measured from the date of postmark of the notice. The courtesy notice shall detail the alleged default, any action necessary to cure the default and, where appropriate, the manner and period of time in which the alleged default may be satisfactorily cured. During the period of time the default letter is pending, the defaulting party shall not be considered in default for the purposes of termination or institution of legal proceedings. If the default is corrected, then no default shall exist and the noticing party shall take no further action. If the default is not corrected within thirty (30) calendar days, the following shall occur:

8.3.1 Set Hearing Notice and Possible Freeze. The party noticing a default shall set the matter for hearing before the County Commission. This hearing shall occur at the Commission's meeting that follows after the minimum seven (7) business days mentioned in this Paragraph 8.3.1 plus the time necessary for publication and noticing pursuant to law. Said parties shall send a letter to the other party, by certified mail return receipt requested, and by regular mail, providing notice of intent to present the matter to the Commission, the date set for the Commission's public hearing of same, and notice of at least seven (7) business days before the hearing date of an additional opportunity to correct the default. The seven (7) or more business days shall be measured from the date of postmark of the certified and regular mailing of the letter. If the default remains uncorrected at the expiration of these seven days, the Commission shall conduct its hearing on the matter. Furthermore, if the Owner is the alleged defaulting party, then the Director of Community Development may also immediately direct County staff to condition all future zoning, land use, and mapping applications for the Property so that the building permits to be issued as a result of those approvals shall not be issued until the default is corrected, subject to review by the Commission.

8.3.2 Review by County Commission. Following consideration of the evidence presented before the County Commission and a finding based on substantial evidence that a default has occurred by the alleged defaulting party and the default remains uncorrected, the County Commission shall, in the event County is the defaulting party, direct County staff to immediately cure the default, and, if Owner is the defaulting party, the County may amend or terminate this Agreement and/or may modify or authorize the suspension or building permits for the Development. Termination shall not in any manner rescind, modify, or terminate any vested right in favor of Owner, existing or received, as of the date of the termination. Should Owner elect to appeal, Owner shall have twenty-five (25) calendar days after the date of the Commission's hearing to institute legal action as set forth in Paragraph 9.3 below to determine whether the County Commission abused its discretion.

8.3.3 Waiver. Failure or delay in giving any notice provided for herein shall not constitute a waiver of any default. Except as otherwise expressly provided in this Agreement, any failure or delay by any party in asserting any of its rights or remedies in respect to any default shall not operate as a waiver of any default or of any such rights or remedies, or deprive such party of its right to institute and maintain any actions or proceedings which it may deem necessary to protect, assert, or enforce any of its right or remedies.
8.4 Unavoidable Delay or Default, Extension of Time for Performance. Neither party hereunder shall be deemed to be in default, and performance shall be excused, where delays or defaults are caused by war, acts of terrorism, insurrection, strikes, walkouts, riots, floods, earthquakes, fires, casualties; acts of God, restrictions imposed or mandated by governmental entities, failure of governmental agencies (other than County) to perform acts or deeds necessary for the performance of this Agreement, enactment of conflicting state or federal laws or regulations or similar matters beyond the control of the parties. If written notice of any such delay is given to County within thirty (30) calendar days after the commencement thereof, an automatic extension of time, unless otherwise objected to by County within ten (10) business days of such written notice, shall be granted coextensive with the period of the enforced delay, or longer as may be required by circumstances or, as may be subsequently agreed to between County and Owner.

9.1 Expiration of Agreement. The term of this Agreement shall be for three (3) years commencing on the date of this Agreement as defined at the beginning hereof. Owner may apply once to the County Board of Commissioners for a two-year extension of this term, provided that the law and regulations existing at the time of action by the Board to grant the extension shall thereafter govern the Property, the Project, the Maps and this Agreement. The Board's action shall be at its discretion.

9.2 Amendment or Cancellation of Agreement. Except as otherwise permitted by NRS 278.0205 and this Agreement, this Agreement may be amended from time to time or canceled only upon the mutual written agreement of the Parties.

9.3 Legal Action, Damages and Venue. The County and Owner agree that the County would not have entered into this agreement if it were liable for damages under or with respect to this Agreement. Accordingly, the County and the Owner may pursue any remedy at law or equity available for breach, except that neither the Owner nor the County shall be liable to the other or to any other person or entity for any monetary damages whatsoever. Prior to the institution of any legal action, the party seeking legal action must give the thirty (30) day notice of default as set forth in Paragraph 8.3 above. Following such notice, a public hearing must be held by the County Commission where the allegations will be considered and a decision regarding their merits will be reached. Any judicial review of the County Commission's decision or any legal action taken pursuant to this Agreement will be heard by a court under the standard review appropriate to court review of zoning actions, and the decision of the County Commission shall be overturned or overruled if its decision is clearly arbitrary and capricious. Judicial review of the decision of the County Commission shall be limited to the evidence presented to the County Commission at the public hearing. Any judicial review or other action to enforce or interpret this Agreement shall occur in and rest exclusively with the Second Judicial District Court, State of Nevada.

9.4 Governing Law. This Agreement shall be construed and enforced in accordance with and shall be governed by the law of the State of Nevada.

9.5 Assignment.

9.5.1 Transfer to an Affiliate of Owner. The rights of Owner under this Agreement may be freely transferred or assigned to any entity, partnership, or corporation, which Owner
controls, or in which Owner has a controlling interest, or which controls Owner; provided, such entity shall assume in writing all obligations of Owner hereunder.

9.5.2 Third Party Assignment. The rights and obligations of Owner under this Agreement may be freely transferred or assigned to a third party not affiliated with Owner, provided such third party assumes in writing all obligations of Owner hereunder as to the assigned or transferred portion of the Project along with a copy of the sale, transfer, conveyance, or assignment agreement wherein the third party assumes the obligations of the Owner. Upon any such assignment hereunder, the Owner shall be relieved of all obligations and liabilities under or in connection with this Agreement. In connection with the conveyance of any portion of the Property, Owner shall provide County with written notice of any sale, transfer, conveyance, or assignment of any unimproved portion of the Project.

9.5.3 Financial Transactions. Owner has full discretion and authority to transfer, assign or encumber the Project or portions thereof in connection with financing transactions, without limitation on the size or nature of any such transaction, the amount of land involved or the use of the proceeds therefrom, and may enter into such transaction at any time and from time to time without permission or notice to County.

9.6 Indemnity; Hold Harmless. Except as expressly provided in this Agreement, Owner shall hold County, its officers, agents, employees, and representatives harmless from liability for damage or claims for damage for personal injury, including death and claims for property damage which may arise from the direct or indirect operations of Owner or those of its contractors, subcontractors, agents, employees, or other persons acting on Owner's behalf, which relate to construction of the Project. Owner agrees to and shall defend County and its officers, agents, employees, and representatives from any claims and actions for damages caused or alleged to have been caused by reason of Owner's activities in connection with the Project. Owner agrees to indemnify, hold harmless, and provide and pay all costs for a defense for County in any legal action filed in a court of competent jurisdiction by a third party challenging the validity of this Agreement. The provisions of this Paragraph 9.6 shall not apply to the extent such damage, liability, or claim is solely caused by the intentional or negligent act of County, its officers, agents, employees, or representatives.

9.7 Binding Effect of Agreement. The burdens of this Agreement bind; and the benefits of this Agreement inure to, the parties respective successors in interest and shall run with the land until the completion of performance of this Agreement or its earlier revocation or termination as provided herein.

9.8 Relationship of Parties. It is understood that the contractual relationship between County and Owner is such that Owner is an independent contractor and not an agent of County for any purpose.

9.9 Notices. Unless otherwise provided in this Agreement, all notices, demands and correspondence required or provided for under this Agreement shall be in writing and delivered in person or sent by overnight courier or mailed by certified mail postage prepaid, return receipt requested. Notices shall be addressed as follows:
To County:  WASHOE COUNTY  
Department of Community Development  
Current Planning Division  
PO Box 11120  
Reno, NV 89520-0027

To Owner:  LW Land Company LLC  
A Nevada Limited Liability Company  
Brian Murphy  
695 Mile Circle Drive  
Reno, Nevada 89511

Either party may change its address by giving notice in writing to the other and thereafter notices, demands and other correspondence shall be addressed and transmitted to the new address. Notices given in the manner described shall be deemed delivered on the day of personal delivery or the delivery date by overnight courier or mail is first attempted.

9.10 Entire Agreement. This Agreement constitutes the entire understanding and agreement of the parties. This Agreement integrates all of the terms and conditions mentioned herein or incidental hereto and supersedes all negotiations or previous agreements between the parties with respect to all or any part of the subject matter hereof.

9.11 Waivers. All waivers of the provisions of this Agreement must be in writing, consent of all parties hereto.

9.12 Recording Amendments. Promptly after County’s execution of this Agreement, an executed original of this Agreement shall be recorded in the Official Records of Washoe County, Nevada. All amendments hereto must be in writing signed by the appropriate officers of County and Owner in a form suitable for recordation in the Official Records of Washoe County, Nevada. Upon the completion of performance of this Agreement or its earlier revocation or termination, a statement evidencing said completion or revocation signed by appropriate officers of County and Owner shall be recorded in the Official Records of Washoe County, Nevada.

9.13 Headings, Exhibits, Cross-references. The headings and captions used in this Agreement are for convenience and ease of reference only and shall not be used to construe, interpret, expand or limit the terms of this Agreement. All exhibits attached to this Agreement and the recitals at the front of this Agreement are incorporated herein by the references thereto contained herein. Any term used in an exhibit hereto shall have the same meaning as in this Agreement unless otherwise defined in such exhibit. All references in this Agreement to Paragraphs, Sections and Exhibits shall be to Paragraphs, Sections and Exhibits of or to this Agreement, unless otherwise specified.

9.14 Severability of Terms. If any term or other provision of this Agreement is held to be invalid, illegal or incapable of being enforced by any rule of law or public policy, all other
conditions and provisions of this Agreement shall nevertheless remain in full force and effect, provided that the invalidity, illegality or unenforceability of such term does not materially impair the parties' ability to consummate the transactions contemplated hereby. If any term or other provision is invalid, illegal or incapable of being enforced, the parties hereto shall, if possible, amend this Agreement so as to affect the original intention of the parties.

9.15 Voluntary Agreement. Owner acknowledges that he had the option of conducting his own public facilities needs assessment but instead voluntarily chose to accept the WSSP. Owner further acknowledges and agrees that he voluntarily, willingly and without protest and duress freely enters into this Agreement and accepts the terms and conditions herein.

IN WITNESS WHEREOF, this Agreement has been executed by the parties on the date stated.

Development Standards Handbook
Disclosure Statement
DISCLOSURE STATEMENT

Because you are considering the purchase of a parcel of property or a home in the Warm Springs area of Washoe County you need to know about the formal plans and rules that govern your purchase and your use of the property. This Disclosure Statement is required by the Warm Springs Specific Plan (WSSP), which is a formal document adopted by Washoe County for the purpose of planning land development and the public services needed to serve this development.

This Disclosure Statement will not tell you everything you need to know about buying and using property in Warm Springs pursuant to the WSSP. You need to study all documents related to your purchase and legal use of Warm Springs property, which are available from your seller and Washoe County. These documents may include a proposed purchase agreement and escrow instructions, title report, seller’s property advisories, the WSSP, the WSSP Development Standards Handbook, the project-specific Development Standards Handbook, a development agreement with Washoe County, and a possible declaration of covenants, conditions, and restrictions. This Disclosure Statement will attempt to summarize some of the major features of the WSSP and its exhibits.

THE WSSP

There are several attachments to this Disclosure Statement, which convey in summary manner some of the major features of the WSSP. They are referred to as exhibits. Exhibit A is a colored map that illustrates all of the land use types and densities currently approved under the WSSP. Exhibit B is a copy of a part of the Washoe County Development Code (Washoe County Code Chapter 110, Article 302), which displays the legal and illegal uses of both your property and neighboring properties. Exhibit C is a copy of another part of the Development Code (Article 304), which describes the use types set forth in Exhibit B. Exhibit D is a copy of a part of the County’s Area Plan Regulations for the Warm Springs Area (Article 226 of the Development Code).

It is important that you study these exhibits at a minimum and understand what you are allowed to do with your property. Your property is within the area that has been outlined on Exhibit A, and your signature on this Disclosure Statement ensures that you were informed of all land uses permitted on and adjacent to your property as well as within the entire Warm Springs Specific Plan community. Please note that you are agreeing NOT to file any written or verbal complaints or any lawsuits or other legal proceedings regarding any existing legal agricultural uses.

WARM SPRINGS AREA PLAN UPDATE

Washoe County is conducting this year of 2006 a review and update of the formal area plan for the general Warm Springs area (“Area Plan”), of which the WSSP is a part. This update may produce significant changes to the WSSP this year, including possible updated fees and schedule, different development vision, and altered infrastructure needs and financing structure. A few of these possible changes could apply to you now and require certain actions or payments. This is all discussed in the development agreement entered into by your developer/seller and Washoe County, a copy of which is attached as Exhibit E. Please read it now.

DEVELOPMENT AGREEMENT

Exhibit E is the referenced development agreement. It controls what may happen to and on the property you are buying or have bought. It requires, among other things, certain appearances to your home and landscape, the payment of certain fees (which your seller may or may not have satisfied), and your possible participation in a homeowner’s association as well as special assessment or general improvement districts. Please study this agreement.

HANDBOOK FOR DESIGN

All development within the WSSP community must satisfy the minimum criteria established in the WSSP Development Standards Handbook as well as the more specific criteria set forth in the project’s specific development standards handbook created by the developers of the project in which you may be purchasing property. These two handbooks are intended to provide future homeowners and businesses with design guidelines to be followed to conserve natural resources, primarily water supply, enhance the quality of the community, and ensure long-term design consistency and land use consistency, as
envisioned by the WSSP. A copy of this Project's Development Standards Handbook is included as Exhibit F. This handbook is attached to this Disclosure Statement for your reference at the time you prepare to design your future home or business.

INFRASTRUCUTRE FEE PAYMENT

The WSSP contains a plan for funding, building and maintaining public services needed for the development of Warm Springs, such as roads, drainage, water, parks, police and fire. This plan is referred to as the financing plan, and it requires payment of fees to cover a proportionate share of these community services. The amount and payment of these fees was established by your property developer in the Development Agreement (Exhibit E). If the property you may purchase is located within a subdivided area in Warm Springs, you will be bound by the development agreement and must pay a fair share at purchase. Note that some of the fees apply only to property that will subsequently be subdivided. Other fees are applicable to parcels that will not be further subdivided.

Attached as an exhibit to the Development Agreement (Exhibit E) is a copy of the Schedule of Fees. The WSSP Development Standards Handbook notes that there will be a yearly escalation of these fees, based upon the Consumer Price Index.

ROADWAY MAINTENANCE

The Palomino Valley General Improvement District (PVGID) will review public roadways, major or minor, for acceptance for maintenance. PVGID probably affects your property. Any private roads must be the responsibility of your homeowners association, if any, and will not be maintained by PVGID or Washoe County.

FUTURE ASSESSMENT DISTRICTS

Please be advised that an assessment district or general improvement district could be created in the future to provide community water service, community sewer service, drainage systems, or roadways in the WSSP area. At the time you file for a building permit, such a district may or may not be in place. The attached waiver (that will require your signature at the closing of your property) will limit your ability to oppose any future assessment district that may be imposed to fund a community water system, community sewer service, drainage system, or roadway construction/maintenance.

ACCEPTANCE

I (we) have read and understand all the provisions of this Disclosure Statement and agree to all the stated provisions.

Financing Concept Plan
GENERAL

The major element of each development agreement to be entered into by a subdividing property owner and Washoe County would be the capital improvement program elements, which have significance within the entire WSSP area, or are required to serve more than one development. These elements form the "backbone" of the infrastructure system. The development agreement identifies specific elements of the infrastructure system that must be funded or constructed prior to issuance of certificates of occupancy by the County. The Capital Improvements Program (CIP) for the WSSP is found in Appendix G of the Warm Springs Specific Plan and is incorporated herein by this reference.

Palomino Ranch Estates
CC&R’s
WHEN RECORDED RETURN TO:

LW Land Company LLC
695 Mile Circle Drive
Reno, NV 89511

DECLARATION OF
COVENANTS, CONDITIONS AND RESTRICTIONS
OF
PALOMINO RANCH ESTATES

This declaration made this _______ day of ______________
2017 by LW Land Company LLC __________________________, a
Nevada Limited Liability Company ______________________, hereafter
referred to as 'DECLARANT'.

WHEREAS, DECLARANT is the owner of that certain real property
located in the County of Washoe evidenced by the certain official
subdivision map recorded in the office of the County Recorder of
the County of Washoe, State of Nevada, on, in Book _______ of
Subdivision Maps, at Page_______, and more particularly described
as Palomino Ranch Estates and

WHEREAS, DECLARANT desires to impose upon said lots mutual and beneficial
covenants, conditions and restrictions under a plan of improvement for
the benefit of all owners and future owners thereof.

NOW THEREFORE, DECLARANT hereby declares that said lots, numbered
_______ through _______ inclusive, are held and shall be held,
conveyed, hypothecated, used, improved and occupied subject to the
following covenants, conditions, restrictions, easements and
agreements which are imposed pursuant to a common plan and are intended
to create equitable servitudes designed to preserve the quality of said
land for the benefit of the various owners thereof, their heirs, successors
in interest and assigns. To wit:
RESTRICTIVE PROVISIONS

1. Use and Improvements

No buildings, other than one detached single-family private dwelling, private garage for the use of the occupants of such dwelling and a barn or other usual and appropriate outbuildings strictly incident and appurtenant to a private dwelling, shall be erected or maintained on any lots, except that a guest house may be permitted subject to County requirements. No use whatsoever, except in connection with its use and improvement as a site and grounds of a private dwelling as above set forth shall be made of any lot or plot therein and furthermore, no driveway, road, right of way, or any easements for public or private use shall be granted for any reason whatsoever, across or through any lot to any other piece of property without complying fully with County requirements.

2. Temporary Dwellings, Outbuildings and Accessory Outbuildings

No trailers, except temporary contractors' trailers used in connection with construction and not provided for dwelling accommodations, tents, garage or other outbuildings shall be used as a temporary or permanent residence, nor shall any residential structure be moved on to the tract from some other location, nor shall "used" lumber be utilized in the construction of any building, whether it be of temporary or permanent nature, unless approved prior to use by an architectural control committee. No accessory outbuildings shall be erected on any lot prior to the erection of a dwelling thereon. In no event shall any such accessory outbuilding, partially-completed or temporary structure ever be used for human occupancy or habitation.
3. Minimum Building Requirements

The construction of all dwellings on all lots, regardless of size of dwelling, must conform to F. H. A. or better specifications. On all lots, no dwelling shall be erected or permitted to remain thereon having a ground floor area, exclusive of open porches and garages, of less than 1,500 square feet for a one-story building, or 750 square feet for a two-story building, with the total size no less than 1,500 square feet.

4. Building Setback Requirements

On lots 10,000 square feet or smaller, building setbacks will vary, providing a more rural atmosphere in the streetscape. No building or projection thereof shall be located nearer than 20 feet to any street or driveway access easement.

No building shall be located nearer than 25 feet to any rear lot line. All lots larger than 10,000 square feet will have an established building envelope with a minimum setback of 30 feet. Buildings may be located anywhere within the envelope; however, all buildings, structures or storage of any type, will be confined to this area on each lot. The size and shape of envelope may vary from lot to lot. The envelopes depth and setback will be related to overall lot size. These established setback lines notwithstanding, no structure shall be located nearer than 100 feet from any perennial stream. Areas within 100 feet of said perennial streams shall be maintained in their natural state. In accordance with fish and game codes, the Department of Fish and Game must be notified at least 30 days prior to any activity that alters a stream. Stream crossings and culvert installations are subject to this code section.

5. Heating and Fireplaces

The use of efficient, non-polluting heating systems shall be encouraged within the SPA Primary heating sources for residences
shall be standard conventional electric or propane gas systems
distributing heat through ducts within the home. Applicants who
prefer stoves as the major heat source in the home will be
encouraged to use pellet stoves. Approved pellet stoves will be
accepted as a major heat source within the residence. Wood-burning
stoves and fireplace inserts are prohibited as a major heat source.
Applicants with standard conventional electric or propane heating
systems designed for use as the major heat source within the
residence will be allowed the installation of one wood stove as a
secondary backup heat system, provided the wood stove meets the new
County clean-burning, low-pollution standards. Open fireplaces are
prohibited except for gas burning fireplaces which have false logs
and are used purely for aesthetic purposes and are not considered
a heat source within the residence.

6. Architecture

All buildings must incorporate a "western ranch" theme or identity
architecturally, in a manner that is complementary and compatible
with the plan area and its surroundings. No mobile homes are allowed
except for construction purposes within the SPA. To enhance the
development and maintain its rural character, buildings and
structures shall adhere to the following guidelines:

a. Exterior Walls and Trim. Wood, brick, stucco, or stone
material finishes are required for all exterior walls.
Siding must run one consistent direction on all exterior
walls. Exterior colors must be earth tone and harmonize
with the surrounding landscape. No true primary or
secondary colors are allowed, nor any gloss or semi-gloss
finishes. All reflective metal such as chimney stacks,
flashings, exhaust vents and pipes, must be painted to
match or blend with surrounding materials. All draperies
and window coverings should also be of materials and colors which harmonize with the surroundings. Aluminum windows, door frames, solar panels, and skylights must be bronzed or anodized. Steel windows and door frames must be painted to match or blend with surrounding materials.

b. **Animals.** On lots greater than one acre, horses or 4-H animals, limited to cattle or sheep, will be allowed provided they are not adjacent to the center spine road, village center, community facilities center, or school sites. No lot shall have more than two such animals. All other lots may have the usual household pets provided they are not kept for commercial purposes and are kept reasonably confined so as not to become a nuisance. Horses, animals, and household pets shall not unreasonably interfere with the comfort, privacy, or safety or other properties. No lot shall have more than four household pets.

If horses/4-H animals are to be allowed in an area, that area shall be designated on tentative and final maps for those uses, and water rights dedicated to provide irrigated pasture in areas where the animals must be kept when not stabled.

c. **Roofs.** Roofs must be constructed of fire-retardant materials.

The use of standard wooden shakes or shingles will be prohibited. Roofing materials shall be restricted to tile, asphalt, fiberglass, fire-retardant treated shakes, or any new fire-retardant roofing materials in use which have pleasing aesthetic values. Roofing materials shall be of a color that harmonizes
with the surrounding area and color scheme of the structure. Flat roofs will be discouraged.

d. **Mailboxes.** Architectural structures of natural materials and natural colors shall be provided for grouped neighborhood mailboxes. The grouped neighborhood boxes of 15 or less per site shall be placed at neighborhood entry points, with adequate access from main roadways.

e. **Garbage and Refuse Disposal.** There shall be no burning of trash, garbage or other like household refuse, nor shall any property owner accumulate on their lot junked or unsightly vehicles or litter, refuse or garbage, except in receptacles provided for such purposes.

f. **Concealment of Fuel Storage Tanks and Trash Receptacles.** Fuel storage tanks and every receptacle for ashes, trash, rubbish or garbage shall be so placed and kept as not to be visible from any street, lot, parcel, or open space in the SPA, except at the times when refuse collections are made.

g. **Travel Trailers, Motor Homes and Boat Storage.** Travel trailers, motor homes (R.V.), or boats and trailers shall be stored within the building envelope and screened from any street, lot, parcel, or open space area by screen fences. If stored in side yards, the minimum side yard shall be 12 feet.

h. **Nuisances.** No noxious or offensive activities, odors, or nuisances shall be permitted on any lot or parcel in the development. No refuse, unsightly or abandoned vehicles, debris, noxious material, discarded personal effects, or construction materials not for immediate use shall be permitted on any lot or portion thereof. It is incumbent
upon all property owners to maintain their lots and yards in a neat, orderly and well-groomed manner, whether said lots are vacant or improved.

i. Completion of Construction. Construction of any improvement, once commenced, shall be pursued diligently to completion. Improvements not so completed or upon which construction has ceased for 90 consecutive days, or which have been partially or totally destroyed and not rebuilt within a reasonable period, shall be deemed nuisances. The County may remove any such nuisance or repair or complete the same at the owner provided the owner has not commenced required work within 30 days from posting a notice to commence such work upon the property. Such notice shall state the steps to be taken to eliminate the nuisance.

j. Clothes Lines. No clothes lines shall be constructed or erected which would be visible from any street, other lot, or open space.

k. Garage. Every single-family dwelling unit constructed within the SPA shall have on the same lot or parcel enough covered and completely enclosed automobile storage space for at least two automobiles. On one-acre or large lots, garage doors shall be encouraged to face side yards away from streets.

7. Landscaping

Landscape design should fit the particular use and blend with the natural environment. The Lot concept limits the area in which a home owner may provide landscaping. The plant material must be selected from a predetermined list incorporated in this plan. The plant selection includes only drought tolerant and low water demand material. These factors contribute to a decreased average annual
residential demand that is mandatory for implementation of this plan.

A specified number of trees are required in the front yard setback and transition zone to provide a "sense of place". Plant material selected from the incorporated list, per neighborhood, should be kept similar to strengthen neighborhood unity and identity.

Selection of materials should contain a mixture of plants with fast, medium, and slow growth rates and a variety of sizes should be planted to provide a more natural appearance.

The use of plants around dwelling units to reduce heating and cooling needs is encouraged. Evergreens along the north and west act as a windbreak to deflect winter winds. Deciduous trees planted on the south around the perimeter of the unit are encouraged to provide summer shade while allowing winter sun. Creation of earth berms to the windward side can also reduce heat loss.

Drainageways should be lined with native wildflowers, grasses, shrubs, and rocks and boulders to slow velocities. They will be graded to resemble a natural drainage swale and incorporated in the overall design. Irrigation of plant material will utilize drip irrigation and other water conservation features as practical. The use of plumbed gray water storage systems will be investigated with the Health Department.

Within nine months of completion of the main dwelling unit, each lot or parcel shall be completely landscaped consistent with the landscape design guidelines and water budget incorporated in this plan. All landscaping shall be maintained to harmonize with and sustain the attractiveness of the development.

8. Fencing

All property lines from single-family dwelling units to the street shall be kept free and open.
A solid privacy fence may be constructed within the building envelope and limited to the rear of the house. Side yards will not be enclosed with a privacy fence in lots larger than 10,000 square feet. Fences shall be constructed of wood or masonry material and no fence will be over six feet in height. Developers will establish a typical privacy fence per neighborhood to promote neighborhood unity.

The transition zone and side yard may be fenced with open ranch style fencing. Fencing will be consistent within all neighborhoods. There shall be no chain link, woven wire or any type of wire fence within the development except for back yard pet enclosures and swimming pools.

9. Public Street and Monument Signs

On public streets the style of signage will be unique to the SPA. It will be uniform in style throughout the area. Subdivision entry signage shall be limited to monument signs of native materials and in conformance with design guidelines set forth in the commercial section of the plan.

10. Exterior Lighting

The functional objectives in providing exterior area lighting are to illuminate areas necessary for safe and comfortable use. In certain situations, area lighting can add to the aesthetic appeal of a site by highlighting architectural features of a building or illuminating pathways and landscape plantings. In these instances, only the special features of a building or landscape should be illuminated. It should be noted that the standards and guidelines contained in this section address area lighting on individual
properties, and not overhead street lighting along public and private rights-of-way.

On public streets, the style of lighting standard will be unique to the SPA. It will be decorative and uniform in style and intensity throughout the area. Lighting shall be directed downward with no splay of lighting directed outward.

a. Standards.

i. Exterior lights shall not blink, flash or change intensity. String lights, building or roofline tube lighting, reflective or luminescent wall surfaces are prohibited.

ii. Exterior lighting shall not be attached to trees except for the Christmas season.

iii. Driveway, walkway, and building lights shall be directed downward.

iv. Fixture mounting height shall be appropriate to the purpose.

v. Illumination for aesthetic or dramatic purposes of any building or surrounding landscape utilizing exterior light fixtures projected above the horizontal is prohibited.

vi. Seasonal lighting displays and lighting for special events which conflict with other provisions of this section may be permitted on a temporary basis.

b. Guidelines.

i. Lighting Design. Exterior lighting should be designed as an integral part of the architecture and
landscape and located in a manner that minimizes the impact of lighting upon adjacent structures and properties.

ii. **Lighting Levels.** Avoid consistent overall lighting and overly bright lighting. The location of lighting should respond to the anticipated use and should not exceed the amount of light actually required by users. Lighting for pedestrian movement should illuminate entrances, changes in grade, path intersections, and other areas along paths which, if left unlit, would cause the user to feel insecure. Lighting suppliers and manufacturers have lighting design handbooks which can be consulted to determine fixture types, illumination needs and light standard heights.

iii. **Fixture Design.** Exterior lighting fixtures should be simple in design and should be well-integrated with other architectural site features.

iv. **Structural Lighting:** Night lighting of building exteriors should be done in a selective fashion: highlight special recognizable features; keynote repeated features; or use the play of light and shadow to articulate the facade. The purpose of illuminating the building should be to add visual interest and support building identification. Harsh overall lighting of a facade tends to flatten features and diminish visual interest.
v. Lighting Height. As a rule, the light source should be kept as low to the ground as possible while ensuring safe and functional levels of illumination. Area lighting should be directed downward with no splay of lighting directed offsite. The height of light fixtures or standards must meet the County standards. Direct light downward in order to avoid sky lighting. Any light source over 10 feet high should incorporate a cut-off shield to prevent the light source from being directly visible from areas offsite. The height of luminaries should be in scale with the setting and generally should not exceed 10-12 feet.

11. Utilities
All utilities shall be underground on lots less than one acre. Undergrounding shall be encouraged for lots from one to two and a half acres and overhead on lots larger than two and a half acres. All individual services to each unit for all lot sizes shall be undergrounded from the neighborhood service line.

12. Prohibition Against Used Structures
No used buildings or structures, intended for use as a dwelling, shall be placed on any lot.

13. Ditches and Swales.
Each owner shall keep drainage ditches and swales located on his lot free and unobstructed and in good repair and shall provide for the installation of such culverts upon his lot as may reasonably be required for proper drainage.

14. Resubdivision or Joiner Lots
No lot shall be further subdivided, unless permitted by the SPA Plan and regulatory zoning category applicable.

15. Drilling and Mining
No drilling, refining, quarrying, or mining operation of any kind shall be permitted on any lot.

16. Television or Radio Antennae and Towers

No television or radio antennae or tower shall be erected or used outdoors, whether attached to a building or structure, or otherwise. The placement of satellite discs shall be screened from view from any adjacent parcels, streets, or open space by locating in rear yards behind screened fences at a minimum. At such time as a community antenna television (CATV) system may be installed to service the development, each lot owner shall pay his proportionate share of standby, installation or service charges made pursuant to the franchise governing such system. This is provided, however, that such charges shall be comparable to those of similar installations in the CATV industry.

17. Failure to Enforce

The various restrictive measures and provision of this declaration are declared to constitute mutual equitable covenants and servitudes for the protection and benefit of each lot in said subdivision and failure by DECLARANT or any other person or persons entitled so to do shall not serve to create any liability or responsibility to DECLARANT for its alleged failure to act. Failure to enforce any measure or provision upon violation thereof shall not stop nor prevent enforcement thereafter or be deemed a waiver of the right so to do.

18. Severability

The various measures and provisions of this declaration are declared to be severable, and the invalidity of one measure or provision shall not affect any other measure or provision.

19. Subordination to Mortgages and Deeds of Trust

Nothing contained in this declaration shall impair or defeat the lien of any mortgage or deed of trust made in good faith and for
value, but title to any property is subject to this declaration obtained through the sale or satisfaction of any such mortgage or deed of trust shall thereafter be held subject to all of the restrictions and provisions hereof.

20. Enforcement and Remedy

Each grantee of a conveyance or purchaser under a contract or agreement of sale by accepting a deed or contract of sale or agreement of purchase accepts the same subject to all of other covenants, restrictions, easements and agreements set forth in this declaration and agrees to be bound by the same.

Damages for any breach of the terms, restrictions and provisions of this declaration are hereby declared not to be adequate compensation, but such breach and/or the continuation thereof may be enjoined or abated by appropriate proceedings by the DECLARANT, or by an owner or owners of any other lot or lots in said subdivision. Court costs and attorney fees shall be awarded the prevailing parties of any legal action as deemed appropriate and awarded by the court.

21. Terms of Restrictions

These covenants, restrictions and agreements shall run with the land and shall continue in full force and effect until __________ at which time the same shall be automatically extended for successive periods of five years unless by a duly executed and recorded statement of the then owners of 75% or more of the lots in said subdivision elect to terminate or amend these restrictions in whole or in part. Said declarations of restrictions can be amended or modified at any time when 75% of the owners election to do so, provided however; that said amendment or modification is in compliance with the provisions of the Washoe County Code.

Note:
The following two items will be applicable in the event of an active architectural control committee.
22. Maintenance of Lots

All lots, whether occupied or unoccupied, and any improvements placed thereon, shall at all times be maintained in such a manner as to prevent their becoming unsightly, unsanitary or a hazard to health. If not so maintained, the architectural control committee shall have the right, through its agents and employees, to do so, the cost of which shall be borne by the owner. Neither the architectural control committee, nor its agents, employees or contractors, nor the DECLARANT, nor its agents, employees, or contractors shall be liable for any damage which may result from any maintenance work as performed.

23. Real Estate Signs

Professionally prepared signs of customary and reasonable dimension may be displayed on any lot advertising it, together with any improvements located thereon, for sale or lease. All other signs, billboards, or advertising structures of any kind are prohibited except upon application to and written permission from the architectural control committee.

Note:
The following is an example of the architectural control committee section of the C. C. & Rs. Not all development projects within the plan area will be required to have an architectural control committee. In the event a project does not have an architectural control committee, then applicants will be required to submit an application to the citizen advisory board with definitive design, materials and color combinations for their review and recommendation prior to submittal to the County of Washoe.

24. Architectural Control Committee

a. General Powers. All improvements constructed or placed on any lot must first have the approval of the committee as
evidenced by the signatures of at least two of the members affixed to the plans submitted. Two sets of plans and specifications shall be submitted to the committee, which plans shall show the location of all improvements, if any, easting upon said lot, the location of the improvement proposed to be constructed, the color and composition of all exterior materials to be used, proposed landscaping, and any other information which the committee may require, including soil, engineering and geologic reports and recommendations.

b. Committee Membership. The committee shall be composed of three members, to be appointed by DECLARANT, at least one of whom shall be a representative of DECLARANT. Committee member shall be subject to removal by DECLARANT and any vacancies from time to time existing shall be filled by appointment by DECLARANT, or in the event of DECLARANTS failure to do so within two months after any such vacancy, the then majority of the lot owners. The power to appoint or remove Committee members shall be transferred permanently to the lot owners upon:

i. A lapse of 18 months between the filing of the final map of the development, provided that 90% of the aggregate number of lots of the development have been sold by the DECLARANT; or

ii. A lapse of three years from the date of Final Subdivision Public Report of the Nevada Department of Real Estate.

c. Grounds for Disapproval. The committee may disapprove any plan of development:

i. Because of the reasonable dissatisfaction of the committee with grading plans, location of the proposed improvement on a lot, finished ground elevation, color scheme, finish, design, proportions, architecture,
shape, height or style of the proposed improvement, the materials used therein, the kind, pitch or type of roof proposed to be placed thereon; or

ii. If, in the judgment of a majority of the committee reasonably exercised, the proposed improvement will be inharmonious with the development, or with the improvements erected on other lots.

d. Rules and Regulations. The committee may, from time to time, adopt written rules and regulations of general application governing its procedures which may include, among other things, required number of copies of plans and specifications; provisions for notice of approval or disapproval, including a reasonable time period for approval by reason of failure to disapprove.

e. Variances. The committee may grant reasonable variances or adjustments from the provisions of this declaration where literal application thereof results in unnecessary hardship and if the granting thereof will not be materially detrimental or injurious to owners of other lots.

f. Certification of Compliance. At any time prior to completion of construction of an improvement, the committee may require a certification, upon such form as it shall furnish, from the contractor, owner, or a licensed surveyor, that such improvement does not violate any setback rule, ordinance or statute, nor encroach upon any easement or right-of-way of record.

g. Administrative Fees. As a means of defraying its expense, the committee may institute and require a reasonable filing fee to accompany the submission of plans and specifications, to be not more than one-fourth of 1% of the estimated cost of
the proposed improvement, subject to a minimum fee of $75.00. No additional fee shall be required for resubmittal.

h. Liability. Notwithstanding the approval by the committee of plans and specification of its inspection of the work in progress, neither it, DECLARANT, nor any person acting in behalf of any of them shall be responsible in any way for any defects in any plans or specifications or other material submitted to the committee, nor for any defects in any work done pursuant thereto. Each person submitting such plans or specifications shall be responsible for the sufficiency thereof and the adequacy of improvements constructed pursuant thereto.

All covenants, conditions and restrictions herein contained which are required by the County of Washoe may also be enforced by the County of Washoe.
