Eric Young opened the public hearing. Julee Olander reviewed her staff report dated November 19, 2019. Ms. Olander noted Engineering had a comment, which had been discussed with the applicant, regarding a road shown on the map going through parcel 2 which will probably be unbuildable due to slopes of 30% or more and driveway slopes are only permitted at 15%. There is alternate access to the parcel.

Mr. Young is concerned the road is showing up on the map but will not be buildable. If the road is not buildable, why would it be on the final map. Ms. Olander said she could add a condition that the road will be removed before the recordation of the final map. Wayne Handrock said the road could be used for horses, off-road vehicles. It doesn’t have to be an approved road. Mr. Young said it could be used as an access easement, not necessarily for a car. Ms. Olander said she would add a condition; roadways on the final map shall be buildable to Washoe County standards.

With no response to the call for public comment, the public comment period was closed.
Larry Chesney moved that, after giving reasoned consideration to the information contained within the staff report and the information received during the public meeting, that the Washoe County Parcel Map Review Committee approve Parcel Map Case Number WTPM19-0015 for Mark Duarte, subject to the conditions of approval included as Exhibit A with the staff report, and make the determination that the following criteria is or will be adequately provided for pursuant to Washoe County Code, Section 110.606.30, with the addition of “all roadways on the final map shall be buildable to Washoe County standards.” James English seconded the motion which carried unanimously.

The motion carried and considered the following criteria:

1) General improvement considerations for all parcel maps including, but not limited to:
   a) Environmental and health laws and regulations concerning water and air pollution, the disposal of solid waste, facilities to supply water, community or public sewage disposal and, where applicable, individual systems for sewage disposal;
   b) The availability of water which meets applicable health standards and is sufficient for the reasonably foreseeable needs of the subdivision;
   c) The availability and accessibility of utilities;
   d) The availability and accessibility of public services such as schools, police and fire protection, transportation, recreation and parks;
   e) Conformity with the zoning ordinances and master plan;
   f) General conformity with the governing body’s master plan of streets and highways;
   g) The effect of the proposed subdivision on existing public streets and the need for new streets or highways to serve the subdivision;
   h) Physical characteristics of the land such as floodplain, slope and soil;
   i) The recommendations and comments of those entities reviewing the tentative parcel map pursuant to NRS 278.330 and 278.348, inclusive;
   j) The availability and accessibility of fire protection including, but not limited to, the availability and accessibility of water and services for the prevention and containment of fires including fires in wild lands;
   k) Community antenna television (CATV) conduit and pull wire; and
   l) Recreation and trail easements.
